Cosmic Overview

Libra New Moon 2026

Balance is the perfect state of still water

Confucious

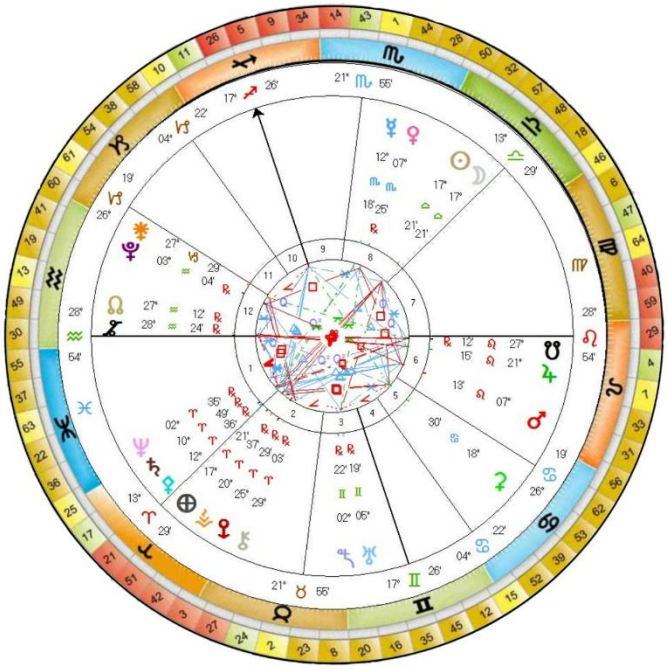

When the mind is still, the Beauty of the Self is seen reflected in it.

BKS Iyengar

We become like a Still Lake of purest crystal and without an effort our depths are revealed to ourselves.

Thoreau

‘I AM’ the Light that Moves to Rest

The New Moon will take place at 17^0 Libra 21 on the 10th or 11th of October depending on where you live.

This New Moon in Libra, following on from the Equinox, represents a profound time of planetary recalibration, choices, and structural alignment.

Libra is fundamentally known as the sign of balance, contemplation, and quiet reflection. A time when the Soul stops to weigh the pairs of opposites. It is a time where the activities of the previous signs are brought into a temporary state of statis and balance so that a conscious choice can be made.

In Esoteric Astrology, the New Moon in Libra offers a potent energetic window for shifting from personality-driven desires to Soul-infused purpose.

At the personality level, the planet Venus governs Libra, focussing primarily on personal issues, but at the Soul level Uranus governs, and realigns the Libran essence, often through sudden breakthroughs, to alignment with Divine Law. The Constellation of Libra flows with the 3rd Ray of Active Intelligence, embodied within the Law of Right Human Relations.

Right Human Relations is at the core of the Aquarian Age, but this Law will only fully materialise when the Head, Heart and Soul are in synchrony and the resulting harmony becomes innate, reflecting within the actions of mankind. The Law begins with oneself, which then leads to right relationship between individuals and the family, leading to right national and international relations, each encompassing a greater whole until ultimately demonstrating humanity’s innate Divinity. At this level of consciousness, Uranus and the 7th Ray will move through humanity, manifesting Harmony and Order as an expression of Divine Will ushering in a much needed World change.

The Sword of Damocles, chosen as the image for this New Moon is not a prophecy of destruction, but is a symbol of consequence. The greater power becomes, the greater the consequences when using it without corresponding Wisdom. The Sword represents the consequences inherent within power itself and the maturity and self-responsibility that is required to hold power. As humanity we have evolved to have seeming, immense, power over the material world, from nuclear technology, global communication and space travel etc, yet that power now requires an equally extraordinary awakening of consciousness to our inherent interconnection with Nature and all Life within the Cosmos.

In the parable of Damocles, the sword remains suspended, by a single horsehair above Damocles head when he sat at the table of Dionysius wishing to experience the ‘gifts’ of power. In tarot, the Sword represents the air elementals, and our mental faculties. Whilst the sword is still suspended we each have the gift of choice. However, the mind thinks in duality and does not see the overall picture.

