'I AM' the Light that Shines in the Darkness

This month there is a great deal to cover, there is a Solar Annular Eclipse at the time of the New Moon, which will take place at 28⁰ Aquarius on the 17th of February, a few days before Neptune and Saturn come together at 0⁰ Aries on February the 20th.

This conjunction is being well documented by all astrologers, as it is a rare alignment. The last time Saturn and Neptune came together at 0⁰ Aries was some 6000 years ago around 4361 BC according to astrologer Heather Ensworth.

0⁰ Aries marks the start of a new Cycle, a Reset, a radical shift in the way the collective consciousness perceives life, which will be explored in more detail later in the Review.

But, first of all, to get a sense of what is unfolding, in looking at the position of the New Moon, from the images created in the Sabian Symbols by Dane Rudhyar, we find that 28⁰ Aquarius has an image of **'A butterfly emerging from a crystal'** and speaks of **'The capacity to utterly transform the character of one's consciousness...'** The Keyword for 28⁰ Aquarius is **Metamorphosis** which, according to Rudhyar, **'In spiritual terms this implies Initiation i.e. entering a higher realm of conscious existence and there joining a Sacred Company.'** What is revealed is the potential ability of every human being to participate in a higher realm of evolution after his or her emergence from a critical state of transition.'

A key element of this transformation of consciousness is our relationship with Time and Space and how we interact within it, from a 3D perspective. Right now, with the Saturn Neptune conjunction at 0⁰ Aries, we are dealing with an extensive cycle of time, but if we expand the Cycles of Time of existence, out further, we will have a greater understanding of the sense and size of the 3D Field in which we are all evolving.

This month's Review image is of a dragonfly, rather than a butterfly - for dragonflies were flying on Earth some 200 million years before the arrival of the butterfly and prior to the advent of the dinosaur. Once much larger, each dragonfly begins life in water and then moves into the air and flies. It is their very adaptability which has created such longevity, which speaks to the time that we are in. These prehistoric, tiny, exquisite, creatures are a symbol of metamorphosis and transformation having shapeshifted and morphed, for over three hundred million years.

