'I AM' the Light Within the Form

The New Moon in Cancer will take place on the 24th or 25th of June, depending on where you live, following on from the Solstice which occurred four days earlier on the 20th/21st of June.

The Solstice marks the time when the Sun appears to stand still against the Fixed Stars, in a Universe, which is in perpetual motion.

This time of Stillness, which lasts for some three days, is a time of inner reflection, reminding us all of how the Cycles of Time and the Elemental Kingdoms of Nature underpin all life, which are constantly unfolding in perfect timing and to remember, at this apparently, unstable time, that we, as Humanity, are part and parcel of this Cosmic unfolding.

The energies flowing through the Cosmos continue to intensify and so, at the time of this Solstice, the energies continue to stir and to activate us through impulses which have a plasma frequency, and Light encodement that are encouraging us to let go of all that is still holding us in fear, separation and judgement.

This high frequency, photonic light, that is flooding the Earth, is assisting all to release the past, for the imprint of Awakening is now constantly underpinning and over-lighting the planetary energies.

Cancer is ruled by the Moon, and being of the Water Element, is emotional, sensitive, and psychic which, at the personality level, makes it difficult to have an objective overview.

The Moon evolves through the **4th Ray of Harmony through Conflict** which we are witnessing erupting in the collective consciousness as old memories, beliefs, and karmic patterns, held within the sub-conscious, and passed down generation by generation, continue to manifest and recycle in the outer world.

At the Soul level, Neptune is the Planetary Ruler of Cancer, giving us the ability to reveal a limitless Compassion, an Agape Love, that witnesses all, but judges no one, understanding that all are responding to these intense times, in myriad ways, according to their level of consciousness,

We stand at the threshold of an extraordinary evolutionary Spiral for Humanity. Over the next few months, no matter what may appear in the outer world, as the Solstice Neptunian energies remain the background theme, we are being called upon to be the anchors for this evolutionary step – to be the embodiment of Peace and Compassion.

For, ultimately, all of us, are on a quest to discover the Light that is contained within the Form when Spirit and Matter unite, which at its height emanates Light and Love throughout the World, regardless of Race, Religion or Ideologies.

As we are all aware, there is a great deal of change and instability going on on the Planet at this time, a sense of being between two worlds, which can be stressful, but which is a reflection of the changes that are occurring in the planetary positions in the Cosmos.

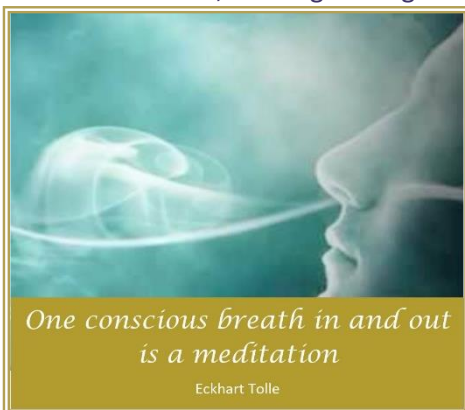

Saturn ♄ and Neptune ♆ have recently moved into Aries which is asking for personal accountability and responsibility in our actions – to be Self determined, or put another way, to be Sovereign Beings who act with compassion and maturity. Uranus ♅ is at the last degree of Taurus close to Sedna ♄, which is stimulating and instigating this need for change as we step into a new evolutionary spiral.

And Pluto ♇ the 1st Ray Planet of Transformation, having also quite recently moved into the first degrees of Aquarius is adding to this sense of the unknown, or unfamiliar, that is currently occurring, within our psyches, as we become acclimatised to the different impulses coming through the Constellations into our auric field. To have the outer planets of Uranus, Neptune and Pluto, along with Saturn, in flux at the same time is all adding to this destabilization, which is necessary, if we are to move beyond our limiting beliefs.

Looking at the chart you will see that there are many planetary alignments occurring. There is a Cardinal Grand Cross (red Lines), a Kite (blue Lines) and a Yod, or Finger of God (green Lines).

First let's look at the Sun and Moon which are conjunct to Jupiter creating a very expansive New Moon, an expansion of consciousness in which many truths may be revealed. They are on Gene Key 52 known as the **Still Point**, moving through the Shadow of **Stress** to the Gift of **Restraint** to the Siddhi of **Stillness**.

'Stress is a frequency which we allow into our DNA. Most human beings forget how to breathe as they grow up; we are conditioned to forget. Because shallow breathing does not oxygenate our cells sufficiently, our rhythm moves out of kilter with the whole. We actually create interference with the whole.'

'What a profound thing it is to move out of harmony with Nature. The 52nd Shadow is also a collective phenomenon. It is generated by the world aura of humanity. The more out of kilter we become with Gaia, the more stressed our physical body is. It's a Shadow quantum field. To rise above that field, we have to slow down, not our vibration, but our rhythm, for the earth, Gaia, has a tempo.'

