

Cosmic Overview

Gemini New Moon 2022

'I just refer to myself as being Spirit, Mind and Body like everybody else and working toward the Mastery of my natural Divinity and the healing of my emotional mind.'

Leonard Orr

'Only those who devote themselves to a cause with all of their Strength and Soul can be a true Master. For this reason Mastery demands all of a person.'

Albert Einstein

'I AM' the Light of Interplay and Relationship

At the time of this New Moon on the 30th of May the Sun and Moon come together at 9^o Gemini 30 with the Earth at 9^o Sagittarius 30

In April, the Christos Easter Festival took place as we were passing through Aries, then last month the Wesak Buddhic Festival was celebrated as we were passing through Taurus and later this month, at the time of the Full Moon, we will be aligning and celebrating the Festival of Humanity.

The June Festival honours the Christ and Celebrates humanity's potential for duality to be resolved – so that personality and Soul, the lower and higher Self, may be fused into Unity Consciousness.

If Aries links to the Essential Spark of Life and Taurus to the Magnetization of that Spark into Form, then Gemini speaks of the ability for that

Form to develop Individuality and it is here in the Gemini archetype that 'Form' takes on the responsibility to individuate – to become the master of thought and expression – to recognise the power of words and the consequences of those words.

When the emotional body is informing the mind then the personality diverts the Soul from expressing its natural Divinity. Caught in a web of illusion and defence the mental process becomes split, fragmented within duality. For Gemini, which is known as the sign of 'The Twins', epitomises duality consciousness. At the personality level, Gemini is ruled by the planet Mercury, the 4th Ray of Harmony through Conflict and, at the egoic level, the individual is linked to the lower mind seeing everything through a 'me versus them' mentality'.