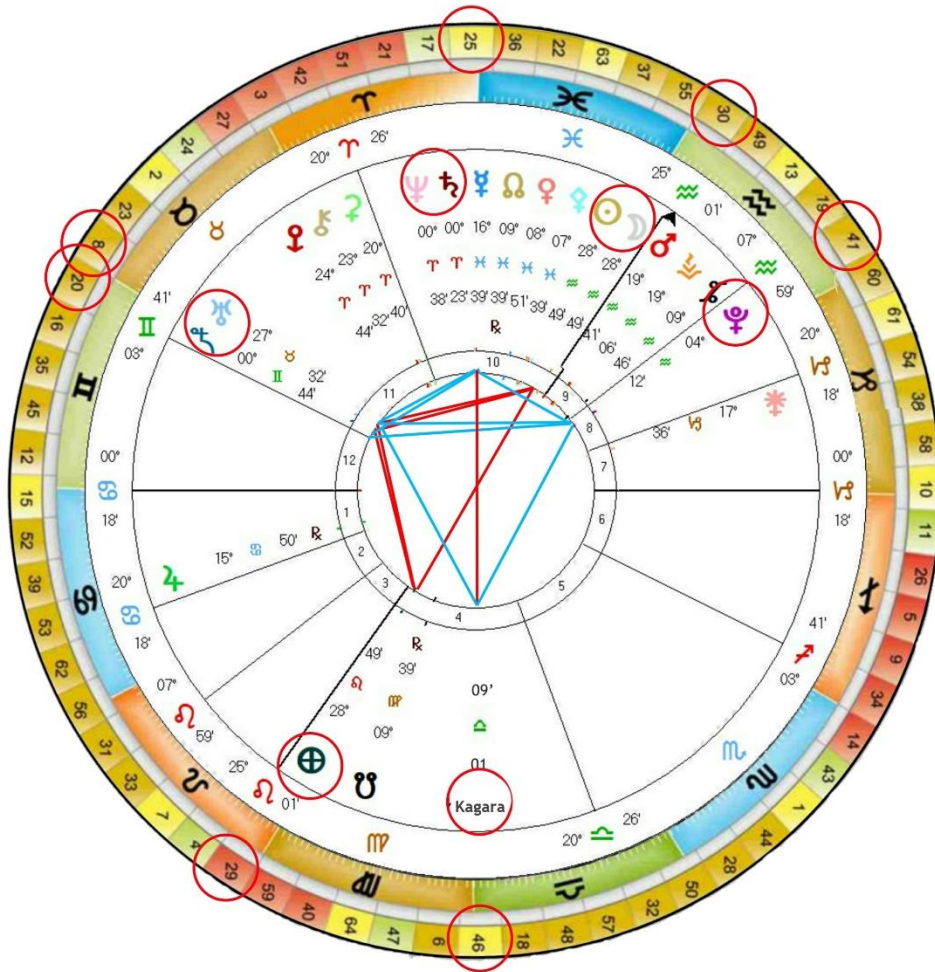

Three hundred million years, however, is but a drop in the ocean when compared to the part of the Universe from which 3IAtlas has emerged. This Interstellar Cosmic Body carries a message from a far distant part of the Milky Way Galaxy that is at least seven billion years old and has arrived right on cue to expand our consciousness beyond our limited belief system and inherited memory patterns.

As old structures of belief are dismantling, and as our awareness expands into the vastness of the Field in which we live and have our Being, we begin to magnetise and naturally attune to higher frequencies of Light that are flowing through the Galactic Field, activating our DNA to latent codes of Light and to the Remembrance and Essence of Timelessness that lies within the Core of our Being.

This is Genesis. Genesis is not the beginning of Time. It is the beginning of Remembrance.

Chart for the Aquarian New Moon 2026

Having touched upon the infinite vastness of the Cosmic Field in which this New Moon and Solar Annular Eclipse is operating, how is *metamorphosis* being translated from the macrocosm to the microcosm, within each one of us, as an expression of this moment in time, at this pivotal juncture?

Whether you call the Field, Universal Consciousness, the Quantum Field or the Holy Spirit we can never be separate from Source, as each one of us has emerged from out of the Field into the physicality of our being. The Holy Spirit flows through every molecule of our being – there is no distance that separates us - we are in a timeless partnership, and equally with everything that we see in this 3rd Dimensional realm - from a dragonfly to 3 | Atlas.

The *metamorphosis* arises when we come out of the mind and into an inner Spaciousness and Stillness leaving behind our limiting stories, desires and beliefs to merge and reunite within the Pure Love of Universal Consciousness, in symbiotic relationship.

So, if we now look at the chart to see the potentials of how the macro may express in the micro, we see that there is a T Square (red lines) between the Sun ☉ Moon ☾ Earth ⊕ and Uranus ♃ and Sedna ♁, which, with the Sun and Moon in Aquarius, and Uranus 90° away from both, makes this a time of change and unpredictability. A stripping away of all that has distorted the Truth of our Being.

Uranus, known as the Awakener, brings disruption, acting as a catalyst to bring about innovation and a shift of perspective and awareness. So, expect the unexpected whilst staying rooted and present in the Core of your Being.

The Sun and Moon are on Gene Key 30 known as **Celestial Fire**, moving through the Shadow of **Desire** to the Gift of **Lightness** to the Siddhi of **Rapture**.

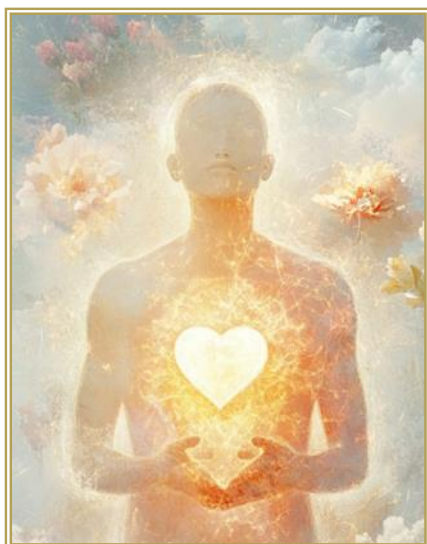

*'As part of a chemical family known as the Ring of Purification this 30th Gene Key naturally bonds with the 13th Gene Key whose Shadow frequency, Discord, creates a powerful energetic field of Discord and Pessimism. **Humanity is thus designed to move through a vast evolutionary cycle in which it is progressively purified.** Such purification can only take place through the Shadow frequency since this provides the raw material for higher states of consciousness.'*

*'The Gift of Lightness does not make you immune to desire, but neither does it cause you to react to desire. **This is a Gift that knows desires do not necessarily have to be followed, but they do have to be felt.** The Gift of Lightness does not change your destiny. It simply allows you to view it from a different level of awareness. **However, the very shift to this higher awareness functioning always signifies a change in the script of your life.** It is a breakthrough that occurs, or one might describe it better as a meltdown.'*

*'As you move into the higher frequencies of the 30th Gift you begin to understand that beneath the thousands of desires that pass through your emotional system, each day, **there is a single underlying desire that gradually becomes stronger and stronger** – the desire to end your own suffering - this desire leads all human beings on the path of Spirituality and inner inquiry. **It is the desire to Ascend - to be free.'***

