Gemini New Moon 2026

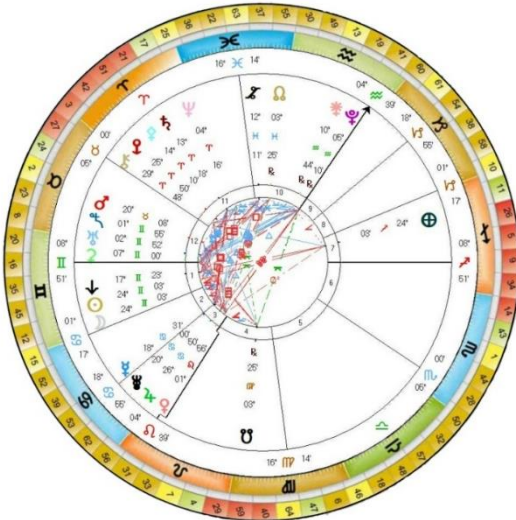

Walking. I am listening to a deeper way. Suddenly all my ancestors are behind me. Be still, they say. Watch and listen. You are the result of the Love of Thousands.

Your life is a Sacred Mirror reflecting the stories, the strengths, the unresolved wounds, and the hidden gifts of the generations who came before you.

'I AM' the Light of Interplay

The New Moon takes place at 24° Gemini 03' on the 14th or 15th of June, depending on where you live. This is the first New Moon in Gemini, marking the seven-year cycle of Uranus in Gemini, which is presently unfolding, so this chart in many ways underpins and sets the tone for this Uranian Cycle.

Every 84 years Uranus is in Gemini – Uranus is the higher vibration of Mercury and with its heightened impulses is the planet of innovation, breakthroughs, and revolution. Mercury rules Gemini, and so Uranus, quickens the mental processes, which have been responsible for so many inventions and discoveries. Over the last four centuries Uranus has transited through Gemini five times. So, what can be learnt from these previous cycles?

During 1606 to 1614 the Polish Russian and Swedish wars were raging - Europe was continuing to colonise North America, Canada, and Central America, whilst science underwent an explosive growth moving from metaphysical and philosophical beliefs to what is now called Empirical Science - Galileo's invention of the telescope radically changed the view of our Solar System and created a total schism with the church.

The next four transits unfolded in a very similar pattern. 1690-1698 saw the European 9 Years War, as the scientific revolution grew apace. During 1774-1782 the American War of Independence raged whilst the early stirrings of the Industrial Revolution was a time when concepts of freedom self-determination and technological progress began to shape society.

By the time we get to 1858-1866 the American Civil War erupted in America and it was also one of the most transformative periods of scientific discovery in defining biology, physics, and medicines - the publication of Charles Darwin's theory of evolution was then sealed into our consciousness for the next 200 years. By 1941 through to 1949 we saw the climax of the Second World War and the reshaping of the Post World War, with the birth of early computing technology that would eventually transform every aspect of our modern-day life

These Markers in Time clearly reveal humanity's capacity for both invention and conflict. What is not so clear to see is what is going on internally - the stresses in the psyche which produce both eureka moments and equally aggression. Gemini rules communication, the central nervous system, and the Vagus nerve. In Holistic healing traditions, the Vagus nerve functions as a living archive that responds to how previous generations navigated life, the trace encodements stored within the cellular system. Esoterically, these inherited imprints are felt in the solar plexus as 'gut-level' instincts and reactions coming from the storehouse of ancestral lineage, which is stimulated when Uranus is in Gemini.

Gemini, The Twins, speaks of the visible and the invisible, the physical body and the etheric body, the personality and Soul, beyond which lies Monadic Consciousness - the enduring Essence of Being that moves through time and space unencumbered by form. So, as we enter this new Uranian cycle in Gemini, our greatest invitation and gift, is Stillness - not to simply accelerate technology, but rather to deepen our understanding of Consciousness, and the Soul, so that we may integrate the Truth of Ancient Wisdom into an increasingly technological world.

