'I AM' the Penetrating Light of the Path'

This month's New Moon will take place, at 25⁰ Taurus 57', on the 16th or 17th of May, depending upon where you live.

Over the last seven years Taurean energy has been a central focus for us all as Uranus moved into this sign of the Zodiac back in May 2018 and the Fixed Earth qualities of a Taurean sense of security and stability, have been severely disrupted and shaken up through many factors, from Covid, to the onset of AI, creating financial and material instability, for so many, whilst a few have significantly increased their financial wealth.

This is the outer world in which we now find ourselves and yet with Uranus having moved into Gemini on the 26th of April to join transiting Sedna and Venus, there will begin to be a tangible shift of consciousness.

As an individual and as a collective group we have to evolve a far greater awareness of our interconnection with each other and how we each impact upon the whole. As the egalitarian ethos of Uranus in Gemini begins to inspire the mind, over the next seven years, many inventions, and discoveries will come into being to create a more equitable way of life for all on planet Earth.

In many ways Taurus underpins our value system – what is it that we value. Taurus being Fixed, Feminine and Magnetic holds some of the deepest patterns and memories. At the personality level, this often manifests as entrenched beliefs and desires - the need to own and to possess ever more – which can range all the way from luxury yachts, to belief systems and ideologies, to entire countries.

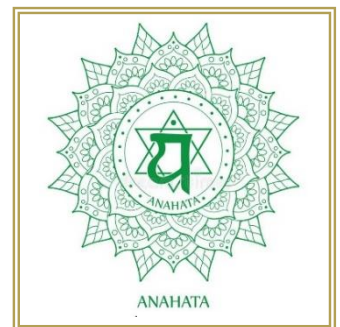

The Taurean Constellation links to the Earth – it is deeply connected with this plane of existence and to the evolution of Humanity within the Fourth Kingdom. It is through the **4th Ray of Harmony Through Conflict** and equally, through the Heart Centre, the 4th Chakra, that Humanity is evolving to move beyond the discord and conflicts that have been created over eons of time.

Venus rules Taurus at the personality level, which adds to the focus on fixed desires, creating the 'tests' and 'trials' for humanity, on the way to becoming Soul embodied. Taurus can build a secure and stable environment for all when Venus utilises diplomacy to bring about harmony between opposing forces.

At the Soul level, Taurus is ruled by the 1st Ray of Will and the planet Vulcan. Vulcan's Path leads from personal desire to becoming the embodiment, indeed the manifestation, of Spiritual Will.

Vulcan is presently in etheric form, but as more and more evolve to be able to use Will from the higher expression of the **1st Ray of the Will to Good**, then Vulcan will become a visible presence. This process of transformation is expressed through tests of detachment from desire.