It is not until the mind becomes still, that as an instrument, the Sword of Damocles, may become the Sword of Discernment - cutting through personal egoic illusion and fear to reveal a far larger Truth - a Heart based Reverence for all Life, arising from deep inner Peace.

Our lives are fashioned by our choices. First we make our choices. Then our choices make us. Anne Frank

Finding inner peace, stillness and balance, as the world seems to be on a trajectory in an opposite direction is the choice that we each must choose. The focus on the Damocles parable is reflecting the fact that at the time of the New Moon, asteroid Damocles is part of a stellium, being conjunct to Trans Neptunian Gonggong, the North Node ☊ and Astrea ⚳, each of which is forming a square 90⁰ angle to Sedna ⯲ and Uranus ♅, which in and of itself is creating considerable collective tension and uncertainty.

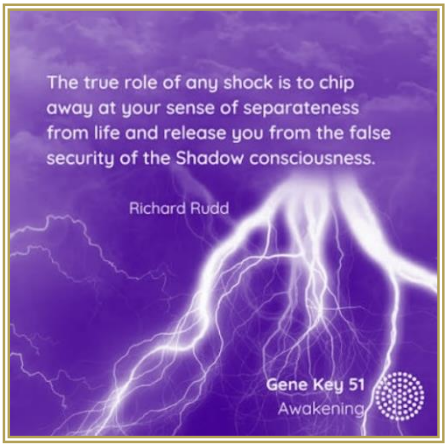

This tension is significantly intensified as the Sun ☉ and Moon ☽ are in an 135⁰ hard aspect to each of them, creating what is known as *Thor's Hammer* or *Fist of God* – a collective moment of profound change when chaos can surface to catalyse major shifts in consciousness which have the potential to create a shift in frequency, ultimately bringing beneficial outcomes.

TNO Gonggong amplifies this sense of disorder and change. Named after the ancient Chinese water God of Chaos, its astrological symbolism speaks of untamed elemental forces and raw, subconscious power.

Adding to this dynamic and tense mix, Mars ♂ is opposite to Pluto ♇ whilst forming a T-square to Venus ♀ and expansive Jupiter ♃ is trine the Earth ⊕ and sextile to both the Sun and Moon, so this is a complex chart with a lot to unravel.

As energy moves in a multitude of ways, the best way to get a deeper understanding and insight of the potentials that are seeking to unfold at this moment in time, is to begin by looking at the Gene Keys of the Sun Moon and Earth that are held within the Thor's Hammer.

Starting with the Earth, which is the chalice for this Cosmic download, we find that the Earth is on Gene Key 51, known as ***Initiative to Initiation*** moving through the Shadow of ***Agitation*** to the Gift of **Initiative** to the Siddhi of ***Awakening.***

*'**The 51st Gene Key is a portal**. The portal to the Shadow frequency leads to hell whereas the 51st Gift leads to a place of great personal empowerment and genius. The reason that the 51st Shadow creates such a disturbance in the energy field of human beings is quite simply because life is beyond your control. **Unforeseen events will occur in your life, from time to time, and these events can radically change your destiny.'***

*'To follow your Initiative is to step off the beaten track and to follow the dictates of your own inner being. It is a journey into the underworld in which the traveller will confront many challenges and tests. A path that leads home – it is a path of heart leading into the Heart. **This is the battle with your own fears but rather than being a struggle there is a leap into the Higher Self.** It is the shock of Awakening from one level of being into another.'*

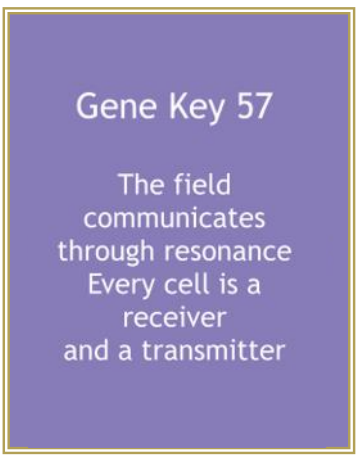

*'Just as the Shadow creates agents of low frequency shock in the world, so the 51st Gift creates agents of positive shock in the world. These people come to awaken the collective consciousness out of its fear-based modality. **They are not leaders – they are Initiators**.'*