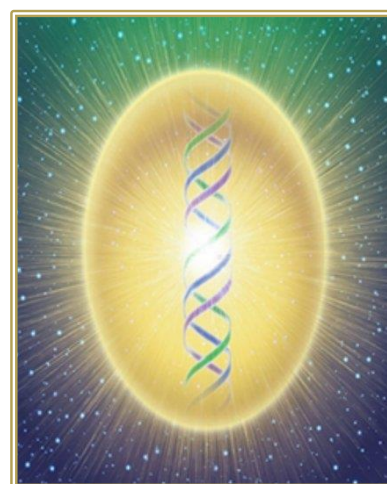

'When we forget this deep natural tempo, our DNA contracts and sends our body into a stressful state. The 52nd Gift of Restraint is such a great gift and even though it sounds so unexciting it is one of the most powerful. At its deepest level, it contains the seed that will one day bring all human beings into a perfect organizational unity. This seed contains all the necessary ingredients that will be needed in the journey ahead for it is the seed of individual destiny.'

The 52nd Gift is about the art of focus. These people are only really interested in the long-term view. That is why they know to take their time. **Everything in the Universe has its natural rhythm and timing;** its seasons, ebbs, swells, dips and flow. The genius of the 52nd Gift is to align oneself with such Cosmic timing, which will gradually bring others into alignment with their natural timing.'

'When we meet someone living out of this Gift, we are meeting someone whose breath is rooted deeply inside their bodies They are really like great anchors, they are so grounded. An anchor allows an organism to rest, come to a natural pause and regain perspective, clarity and above all timing. This gift has a huge impact on the emotional body. It communicates and exudes calmness through the aura. There have always been people in the world who remain completely unflustered by external crises, like emotional turmoil or human conflict and war. When we are grounded inside ourself, all of Gaia and her natural rhythmic power are at our disposal.'

'When a being attains realisation through the 52nd Siddhi, some intriguing things occur. Since all frequency and energy patterns are experienced as stopping you find yourself sitting at the heart of all creation. The incredible sheath of fear and stress created by the world aura can no longer touch you.'

'Along with this Stillness you experience the 58th Siddhi of Bliss, the programming partner of the 52nd Siddhi. Stillness and Bliss are derived from a higher functioning of your genetics. At the Siddhic level adrenaline is transmuted into rarefied hormones and neurotransmitters that induce Bliss and Stillness throughout the body. This influx of Stillness into our planetary aura will allow millions of people to follow their true destiny into far wider service of the whole.'

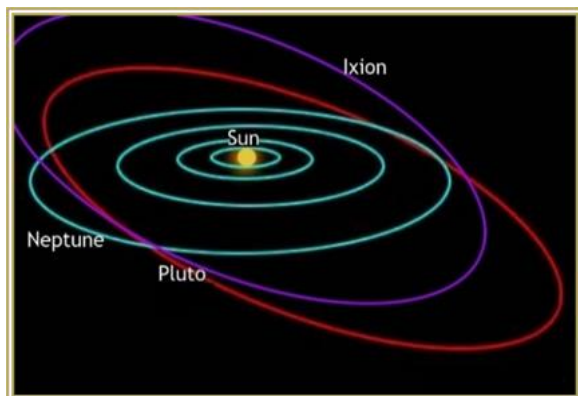

'Stillness is in every cell, at the heart of our DNA within the core of each atom, where the mystery of the Universe is constantly pouring through us. From within this Stillness activity naturally arises and its only interest is to reach out and touch the Stillness in others, in all things. Stillness sees only itself. It is the wellspring of joy, the font of Bliss, the end of all seeking, Stillness is how the world will be transformed.'

We are all passing through an Initiation at this time, our ability to be the Stillness, is why we incarnated at this time. The Shift of Ages creates major change and stressful situations which the Earth has passed through many

times but this time it is humanity that is consciously to participate in the evolution that is occurring. So, to find that inner Stillness that resides within, is a blessing as old cycles, recycle to be integrated into higher frequency. The Sun, Moon and Jupiter are opposite to the Earth, Ixion, Quaoar and Pholus, which were mentioned in the Pisces New Moon Review this year. Ixion, and Quaoar are Dwarf Planets and Pholus is a Centaur, and they are underpinning much that is currently manifesting in the outer world.

At the time of this New Moon they take on a greater prominence and focus as they are so critically placed in alignment with the Sun Moon and Earth.

Ixion is located in the Kuiper Belt, just beyond Neptune whose orbit is similar to Pluto. They both spend part of each orbit in the underworld and part above, however, they are oriented differently, meaning Pluto spends more time in the underworld than Ixion.

