'I AM' the Light Within the Form

There is much to cover in this Review, so it will begin as always sharing that the New Moon will take place at 21⁰ Cancer 59' on the 13th or 14th of July depending upon where you live.

Cancer is aligned to the Water Element, to the Feminine, linking to the Moon and to the unconscious drives of the mass consciousness. The Moon, as a satellite of the Earth, has an extremely strong magnetic pull upon the Earth affecting not only the tides but also our subconscious memory banks. Every 29.4 days we go from New Moon to New Moon. Each year, we experience 12.4 orbits of the Moon around the Earth and by the time each one of us is seven years old we will have experienced approximately 90 imprints of the thoughts and emotions of the group consciousness onto our individual psyche, from out of which our egos are born.

Most of humanity is still firmly attached to their instinctual responses, to their early family conditioning and experiences and to the unconscious drives within the mass consciousness, which are constantly reinforced through the Lunar cycles that circle around the Earth. As the Jesuits said, *'Give me a child till he is seven and I will show you the man.'*

At the personality level the Moon rules Cancer through the **4th Ray of Harmony through Conflict**, yet the Constellation of Cancer flows with the **3rd Ray of Active Intelligence** and the **7th Ray of Ceremonial Order and Magic** seeking to lift humanity beyond the limited fears and beliefs that are held within the mass consciousness. At the Soul level, the Cancerian is ruled by Neptune and the **6th Ray of Devotion**. At this level, the individual is not driven by like or dislike, by pain or by pleasure, but rather has become aware of making *conscious choices* that ultimately reveal and connect each one into Pure Universal Consciousness that underpins and flows through all Life.

This is particularly pertinent at this New Moon, for you will see that within a few days, on the 19th/20th of July, the Cosmos will be unfolding an exact planetary alignment between Pluto, Neptune, Uranus and Jupiter, known as a 'Basket', which every astrologer is presently speaking about. This particular Basket is profound because it aligns and activates three great outer planetary cycles simultaneously.

The Neptune/Pluto sextile is part of a 492 year cycle, which began in 1891/2 when Neptune and Pluto came conjunct in Gemini. This cycle is all about the transformation of deep unconscious collective belief patterns, and to opening the mind to previously unseen spiritual dimensions.

The Pluto/Uranus trine is part of an orbital cycle, lasting between a 115 to 140 years, which began this time around when they came together in 1965/6 in Virgo. These planets link to radical ideas, inventions and change, underpinning the birth of the digital age, the internet, space exploration and Artificial Intelligence.

The Uranus/Neptune sextile, has a 172 year cycle, which began when Uranus and Neptune came conjunct in 1993 in Capricorn, when the seed was laid for the qualities of the Higher Heart and Higher Mind to fuse, and to expand our awareness and consciousness in the spiritual/metaphysical/scientific worlds to bring about an understanding of the subtle realms held within quantum reality. Nothing is by chance, for the timing of this alignment announces that we have arrived at a point in our evolution when we have the capacity to transform beyond the Homo Sapien into the creation of the new Homo Sanctus.

We all have capacities far beyond what we imagine. We are larger than we know. Jean Houston

Looking at the New Moon chart first, at the time of the New Moon there is a Cardinal Grand Cross formed in the sky by the Sun ☉ and Moon ☾ on Gene Key 62, with Mercury ☿ opposite to the Earth ♁ and square to Pallas Athena ♀ and asteroids Echo and Hesperia completing the Grand Cross.

The whole message for the time that we are in is that we have to let go of the 'scripts', the mental thoughts, that have been passed down from generation to generation, which keep us in a limited perception of what it is to be a human being. This is expressed clearly in Gene Key 62 which is known as **The Language of Light** moving through the Shadow of **Intellect** to the Gift of **Precision** to the Siddhi of **Impeccability**.

'Like any of the human Shadows, the 62nd Shadow of Intellect is not inherently bad. Intellect is a wonderful quality if it is used correctly in the service of innate intelligence. Problems arise when we identify our lives with our thoughts, which we have been pre-programmed with throughout our upbringing.'