*'The process of transcendence through this 30th Gene Key directly mirrors the purification of the Astral Body (2nd) and its assimilation into the higher Buddhist Body (5th). **The state of Divine Rapture is akin to being burned by the fires of Bliss over and over again.** The 30th Siddhi is an unusual Siddhi in that it manifests as one of the great Divine ecstatic states. **The 30th Siddhi and its partner the 29th Siddhi represent an archetypal stream within your DNA that causes powerful mutations in your endocrine system leading to states of great Devotion and Divine Rapture.'***

*'Devotion and Rapture is a vital pairing. **Rapture cannot exist without Devotion.** Rapture comes when all our desires have been purified into a single overarching desire – **the desire to return to our Source, the yearning for the Light – freedom from suffering.** These are the people who are so flammable that the smallest thing will set them off and whoever comes near them will very likely catch their devotional energy, for the nature of the mutated Solar Plexus system, which is where the 30th Siddhi lies, carries this purified frequency out through the aura into the morphogenetic field.'*

*'They have stepped willingly into the fires of annihilation - into the primal chaos of Divine Frequencies with just the desire to transcend. **They are here to teach us, to remind us – that beneath the veneer, we are one rippling Field of Love, of Divine Rapture.'***

The Earth on Gene Key 29 is known as **Leaping Into the Void** and moves through the Shadow of **Half-Heartedness** to the Gift of **Commitment** to the Siddhi of **Devotion**.

*'There is nothing that is worth doing in life unless it is done with absolute Commitment. **If you attempt anything half-heartedly you might as well not attempt it at all.** Without commitment, action lacks power or direction and above all, luck. **This last comment may sound rather odd, but there exists a Universal Law that states that anything that is done with full Commitment carries within it the seed of good fortune.'***

Spiritual Awakening is a Remembering

It is not becoming something that we are not.
It is a remembering of what we are.
As if we had known it long ago
And had simply forgotten.

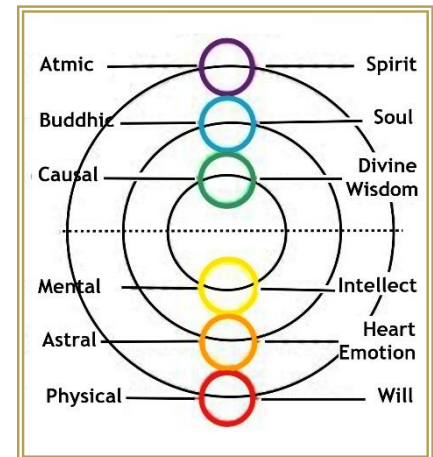

Adyashanti

*'Likewise, anything that is done without full Commitment carries the seed of misfortune – there is no morality here - Life is simply asking for you to trust in Life. **True Commitment can only be to one thing, the present moment.** You can only know the truth in the now.'*

*'The 29th Gift is not subject to the pressures of conditioning and expectation from others but opens into a deep connection to the direction of the Life Force within. **The more the frequency rises through the 29th Gene Key the more you find your commitments directed towards the service of others.** As the frequency gets higher and higher your Commitment takes on a devotional quality and begins to activate the Heart Centre.'*

*'As you allow the energy of Commitment to act itself out in the world, you begin to realise that an energy separate from your body is moving through you. **This high frequency energy is actually moving into your body from your higher bodies and in particular from the 5th body known as the Buddhic body.** Bhakti Yoga refers to the path of Devotion, or the path of the Heart. Wherever such people go their heart is in constant meltdown from everything and everyone they meet.'*

'The 29th Siddhi of Devotion is an absolutely contagious Siddhi – wherever it goes it inspires Devotion in others. This electrical, almost sexual aura creates considerable waves when it appears in the world – but these Masters are interested in only one thing – surrender into your heart.'

*'This is the Siddhi of saying yes to life – it gives itself to absolutely anything or anyone that comes its way. The message of the 29th Siddhi is exactly this - trust your heart above all else and never worry about the consequences. **To be devoted means to lie forever in the lap of the Divine.**'*

Sedna, and Uranus, are playing a pivotal role, and in many ways are polarities – Sedna links to primordial space, pre-thought and Uranus links to the Higher Mind. Sedna on Gene Key 20, is known as **The Sacred Om** moving through the Shadow of **Superficiality** to the Gift of **Self-Assurance** to **Presence**. Sedna, is at 0° Gemini and the Sabian Symbol for this degree speaks of **'A New Dimension of Reality**.

'This aspect of the DNA is very ancient. The 20th Gene Key and its Shadow were developed in species that preceded human beings – primarily in the world of insects.'