Ixion has a Plutonian energy, one which cuts through existing systems even more than Pluto, but which works more out in the open and less in the underworld. And, like Pluto, the resonance to Neptune lends a spiritual nature to Ixion's energy.

According to Ancient Greek legend, Ixion has a quality of lawlessness about him, having murdered his father-in-law, he was full of remorse, but he breaks the pardon that was granted to him by Zeus, by seducing Zeus's wife, and is cast out into deep space without redemption.

So, it is a pretty dark primordial story, but these ancient stories, entanglements, and imprints held in primal space are being revisited and recalled so that this time they may come into a higher frequency and be interpreted differently.

At an unconscious Shadow level, the myth suggests the action of this dwarf planet involves broken promises and retribution and there is the danger that second chances will be wasted through the arousal of base passions.

At the Gift level, Ixion represents a passionate Spiritual mission, which may involve a violation of existing customs and a resulting catharsis, followed by opportunities for a second chance - no longer being ruled or at the mercy of lower emotions.

And, at a Spiritually evolved level, Ixion offers the opportunity to follow your Bliss, living your life from an innate inner guidance, whilst respecting implicit Natural and Cosmic Laws.

The Earth conjunct Ixion is on Gene Key 58 known as **From Stress to Bliss**, echoing this highest potential, moving through the Shadow of **Dissatisfaction** to the Gift of **Vitality** to the Siddhi of **Bliss**

'When the frequency of this Gene Key hits the Gift level things tend to happen very quickly in your life. Not only does your life take on a new shape, but a far deeper process overtakes you – the process of moving into the heart.'

'The future of human evolution truly lies in the ideal of service. The Joyousness we seek as individuals is intimately tied to the joyousness of the collective – this is why the 58th Gift's delight is to work so tirelessly in that direction.'

'As your identification with the future progressively loosens, you are brought more and more deeply into the present moment. Your core Dissatisfaction is being transformed into Vitality.'

'As the frequency of your Vitality attains a higher and higher pitch, at a certain point it peaks and catalyses a spontaneous shift in awareness.'

'This vital force burrows so deeply into your being that it triggers a process within your DNA known as enlightenment.'

*'When Consciousness comes, it comes into you like a flood wiping you clean in less than a microsecond. It is one of the greatest mysteries of existence. Once a being has realised enlightenment through the 58th Siddhi they become entirely unfocussed. Their awareness stretches into infinity, their gaze becomes unfixed and dreamy and their heart is so full that it bursts with Love for all creation – **everything reverts to its pure and pristine state of being.**'*

*'Our bodies have to acclimatise to the voltage of Bliss and as they do so, over time the Bliss becomes stabilised. This is why the 58th Siddhi is paired with the 52nd – in the I Ching known as **Keeping Still Mountain**, because the Bliss has to become anchored in the world. **Heaven must come to Earth.** The Mountain must come to Mohammed. Bliss, true bliss, is utter Stillness. It is unmoving, unflinching. It is Eternal, as we are.'*

'The Siddhi of Bliss cannot be hidden or contained in any way, but radiates out from the very pores of one's Being. Finally, you realise that the Siddhi is present within the Shadow just as the flower is present at all times in the seed.'

And just as before, as shared in the Piscean Moon Review, both Pholus and Quaoar are on Gene Key 38, known as **The Warrior of Light**.

Pholus, in ancient Greek myth, lived in a cave in Arcadia, where he was the protector and keeper of the sacred jar of wine of Dionysus, the god of Ecstasy, whose rites were often characterised by drunkenness and chaos, and which sometimes culminated in violence.

The 'Jar of Pholus' was not supposed to be opened for four generations, which seems to highlight ancestral processes, whether known or unknown to us, which are releasing. In his desire to taste the wine, Hercules had Pholus open the Jar and the Centaurs became intoxicated and a fight ensued. Hercules ended up killing many Centaurs including Chiron and Pholus who were also accidentally wounded by his poisoned arrows.

'Archetypally, Pholus is linked to generational trauma this is why bearing witness is important: we are called to clarify our own ancestral lineage by our healing attitude to it. With Pholus, however, actions may precipitate quickly and then the consequences take a while to resolve. Sometimes there are specific things to do, like forgiveness work, but often it is simply to inwardly acknowledge and transform the suffering of those who went before us.'

Melanie Reinhart

And Quaoar talks about the natural order of Life and its Creation Laws and asks us to respect the natural Order and Laws - to take responsibility and to live in harmony with these Laws. Quaoar's name comes from the Tongva people who have been living in the Californian area of the USA for thousands of years – the original Los Angeles. According to Tongva myth, Quaoar came to Earth and found chaos, and felt pity. He started to dance, whirl and twirl while he sang the "Creation Song". He sang two other "gods" into creation and they together created the Sun and the Moon and then all five together created everything else existing.