'Precision happens when natural intelligence strikes a balance between the heart and the mind, but with one caveat, that the heart, the feminine principle, is given control over life. The masculine principle, the intellect, then moves into service of the feminine principle, which is about intuition, listening and receiving rather than thinking, expressing and transmitting.'

'As the Gift of Precision grows stronger it may seem as though the world gradually begins to come alive again. Intelligence recognises intelligence and with the mind out of the way the invisible essence that connects all beings is once again felt.'

'The 62nd Gene Key is genetically coupled with the 31st Gene Key forming the codon known as the Ring of No Return. This mystical name describes the evolutionary process that takes place when higher consciousness reaches the throat centre.'

'The throat centre is where the greatest human initiation occurs. Once the higher involutionary currents begin to use our voice to transmit their truths, you begin a process of detaching from your own identity. The 62nd Gene Key allows access to the Universal Language of Light behind all forms.'

'The most common mistake we make is to believe that one who manifests the Siddhi state must now behave in some kind of holy way. However, Impeccability, simply means exempt from doing sin. Pure consciousness is at play within the being, so whatever they say or do is beyond reproach. All ego has left the vehicle.'

'The 62nd Siddhi concerns the use of language at a level beyond our ken. Every word has its frequency and vibration and the order and tone of your diction creates a certain aura. At the Siddhic level words do not come via the mind anymore – they are not thoughts that become words. They emerge directly from the void, naked and pure.'

'There is a Cosmometry behind life that choreographs all actions. The closer you come to full awakening the more harmoniously your life flows within this Cosmometry. When you finally merge into the ocean of consciousness you achieve complete oneness with the Divine.'

'Divine Cosmometry is the language of perfection. It is the manifestation of Impeccability in which your every movement and breath becomes an emanation of the Pure Light. You have entered into the Language of Light – the Impeccable Beauty of Being.'

Mercury, which is the planet of the mind, communication and mental processing, is conjunct the Sun and the Moon, at 19° Cancer on Gene Key 53, asking us to move beyond the Shadow of **Immaturity** to the Gift of **Expansion** and ultimately to **Superabundance** so that we may enter into a state of **Evolving Beyond Evolution**.

*'The Shadow of Immaturity is rooted in the human tendency to see ourselves as separate from each other and Nature. **The human mind has enormous difficulty seeing itself as a collective organism that is deeply embedded in Nature and the Earth.** This sense of separateness, of being alone, underlies the primal fear of death. At the Shadow level, this fear is an inner yoke bound to human intention and intention is like the arrow you load into the bow of your actions. **If the arrow is bent through fear it will miss its target.'***

*'The Gift of Expansion demands that individuals transcend their personal opinions, views and attempts to understand what is going on. Expansion is a process of transcending and including. **In a human being, the expansion of frequency can only occur in one way – through the heart.** The 53rd Gift has the quality of bhakti or devotional energy. As you allow awareness to expand it opens your heart. **You see the evolutionary impulse in all of life – all interconnected – all one.'***

*'To one who has awakened through the eyes of the 53rd Siddhi humankind is both a Being and a Becoming. **The form endlessly evolves awareness and expands, but the Consciousness never changes.** And here we humans have made a basic error – we have identified with the instrument of our awareness, which expands according to the Laws of Evolution.'*

*'We are indeed entering a new evolutionary phase right now in which human awareness seems ready to make a great quantum leap in terms of its expansion, but even though awareness may expand, **Consciousness does not expand since it is already everywhere and everything and even everywhen.** This is the crucial truth to understand. **Beneath the form, Consciousness never changes or evolves or expands or contracts. It simply is.'***

*'Superabundance is a space beyond frequency, but we can only describe it as a very high frequency at which there is nothing left to do in the world. **The 53rd Siddhi represents the state beyond and behind awareness known as Pure Consciousness.** This Gene Key links to the Ring of Seeking, but at a certain point you have to let go of seeking as the awareness inside expands outside the form. **At this stage known as Enlightenment the great and final leap occurs – the leap into Pure Consciousness - the end of evolution itself.'***

Exactly opposite to Mercury, at 19° Capricorn, on Gene Key 54, the asteroid Echo is to be found, which is appropriate, as for generations we have simply been echoing the scripts that have been agreed upon by group consensus.