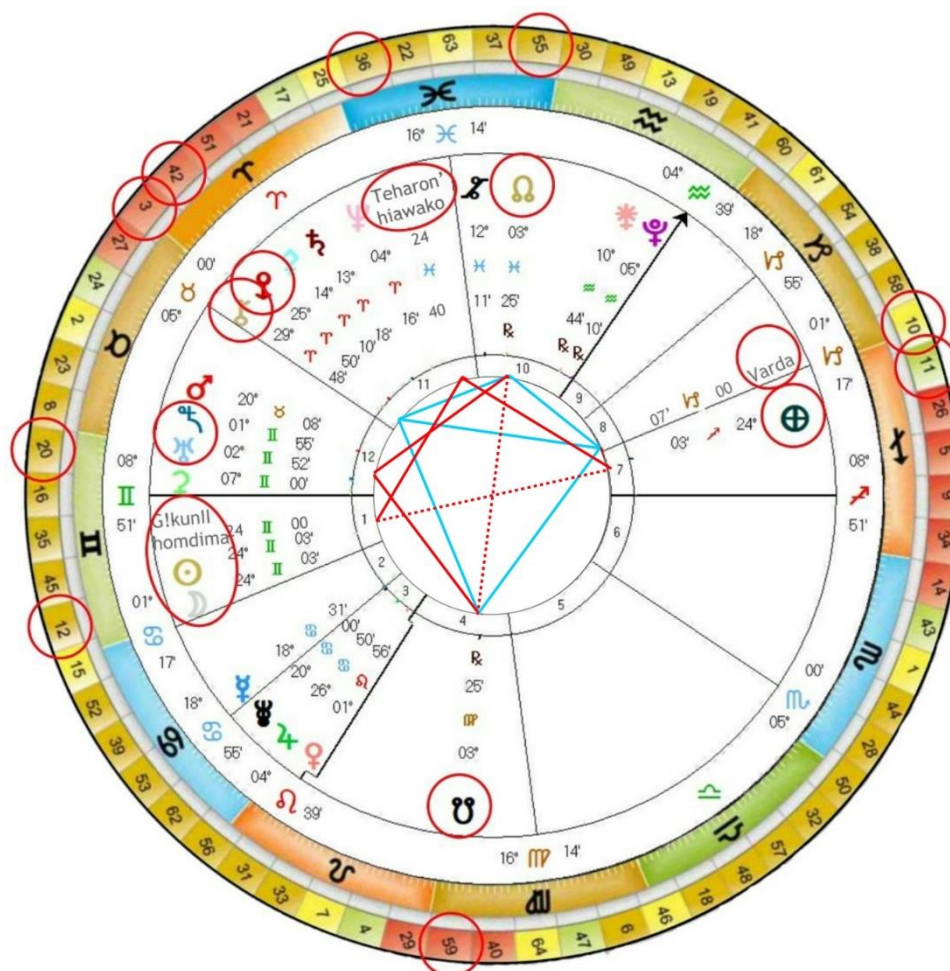

Some four hundred years after the invention of the telescope four human beings returned to Earth in April this year, from their travels around the Moon with one Heartfelt message for all on our beautiful planet. A message of Unity, Love, and Joy. May these qualities be the foundation for all our actions as we begin this seven-year cycle, and may it also reveal the Monadic Consciousness that has no need to travel by spacecraft!

To the mind that is still, the whole Universe surrenders.

If Uranus in Gemini is all about discoveries, and the expansion of consciousness, then this chart reflects this back to us, for at the time of this New Moon the Sun ☉ and Moon ☾ are at 24° Gemini with two Trans Neptunian Bodies, G!kunil'homdima, and Teharon'hiawako making an exact T square to the Sun Moon and Earth ⊕ (red lines) whilst Varda creates a Kite with the North South ♀♂ Nodes Chiron ♄ and Eris ♀ (blue lines).

Trans Neptunian Bodies behave like generational influencers, and newly discovered TNOs are often linked to profound shifts in human consciousness, as they link to the deep outer edges of Galactic Consciousness, and equally to primordial memory, much like Pluto, Eris, or Haumea. As their naming suggests, these TNOs resonate with deep indigenous, innate awareness, before the 'left brain' took on such prominence within our cultures. According to Philip Sedgwick the long orbital duration or 'gestation period' of TNOs is intended to be creation-oriented, resurrection-based and ultimately, spiritually uplifting.

We will look at their archetypal message and essence separately, but first looking at Gene Key 12, where the Sun and Moon are, Gene Key 12 is known as **A Pure Heart** moving through the Shadow of **Vanity** to the Gift of **Discrimination** to the Siddhi of **Purity**. At the time of the last New Moon in May, Venus, who had transited across Uranus and Sedna earlier, was activating this key in preparation for this New Moon.

'This 12th Gene Key, along with the 56th and the 33rd, is related to what science terms the stop or terminator codons. On a purely archetypal level, the three stop codons - known collectively as the Ring of Trials - can be seen as three great mythic trials that test human beings on their road to self- realisation. The 12th Shadow of Vanity marks the inner core of the Ring of Trials, which means to say that this Shadow state represents the third and final aspect in this trilogy of human tests.'