The archetype of Quaoar, as a Creator God, seems to have both liberating and governing aspects, that asks us, to use our own abilities to create order under the Natural/Universal Laws, which includes honouring and respecting all Life, which perfectly reflects the Saturn Neptune conjunction which is presently in the skies.

These three Cosmic energies Ixion, Pholus and Quaoar describe very clearly the period of time that we are passing through as structures are being broken down, and the past comes up to meet us. We are being guided to incorporate Natural Law which our ancestors knew and respected, based on the interconnection of all Life and our co-creative ability within the Cosmic Field.

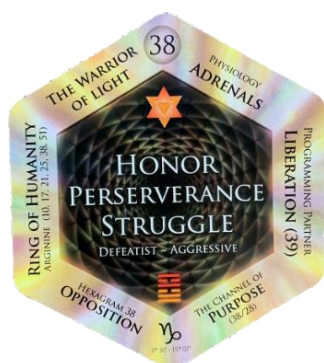

And to facilitate this integration the 38th Gene Key moves through the Shadow of **Struggle** to the Gift of **Perseverance** to the Siddhi of **Honour**.

'This Gene Key still influences all human beings today, regardless of how closely associated you are to this Shadow. It is there in the collective energy field of humanity and it is particularly strong when certain groups of human beings are threatened by other groups, manifesting through its aggressive reactive side.'

'The 38th Gift is the Gift of Perseverance. This is a Gift which thrives when you are up against the odds. These people are extremely active and physical – they make the impossible look effortless. They are people of action.'

'The 38th Gene Key sets the pattern of a human struggle – the Struggle of all form to reach Spirit. In humans it is represented by the quest of the inner Warrior of Light against the dark forces of the lower nature. At a certain level this Spirit enters into the realm of a pure frequency - into the realm of Honour.'

'Honour is action that is rooted in a Love so pure that it sacrifices itself, without a thought, to serve a higher aspiration. Every act of Honour carries an equalising force into the world rather than a divisive force. If the act brings people together into a high frequency field, it is an act of Honour. Honour always carries the frequency of mercy and surrender within it.'

'The 38th Siddhi retains a deep mythic connection to Struggle, aggression and all the darkest sides of human nature, however, people in whom this Siddhi manifests are the highest form of warrior. They become our Holy Warriors those who cannot be tarnished by the world.'

'As the Warrior of Light the 38th Siddhi does not fight the lower nature; rather it absorbs the forces of darkness deep inside itself through its action and in doing so shines out with immense purity in the world. Whenever a Siddhi dawns in a human being, its programming partner is also activated. Thus the 39th Siddhi of Liberation is also released alongside the 38th Siddhi – unleashing a chain reaction resulting in a stream of dynamic liberating energy lasting for generations and generations.'

The other two angles of the Cardinal Grand Cross, have Saturn, Neptune and Dwarf Planet Ceres ♄ at one point, with another Dwarf Planet, Makemake ♅ completing the Grand Cross.

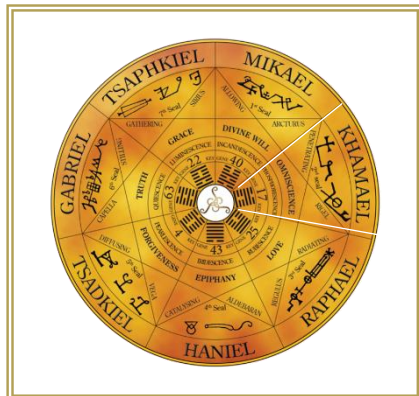

Saturn and Neptune together hold the potential for manifesting the vision or for embodying Agape Love. Saturn brings the discipline and Neptune brings the high frequencies of Compassion.. They are both on **Gene Key 25** known as **The Myth of the Sacred Wound**, moving through the Shadow of **Constriction** to the Gift of **Acceptance** to the Siddhi of **Universal Love**.

'The 25th Siddhi is a special Siddhi, whether it happens to be within your hologenetic profile or not. Every Gene Key exists inside each of us and the 25th Gene Key is the primary archetype of Love. The 25th Siddhi is Love itself as the Source of all, and in this sense, it can be called Universal Love.'

'The sacred wound that hides within each human being can be understood at three levels of consciousness – at the Shadow frequency, the wound maintains human suffering, at the Gift frequency the wound provokes humanity to evolve, and at the Siddhic frequency the wound reveals humanity's true nature as an Expression of Universal Love.'

And Dwarf Planet Ceres, on Gene Key 17 is moving through the Shadow of **Opinion** to the Gift of **Far-Sightedness** to the Siddhi of **Omniscience**.