*'**Awakening is a spontaneous evolutionary force operating throughout the entire Universe**. Awakening is a sudden unexpected shock in awareness that is preceded by a mutative chain reaction within the cells and DNA. Each of the 64 Siddhis has its own particular pattern and the 51st Siddhi is the ground beneath everyone of these 64 codes. **This Gene Key ensures that one day all of humanity will awaken in times to come.'***

*'This Siddhi will begin to awaken entire gene pools – there will come a time in which relationships awaken then families then entire communities until finally humanity will awaken as an individual and we will see its own true nature**. That single moment when Humanity opens its true eyes for the first time will be the greatest single event in the history of awareness itself.'***

The Sun and Moon on Gene Key 57, known as ***The Gentle Wind***, are activating and moving through the Shadow of ***Unease***, to the Gift of ***Intuition*** to the Siddhi of ***Clarity***, and encodes all that we have inherited from previous generations.

*'The Shadow frequency of the 57th Gene Key manifests as the fear of the unknown - what might be coming in the future. **There is a continuous Unease that can manifest as anxiety and which gets amplified by the morphogenetic field connecting humanity**. There is a strategy of seeking security through the mind that perpetuates more insecurity.'*

***'From the point of view of the 57th Gene Key, absolutely everything in life is acoustic**. Even Light can be reduced down to a sonic signature. At the highest level, we humans are quite simply made up of layers of flickering and alternating sound waves. As such the 57th Gene Key, reveals that every human being is like an acoustic tuning fork.'*

'As your frequency rises so you gradually heal the many layers of your inner being. T**he 57th Gift of Intuition is basically your body system interacting harmoniously with the outer world. Here you experience the deepest sensitivity to everything and everyone around you. **You are able to make positive use of this natural guidance system known as The Sixth Sense of Intuition.'

***'At the higher reaches of the 57th Gene Key you begin to access the ability to tune your clairaudience beyond the borders of time**. The essence of Gentleness is one of the greatest secrets to life. Consciousness is the gentlest most subtle phenomenon. This is why the ancient sages so frequently likened it to water or wind – elements of such subtlety and softness that they can penetrate everything.'*

***'Clarity is about seeing this softness at the heart of all things**. When you live your life in harmony with this softness your come into accord with what the ancients called the Tao – **the transcendence of the opposites.** This 57th Siddhi like all the Siddhis, contains the mystery of the Feminine principle, even though it is beyond duality itself.'*

*'This Siddhi holds the secrets of miraculous healing through its special ability to attune to the subtleties of physical DNA. **Such gentleness opens the heart and leads to transcendence.** When someone attains enlightenment through this 57th Siddhi it manifests through them in an extraordinary and beautiful way – **they become a tuning fork for the Divine Presence**.'*

Thor's Hammer has Uranus and Sedna on Gene Key 20 known as ***The Sacred Om,*** moving through the Shadow of ***Superficiality*** to the Gift of ***Self-Assurance*** to the Siddhi of ***Presence.***

Sedna began this focus and activation in May 2024 and will remain on this Key until April 2033, whilst Uranus just recently came to join Sedna and will leave Gene Key 20 in May 2027. This coupling of Uranus and Sedna reflects the deep restructuring that is occurring as Sedna returns to her closest alignment with the Earth – moving away from the reliance on the neo-cortex.

Om, from Sanskrit, means the *Universal Primal Sound*. Nothing is by chance, and this particular Gene Key seems to reflect and to mirror the Innuit Sedna story of ancient lineage, as it links us into the development of ancient species in primal times through acoustic vibration, held within the brain stem.