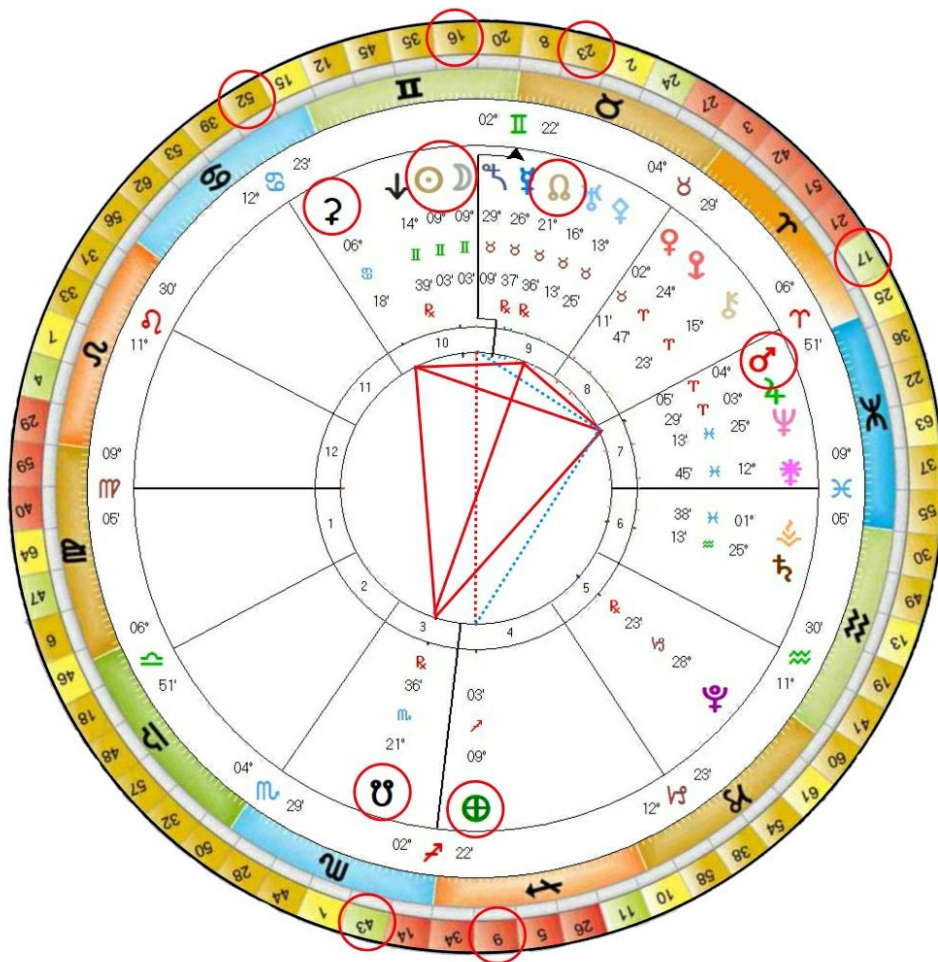

However, as the constellation of Gemini is a mutable sign it works through the 2nd Ray, to mutate and rearrange that which needs to be rebalanced in order to bring about the evolution of the Soul, both individually and collectively so that Love and Wisdom may be expressed through the Intellect via intuitive inspiration. At the Soul level, Venus becomes the planetary energy ruling Gemini, working through the 5th Ray of Concrete Knowledge, bringing harmony and balance to the mind – giving the individual the ability to blend and synthesise many different philosophies and thoughts into a Universal Awareness – a mind no longer divided, but a Mind that is based on Love and Spiritual principles, a Mind that is co-creative with the Universe.

At this level of Soul awareness the individual is conscious of the Spiritual implications of his or her activities – in effect acting on behalf of the Hierarchy as an intermediary of Light and Love – the highest expression of Gemini and Venus.

'You don't excel by conforming to society, you excel by conforming to your Higher Self.'

Matshona Dhliwayo

Chart for the Gemini New Moon

The New Moon 30th May 2022 12:30 pm BST London UK

<https://www.timeanddate.com/moon/phases/>

There are all but eight billion human beings on planet Earth and each one of us is informing the Group Consciousness through our thoughts and words. Although seemingly inconsequential, both these silent and spoken resonances go out into the collective creating the thought forms that surround us as a species. It has now become essential to understand how ill-considered stray thoughts and words directly influence and affect our perception and response to Life. How divisive opinions contaminate the airwaves - airwaves that were designed for the dissemination of constructive knowledge, wisdom and purity of thought.

Disharmony occurs when we are not at peace within, not being true to our Self. Every ill-considered negative mental thought, ultimately builds to the outpouring of negative actions manifesting somewhere upon the Earth plane – like the wind that blows - we have no knowing where the arrow will ultimately fall – but fall it must.

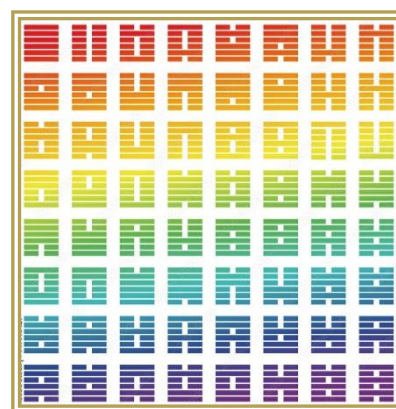

So, with this understanding how are the planetary energies, at the time of this New Moon, assisting us to move into a higher awareness. The Sun and Moon are on Gene Key 16 known as **Magical Genius**, moving through the Shadow of **Indifference** to the Gift of **Versatility** to the Siddhi of **Mastery**.

*'Indifference is an energy field created by all human beings on this planet who are not doing what they would really love to be doing. Indifference is an energy field that gets you to focus your precious time and life force on the inessential. **The inessential in this context is anything that takes your attention away from the present moment and its limitless potential.** There is a collective energetic wall created by the diffusion of one's responsibility to follow one's true purpose and vision that maintains a 'lock down' on creativity.*

'Here the mind puts the emphasis on skills, techniques and systems at the expense of the human spirit that would give them life. Being addicted to and trapped by the pursuit of information and techniques but never putting them into action.'

'Indifference simply arises because the mass consciousness does not yet see its own true nature - that is, it doesn't yet realise itself as a holistic entity. However, our new awareness will enable us to identify as a single consciousness. Versatility is driven by the dynamic energy of enthusiasm – the feeling that you are doing something thoroughly enjoyable, which also happens to improve people's lives and serve the whole. Versatility is a frequency and at this level natural abilities emerge with ease.'