The 17th Siddhi activates the fullest expression of the pituitary gland. The 17th Siddhi directly corresponds to the open 3rd eye. Where seeing and the seen are one. 'A single eye through which consciousness pours and where past present and future are a single eternal screen of consciousness. These are the true seers and oracles.'

'At the level of the 17th Siddhi consciousness sees through you rather than you seeing through it. When the 17th Siddhi comes into the world it comes like a Divine afterthought. **It is one of the seven powers of Grace.'**

'It is where the body becomes an instrument for consciousness and there are no borders, levels, opinions or past lives, for the Siddhic level sees an endless fractal pattern of life – repeating over and over – the same but always new – the serpent eating its own tail.'

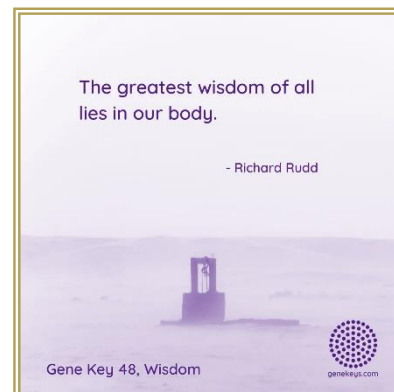

'This is a Siddhi that sees and knows only perfection.'

And Makemake, like Quaoar, both Dwarf Planets out in the Kuiper Belt, is said to be, by the traditions of the Rapanui of the Easter Islands, also a Creator God. Makemake is said to be the Supreme Divinity of Easter Island through oral tradition handed down from generation to generation.

Makemake on Gene Key 48 is activating the Collective Consciousness with the **Wonder of Uncertainty** moving through **Inadequacy** to **Resourcefulness** to **Wisdom**.

*'There is no darker place represented anywhere within human DNA than the 48th Shadow. **This Shadow gives rise to one of the deepest human fears – the fear that we are inherently inadequate.** The frequency that the 48th Shadow releases into the cells of your body emerges as a profound uncertainty about the future and your ability to handle it. The 48th Shadow seeps into our genes through a deep sense of emotional inadequacy. **The 48th Shadow is like a bottomless black hole.** It is the primal fear of the feminine.'*

'The secret of moving beyond the 48th Shadow lies in one word – Trust. As you learn to trust life on a broader scale the well begins to reveal some of its secrets. **First you must enter the well – by entering into this field of fear you slowly learn to stop being afraid of fear itself.** Instead of hiding from the darkness inside you it is as though you finally lower a bucket down the well and then pull it up to see what it contains. What you discover is a wonderful surprise – the well has all manner of solutions to all manner of challenges – **you will be amazed that so much Light can emerge from such a dark place.'**

*'The 48th Siddhi of Wisdom is one of the truly great Siddhis. Wisdom has been revered and sought by all cultures since the beginning of time. Most see Wisdom as some inner knowledge that allows the individual to see beyond the confines of normal awareness. **However, the 48th Siddhi opens up the void***

inside you and you enter into a primal state of not knowing. Everything about Wisdom is about being unsafe and unsecure.'

'There is a great difference between being insecure and unsecure – in insecurity we are looking for safety, for answers - to be unsecured means to be released from fear altogether. It means to have stepped through the Group Consciousness of fear and to be more secure than can possibly be imagined. No fear of death, no fear of life. Wisdom is feminine in essence deep and unfathomable. Water is a symbol for Wisdom because its nature is paradoxical – it is empty yet full, weak yet strong, resistant yet yielding. One who is truly wise is like water in all these ways – you are wise because you do not know you are wise, you are powerful because you do not care about power, you are fearless because you do not really exist!'

The Gene Keys that are activated by the Grand Cross are the major driving impulses at the time of this New Moon, but there are two other major planetary alignments occurring at this time. Firstly, the Kite formation is created by Hygeia ☿ Sedna, Uranus, and Pluto aspecting Makemake, Saturn, Neptune and Ceres.

Sedna is coming into her closest connection to the Solar System, and is aligning to Uranus, which suggests that all that has been created and gathered over this last 11,400 year cycle of Sedna are about to go through some radical change. Uranus is all about Freedom and Awakening. Uranus has little tolerance for complacency, or masks, but demands we act from Truth.

Sedna and Uranus are on Gene Key 20 moving through the Shadow of **Superficiality** to the Gift of **Self-Assurance** to **Presence**.

'The 20th Shadow concerns how deeply consciousness incarnates into a human form. In the case of the 20th Shadow very little consciousness can express itself at all, so that we see a very watered down reflection of life's real potential coming through human beings operating at this frequency. This aspect of the DNA is very ancient. The 20th Gene Key and its Shadow were developed in species that preceded human beings – primarily in the world of insects.'