*'The 20th Gene Key and its Shadow were developed in species that preceded human beings – primarily in the world of insects. Looking at insects, we can see how incredibly busy they always seem to be. **There is a blind activity occurring and like the insects, at a Shadow level, human busyness lacks real presence.'***

*'With the development of the neo cortex we began to think and a strange thing happens when we think – **we leave the present moment.** The illusion occurs because the mind can only think in a linear fashion. This is the trade-off of the incredible abilities of the mind – **for all its genius it is limited to thinking within the domain of a false reality called Time.'***

'Self-Assurance is directly equivalent to your ability to escape being a victim of your mind**. As you begin to learn the knack, you experience an ability to witness your mind without being caught up in it. An internal spaciousness grows and you no longer have to try to control life. **What actually occurs with this Gift is that the awareness within your solar plexus begins to take over from your mind, opening the way for you to connect into a very powerful Universal power.'

*'When this Siddhi has flowered in a person it actually creates a subtle atmosphere around itself – a kind of silent ease that pervades the aura of the person and radiates out to all Creation. **The true Siddhic state is one of complete relaxation. Thoughts are irrelevant** – there is nothing to say that is not superficial – for nothing is felt but the Presence itself.'*

'Presence is the underlying nature of Being**. It would actually be truer to name this Siddhi, The Presence, since the use of the definite article gives us the clear impression that this is a state of consciousness that has nothing to do with any individual. **It is the manifestation of The Presence through a human vehicle.'

The Peace of Wild Things

When despair for the world grows in me
And I wake in the night at the least sound
In fear of what my life and my children's lives may be
I go and lie down where the Wood Drake rests
In his beauty on the water and the Great Heron feeds.

I come into the Peace of wild things
Who do not tax their lives with thoughts of grief
I come into the Presence of Still Water.
I feel above me the day-blind stars
Waiting with their Light.
I rest in the Grace of the World and am free.

Wendell Berry

Looking at the other arm of Thor's Hammer we find two very distinct potentials playing out. The North Node and Astrea on Gene Key 30 speak of the Soul's way forward, *(North Node)* and the return of a Golden Age *(Astrea)* whilst Damocles and Gonggong, on Gene Key 55 allude to a time of upheaval and a chaos.

Gene Key 30 known as ***Celestial Fire***, moves through the Shadow of **Desire**, to the Gift of ***Lightness*** to the Siddhi of ***Rapture.***

'Gene Key 30 is part of the Ring of Purification and it bonds with the 13th Gene Key Shadow of Discord and Pessimism. ***Humanity is designed to move through a vast evolutionary cycle in which it is progressively purified.'***

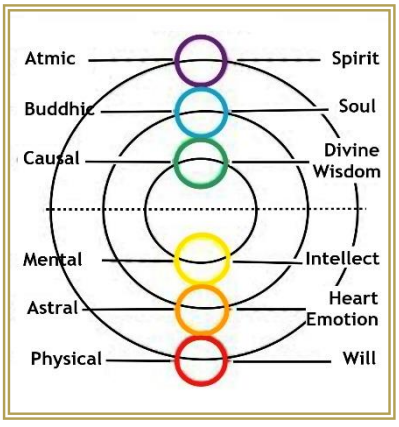

'Such purification can only take place through the Shadow frequency since this provides the raw material for a higher state of consciousness. ***At the lower frequencies of the Astral Plane the overall tone is one of Discord. The astral plane's subtle electromagnetic frequency field arises out of the sum total of all human desires and feelings.'***

'As every human being eventually learns, the cycle of Desire is eternal. Fighting an evolutionary force as powerful as Desire is what causes human beings so much suffering in the first place – so what is the future for a race that is caught in such a paradox – as ever the answer lies within the higher Gift frequencies of this Gene Key.'

'There are two possible human responses to a paradox – either you become tense or you surrender to it. *The Gift of Lightness does not make you immune to desire, but neither does it cause you to react to desire.* ***This is a Gift that knows desires do not necessarily have to be followed, but they do have to be felt****.'*

'All Life follows a mythical script or storyline and you can only see your life from this expanded awareness when you have escaped feeling that you are a victim of it. As you move into the higher frequencies of the 30th Gift you begin to understand that beneath the thousands of desires that pass through your emotional system, each day, there is a single underlying desire that gradually becomes stronger and stronger – ***the desire to end your own suffering - this desire leads all human beings on the path of Spirituality and inner inquiry.'***