At the shadow level, Echo touches upon the core human struggle with identity boundaries. It is the signature of self-effacement, where the individual's internal script is hijacked by external narratives, so that communication is defined by mimicry rather than originality.

Understanding Echo is crucial for identifying repetitive life patterns, those cycles of thought and behaviour, that seem to replay in a loop again and again.

At a higher resonance Echo is about finding the internal authentic voice, being unafraid of speaking truth and when harnessed effectively, the energy of Echo transforms repetitive cycles into conscious patterns, enabling the Soul to break free from past limitations articulating what resonates only with their authentic, original frequency.

Echo on Gene Key 54 is known as **The Serpent's Path**, moving through **Greed** to **Aspiration** to **Ascension**.

*'The primal energy behind the 54th Shadow was essential for the survival of early human tribal cultures. **This means that at a certain evolutionary point, Greed will have served its purpose and will need to be transcended.** If Greed is pursued to its furthest limits without transcendence, it becomes self-destructive, for it focuses solely upon power, status, recognition, wealth, and material gain. For many who attain material success, it acts as the trigger to seek something higher, but for many, it remains an addiction preventing them from enjoying the beauty that surrounds them.'*

*'When the 54th Shadow transforms into a higher frequency the **Gift of Aspiration** is born. Aspiration here refers to the energy to aspire to something beyond the material realm. Aspiration contains within it the seed of all Higher Consciousness. At the Gift level, Aspiration has to do with working for others for the benefit of others. The 54th Gift aspires to a higher vision of prosperity. **These Souls want their entire community to thrive in order that they can draw more and more people up the hierarchy away from the self-destructive patterns of the lower frequencies.'***

'As the energy of the Gift of Aspiration reaches higher frequencies it becomes Spiritual. Thus, these people also understand energy flow and transformation – the flow of prosperity is directly proportional to the flow of energy at all levels within your life, beginning with your own body, which is the foundation of all journeys into Higher Consciousness.'

*'The 54th Siddhi Of Ascension is a very particular path. **It concerns the transformation of the gross currents within the body into more and more refined currents – the continual alchemical transformation of matter into Spiritual essence.'***

*'True Ascension is activated automatically through the lower frequency of Aspiration. At a certain point a spontaneous physical transformation begins to wrack the body. **The process of Ascension takes over and you cannot stop or interfere with it.** All personal cultural and genetic memory is burned from the body.'*

*'Kundalini is likened to a fire – a liquid fire which burns the water molecules within the physical body vaporising them to create a steaming process in which spiritual essence is refined. After a certain period of time, sometimes spent in physical agony, stillness reigns over the body and you experience the purity of consciousness without thought. **This process continues until the physical body becomes more and more translucent.** One aspires and sooner or later one Ascends.'*

The final two asteroids in this Cardinal Cross are Hesperia and Pallas Athena. Hesperia, a nymph or Nature Deity from ancient Greek mythology, was one of the guardians of the Golden Apples of Immortality at the western edge of the world. She embodies the clarity and wisdom that emerge through life's experiences, often later in life or at the completion of a long journey. Her presence speaks of a time of harvest, inner transition, and the quiet search for peace as one cycle comes to its natural conclusion and another begins.

Activating Gene Key 57 known as **A Gentle Wind**, the group collective is passing through the Shadow of **Unease**, to the Gift of **Intuition** ultimately revealing the Siddhi of **Clarity**.