'At the 16th Gift level of frequency something remarkable occurs – no matter what your personal genetic makeup, you can draw upon any of the 64 Gifts through the Morphogenetic field that links all states of the same frequency together. This is the true meaning of this 16th Gift – it is the ability to tune into any Gift you need and make use of that Gift.'

'At the Siddhic level a paradox opens up before us. We have gone from lack of identification at the Shadow level, to identification with a skill as you approach the Gift and the loosening of the identification in order that you become truly versatile. At the Siddhic level the issue of identifying with what you are doing is no longer relevant. At this heightened frequency of consciousness your identity is erased and you become an empty vessel for Life.'

'The enthusiasm inherent in the 16th Gift also has its manifestation in the Siddhi where it shows its true nature. Enthusiasm, deriving from the Greek meaning 'To be possessed by the breath of God' floods the human being and he/she merges with Divine currents, shattering their identification with the world of form.'

*'The 16th Siddhi has an interesting connection to the 35th Siddhi of Boundlessness and on closer analysis one can see why. As one of the Miracle Siddhis, the 35th Siddhi's sole purpose is to expand the average human's perspective on life exponentially. **The one who has attained this Siddhic level displays Mastery over Creation – their powerful actions, seen as miraculous, pull humanity out of Indifference.'***

The Earth is on Gene Key 9, known as **The Power of the Infinitesimal** having **Inertia** as the Shadow, **Determination** as the Gift and **Invincibility** as the Siddhi.

*'Without a sense of purpose, human beings move round and round in circles creating energy fields that prevent abundance. So, if you are low or lacking in energy and you are finding it hard to get enthused about your life, the answer may well lie in the 9th Shadow. **The Inertia of the 9th Shadow feeds off the victim mind, which also goes around either blaming or worrying.** We are not here on Earth to have our dreams clipped, or tamed - we are here to make magic happen and we cannot do that unless we are focussed upon an over-arching ideal or vision.'*

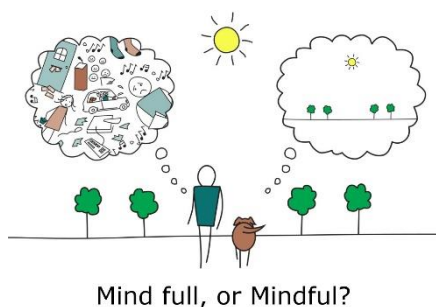

*'The 9th Gift fuels all Determination. The Gift of Determination is built upon the rock of each and every small act. 'Every intentional act is an act of magic'. **Even the smallest act has a spin off effect that ripples out into the Universe – actions made out of resentment or fear reinforce the Shadow frequency, in both the individual and the World at large - whereas acts done in joy or service create***

the Shadow frequencies of mass consciousness the 17th Gift has the ability to see higher dimensions and realities - looking ahead to the future and linking one phase of evolution to another. It is working with the Gift frequency that the process known as the opening of the third eye begins. **Thus, Far-Sightedness can be said to arise directly out of the heart rather than from the mind.'**

'Through the 17th Siddhi of Omniscience the human mind will finally see the perfection and beauty of our oneness with all of existence and through the 18th Siddhi of Perfection we will actually bring that vision into full manifestation. **The 17th Siddhi directly corresponds to the open 3rd eye. Where seeing and the seen are one.** A single eye through which consciousness pours and where past present and future are a single eternal screen of consciousness. At the level of the 17th Siddhi consciousness sees through you rather than you seeing through it. When the 17th Siddhi comes into the world it comes like a Divine afterthought. **It is one of the seven powers of Grace.'**

'The deepest irony of all life is caught in one famous mystic's words: **'God can only come and visit you when you aren't there' or put another way, if you want to know what Omniscience looks like, you, the personality, have to cease to exist.'**

Ceres is on Gene Key 52, would seem to be acting as a counterbalance for the oftentimes reactive response of Mars, as Gene Key 52, is known as the **Still Point**, moving through the Shadow of **Stress** to the Gift of **Restraint** to the Siddhi of **Bliss**.