'Looking at insects, we can see how incredibly busy they always seem to be – their only focus is to stay alive and to reproduce within a short time frame.'

'There is a blind activity occurring and like the insects, at a Shadow level, human busyness lacks real presence. With the development of the neo cortex we began to think.'

'A strange thing happens when we think – we leave the present moment. The illusion occurs because the mind can only think in a linear fashion. This is the trade-off of the incredible abilities of the mind – for all its genius it is limited to thinking within the domain of a false reality called Time.'

'With Self-Assurance comes a profound surrender to life in every moment. As you begin to accept that life has its own plans and flow, you also begin to stop interfering with the process at a mental level. This Gift is in fact the precursor to a higher state of spiritual awareness.'

'Your Self-Assurance is directly equivalent to your ability to escape being a victim of your mind. As you begin to learn the knack, you experience the subtle expansion of a meditative awareness – an ability to witness your mind without being caught up in it.'

'An internal spaciousness grows and you no longer have to try to control life. What actually occurs with this Gift is that the awareness within your solar plexus begins to take over from your mind, opening the way for you to connect into a very powerful Universal power.'

'The true Siddhic state is one of complete relaxation. Thoughts are irrelevant – there is nothing to say that is not superficial – for nothing is felt but the Presence itself. When this occurs, the whole world created by the human mind is suddenly seen as utterly superficial.'

'The smallest thing such as a leaf or stone is understood to have more Life within it than all the greatest ideas of man. When this Siddhi has flowered in a person it actually creates a subtle atmosphere around itself – a kind of silent ease that pervades the aura of the person and radiates out to all Creation.'

'Mythically the 20th Siddhi is represented by the notion of the Breath of God, or the Word of God. Presence is the underlying nature of Being. In fact, it would actually be truer to name this Siddhi, The Presence, since the use of the definite article gives us the distinct impression that this is a state of consciousness that has nothing to do with any individual. **It is the manifestation of The Presence through a human vehicle.'**

The electrifying energy of Uranus, which is presently on 27⁰ Taurus holds the Sabian Keynote of **'Man's capacity to rise in consciousness and feelings above biological limitations.... the possibility of re-beginnings.'** Over the last two years, Uranus has been activating the Light Codes within Gene Key 8, known as **The Diamond of the Self**, to release the Shadows of **Mediocrity** and **Constriction**, to ultimately reveal the **Exquisiteness** which lies within the Heart of each one of us

'As an aspect of the genetic family known as the Ring of Water, the 8th Siddhi of Exquisiteness is chemically bonded to the 2nd Siddhi of Unity. These are the two great Feminine Gene Keys in the human genome drawing all human beings along their inevitable journey to self-realisation.'

'One of the great Mysteries of the 21 Codon Rings is found here. The Ring of Water forms a kind of eternal genetic knot with its polarity, the Ring of Fire. These two chemical families move us human beings along the trajectory of our destinies ensuring that our genetic material finds its opposite match.'

'Deep within the body these chemical families set the primal blueprint for the balance of all the opposing forces inside us. It is the crossfire of these two Codon Rings that the mystical figure of eight is forged within us. This eternal love knot deep within our planetary gene pool sets each man and each woman squarely on the human journey. **The true symbolism of the number eight represents the timeless quest for the buried treasure that lies inside each of us – that elusive Diamond of our true Nature.'**

'The 8th Siddhi of Exquisiteness is the natural revelation and manifestation of all the Siddhic states, for each Siddhi is holographic in the sense of being reflected within all other Siddhis. People of the 8th Siddhi are not leaders. They are examples. Exquisiteness is experienced when the Divine Essence begins to shine through the individual. In this state of Bliss you fall in love with your own pristine manifestation because it is through this uniqueness that the Divine currents can be accessed. **This is the stage at which you achieve transcendence of your genetics.'**

At the time of this New Moon, Saturn ♄ and Neptune ♆ are now both at 0⁰ Aries on Gene Key 25, to come exactly conjunct at 0⁰ Aries 45 on the 20th of February. The Sabian message for this degree is: **'A woman just risen from the sea. A seal is embracing her.'** And the Keynote for 0⁰ Aries is **'Emergence of new forms and of the potentiality of Consciousness.'** Rudhyar goes on to say, **'To be individually conscious means to emerge out of the sea of generic and collective consciousness....such an emergence is the primary event...a leaving behind, an emerging from a womb or matrix.'**

So how does Gene Key 25, which is known as the **Myth of the Sacred Wound**, moving through **Constriction** to **Acceptance** to **Universal Love**, reflect this emergence from out of the Group Collective matrix into a Field, that is held within, untainted by the past.