*'As the foundational aspect of the Ring of Matter, the 57th Gene key governs the cycle of gestation. Your genes build your body at the frequency of the energetic field in which your mother lives. Therefore, every mother plays a crucial role in the biological, emotional and mental structure of the child. **The mother is actually a co-creator of the incarnating child, and every thought, feeling and impulse running through her being will direct the DNA within the foetus.** This obviously puts a huge responsibility on pregnant mothers and has significant implications concerning the transformation of our species through deep honouring of the mother and of the importance of her role during pregnancy.'*

*'The 57th Gift of Intuition is basically your body's system for interacting harmoniously with the outer world. Here you experience a deeper sensitivity to everything and everyone around you. **You are able to make positive use of the natural guidance system known as the 6th sense or intuition.'***

*'Trusting your instinctual awareness, you are able to perceive beyond the physical senses. Now you are using intuition as your most innate and powerful compass. **You are attuning yourself to the gentle and subtle voice within and living with greater ease and flow.'***

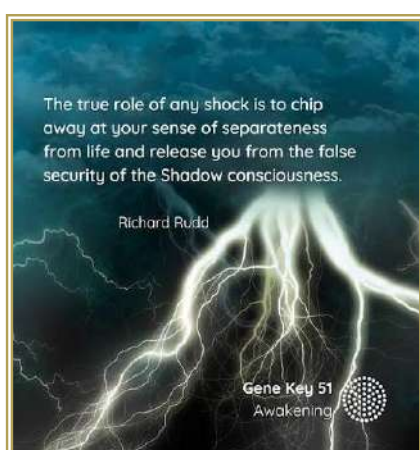

*'The essence of gentleness is one of the greatest secrets to life. **Consciousness is the gentlest most subtle phenomenon.** Clarity is about seeing this softness at the heart of all things. When you live your life in harmony with this softness you come into accord with what the ancients called the Tao – the transcendence of the opposites.'*

*'This 57th Siddhi like all the Siddhis, contains the mystery of the Feminine principle, even though it is beyond duality itself. **This Siddhi holds the secrets of miraculous healing through its special ability to attune to the subtleties of physical DNA.** When someone attains enlightenment through this 57th Siddhi it manifests through them in an extraordinary and beautiful way – **they become a tuning fork for the Divine Presence.'***

And Pallas Athena is known as the Goddess of Truth - during ancient Greek times Vestal virgins channelled messages from Pallas Athena and Vesta at the Oracle of Delphi for over 700 years. Athens was named in her honour and from higher dimensions she remains the Guardian of Cosmic Laws, Wisdom peaceful resolution, and the protectress of civilized communities.

Activating Gene Key 51 we are being guided through the Shadow of **Agitation** to the Gift of **Initiative** to the Siddhi of **Initiation**.

*'At certain points in our journey we move through Initiations – periods of intensity in which we undergo huge transmutations. **True Initiation is not something that can be predicted or ritualised. It is a natural part of life itself as it evolves.** Neither does it require any learning, or religious or spiritual affiliation.... The great Initiations are upsurges in the frequency of our subtle bodies, and when we pass through them, they are often dramatic and challenging to integrate.'*

*'**No one knows when an awakening or initiation will sweep through our being.** It is always a shock and this 51st Gene Key is a thunderbolt. What is the quality most needed in order for us to move through one of these portals – Love, Truth, or Wisdom? Yes all of these, but even more so gentleness and softness. This insight is confirmed in the Programming Partner of the 57th Gene Key.'*