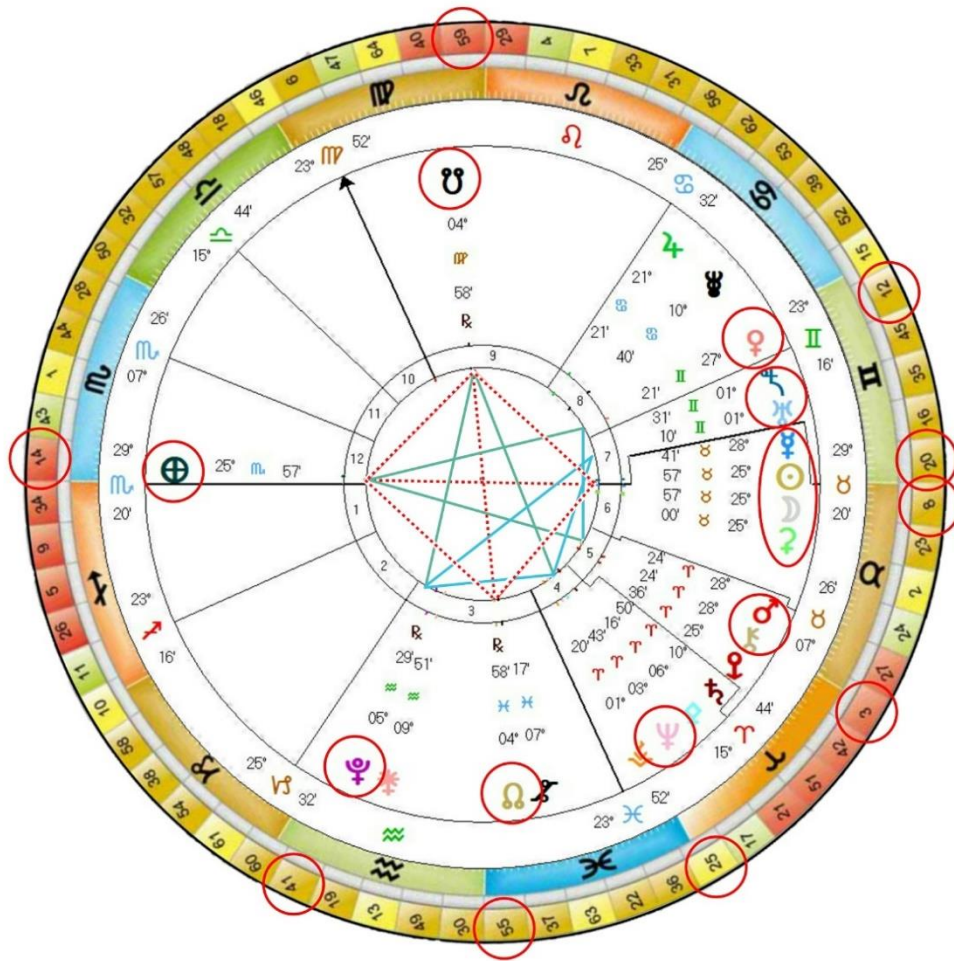

It is through the 1st Ray, and Vulcan, that the inner transformation occurs, as the Soul, once freed from attachment, opens to the Presence of Light, concealed within the physical form, that permeates all Life. This is the true White Magician, the true Healer - for at this level of awareness, Spiritual Presence and Divine Will become the reality manifesting through Life.

A life of kindness is the primary meaning of Divine Worship.

Once again, over lighting and underpinning this New Moon, Uranus ♅ Neptune ♆ and Pluto ♇ continue to hold their Minor Grand Trine (blue lines) and you will also see that this month the Sun ☉ and Moon ☾ are together with Ceres ♄ and Mercury ☿ on Gene Key 8, and they are creating a Grand Cross with the North and South Nodes ♁♏ and the Earth ♁ (red lines.) As well as this, there are two Yods, or *Fingers of God* formed from the South Node quincunx, 150° to both Pluto and to Neptune and the Earth quincunx 150° to both Chiron ♄ conjunct Mars ♂ and to Venus ♀ (green lines).

This creates a moment of interconnected precision and intense focus, as the apex of both of the Yods are linked to the Grand Cross through the South Node and the Earth (the past), and the resolution of the Yods are to be found through the North Node and the Sun Moon and Ceres, which points to a time line coming on stream, a stepping into a new state of consciousness. So before looking at the Gene Keys that are being activated at the time of this New Moon, it is relevant to note that Uranus in Gemini conjunct ♄ Sedna will bring a radical shift in the way that we perceive life and think about life on planet Earth.

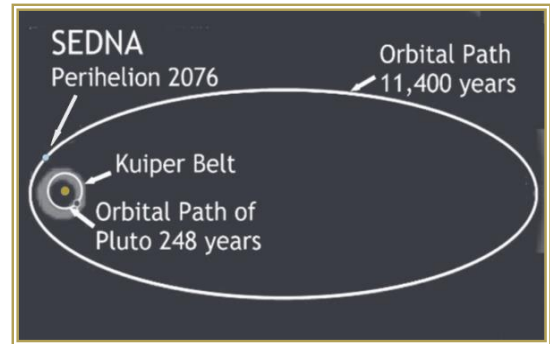

Over the next few hours, and days, the Moon, Mercury, the Sun and Ceres, pass across Uranus and Sedna, laying the first imprints for the next seven years. The Moon will transit this point eight hours after the New Moon, Mercury some twenty hours later, and then the Sun on the 22nd of May, followed by Uranus becoming exactly conjunct Sedna on the 24th, with Ceres finally completing this integration on June 3rd.

There are many ways this may manifest, but here on Earth we are having a vibrational interface with primal energies as the Cosmic Bodies transit across Sedna in Gemini in quick succession. In time there will be major shifts in how we think and express ourselves as we integrate Sedna's message. Truth and transparency become the bottom line for Uranus, whilst Ceres through all of this underpins the values of human kindness, simplicity and a return to an organic, wholistic way of life, at one with Nature, the Elements and the Galaxy.

Sedna is a key Marker of Time and Cycles – she marks the initiation of new life forms. Discovered in 2003, and having an 11,400-year orbit, humanity is just learning to understand and to integrate her presence.