*'Within the 25th Gene Key lies the secret that men and women have always sought – the secret of love. Here too lies the antithesis of love, the Shadow of Constriction. **Constriction is the physical manifestation of fear at an individual and Universal level.** Most of us enter Constriction training at a very young age. We learn it through the breathing patterns of our parents, even while we are still in the womb.'*

'Pure fear is simply a collective thought form that hangs like a fog across the world. Constriction exists wherever love is absent and it is the underlying source of all human suffering.'

*'Because this 25th Gift represents the portal to the true nature of the Universe as Love, it has incredible relevance for all human beings. The state of Acceptance is akin to "Spiritual Springtime" where everything seems new again, flowing more easily and freely. **When you can finally accept everything in your life just as it is right now you will have embraced the human wound.***

*'The 25th Siddhi is a special Siddhi whether it happens to be within your hologenetic profile or not. **Every Gene Key exists inside each of us and the 25th Gene Key is the primary archetype of Love.** The 25th Siddhi is Love itself as the Source of all and in this sense it can be called Universal Love.'*

*'The 25th Siddhi is one of the Seven Sacred Seals - a mystical group of Gene Keys whose collective role is to heal the Sacred Wound within humanity. **The 25th Gene Siddhi is the 3rd Seal, and it heals the human wound of shame.***

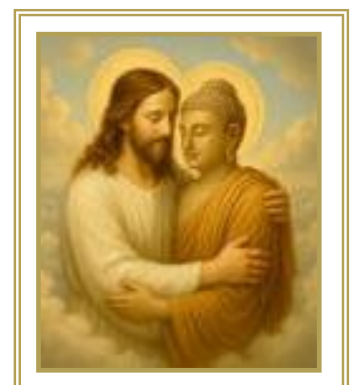

*'All that Love locked away in our DNA. The DNA is just filtering it through the memory – the ancient memory. **This is the embracing of the collective wound. It is the passage to Christhood, or Buddhahood.***

*'We cannot 'get' there. We just have to keep on opening, accepting and the path leads us there of its own accord. **It is our natural state.** It has a certain flavour, a certain peacefulness Universal Love, Unconditional Love.'*

*'It is not the fiery Love of the ecstatic. It is not Divine Passion. It is after all that has been burned away. It is what is left over. **It is a deep knowing that emanates from our cells, the knowing that we are One.** It transcends and includes personal love. It is the background radiation for all our experiences. Life emerges out of and falls into this Love. **This Siddhi concerns the future of Humanity, a new kind of human being, a human that knows it is Universal, that has moved away from the personal dimension.***

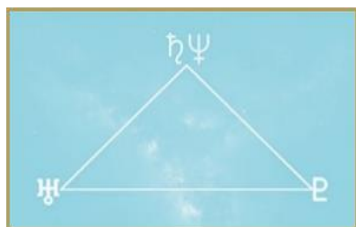

'All spiritual paths begin with the urge to bring an end to personal suffering – it is the unacceptance of suffering that makes you seek. Eventually this revelation gives rise to the quantum leap to the Siddhic level of consciousness.'

*'Those Beings who have attained realisation through this 25th Siddhi become, in some form, legends Whether Buddha or the Christ – the aura of such a person shines like a Light down the centuries and is felt within the bloodlines of all future generations. Every time someone attains the 25th Siddhi a great genetic constriction is removed throughout Humanity. **The bodies of these people have undergone a radical transformation in order to be the receiver or chalice for pure consciousness.***

Out at the edge of our Solar System, Pluto ♃ continues to hold the Minor Grand Trine in the sky at 4° Aquarius. 4° Aquarius, as a Sabian Symbol speaks of Ancestral Lineage - those that have gone before - **'A Council of Ancestors... every individual is far more dependent upon the strength of his ancestors' achievements... enabling the aspirant to greatness... to tap the power of his deepest roots.'**

Gene Key 41, which Pluto will be activating over the next three years, is known as **The Prime Emanation**. During this time, Pluto will be silently and steadily activating the Start Codon to move through the Shadow of **Fantasy** to the Gift of **Anticipation** and ultimately to the Siddhi state of **Emanation**.'

'The 41st Gene Key houses a truly remarkable archetype. It has a very important function – it relates to what is known in genetics as the Start Codon. At the Shadow level the 41st Gene Key centres around the issue of Fantasy and dreams – it is like holding the key to your dreams in your hands but never turning the lock. The evolutionary pressure that surges up in human beings carries our entire genetic history within it, all the way from the amoeba to Homo Sapien.'