'The process of transcendence through this 30th Gene Key directly mirrors the purification of the Astral body (2nd) and its assimilation into the higher Buddhic body (5th). ***The state of Divine Rapture is akin to being burned by the fires of Bliss over and over again.'***

'Whoever comes near them will very likely catch their devotional energy, *for the nature of the mutated Solar Plexus system, which is where the 30th Siddhi lies, carries this purified frequency out through the aura into the morphogenetic field.* ***They have stepped willingly into the fires of annihilation - into the primal chaos of Divine Frequencies with just the desire to transcend.'***

And, Damocles and Gonggong, are on Gene Key 55, moving through the Shadow of ***Victimization*** to the Gift and Siddhi of ***Freedom***. How we perceive, integrate and transmute, all that is occurring in the outer and inner world is central to how the energies will play out.

'Our DNA holds our greater Self – the Cosmic part of each of us that transcends our mortal body has lain secretly hidden inside humanity for aeons. *The 55th Gene Key allows us to contemplate and to quicken the actual process of awakening. At the Shadow level of Victimization, as human beings we become our own worst enemy.* ***We are not victims of our experiences we are victims of our attitude towards our experiences.'***

***'When we look to blame others we become caught in a web** - we become addicted to the Drama and the Romance of life – the highs and the lows – all rooted in your unconscious attitude to Life. With the coming shift of consciousness that is unfolding through humanity we will slip through the strands of the emotional net that has kept us in a state of Victimization for so long.'*

***'As we begin the process of transcending our Shadows, miracles can occur in our lives**. **Much of the 55th Gene Key concerns the future of our species as it moves through the Great Change.** Down the centuries much has been written, spoken and taught concerning the nature of higher consciousness. We are now entering an era in which more and more people will have direct access to an experience of true higher consciousness.'*

***'There will be a genetic mutation that will slowly colonise our species**. The old human will literally be bred out of humanity. This vast and dynamic change is being triggered by this 55th Gene Key and its related amino acid histidine. Soon there will be children born among us who carry the full mutation and who will spread it through the gene pool.'*

***'Freedom is the spirit of the 55th Gene Key - it is the spirit of humanity**. As your awareness stretches, the spirit of Freedom breaks down the barriers in your life. The fractal lines open all around you and energy that was blocked in a certain dimension suddenly precipitates unforeseen beneficial circumstances in your life.'*

*'All aspects of Life are interconnected, so a breakthrough at the source of your being will ripple out into all areas, some that you perhaps didn't even remember existed. **This Freedom is born out of one's absolute trust in Life.** The coming shift will precipitate the end of the age of the individual 'I' and the beginning of the collective 'We'. After the awakening has occurred one will no longer exist as an individual**. Awareness will operate collectively.'***

From the understanding gained through the message held in Thor's Hammer it reveals that we are in the throes of a collective awakening, or put more accurately, a collective return to our true selves, as continuing to sleepwalk is no longer an option.

With Mars and Pluto in opposition – personal will versus Divine will - the question is, are old fears and behaviours going to continue to create re-enactments of strife and division or will this opposition assist this reawakening by stripping away *(Pluto)* the false ego, based on anger *(Mars)* that has dominated for eons of time? Each one of us will make the choice.

Mars is on Gene Key 31 known as ***Sounding Your Truth*** moving through ***Arrogance*** to ***Leadership*** to ***Humility*** and Pluto is on Gene Key 41 known as ***The Prime Emanation*** moving through ***Fantasy*** to ***Anticipation*** to ***Emanation***.

***'We are 'programmed' by the language and thoughts that we have inherited**. These thoughts and language keep us confined within a narrow spectrum of intellect and understanding of what our true potentials are. You can only ever be free when you have escaped language – when you are no longer a victim of your mental constructs and words.'*

'The 31st Gift, like all the Gifts, represents a huge step beyond the intellect and into the heart.** It is the heart that separates the Shadow frequencies from the Gift frequencies and in our current stage of evolution the heart is the hottest frequency there is. **Only the heart perceives the collective suffering that comes from being marooned in your intellect at the Shadow frequency.'