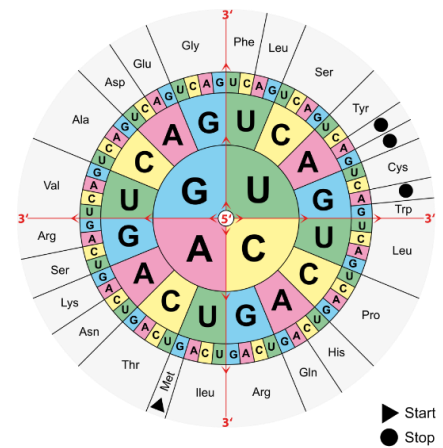

'Vanity is the first human vice and the last one to go in the advancement of consciousness. The Shadow comes from a false sense of independent power fuelling a fear-based belief that, coming from the heart, will result in a loss of power. This Gene Key Shadow allows you to progress to great intelligence and artistry, but at the same time prevents you from stepping into your wider heart.'

'Where Vanity is about only loving yourself, Discrimination is about loving the things and people outside yourself that are healthy for you. This 12th Gift is about feelings. If this Gift is a powerful aspect of your hologenetic profile, you will be strongly motivated and moved by feelings and emotions throughout your life. Your Gift is to communicate these feelings to others, and you may do this in a myriad of ways.'

'Wherever you see true passion moving into the world, there you are seeing the influence of this 12th Gift. It is both sweeping and consuming yet at the same time highly refined. The 12th Gift contains the teachings of transformation and death – the movement from one level of consciousness to another.'

'Of all the Gene Keys this 12th Gift represents the mythic passage from one state to a higher state in which the stop codon kills your identification with your past, allowing you to be transformed; through tears and laughter, the transcendent enters your body and alters your chemistry leaving you radically and permanently altered.'

'With Vanity, your lower self falls in love with itself and with Purity, the Higher Self falls in Love with itself. You might say that Purity is when the Divine falls in Love with You. Your behaviour, your thoughts your feelings, the very air you breathe must resonate to one purpose – falling in Love with the Beloved. The Beloved is the Essence of your true Nature.'

May Purity shimmer in our bones filling us with the Light of Ancient Stars

Gene Key 12

'Everything in the Universe has at its core the same original Purity – we are all shards of a Divine crystal and as our forms go through their processes of polishing, so consciousness begins to remember itself through us. In the ancient alchemical systems, the throat centre was seen as the greatest of all initiations. All the lower chakras including the heart are synthesised and purified in the throat. In this respect, it represents the boundary of the known and unknown. It is the abyss or Da'ath of the Kabbalah.'

'The Being who has passed through the abyss and entered the sphere of the 12th Siddhi becomes once again like a child. It is the ultimate purification in which you meet your own death and are reborn in a higher sphere – into the Sphere of Divine Love. You are so pure that it is not possible for you to exist as anything other than existence itself. In crossing the great Cosmic Throat centre, you are swallowed by Life itself.'

At the time of this New Moon, the Earth is on Gene Key 11 known as **The Light of Eden** evolving through the Shadow of **Obscurity** to the Gift of **Idealism** to the Siddhi of **Light**.

'The 11th Gene Key will open you to a whole new world — the world of Light. This Gene Key concerns human vision — both internal and external. The 12th Gene Key along with its Shadow and Siddhi is one of the most extraordinary and far-reaching archetypes in the human genetic matrix.'

'In the world of the 11th Gift, everything is a symbol of the endless pattern of the great archetypes moving from the world of the formless into the world of form — from the past into the future via the vital artery of the present. As we humans begin to think once again with our right brains, so we will bring much-needed balance to the world of form. The result will manifest in the world around us as the dominance of the patriarchal forms subsides, and the power of the feminine pole comes into balance with the male.'

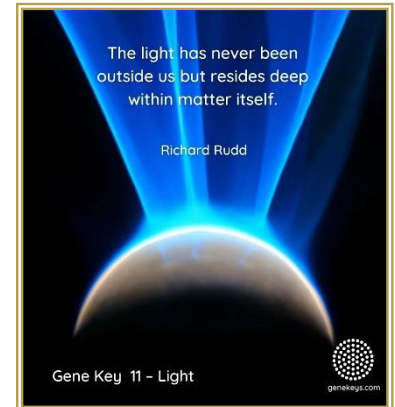

*'This is the true meaning of the time we are living through. **It is why so much ancient tribal knowledge is once again pouring into the collective consciousness of our planet.** It is through this 11th Gift that the true art of magic is once again returning to our world.'*

*'**Idealism represents the steady flow of archetypal memory into the world of form.** As long as it is allowed free movement, it will manifest your dreams in the world. One of the trickiest things about your dream is that you never know what it will become as it emerges into the world of form. You only know the feeling that it stirs deep inside your heart.*

*'Your mind conjures visual images around your dreams and ideals, and this is where potential blockages to the flow arise. You must believe in the power of your dream and at the same time you must give up what it looks like. **Every image, archetype or mythical experience you have or see is a part of the river moving from the past towards the future and vice versa.**'*

'Because of this, the real essence of the 11th Gift is the ability to play with the archetypes that pass before you and into your life. This very playfulness loosens your tendency to try to tightly grip your experiences.