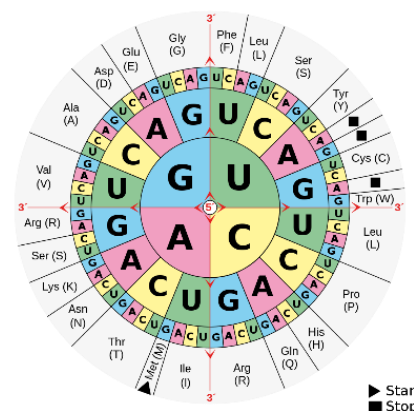

'All this history carries an enormous weight inside you – it can drag you down, but it also urges you to want to break free. The 41st Shadow represents the pressure to evolve to seek out new fields and new experiences. This evolutionary impulse is the secret to the 41st Gift – the Gift of Anticipation.'

'The more the frequency of your DNA rises you become more and more sensitive to the hidden properties in the world around you, in particular, linking into the morphogenetic field that communicates specific information across time and space.'

'Every start codon inside every single cell is electromagnetically linked to each other. This is the foundation of the holographic body which in turn is linked to the holographic Universe. This Gene Key is the key to seeing that the physical body can equally be seen as a holographic mirror of the Universe.'

'What is fascinating about the 41st Siddhi is that it is the Source underlying all true Siddhic states. No matter what manifestation comes through our genetics, they are all ultimately grounded through this Siddhi that is not a Siddhi.'

'In many ways, this is the nameless Siddhi, but we call it Emanation because we have no other way of approaching it.'

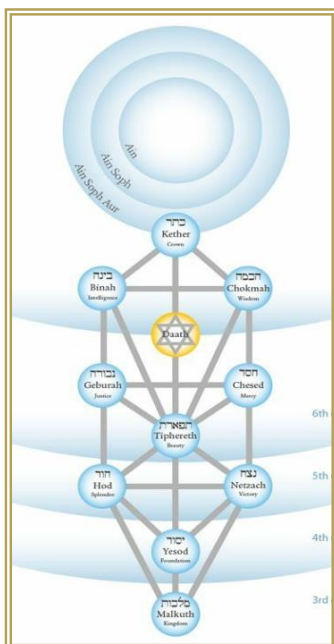

'As the Source of Being the 41st Siddhi is the Siddhi of Emanation. Emanation is a word that has been used by many ancient metaphysical and mystical systems as a means for understanding something that is really unapproachable.'

'One of the best known of these systems is perhaps the Kabbalah, whose central tenet is a map known as the Doctrine of Emanation. In a nutshell the Doctrine of Emanation points towards a fractal model of the Universe in which everything is a mirror image of itself.'

'There is another interesting point that emerges from deep contemplation of this Gene Key. Somewhere deep within your DNA lies a code whose sole purpose is to trigger the state we call Enlightenment. In certain vehicles, the body picks up a specific set of secret genetic instructions and triggers the neurological process of enlightenment.'

'It may come as a shock to many mystical seekers that this process cannot be triggered by what we do up on the surface. Within the hologram of the Universe, Enlightenment is a spontaneous acausal non-event. You could say that Grace triggers this process but the point is that no one knows why or when or to whom it will happen.'

Finally, and synchronistically, if you look at the chart you will see that at the time of the Aquarian New Moon there is a Kite Formation (*blue lines*) formed between the Minor Grand Trine, of Pluto, Saturn, Neptune, Uranus, Sedna, and a little-known Kuiper Belt object called Kagara.

Kagara, is a Trans Neptunian Body in the Kuiper Belt, discovered in 2005, and Philip Sedgewick, the authority on Kuiper Belt Objects, believes that TNOs are '*evolutionary intensified*' objects, and he suggests that Kagara represents '***The exploration of entirely new mental maps or concepts that are completely outside of our previous experience***' which mirrors the sense of unexpected breakthroughs that underpins the Aquarian vibration, intensified now with Pluto having moved into Aquarius until 2043-2044.

Kagara, at the time of this New Moon, is at 1⁰ Libra 09 which according to the Sabian Symbol describes: '***The Light of the Sixth Race Transmuted into the Seventh.***' This symbol highlights a transition to a higher state of consciousness, suggesting the refining of previous, limited experiences into a more Spiritual, or Enlightened form. The Keyword is ***Threshold***. This degree relates to a significant, internal, metamorphosis, where one is not just repeating the past but is evolving it.

As we open ourselves to the resonance of Galactic frequencies — a Field of vast, refined, and unified consciousness — we are not merely reaching outward into the Cosmos - we are awakening inward to our own original nature. Spiritually understood, these 'frequencies' are not just energetic waves but levels of awareness where separation dissolves and unity becomes directly felt rather than intellectually understood.

Love, in this expanded state reveals itself as a foundational field — a living presence that underlies all existence. We discover that Love is not something we generate; it is something we align with. It is the organizing intelligence of Consciousness itself.