'Looking at insects we can see how incredibly busy they always seem to be – their only focus is to stay alive and to reproduce within a short time frame. There is a blind activity occurring and like the insects, at a shadow level, human busyness lacks real presence. With the development of the neo cortex we began to think and a strange thing happens when we think – we leave the present moment.'

'With Self-Assurance comes a profound surrender to life in every moment. As you begin to accept that life has its own plans and flow, you also begin to stop interfering with the process at a mental level. This Gift is in fact the precursor to a higher state of spiritual awareness.'

'Your Self-Assurance is directly equivalent to your ability to escape being a victim of your mind. As you begin to learn the knack, you experience the subtle expansion of a meditative awareness – an ability to witness your mind without being caught up in it. An internal spaciousness grows and you no longer have to try to control life. What actually occurs with this Gift is that the awareness within your solar plexus begins to take over from your mind opening the way for you to connect into a very powerful Universal power.'

*‘Mythically the 20th Siddhi is represented by the notion of the Breath of God, or the Word of God. **Presence is the underlying nature of Being.** In fact, it would actually be truer to name this Siddhi, The Presence, since the use of the definite article gives us the distinct impression that this is a state of consciousness that has nothing to do with any individual. **It is the manifestation of The Presence through a human vehicle.**’*

*‘**The true Siddhic state is one of complete relaxation.** As you release deeper and deeper levels of tension, the high frequencies of The Presence force you to sigh until your body comes into a state of great ease. **Thoughts are irrelevant – there is nothing to say that is not superficial – for nothing is felt but the Presence itself.**’*

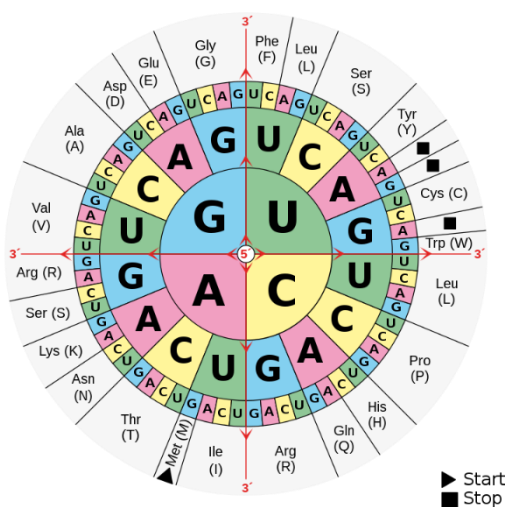

*‘When this occurs, the whole world created by the human mind is suddenly seen as utterly superficial. **The smallest thing such as a leaf or stone is understood to have more Life within it than all the greatest ideas of man.** When this Siddhi has flowered in a person it actually creates a subtle atmosphere around itself – a kind of silent ease that pervades the aura of the person and radiates out to all Creation. **The 20th Siddhi also relates to the eighth plane of reality, the true ground of our Divinity, known as the Logoic Plane.**’*

And Pluto, making a trine, a 120° angle to Uranus and Sedna and Hygiea, completes the Kite with Saturn, Neptune and Makemake. Pluto, the 1st Ray planet of Transformation, brings the intensity of this time – to activate the Aquarian impulse to bring about a realignment, a dismantling of any illusions and delusions that have been developed over the 2160 year Piscean Age based on victimhood. Pluto will remain on Gene Key 41 until March 2028 - so this is the powerful activation and focus of transformation for the Group Consciousness over these next years.

Gene Key 41, known as **The Prime Emanation**, evolves through the Shadow of **Fantasy** to the Gift of **Anticipation** to the Siddhi of **Emanation**.

*‘The 41st Gene Key houses a truly remarkable archetype. **It has a very important function – it relates to what is known in genetics as the start codon.** At the Shadow level the 41st Gene Key centres around the issue of fantasy and dreams – it is like holding the key to your dreams in your hands, but never turning the lock. **The evolutionary pressure that surges up in human beings carries our entire genetic history within it, all the way from the amoeba to Homo Sapien.**’*

*‘The 41st Shadow represents the pressure to evolve to seek out new fields and new experiences. This evolutionary impulse is the secret to the 41st Gift – the Gift of Anticipation. **The more the frequency of your DNA rises you become more and more sensitive to the hidden properties in the world around you, in particular, linking into the morphogenetic field that communicates specific information across time and space.**’*

*‘The 41st Gift gives the gift of premonition or Anticipation which links to its partner the 31st Gift of Leadership. The greatest leaders are those who build upon the past whilst anticipating what is to come. **The 41st Gift has a single genetic agenda – it is always attuned to the next evolutionary energetic grid that is waiting to descend into form.**’*