Through the 11th Siddhi you will see the true nature of mind as emptiness or spaciousness, and that mind or no-mind is experienced through the brain as pure Light.'

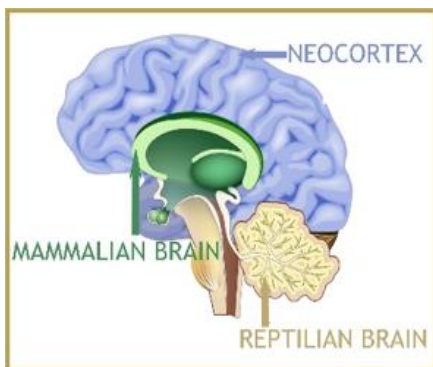

'Light itself is seen as a metaphor within the world of form for the radiance of the Divine presence. The Light of the 11th Siddhi is nothing like the light that our eye perceives, although that is the closest words can come to conveying it to those outside of the Siddhic state.

*'**With the Light comes an ineffable breath of Peace that continually breaks like a wave from within every single viewed form.** What was viewed as magical from within the Gift level of frequency is now seen as the nature of reality. **For the being that attains the 11th Siddhi, Light is everything.** They appear enrobed in Light because that is all they can see. If they become teachers, which is more than likely given their understanding of the mind, they continually reflect their own light but at the same time guide others into their own darkness.'*

Sedna ♄ and Uranus ♅ form another T square with the Nodal Axis (red lines), inviting a profound meeting between past and future. As Sedna returns on her 11,000-year journey, she carries the memories of ancient Golden Ages, alongside the wounds and experiences accumulated through vast cycles of time.

Uranus acts as a catalyst for awakening, helping to release these ancestral imprints through each of us. In this sense, we are living 'clearing stations' for the past. As the mind, heart and solar plexus come into greater coherence, the nervous system settles, allowing for a calm and stabilising Presence amidst the uncertainty and rapid changes of our times.

Uranus and Sedna are activating Gene Key 20 known as **The Sacred Om**, moving through the Shadow of **Superficiality** to the Gift of **Self-Assurance** to the Siddhi of **Presence**.

*'**This aspect of the DNA is very ancient.** With the development of the neocortex we began to think and a strange thing happens when we think – **we leave the present moment.** The illusion occurs because the mind can only think in a linear fashion. This is the trade-off of the incredible abilities of the mind – **for all its genius it is limited to thinking within the domain of a false reality called Time.**'*

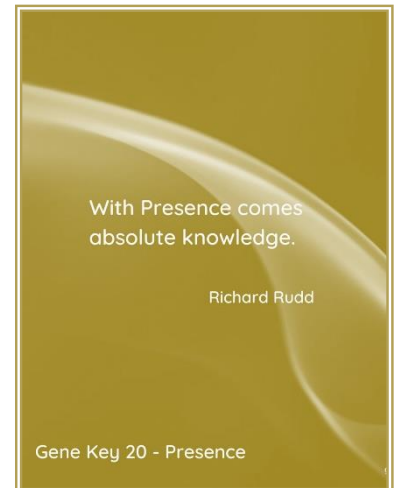

*'Your Self-Assurance is directly equivalent to your ability to escape being a victim of your mind. **As you begin to learn the knack, you experience an ability to witness your mind without being caught up in it.** An internal spaciousness grows and you no longer have to try to control life.'*

*'**What actually occurs with this Gift is that the awareness within your solar plexus begins to take over from your mind, opening the way for you to connect into a very powerful Universal power.**'*

*The true Siddhic state is one of complete relaxation. Thoughts are irrelevant – there is nothing to say that is not superficial – for nothing is felt but the Presence itself. **When this occurs, the whole world created by the human mind is suddenly seen as utterly superficial.***

‘When this Siddhi has flowered in a person it actually creates a subtle atmosphere around itself – a kind of silent ease that pervades the aura of the person and radiates out to all Creation. The 20th Siddhi is the notion of the Breath of God, or the Word of God.’

‘Presence is the underlying nature of Being. ‘It would actually be truer to name this Siddhi, The Presence, since the use of the definite article gives us the clear impression that this is a state of consciousness that has nothing to do with any individual. It is the manifestation of The Presence through a human vehicle.’

As for last month, the North and South Nodes continue to activate Gene Keys 59 and 55. These Keys are fuelling the immense biological shift that is underway as we clear the old imprints. The South Node on Gene Key 59 is known as **The Dragon in your Genome**, moving through the Shadow of **Dishonesty** to the Gift of **Intimacy** to the Siddhi of **Transparency** and the North Node on Gene Key 55 known as the **Dragonfly's Dream** moves through the Shadow of **Victimhood** to **Freedom**.