'This 52nd Shadow and its programming partner the 58th Shadow of Dissatisfaction represent the deepest genetic binary pattern that undermines human health. **Stress is a collective pressure not a personal pressure. It is an energy field generated by every human being alive.** Until human beings experience their unity with all of creation they will create and be driven by this underlying Stress – the physical manifestation of our deepest and most hidden fear. **The only way to escape this collective fear is to rise above it at an energetic level.'**

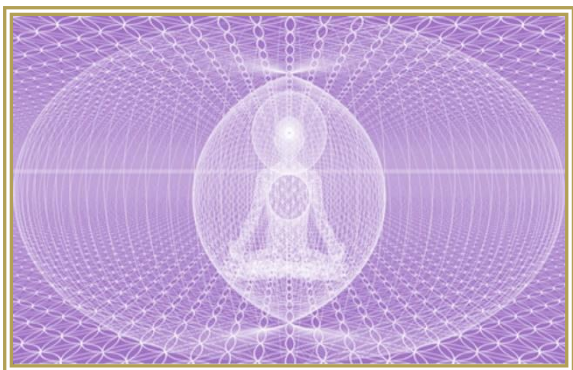

'The collective or extended phenotype of humanity is shaped by fear which creates an environment that puts the physical organism under great Stress. Stress is created through shallow breathing. Most humans forget how to breathe as they grow up - the 52nd Shadow is deeply connected with the function of the adrenal glands – the flight or fight response. **The secret is to change your inner environment – your feelings and your thoughts.'**

Restraint does not sound particularly exiting or dynamic, but this Gift has the potential to slow down time – to take the Stress out of the environment. At its deepest level, it contains the seed that will one day bring all human beings into a perfect organizational unity. This seed contains all the necessary ingredients that will be needed in the journey ahead for it is the seed of your individual destiny.

'The seed of a Yew Tree and a Sunflower are similar in size. However, whilst the Sunflower will grow to its full size within the space of a few months, the Yew Tree may take ten years to reach the height of the Sunflower, but it may live as long as five thousand years. The stored-up energy and potential within a human being is infinite in its proportions, but its potential must be managed economically and allowed to expand and grow in an organic fashion.'

'The Gift of Restraint is about non-interference. When you apply this to your own life, you have to accept yourself as part of a far greater flow than you can see and as such you have to accept that there are times when you will feel deeply restrained. **To live this seed fully you must ask yourself 'How can I be of the greatest service to humanity?'**

*'An interesting phenomenon occurs at the highest level of frequency that may help us understand why the Siddhic state transcends frequency altogether. The Siddhi of Stillness can greatly help us to understand this concept of transcending frequency. When a being attains realisation through the 52nd Siddhi, some intriguing things occur. Since all frequency and energy patterns are experienced as stopping you find yourself sitting at the heart of all creation. **The incredible sheath of fear and stress created by the world aura can no longer touch you.'***

*'Along with this Stillness you experience the 58th Siddhi of Bliss, the programming partner of the 52nd Siddhi. **These two great Siddhis mirror one of the great Universal concepts of geometry and physics – the torus.** Within the human DNA the torus at the heart of all being is directly experienced through the state of enlightenment which unites Stillness with Bliss.'*

*'Stillness and Bliss are derived from a higher functioning of your genetics. At the Siddhic level adrenaline is transmuted into rarefied hormones and neurotransmitters that induce Bliss and Stillness throughout the body. **This influx of Stillness into our planetary aura will allow millions of people to follow the true destiny into far wider service of the whole.'***

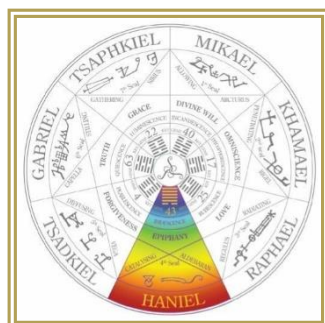

And finally, the Nodal Points. These are Points in Space that release our collective Karma - all that we have created over lifetimes. You could think of the Nodal Points as the integration of different Timelines – these Timelines hold many Gifts as well as past difficulties that are seeking resolution and integration in this present time.