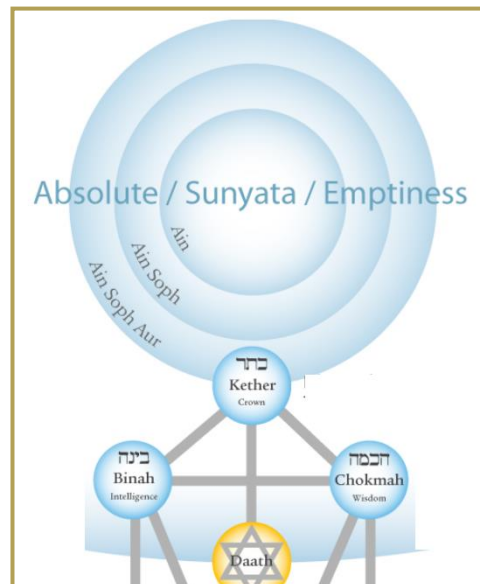

‘When you are able to maintain a high frequency through this 41st Gift you will be able to literally download all manner of beautiful things from the morphogenetic field.’

*‘Every start codon inside every single cell is electromagnetically linked to each other. **This is the foundation of the holographic body which in turn is linked to the holographic Universe.** The 41st Gene Key is the key to seeing that the physical body can equally be seen as a holographic mirror of the Universe.’*

'As the Source of Being the 41st Siddhi is the Siddhi of Emanation. Emanation ord that has been used by many ancient metaphysical and mystical systems as a means for understanding something that is really unapproachable.'

'One of the best known of these systems is perhaps the Kabbalah, whose central tenet is a map known as the Doctrine of Emanation. In a nutshell the Doctrine of Emanation points towards a fractal model of the Universe in which everything is a mirror image of itself.'

'The Cabbalists used the symbol of ten spheres or sephira, one emanating from another, to represent the various levels of Spirit descending into matter. The ultimate source, known as the Ain Soph, represents the unnameable, inconceivable, limitless Light from which all emanates. What is fascinating about the 41st Siddhi is that it is the Source underlying all true Siddhic states.'

'There is another interesting point that emerges from deep contemplation of this Gene Key. Somewhere deep within your DNA lies a code whose sole purpose is to trigger the state we call Enlightenment. In certain vehicles, the body picks up a specific set of secret genetic instructions and triggers the neurological process of enlightenment.'

'It may come as a shock to many mystical seekers that this process cannot be triggered by what we do up on the surface. Within the hologram of the Universe, Enlightenment is a spontaneous acausal non-event. You could say that Grace triggers this process, but the point is that no one knows why or when or to whom it will happen. It is an Emanation that simply arises from an unknown Source.'

Hygiea forms part of this Kite, and as shared in earlier Reviews, is the fourth largest asteroid in the Asteroid Belt. According to Greek myth, she was a daughter of Asclepius, the God of Medicine, and as one of five sisters representing aspects of health and healing, Hygiea's domain was preventative medicine: how to care for our physical and mental bodies to avoid illness, as opposed to curing illness once contracted.

Hygiea is currently in Gemini, which relates to how we treat our overall wellbeing, our mental health, and our central nervous systems, which at this current time, seems to be of major concern, as mental illness has escalated throughout the western world, particularly impacting the young. Without a greater awareness of the potential of what it is to be a human being there can be a sense of meaningless which eventually distorts and diminishes the vibrancy of Life.

Hygiea is activating Gene Key 16, known as **Magical Genius**, which seems a far cry from the current state of awareness, as this key moves through the Shadow of **Indifference**, to the Gift of **Versatility**, to the Siddhi of **Mastery**.

'Indifference is an energy field that gets you to focus your precious time and life force on the inessential. The inessential in this context is anything that takes your attention away from the present moment and its limitless potential.'

'There is a lethargy that leads to an inability to identify your inner dream and potential.'

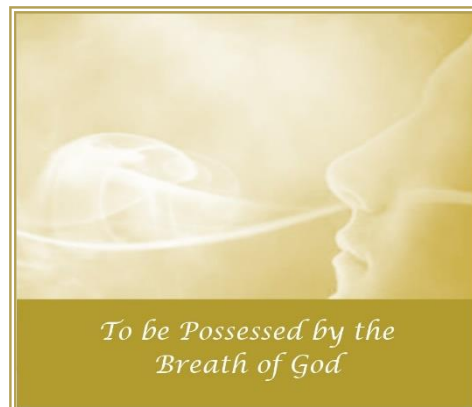

'Versatility is driven by the dynamic energy of enthusiasm – the feeling that you are doing something thoroughly enjoyable, which also happens to improve people's lives and serve the whole. Versatility is a frequency and at this level natural abilities emerge with ease. At the 16th Gift level of frequency something remarkable occurs – no matter what your personal genetic makeup, you can draw upon any of the 64 Gifts through the Morphogenetic field that links all states of the same frequency together.'