‘The 59th Shadow demands that we do some deep inner spring cleaning and it is not a comfortable process. But take heart, because now is the time of the great cleansing of the human wound. Right now the 59th Gene Key is mutating. It is paired with the 55th Gene Key – the 55th Gene Key explains the nature of the Great Change, this transitional period we are living through, in which humanity is moving through a huge deep genetic change. The 59th Gene Key is instrumental in this process. It is dismantling us, opening us up so that we can become an empty vessel for the new, for a new functioning, a new human.’

‘The 55th Gene Key holds the key to our liberation and Freedom. Our DNA holds our greater Self – the Cosmic part of each of us that transcends our mortal body has lain secretly hidden inside humanity for aeons. The 55th Gene Key allows us to contemplate and to quicken the actual process of awakening. Up until now, the inner journey has been for the select few – those bold adventurers and courageous pioneers of the inner planes. But that is all about to change.’

‘There is a place inside our DNA whose sole purpose is to trigger this awakening. There is no more poignant nor contemporary note sounded than the underworld journey from victim mentality out into the pure air of Freedom.’

‘Of all the Gene Keys, this 55th Key is the one we humans most long for and this is the Gift we will soon be given at a collective level. As we begin the process of transcending our Shadows, miracles can occur in our lives’

‘The Time of the Great Change is now upon us. As the Fifth Root Race prepares to give way to the Sixth Root Race. The 6th Root Race will be triggered through the 55th Gene Key and its mutation within the Solar Plexus centre, the seat of human emotion.’

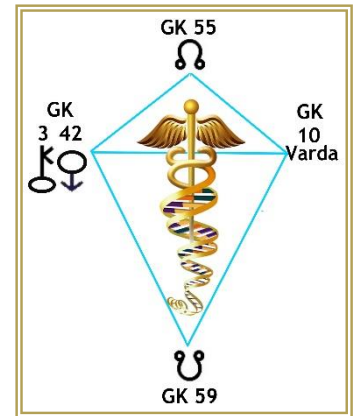

‘The Sixth Root Race heralds the reawakening of this centre and will allow human beings to experience once again the Universal Quantum field connecting all beings. This reawakening is not a retrograde movement into a past Golden Age but a new integration of the three lower planes, the physical, astral and mental into their higher counterparts – the Causal, Buddhic and Atmic.’

‘Down the centuries much has been written, spoken and taught concerning the nature of higher consciousness. We are now entering an era in which more and more people will have direct access to an experience of true higher consciousness. There will be a genetic mutation that will slowly colonise our species.’

'The old human will literally be bred out of humanity. This vast and dynamic change is being triggered by this 55th Gene Key and its related amino acid histidine. Soon there will be children born among us who carry the full mutation and who will spread it through the gene pool.'

'We stand on the cusp of a Siddhic supernova – the incarnation of the Divine Feminine Spirit. The end result of this in flowing of the Divine Feminine will result in the purification of all the fractal lines throughout humanity, resulting in a burning up of the collective karma in our DNA and the eventual eradication of all disease on the physical plane.'

Chiron ♄ and Eris ♀ remain together in the sky, on Gene Keys 3 and 42, and they form a Kite formation with the North and South Nodes too, and also Trans Neptunian Varda.

As time folds back on itself to move into the next spiral of evolution the Shadows of Collective past lives, flowing through Gene Key 59, are being released to be healed through the Soul essence and resonance of Chiron. Chiron on Gene Key 3, known as **Looking Through the Eyes of a Child**, is moving through the Shadow of **Chaos** to the Gift of **Innovation** to the Siddhi of **Innocence**.

'Individuals working from the Shadow of the 3rd Gene Key are trapped in a 'separation' consciousness by their own thoughts – thoughts that are coming from a primitive and defensive level. This 'separation' consciousness creates Chaos by resisting the very changes that are required in order to survive and thrive. They do not trust that the Chaos created by change will lead to order on a new level.'

'The Gift of Innovation is far more exciting than simply being creative. It implies that you have permanently escaped the fear-based perspective of the Shadow frequency. Innovation also requires a deep sense of inner trust. All preconceived notions, and dogmas, must be discarded when they no longer serve the developing synthesis. The Gift of Innovation requires you to become as open hearted and open minded as a child.'

'There are two kinds of Innocence – ignorant innocence that is like a new born baby, the infant that just expresses its beauty without awareness of itself. Then there is the wise Innocence, when the mind and heart have opened up again after a long search with much pain and travail.'

'The wise Ignorance and the ignorant Innocence, they are the same – the same field. The only difference is awareness. Wise Innocence has come full circle. We don't have to wait until we are old to be wise. Wisdom isn't dependent upon age. Wisdom is dependent upon Love. How deeply can we Love.'