So how do Kagara, and the Sabian Symbol on 1⁰ Libra 09, activating Gene Key 46, come together with all of the other Gene Keys already mentioned, to assist in the transition into a higher state of consciousness? Gene Key 46 moves through the Shadow of ***Seriousness***, to the Gift of ***Delight*** to the Siddhi of ***Ecstasy***.

'The 46th Gene Key governs your relationship to your physical body. It is part of the Codon Group known as the Ring of Matter which programs the developmental process of incarnation from conception to the age of 21. The 46th Gene Key relates to your first seven-year cycle in which all your Shadow patterns are hotwired into your physical structure – your posture, your breathing patterns and your relationship to the physical world through touch.'

'When the child learns through their physical aura that life is safe and loving their body relaxes into its natural internal rhythm. At the Shadow level there is no trust. To escape the low frequency of Seriousness, it takes a simple quality – Acceptance. Acceptance is the programming partner of the 46th Gift of Delight.'

'Delight is a sense of freedom and an appreciation of the richness of being alive. The 46th Gene Key also contains the germ of material success and failure. This much sought after secret is founded upon the principle of synchronicity – the Law that binds together all free-moving objects in space and time.'

'Free-moving in this context means accepting. When you move through life with an attitude of Delight and openness, whatever happens is correct. If your attitude remains open and accepting you will see that the Universe is at work in you.'

'Synchronicity is an energy field available to all with or without the 46th Gene Key in their profile. The only prerequisite for tapping into synchronicity is this Delight. It is not about being an aimless drifter – it is about holding your goals so lightly that they can be dropped at any point if necessary.'

'Ecstasy is the highest frequency of the 46th Gene Key and it occurs only through the heart. It is in fact the true nature of Humanity. There is actually no work more important on this Earth than play. When we become truly playful we reshape the nature of our Collective reality.'

'Ecstasy is not a word that most people consider when they think of themselves and their lives. Yet it is this block at the mental level that keeps us at a frequency far from Ecstasy. If you can open your heart to receive the frequencies they represent, the frequencies will begin to seek you out, for Siddhic states are all a matter of magnetism.'

'People who manifest this Siddhi cannot go unnoticed in the world. The Love that swirls around them is so tangible that it can even be felt by people of the densest frequency.'

'It is not that this 46th Siddhi is any more powerful than any other Siddhi, but that this manifestation of Divine consciousness is so close to the physical realm and it emerges through the physical body. Matter is penetrated completely by the Spirit.'

'Such men and women – the ecstatics – have not always found it necessary to remove themselves from the world, but have found their love within the world of ordinary life. Ecstasy comes in waves, in orgasms that travel through the Universal quantum field in which we live. The more people who experience such orgasmic energy coming through their higher bodies the more our planet will be transformed.'

Ecstasy is not a quality of an individual - it is the quality of Nature itself. In this culture we say 'Brahmananda' which means that the entire Creation is Ecstatic.

Sadghuru

As the outer world continues to shift, to change, and to unravel, we stand at the **Threshold** of a **Metamorphosis** that is occurring deep within us and across the Planet, Solar System, Galaxy and Beyond as we **Transition** from one Cycle into another.

As we emerge from the Kali Yuga - an Age of density, distraction and fragmentation, we are being given a collective invitation - rather than seeking fulfilment externally - each person is called inward, toward the Core of their Being, where true **Transformation** begins, and spaciousness and inner stillness emerge. In this openness, perception becomes more subtle. The mind grows quieter, the heart more receptive, and the inner senses begin to recognize harmony where they once perceived fragmentation