'The 16th Gene Key opens humanity up to so many creative possibilities. It is the domain of the polymath. A polymath is someone whose wisdom spans many different fields of knowledge and endeavour. A term coined in the Renaissance, when certain spirited individuals and geniuses dedicated themselves to higher

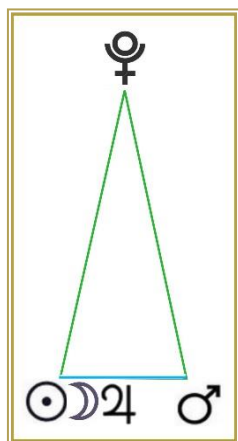

knowledge and understanding. **The 16th Gift learns holographically, using heart, body and mind all synthesised.** This Gene Key is about excellence. Once Indifference is taken out of the equation all the skill and natural talent can be used to serve the whole.'

'The great joy of Versatility is to spread your wings as widely as possible. At its height, the enthusiasm inherent in the 16th Gift also has its manifestation in the Siddhi where it shows its true nature.'

'Enthusiasm, deriving from the Greek meaning **'To be possessed by the breath of God'** floods the human being and he/she merges with Divine currents, shattering their identification with the world of form. The 16th Siddhi has an interesting connection to the 35th Siddhi of Boundlessness and on closer analysis one can see why. **As one of the Miracle Siddhis, the 35th Siddhi's sole purpose is to expand the average human's perspective on life exponentially.** The one who has attained this Siddhic level displays Mastery over Creation – their powerful actions, seen as miraculous, pull humanity out of Indifference.'

Finally, there is a Yod, or Finger of God, at the time of the New Moon, which has Mars ♂ in sextile 60° from the Sun, Moon and Jupiter, with Pluto at the apex of the Yod, 150° away from the four cosmic bodies. A Yod creates a very dynamic energetic which seeks synthesis and resolution through the planetary energy at the apex.

Mars, on Gene Key 59, links to our personal will, our ambitions, our ego, and this Yod is requiring that all of this personal drive, is aligned to a higher understanding, to a greater purpose, in service to the whole, as Pluto, Divine Will, is at the apex of this Yod.

Mars on Gene Key 59 moves through **Dishonesty to Intimacy to Transparency.**

'In looking at the 59th Shadow we see the essence of all the problems underpinning the social structures within our world. **The 59th Gene Key, the 55th Gene Key and to an extent the 49th Gene Key are the places within our DNA where a complete transmutation is currently underway.** This is the Shadow that makes the world a lonely place, despite the numbers of people there are around, as we rarely communicate with each other in real depth. **At the Shadow level Dishonesty manifests as a deep distrust of others and a core fear of relationships.'**

'The transformation of the 59th Shadow into the 59th Gift of Intimacy is the subject of many ancient traditions and prophecies. Intimacy may sound like a soft and cuddly kind of state, but the reality of the 59th Gift is somewhat different. **Intimacy presupposes honesty and acceptance of the Shadow state.** This means that the fears between the sexes must be acknowledged, understood and allowed to exist.'

'The sexual power of the 59th Gift is highly contradictory for it is both creative and destructive. **At the level of the human aura, it destroys any interference patterns that appear to separate people.** The power of human Intimacy is the power of two human auras interacting to create a third transformational aura, which sublimates the two original auras. The more differentiated the original auras are the more potential there is for transcendence. **An alchemical process within the solar plexus allows the two individuals to experience themselves as one awareness, through an opening of their heart centres.'**

Beyond the transmutation of the Shadow into the Gift lies a further transformation in which genetic mutations will take place within the brain chemistry of the pineal and pituitary glands. The ultimate role of the four Gene Keys, the 4th, 7th, 29th and 59th is to bring the human family into realisation of its state of higher union with all of Creation. The ultimate agenda is evolution – although the form of our world will continue to evolve, the Consciousness out of which it emerges can never and has never evolved. **Only awareness can evolve and it is evolving very quickly through the transformations and mutations coming through the 59th Gift and Siddhi.'**

*'When awareness has reached its ultimate expression it becomes a clear mirror for consciousness and this is what Transparency is. **It reflects life without any additional comment – the ability to look upon the world without Judgment.** This is the epoch we are now entering, in which the mutation of the solar plexus equates to the opening of our Planetary Heart Centre, when we once again remember that every man and woman is our genetic brother and sister and no single individual, family, tribe or nation is an island. **We are One.**'*

This Solstice and Cancerian New Moon are a pivotal critical time – may we be the **Still Point**, through which the **Presence** and **Emanation** of **Wisdom, Universal Love** and **Bliss** will enfold all Life as we anchor and initiate the Shift of the Ages.

All Love and Blessings