'One day humanity will evolve towards its awesome final destiny of Global and Celestial harmony. As the 3rd Siddhi comes into the world, which it will do very shortly, a great remembering of our Innocence will emerge in humanity, because the first vessels of the new human destiny will all be children.'

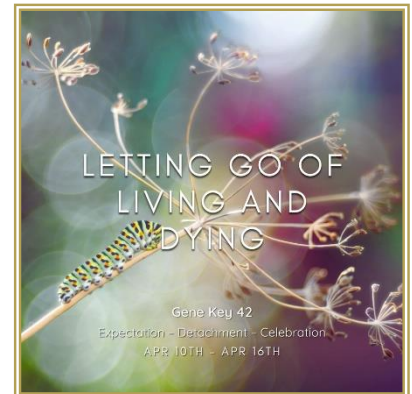

'The strange thing about these children is that the consciousness within them will never grow up and become serious. Their awareness will function in an entirely new and different way from our current brain-centred awareness. Their brain will be the environment itself – it will be inside every other human being, creature, plant, stone and star and it will soon come pouring into the world like a great breaking wave. Above all it is equated with the human heart and the feeling of Love and Unity that lies between all creatures.'

And Eris working alongside Chiron on Gene Key 42, known as **Letting Go of Living a Dying** evolves through the Shadow of **Expectation** to the Gift of **Detachment** to the Siddhi of **Celebration**.

'The 42nd Shadow is actually one of the Shadows at the source of all human mental fear because the 42nd Shadow concerns death. The notion of time and our response or reaction to its passing is rooted profoundly in this key. Eastern cultures have a huge advantage over the West because most of them have figured out the secrets of incarnation and reincarnation. It is a part of their culture and this makes a huge difference to the drama.'

'Imagine for a moment your body without any fears. We can close our eyes for a moment and conjure up what that might feel like, what that blissfulness feels like. We can touch the ecstatic realms where the mind lets go and thinking comes to an end. And when thoughts do come, they are the thoughts of God so they only engender more bliss. We become like a child again and life becomes Heaven on Earth.'

'The 42nd Siddhi is about the transcendence of death. These are the sages who teach humanity about the illusion of death. The 42nd Gift of Detachment births the process of letting go of control over your life, physically, mentally, and emotionally.'

'It is a wonderful letting go that travels deeper and deeper into your DNA as you gradually allow your Expectations of life to fall into the background. There is a great understanding and freedom that comes to every human being who surrenders deeply enough to their life. Detachment represents the separating out process between the emotions and the mind and occurs naturally as the frequency rises within the cells.'

'The 42nd Gene Key is one of six Siddhis (3,20,23,24, 27 and 42) in the Codon Ring of Life and Death. The 3rd Siddhi of Innocence brings the Eternal Child the 'puer eternis' Adam and Eve naked in the Garden. The 24th Siddhi brings Silence, not a deathly silence, but the Silence of Light and Illumination. It is the Silence of Quintessence, of reaching the heart of hearts, which is the 23rd Siddhi. It also brings vast caring for everything, the kind of love that is selfless and unconditional, the 27th Siddhi.'

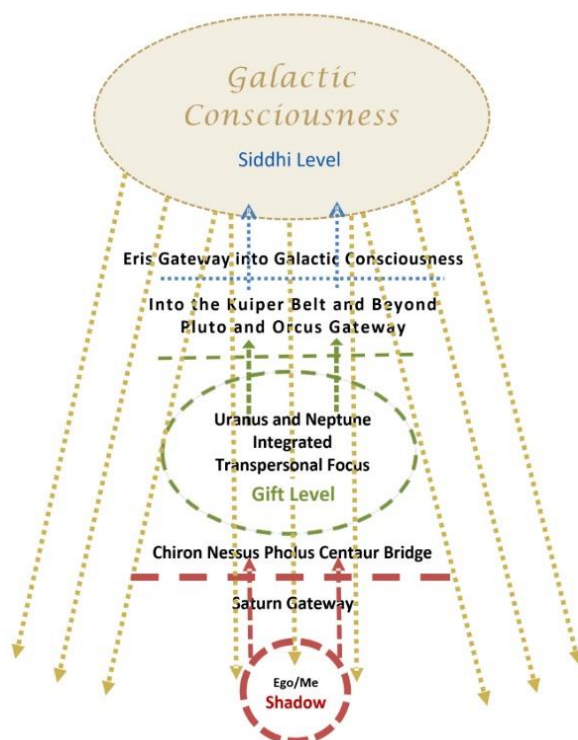

'Finally, this Codon Ring brings the 20th Siddhi, pure Presence, a resting in the Eternal Now. When we discover this, we realise that we are Eternal and cannot die. The body may die, but the indwelling Quintessence can never die. The body may even not die, because when we break down the illusion, all manner of things become possible within the field of Celebration. The cells of the body can be transfigured back into their Quintessence and literally cause us to ascend.'