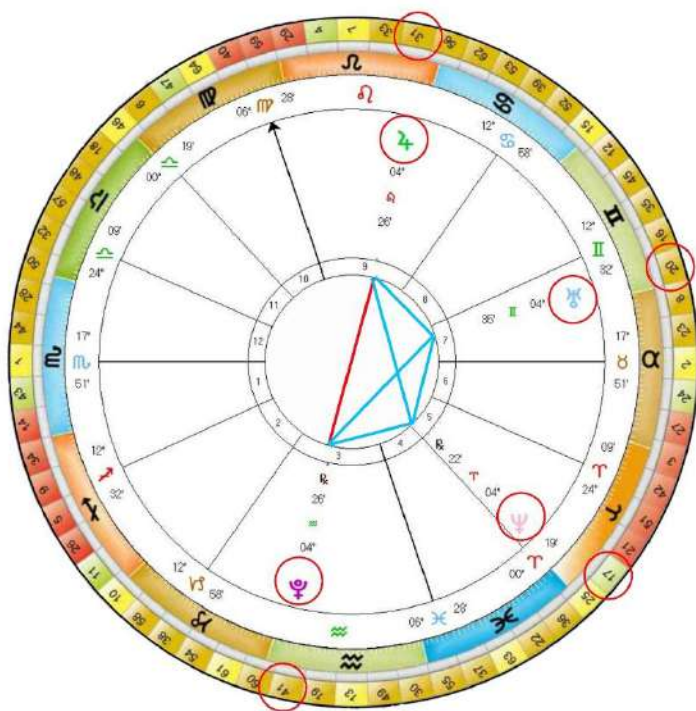

*'**The 51st is the shock of thunder while the 57th is the softness of the Gentle Wind.** To meet thunder we need to be soft, pliant and yielding. **Awakening is really a series of softenings.** Our Awareness becomes more one pointed, but our heart and mind become softer and more open. Instead of tensing up, we need to soften and become milder. **Mildness is the essential quality needed to allow spiritual Initiation.'***

*'The 51st Gene Key is part of the Ring of Humanity and this Gene Key ensures that one day all of Humanity will awaken. In times to come this Siddhi will begin to awaken entire gene pools. **There will come a time in which relationships will awaken, then families, then entire communities until finally humanity will awaken as an individual Cosmic Being and will see its own true nature.** That single moment when humanity opens its true eyes for the first time will be the greatest single event in the history of Awareness itself.'*

Now to the second chart - the Minor Grand Trine of Uranus Neptune and Pluto, which has been covered in some detail over the last few months, came into an exact alignment on July 7th at 4⁰ Gemini, 4⁰ Aries and 4⁰ of Aquarius, which will remain in place until July 31st.

On the 18th of July a few days after the New Moon, Jupiter moves to 4⁰ Leo, linking together with Uranus Neptune and Pluto to form a 'Basket' formation. This chart is for the 20th of July when Jupiter comes exactly opposite Pluto at 4⁰ Leo 26'.

If you are interested in reading the Gene Keys that relate to the positions of Uranus Neptune and Pluto you will find them in a separate attachment, but for this chart, we will be looking at the Gene Key for Jupiter and also the Sabian Symbols for Jupiter, Uranus, Neptune and Pluto to give an insight into the breadth and scope of what is unfolding.

Jupiter on Gene Key 31 is known as **Sounding Your Truth** moving through **Arrogance** to **Leadership**, to **Humility**. Gene Key 31 is the programming partner of Gene Key 62 forming the Codon Ring of **No Return**.

*'We are 'programmed' by the language and thoughts that we have inherited. These thoughts and language keep us confined within a narrow spectrum of intellect and understanding of what our true potentials are. **Real Arrogance comes from being cut off from our Divine Source.** Words that are not rooted in a profound sense of wonder are always to some level arrogant. Only the human heart can truly offer an answer to the mystery of existence and unless your words carry the perfume of love somewhere behind them, they are still wading around in the Shadow frequency.'*

'The 31st Gift, like all the Gifts, represents a huge step beyond the intellect and into the heart. It is the heart that separates the Shadow frequencies from the Gift frequencies and in our current stage of evolution the heart is the hottest frequency there is. Only the heart really perceives the collective suffering that comes from being marooned in your intellect at the Shadow frequency. Because the 31st Gift has its finger on the pulse of the collective patterns of humanity, it can have enormous influence over large numbers of people. Certain human beings operating out of the 31st Gift can literally become the voice of the collective.'

*'Humility is not for the faint-hearted. It is therefore ironic that Humility is a word that has come to be associated with people of a saintly or virtuous manner. **But Humility has nothing to do with behaviour.'***

'Because the 31st Siddhi is truly humble, it has no agenda. It does not matter what such a person does in life. They are content to leave the world exactly as it is. Nonetheless such a person still carries the same genetic coding that requires they speak from the cutting edge of consciousness.'

'The 31st Siddhi is rooted in the ancient tradition of the Oracle. The Oracle is simply a voice box for the Divine. The Ring of No Return refers to the great initiation from the 4th Causal Body into the 5th Buddhist Body. Once this leap of consciousness has been made, there is no possibility of return because your identity or ego will be erased.'