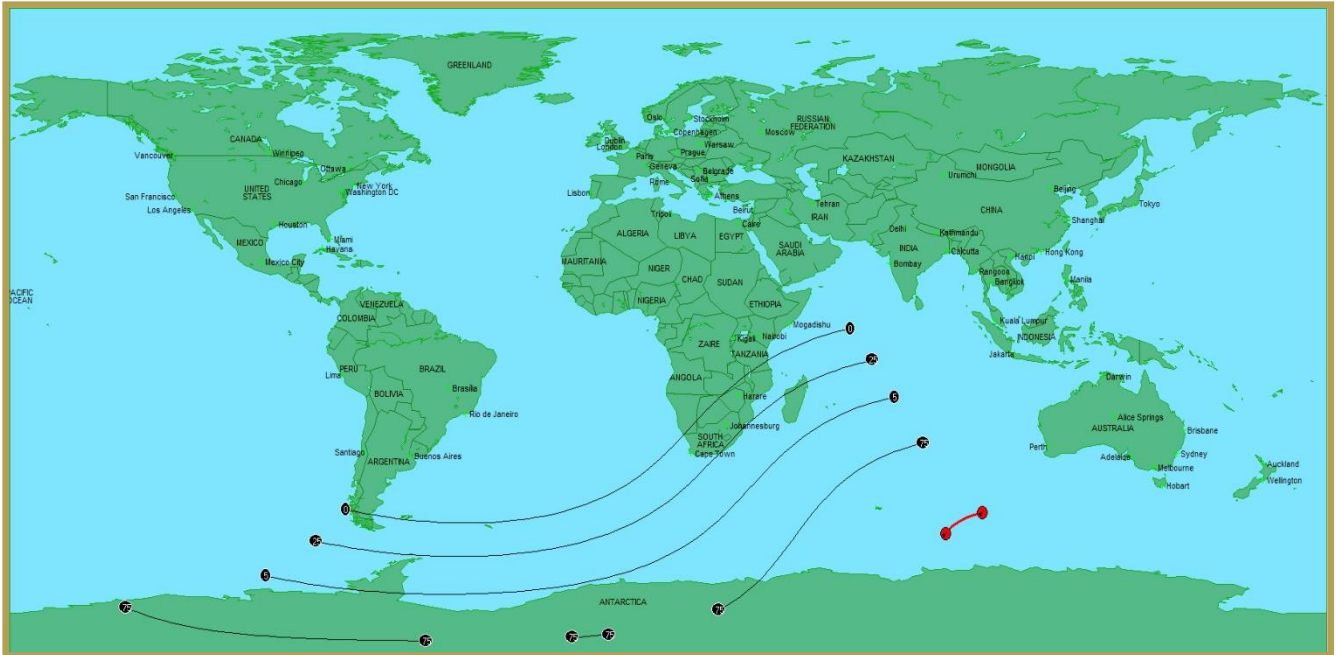

From this ground of **Presence**, the Heart becomes the primary instrument of knowing, expression, and communication. As we stabilize in this resonance, Love is no longer simply emotional or personal but is recognized as the Essence and Energy that flows within and through all Beings and connects all Life in a Field of **Universal Love, Peace and Light**.

Whatever may appear in the outer world, hold to this Truth, not in denial, or Spiritual by-passing but so as to be the most constructive and productive in these times of Change. Return often to this quiet centre within, not to withdraw from the world, but to meet it more fully. For from this space you will not amplify confusion with reactivity, nor answer fragmentation with fragmentation but rather you will embody Coherence. In this State of Coherence your Essence is responsive, restorative and ultimately Rapturous.

All Love and Blessings

Annular Solar Eclipse of 17th February 2026

Saros Cycle 121

Before closing this Review, here is a little information about this current Solar Eclipse Saros Cycle that is underpinning the New Moon. This is a map showing the outline of where the Annular Solar Eclipse is to fall. An Annular Solar Eclipse is not a Total Eclipse, but forms a Ring of Fire around the Sun. You will see that the path of the Annular eclipse is visible only over remote parts of Antarctica, and the Southern Ocean, as well as briefly touching parts of South America and South Africa.

Each Saros Eclipse Cycle starts at either the North or South Pole and gradually moves down or up across the Earth for around 1,300 – 1,500 years. Saros Cycle 121 started out on its journey across the Earth from the North Pole in 944 AD and will complete its cycle at the South Pole in 2206 AD.

As the Eclipses move across the Earth, every 18 years, plus 10-12 days, they play a vital role, for there is a symbiotic transference of consciousness, as the pure Light of the Sun merges with the ingrained memory patterns of humanity, reflected back to Earth by the Moon. The Eclipses release stored, trapped energy held within the Earth plane, for transmutation and release, so that the ley lines and vortices may be maintained and upgraded. Humanity, as the 'acupuncture needles' on Earth, assist or hold back this evolution and Cosmic cleansing, through our emotional and mental beliefs and reactions.

Bernadette Brady's analysis of Saros Cycle 121, in her book *Predictive Astrology: The Eagle and the Lark*, identifies it as **'A powerful and fiery family of eclipses associated with intense, unexpected energy, often manifesting as sudden shifts...Unexpected events that require immediate, proactive adjustment rather than passive endurance. It also has a theme that links to authority, or a 'dystopian' struggle where the individual can feel small against a larger system, creating sudden shifts amongst authority figures.'**

The theme of Saros 121, cycling over hundreds of years, based on Cosmic Natural Law, has been seeking to mature us, to take responsibility for our thoughts, and actions in creating the world that we wish to live in, and is encouraging us to embrace transformative new beginnings. This is clearly reflected in the New Moon Aquarian Chart too, for the planetary pattern is a very electrical, high frequency energy, of intensified Light creating shifts, breakthroughs, and revelations across many Dimensions and Worlds.