If we turn our awareness now toward the Trans-Neptunian Objects that are central to this chart, we enter a realm that speaks less to individual identity and more to the Soul's long remembrance.

These distant Cosmic Bodies carry memories of when humanity experienced itself as part of a Living, Conscious Cosmos, before the mind became so dominant, and before the innate bond between Earth, the Stars, and the human heart was forgotten.

In this image we can see how the personal planets within the orbit of Saturn reflect the journey of our present incarnation. They illuminate our lessons, our gifts, and the shadows we are invited to embrace, and to transform. As we pass through the Saturn Gateway, there is an invitation to mature beyond the concerns of the separate self and awaken to a more expansive awareness that seeks to serve the whole.

Yet it is through the Gateway of Pluto and Orcus that an even deeper transformation unfolds. Here, the old structures of identity dissolve, allowing consciousness to move beyond the limits of personal history and local reality.

As our awareness expands into the vast field represented by the Kuiper Belt, and Galaxy beyond, it is as though we are journeying both outward into the Cosmos but equally deeply inward towards our original Self. Ancient memories begin to stir - remembrances of times when humanity knew itself to be in communion with the wisdom of Nature, the Elemental Kingdoms, and the Living Intelligence of the Cosmos.

At the time of the New Moon, TNO G!kún||'hòmdímà is exactly conjunct the Sun and Moon. Named after a Goddess preserved within the ancient Star wisdom of Namibia, which originated as far back as 25,000 to 100,000 years ago, her presence evokes the timeless feminine Guardian who watches over the sacred and protects what is precious.

She invites us to look beneath appearances and gently uncover the truths hidden within the depths of our being. Like the armadillo with which she is associated, she teaches us to dig beneath the surface of life and discover treasures that have long been buried. Her energy reminds us that wisdom often appears in unexpected ways, offering intuitive guidance and unseen solutions precisely when they are most needed.

Then, TNO Teharonhiawako, which is making an exact 90° angle to the Sun Moon and Earth, links to the Native American Iroquois people. As Indigenous peoples of North America, their ancestors have inhabited the Great Lakes and upstate New York regions for thousands of years, with archaeological evidence of Iroquoian people in the area dating back to around 4000 BC.

Teharonhiawako, whose story emerges from the rich spiritual traditions of these people, speaks of humanity's Sacred relationship with the Earth and our responsibility as conscious stewards of Life. This lineage carries the remembrance that we are not separate from Creation but active participants within it. Deep within this mythology lies the understanding that humanity descends from both the Earth and Stars, and that celestial wisdom can once again be embodied when harmony is restored within.

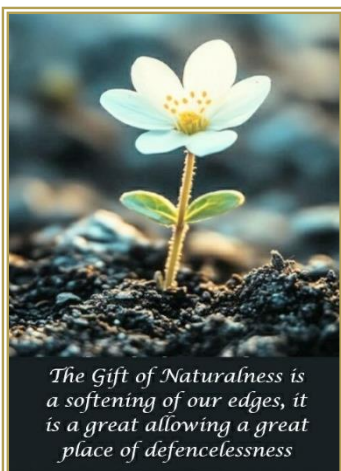

For the teachings of the Iroquois remind us that true spiritual awakening is not an escape from duality but a reconciliation of it. In balancing the forces of Light and Shadow within ourselves, we become capable of grounding higher wisdom into everyday life. The Celestial and the Earthly, are revealed not as opposites but as expressions of the same Living Source.

Finally, Varda forms a luminous bridge, this month, through her connection with the Nodes, Chiron, and Eris. Philip Sedgwick believes Varda comes from East Indian origins as Var is *Blessing* and Da is *One who Bestows*. She resonates with Goddess Lakshmi of Hindu tradition. Varda's presence is like a blessing flowing across time, illuminating pathways of healing and remembrance.

Varda invites us to meet the past with compassion rather than judgment, allowing old wounds to soften and dissolve. In doing so, we create space for new possibilities to emerge - possibilities founded upon integrity, co-operation, and a deeper alignment with our true nature. She reminds us that every ending carries the seed of a beginning, and that blessings often arrive disguised as periods of profound transformation.

Together, these three distant celestial bodies seem to speak of a collective awakening. They call us to remember that we are not isolated beings moving through an indifferent Universe, but conscious expressions of a vast and interconnected Field of Life. As higher frequencies flow and permeate human awareness, we are being invited to reclaim Ancient Wisdom, to heal old separations, and to rediscover our place within the great tapestry of Earth and Sky and Spirit.