'Once you have allowed the Siddhic frequency to command your voice, you have entered the first stage of Divine embodiment. From this moment forwards, whenever you use the word I, it is the voice of Divinity itself speaking. Such speech is pure transmission. It uses words to indicate the path beyond words.'

'Life is about letting go, the spiritual life even more so. To live life right out of the fires of our heart, we will be humbled and humbled over and over. This is the beauty of a life lived at that level of consciousness. We enter another dimension. We learn to bow to life, not out of resignation, but from deep trust.'

Looking at the Minor Grand Trine of Uranus Neptune and Pluto, we are looking at vast cycles of time that have occurred over millennia, and so to get an insight into the potentials of this alignment, the Sabian Symbols by Dane Rudhyar, have the potential to offer such an overview.

If we first look first at the symbol for Jupiter on Leo 4⁰ we find the image of **Rock Formations Tower Over a Deep Canyon** with a Keynote of **The structuring power of elemental forces during the long cycle of planetary evolution.**

'Dwarfing the time allowed to individual human beings, the vast period of geological evolution not only awe our imagination but allow the slow yet magnificent work of elemental forces as they mold landscapes and canyons, rocks and mountains. This symbol points to our need to acquire a much vaster perspective on what we are able to do and our yearning for prolonged youth and our pride in masculine achievements. The works of nature should make us feel humble and help us to 'planetarise' our consciousness.'

The Keyword for this symbol is **Impersonality**

The image for Pluto on 4⁰ Aquarius is **A Council of Ancestors is Seen Implementing the Efforts of a Young Leader** with a Keynote of **The Root foundation of past performances which power and sustain whatever decision is made, in a crisis, by an individual.**

'The whole past of mankind stands behind any individual effort, especially in times of critical decisions...Every individual is far more dependent upon the strength of his ancestors' achievements – or oppressed by their failures and lack of vision – than usually believed. This can mean a hidden foundation of individual strength, or the inertia of a tradition unable to transcend its limited origins.'

The Keyword for this symbol is **Reliance Upon Precedents** in order to tap the deepest roots.

The image for Uranus on 4⁰ Gemini is **A Revolutionary Magazine Asking for Action** with a Keynote of **The explosive tendency of repressed feelings and root emotions.**

'Every movement overstressing one direction calls forth in time an equally extreme movement in the opposite direction. This is particularly true at the level of the dualistic mind symbolized in the zodiac by Gemini. What is rigidly bound in form and convention tends to explode into formlessness. It may do so violently, if socially oppressed through revolution or, at the psychological level, in psychosis; or it may withdraw inwards into the mystical state in which one identifies with a nameless Reality.'

The Keyword for this symbol is **To Reach Beyond Established Forms.**

And the image for Neptune on 4⁰ Aries is **A Triangle with Wings** with a Keynote of **The capacity for self-transcending.**

'This is the symbol of the desire to reach a higher level of existence, of pure aspiration or devotion, of bhakti. It represents self-transcendence and the innate human desire to rise above worldly concerns. It signifies an elevated perspective, spiritual inspiration, and the capacity to lift your awareness beyond ordinary situations. At this stage the whole being experiences a childlike longing for its eventual realization.'

The Keyword for this symbol is **A New Dimension of Being**

These four images invite us to remember our profound interconnection with the vast intelligence of the Natural World and the Elemental Kingdoms that have shaped and sustained our earthly home. They remind us that we are not separate observers of life, but active participants within the great evolutionary cycles that unfold across vast expanses of time. For all of humanity's technological achievements, they remain but a small expression when set against the immeasurable wisdom and over-lighting Divine Design continually unfolding throughout the Galaxy and Beyond.

This is a profound month of planetary alignments - may we soften and blend into this Sacred Cosmic time, allowing **Clarity** and **Impeccability** to emerge through the quiet **Humility** of our Being. As we realign with impersonal, intuitive knowing, we will come naturally into harmony with God, Universal Source, and the Elemental Kingdoms, remembering that we are the living bridge of **Ascension** through which a new humanity is being born.

All Love and Blessings