*'Because the 31st Gift has its finger on the pulse of the collective patterns of humanity, it can have enormous influence over large numbers of people**. Certain human beings operating out of the 31st Gift can literally become the voice of the collective.'***

'The 31st Siddhi is rooted in the ancient tradition of the Oracle. *The Oracle is simply a voice box for the Divine.* ***The Ring of No Return refers to the great initiation from the 4th Causal Body into the 5th Buddhic Body.*** *Once this leap of consciousness has been made, there is no possibility of return because your identity or ego will be erased.'*

Pluto on Gene Key 41, ultimately moves beyond words as the means of communication.

'The 41st Gene Key houses a truly remarkable archetype. ***It has a very important function – it relates to what is known in genetics as the start codon.*** *The evolutionary pressure that surges up in human beings carries our entire genetic history within it, all the way from the amoeba to Homo Sapien.* ***All this history carries an enormous weight inside you – it can drag you down, but it also urges you to want to break free.'***

'The 41st Shadow represents the pressure to evolve to seek out new fields and new experiences. *This evolutionary impulse is the secret to the 41st Gift – the Gift of Anticipation. The more the frequency of your DNA rises you become more and more sensitive to the hidden properties in the world around you, in particular, linking into the morphogenetic field that communicates specific information across time and space.*

'The 41st Gift gives the gift of premonition or Anticipation which links to its partner the 31st Gift of Leadership. *The greatest leaders are those who build upon the past whilst anticipating what is to come.* ***The 41st Gift has a single genetic agenda – it is always attuned to the next evolutionary energetic grid that is waiting to descend into form.'***

'Every start codon inside every single cell is electromagnetically linked to each other. ***This is the foundation of the holographic body which in turn is linked to the holographic Universe.*** *The 41st Gene Key is the key to seeing that the physical body can equally be seen as a holographic mirror of the Universe.'*

'As the Source of Being the 41st Siddhi is the Siddhi of Emanation. *Emanation is a word that has been used by many ancient metaphysical and mystical systems as a means for understanding something that is really unapproachable. One of the best known of these systems is perhaps the Kabbalah, whose central tenet is a map known as the Doctrine of Emanation.'*

'In a nutshell the Doctrine of Emanation points towards a f*ractal model of the Universe in which everything is a mirror image of itself. The Cabbalists used the symbol of ten spheres or sephira, one emanating from another, to represent the various levels of Spirit descending into matter.'*

'The ultimate Source, known as the Ain Soph, represents the unnameable, inconceivable, limitless Light from which all emanates. *Once you have allowed the Siddhic frequency to command your voice, you have entered the first stage of Divine embodiment. From this moment forwards, whenever you use the word I, it is the voice of Divinity itself speaking.* ***Such speech is pure transmission. It uses words to indicate the path beyond words.'***

Mars and Pluto are squaring Venus, which has been on Gene Key 44, until recently, but has now moved retrograde onto Gene Key 28 before returning to GK 44 on the 14th of December. GK 44 is all about *'Ancestral Entanglement'* and how we project what we do not want to see in ourselves onto others, whether that be an individual, a political party, a religion or a nation. It is the basis of Karma.

Right now, Venus is on Gene Key 28 known as ***Embracing the Dark Side*** moving from ***Purposelessness*** to ***Totality*** to ***Immortality.***

'The 28th Shadow represents everything that you do not wish to accept within your psyche, right down to your core fear of non-existence. ***Only as you reclaim each of these dark aspects of your inner being can you begin to assemble and manifest the true purpose of your life.*** *This is the magic and true purpose of the 28th Shadow.*

'The Gift of Totality is a wonderful Gift to have and it belongs to anyone who really knows how to trust in life. *Totality means to live alongside fear – and to live with the unexpected and to stay open to continual change whilst remaining committed.* ***The Gift of Totality means to embrace the whole of your nature and the whole of life – the pleasure and the pain****. To be total in the sense of this Gift means to live without allowing your mind to dictate your life.'*

'This is Life lived for the moment in the full knowledge that life purpose can only be found in the present moment rather than in the distant future. ***It is a mythic path – a path that Jung called individuation****. Shamans would call it the retrieval or incarnation of your full Soul****. Life shows you that it has an underlying purpose in everything that it brings you.'***