The South Node links to our past and the North Node to our Spiritual direction in the present and, as for the last New Moon, they are still passing through Gene Keys 23 and 43 guiding us to move out of a life of **Complexity** into one of **Simplicity** out of which there is the possibility of greater **Insight** and the potential for both **Breakthrough** and **Epiphany**.

Looking at the South Node, the 43rd Gene Key, first, to see what Shadow we have been collectively creating over eons of time, we find that deep in our subconscious the need to be 'successful', to 'fit in' and the fear of being 'different' has held back and diverted the expression of our True Self. In this diversion we have forgotten our Destiny as Humanity.

*'You cannot hear the truth inside you due to the fear based, white noise generated by the sub-acoustic aura of humanity. Trying to avoid feelings of fear we become worried and obsessed about finding our way out of uncertainty, seeking the perfect relationship, enough money etc., in order to relax and feel good about ourselves. **But no amount of freedom or wealth can release this Shadow – only facing our deepest fears of being rejected by society will free us from this Shadow frequency.'***

*'The 43rd is part of the Codon Ring of Destiny. **The secret of this Codon Ring is timing and through the ages it has whispered a great truth into the ears of those whose insight is developed enough to hear it – Life is a mystery in which chance and love dance together.** When you Love totally, unconditionally, even chance is shown to be an illusion and the underlying Cosmic geometry is revealed behind all things.'*

*'The 43rd Siddhi is one of the seven Gene Keys that provides a Portal for Grace to move into the world of form. The 43rd Siddhi represents the opening of the 4th Seal which releases the profound human fear of rejection and opens the hearts of all individuals. **This Siddhi has a powerful destiny – to create mass breakthroughs across entire gene pools – ultimately the Epiphany is an explosion in the human heart, an openness and acceptance of others you become deaf to everything but the Divine!***

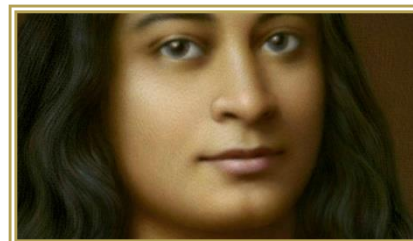

To achieve this Epiphany the North Node on Gene Key 23, known as ***The Alchemy of Simplicity***, guides us to have Mastery over our lower mind – the limited mind that seeks to have dominance over our thoughts, beliefs and actions. This Gene Key has the potential to refine, purify and heighten the consciousness that has been misaligned over eons of time – returning it back to the Source of Pure Light.

*‘Complexity is the result of the human mind trying to control its environment. **The more humans try to use their minds to create a feeling of security the more complicated and unsafe the world becomes.**’*

‘To be around someone exhibiting the Gift of Simplicity is a wonderful and powerful experience. Things you thought were problems somehow dissolve in their presence and through their Insight and clear language, difficult things become easy – you relax in their presence.’

‘The 23rd Siddhi has an alchemical flavour to it – the ability to extract gold from base metal. Every person has a unique key that opens them to a higher state of consciousness and the people of this Siddhi hold all the keys.’

*‘They can transmit the power of the awakened state through a word or a look or a gesture. This is the true explanation of the secrets hinted at by Alchemy – that the physical body itself contains the seed of the Siddhic consciousness. **It is concealed in your DNA and controlled by a hidden timing mechanism that is utterly spontaneous and out of your individual reach.**’*

‘Once this Siddhi has fully dawned inside a person they become an alchemical agent that overtime refines all and extracts the Quintessence from the dross.’

As you will see the Cosmos remains focussed on impressing upon us the need to find inner Stillness beyond the limited and disruptive mind as it looks out onto this busy and challenging world, and in this Stillness to embrace Simplicity so that we may enter into the Mastery of our Being.

There is perhaps no better way to end this month’s Review than by quoting Yogananda -

‘Stillness is the altar of Spirit.’

‘Be as Simple as you can be - you will be astonished to see how uncomplicated and happy your life can become.’

Love and Blessings to All