The Gift of Naturalness is a softening of our edges, it is a great allowing a great place of defencelessness

At this moment in time Varda is on Gene Key 10 which is known as **Being at Ease** moving through the Shadow of **Self Obsession** to the Gift of **Naturalness** to the Siddhi of **Being**.

*'We are all trying to be who we are, but many of us have been conditioned to be other than who we are. It has been this way throughout our history, ever since we began to develop the complex neo-cortex. **The moment the mind was equipped to reflect on itself, the primal question Who am I? was born.**'*

*'Prior to this question, human beings did live in the state of naturalness, but only in the sense that they were more a part of the animal kingdom and had not yet fully developed into homo sapiens. The human journey, of course, is unique and is obviously different from that of the animals. **We have to solve the conundrum of having a mind that can look at itself.**'*

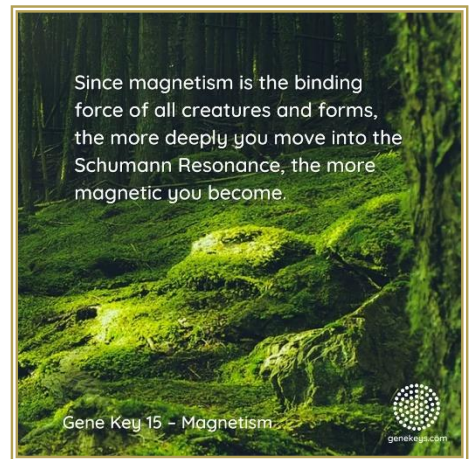

'The primal question Who am I? has to be answered before the Gift of Naturalness can once again be realised. There are so many paradoxes in this 10th Gift - the main one being that you cannot be who you are as long as you think you are someone, but you still have to set off and search for this someone in order to realise that they do not exist!'

'The 10th Gene Key belongs to a codon ring known as The Ring of Humanity which includes the 10th, 17th, 21st, 25th, 38th and 51st Gene Keys. As one of the most complex codon groups, this chemical family holds the keys to the great mythic story lines from all cultures. These six Gene Keys encapsulate all the mythic elements of what it means to be a human being. Wounded from the outset (25), you must engage with and do battle with your shadows (38), overcome the limitations of your mind (17), surrender your need to control life (21) and find your true self (10) before you can awaken (51).'

'You can see from this very profound grouping how deeply bonded we humans are by the same basic dramas. There is great beauty to be discovered here, and when you find it, you will finally realise that naturalness is the simplest thing of all. It is simply there inside you the moment you enter into Stillness. The only word that even gives a hint of what the 10th Siddhi holds is the word Being. In the expressions of the mystical traditions, this is sometimes known as the I AM consciousness, although the very use of the word I can be misleading. In the 10th Siddhi there is no sense of I - there is only pure Consciousness expressed as Being.'

In a few days from now, at the time of the Solstice on June 20th or 21st, depending upon where you live, Varda and Gene Key 10 will be the central focus, as the Earth will be conjunct Varda, and the Sun will be opposite to Varda, on Gene Key 15 moving from **Dullness** to **Magnetism** to **Floresence**, reflecting the message of the TNOs to come into harmony with the Earth and Nature.

'The 15th Gift represents the inner barometer within your DNA to the Schumann Resonance – the natural energy frequency of the Earth - the Earth's heartbeat. Just as Magnetism holds families of the same species together people with the 15th Gift feel a deep kinship with humanity. The Gift of Magnetism makes a person physically glow with Life force - it is a Gift filled with enthusiasm and openness and Love.'

'One of the greatest challenges for modern humanity is to learn how to slow down. Trusting the natural ebb and flow of life's currents, the people embodying the Gift live closely with the Earth's natural rhythm and experience the wisdom and clarity of slowing down. There is a subtle shift in attitude that unlocks the hidden magnetic force in your DNA.'

'The Ancients and Sages said that the mind must be still, or that all thought must stop, in order for reality to be perceived. This has actually been misinterpreted down the ages — it is not thought that must cease, but identification with thought. It is the thinker that must cease.'

This New Moon and Solstice message, seen through the lens of Varda, and the TNOs, is especially significant, for the impulses flowing from deep space continually draw our awareness beyond the concerns of the personal self and into the larger evolutionary cycles of humanity. They remind us that wisdom is not found simply through progress and technology, but through remembering our ancient relationship with the Earth, the Stars and the Elemental Forces of Life.

In this way, the New Moon and Solstice become a Gateway of Ancestral Remembrance - a moment to connect, to Bless and release all that has been, and then to connect to the same **Light** that shines in **Purity** and **Presence** through the Stars, the Earth, the Forests, the Oceans and within the **Being** of each One of Us.

All Love and Blessings