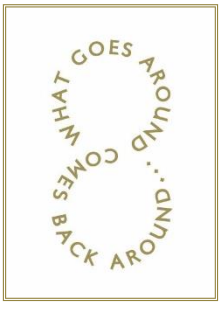

'People aligned with the 28th Gift have the wonderful knack of handling adversity lightly. ***The more deeply they accept each feeling of fear that comes the lighter they grow and the more love they feel towards life****. As long as your commitment is total you will find an inner detachment – this detachment is the reward for your courageous Totality.'*

'The Siddhi of Immortality requires that the individual surrender him or herself into his own deepest fears and is reborn as pure consciousness*. When a being attains this state through the 28th Siddhi, they take on a particular mythology – their specific gift is to highlight the fears of others wherever they go. This is simply an aspect of their awakening operating through their genetics - thus, they are said to have the gift of casting out demons, because this is precisely what their aura does.* ***Through its Grace, it highlights the darker, unaccepted aspects of one's nature and absorbs them into non-existence.***

*'As already stated, this Siddhi contains the seed of the manifestation of Immortality in form – when the elements of our future vehicle will coalesce and form another kind of vehicle to house the higher consciousness of humanity****. In this vehicle the 28th Siddhi will come into fruition and in doing so it will synthesise the animal soul of Gaia with the human soul, thus making an immortal body****.***

Mercury, the planet of communication, right now is passing quickly through Gene Key 44, to return in the third week of November for a further five days. Gene Key 44 moves through the Shadow of ***Interference*** to the Gift of ***Teamwork*** to the Siddhi of ***Synarchy***.

'The ancient Chinese called the 44th Hexagram Coming to Meet, which is of course highly appropriate since this 44th Gene Key concerns how, why and when people meet each other, as well as the results that emerge from group or family dynamics*. As you learn from each relationship in your life and over time come to master the lessons each affords you, then the frequency of your entire hologenetic profile heightens in pitch and you begin to attract higher frequency fractals.'*

*'In the classical Indian teachings, such ties are known as Karmic ties****. Until two individuals are ready to take on the Ancestral Interference patterns of their entire fractal, that fractal remains dysfunctional, but as it clears a deep devotion develops****. The moment we begin to see relationships appearing in the world without Interference patterns, we will know that the core human fractal/consciousness is rebuilding itself from the bottom up.* ***Couples who are actively involved in clearing out this collective genetic dysfunction are the pioneers of a coming new age.'***

'Once you are at the Gift level you can overcome the collective interference of the 44th Shadow and begin to scent your true allies in Life. ***To really understand this Gift of Teamwork you also need to understand something of the mechanics of incarnation****. Your Causal body, or Soul, which vibrates at a very rarefied frequency also travels with the Causal bodies of others across space and time in a cosmic relationship dance. Such fractal lines of evolution have been understood through the ancient laws of karma.'*

'The 44th Siddhi is truly remarkable. It concerns the complete understanding of the mechanics of human destiny and the entire story of humanity. ***Synarchy is the opposite of anarchy - it concerns the concept of collective ruler ship****. Synarchy is the underlying nature of humanity that can only be known once it has emerged from the Shadow frequencies.'*

'The 44th Siddhi sees the entire tapestry of human interaction through time and space*. It not only sees it, but this being dissolves into it. The consciousness within such a person is able to travel down every single fractal line within the Cosmos.* ***Because there is no resistance within their vehicle their consciousness ripples down the fractal arms of both the past and the future of the Universe****. The being expressing the 44th Siddhi therefore occupies a specific genetic vehicle whose mutation causes, in time, a chain reaction through humanity.'*

*'****The awakening of a core fractal essentially involves the death of the illusion of its individuality****. There are a finite number of core fractals – 144,000 to be precise.* ***Synarchy has existed since the dawn of time****. It is simply distorted by an interference pattern – this distortion or sacred wound is literally wound around the arms of every single fractal line'*

*'****It is the reason for human suffering, but as the Universe awakens the Interference is gradually cleared and the Synarchy that lies beneath emerges****. Humanity has always sensed the existence of Synarchy – it is in all our myths of a past Golden Age and our present desire to create Heaven on Earth.'*

And Jupiter which is trine, 120^0 to the Earth, and sextile, 60^0 to the Sun and Moon on Gene Key 4, known as ***A Universal Panacea***, is encouraging us all to move away from ***Intolerance,*** to ***Understanding*** to heal the Karmic debt through ***Forgiveness.***

Jupiter has a particularly significant role in this configuration because, as the planet of expansion of consciousness, higher Wisdom and the search for Truth, it encourages us to move beyond the limitations of our conditioned mind into a more Universal understanding of Life. Perhaps the deepest significance of this alignment is that Forgiveness, the Siddhi of Gene Key 4, is not simply an act of forgiving another person - it represents a profound shift in consciousness.

Jupiter expands whatever it touches upon, so initially it may simply magnify our awareness of the beliefs, prejudices and judgements that we carry, individually and collectively. However, through this recognition, it is possible that profound transformation will arise.

'Forgiveness is born out of Understanding, but it occurs when a being makes a leap beyond Understanding. ***Forgiveness is the thunderbolt that is released when a being attains Christ Consciousness - it melts the boundaries and borders of form.*** *It falls upon you like a surprise and something inside you opens up that was previously choked.'*

'There exists a great mystery about the power of Forgiveness concerning time*. Forgiveness represents an involving force rather than an evolving force because it literally comes from the future towards the past.* ***It is a Divine quality that descends, like Christ, into the world of form****.'*

'In descending into human form, Forgiveness lays its hand upon all humanity and works its way back through time, burrowing into our collective past, releasing and freeing energy that has lain trapped and stagnant for aeons. ***This is why the Siddhi of Forgiveness is often credited with being capable of inducing miracles, because it can release a karmic debt that has stagnated for generations.'***

And finally, the South Node which links directly into the collective karmic past is on Gene Key 29, known as ***Leaping into the Void*** moving through ***Half-Heartedness*** to ***Commitment*** to ***Devotion.***

'The secret to all commitment lies in the way in which you begin. It is the energy behind your actions that creates your future rather than the actions themselves. ***There is nothing that is worth doing in life unless it is done with absolute commitment.'***

'The more the frequency rises through the 29th Gene Key the more you find your commitments directed towards the service of others. ***As the frequency gets higher and higher your Commitment takes on a devotional quality and begins to activate the Heart Centre****. As you allow the energy of Commitment to act itself out in the world, you begin to realise that an energy separate from your body is moving through you.'*

*'****This high frequency energy is actually moving into your body from your higher bodies and in particular from the 5th body known as the Buddhic body****. Bhakti Yoga refers to the path of Devotion, or the path of the Heart. Wherever such people go their heart is in constant meltdown from everything and everyone they meet.* ***The 29th Siddhi of Devotion is an absolutely contagious Siddhi – wherever it goes it inspires Devotion in others.'***

At this critical time, as we sow the seeds for the next great spiral around the Galactic Centre, we are being called, as 'Pattern Breakers', to recognise and release the ancestral interference patterns that have held us in an endless loop of limiting fearful thoughts and beliefs.

These final weeks of 2026 call for ***Commitment*** and ***Clarity,*** born not from the restless activity of the mind, but from a deep inner stillness that opens the Heart to ***Lightness*** and ***Peace,*** whilst embracing all of Life in its ***Totality.***

As the outer world grows ever louder, this is the choice that is being offered to us all, to ***Sound our Truth,*** not in a cacophony of noise, but rather through the ***Emanation*** of ***Wisdom*** that recognises the Sacredness of all Life, as we collectively move through a vast evolutionary cycle in which we are all being progressively purified to anchor the next Golden Age.

This Golden Age is not a future that we are moving towards, but rather it is a Consciousness we are ***Awakening,*** and revealing, within ourselves, one that begins to take form through every conscious choice and act of ***Love***, ***Forgiveness*** and ***Lightness of Being***.

Love and Blessings to All