Moving in the far reaches of deep space, Sedna carries the resonance of primordial memory — an ancient intelligence that links us back to the earliest times of life upon Earth.

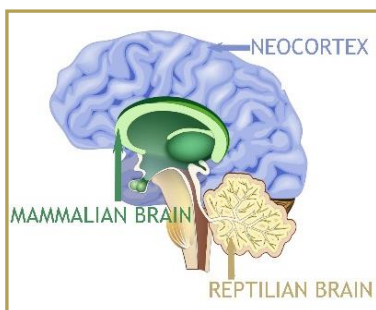

Named after the Inuit Goddess of the Deep Oceans, her story tells of descent, sacrifice, and transformation. Cast into the waters by her father, Sedna sank into the depths where, according to Inuit legend, life began to emerge through her sacrifice. From her fingers came the first forms of oceanic life, which over vast ages would evolve into the great beings of the sea — the whales, dolphins, and creatures of the deep.

This Creation myth of Sedna is profound as it speaks to the beginning of a particular stratum of Life. As with all myths this legend speaks on many levels. Spiritually, it reflects the descent of Divine Consciousness into Matter - the Divine Feminine or Shekhinah of Kabbalistic tradition, moving deep into physical matter to hold form, so that consciousness might have a physical experience and ultimately that we might remember our true state of Being in Union with all Life.

Sedna's closest return to our Solar system after an eleven-thousand-year orbit out in deep space, is a marker for the reawakening of the Sacred Feminine - the rising once more of a consciousness long buried within the collective unconscious. For Sedna speaks not only of Cosmic cycles, but of the restoration of a deeper spiritual memory held within both the Earth and the human Soul.

These ancient evolutionary memories are also mirrored within the human being, through our *Triune Brain system*, and the return of Sedna would seem to indicate a realignment of these three 'memory banks' stored within our DNA that are waiting to be brought back into consciousness and coherence. This is not about going back into time, but rather it is the integration of wisdom held within the Elemental Body, when once, many years ago, we walked in harmony with all life on Earth.

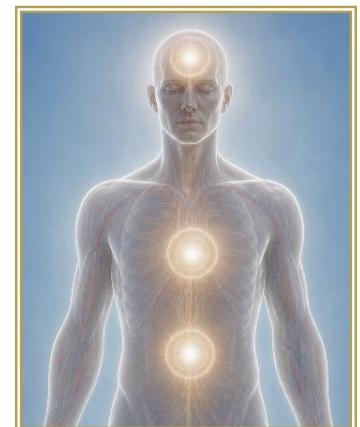

Our Brain Stem or Reptilian Brain, links us back to the time of the dinosaurs some 252,000,000 years ago. Our Mammalian Brain links us to a time when mammals exploded in number on the Earth around 66,000,000 years ago, and the Neo-cortex which was developed around 6,000,000 years ago accounts for about 80% of the brain today.

These three brains link to three different locations in our bodies, the neo-cortex to the head, the mammalian brain to the heart and the reptilian brain to the Solar Plexus.

The neo-cortex links to logic and creative thought, the mammalian brain to emotional nurturing, and the reptilian brain links to instinct and to embodied intuitive intelligence. The three brains are connected via the vagus nerve, and currently 90% of the signals traveling through the vagus nerve are traveling up to the head, only 10% down to the solar plexus.

While the solar plexus is known as the seat of the ego, at its highest level, it becomes a radiant centre of Divine Will - the place where personal identity is surrendered into alignment with a greater Cosmic Intelligence.

No longer driven by fear or control, we begin to function from what could be called Galactic or Universal Consciousness — where there is a direct recognition of our participation within a loving, intelligent, Cosmos.

The return of Sedna is not simply an evolution of intellect, but an awakening into Unified consciousness, where the wisdom of the body, the compassion of the heart, and the clarity of higher awareness function as one living coherent field. In this state, we move beyond separation and begin to remember our origin within a loving, conscious Universe and our innate relationship within the Cosmic field.

When out of coherence, however, all planets when first 'discovered' tend to be interpreted through the Shadow frequency. Many years ago, astrologer Dane Rudhyar, suggested that there were three different levels on which each planet could operate depending on the evolution of individual consciousness – just as described by the Shadow, Gift and Siddhi levels of the Gene Keys.

At this moment in time the majority of humanity will be manifesting the potential energy of Sedna from a position of being caught in old limiting thought forms that are repeated patterns, coming from fear. *Sedna Shadow Level: Victimisation. Alienation. Chronic stress and illness. Trauma. Personal blind spot.*

At a higher awareness the Gift level moves beyond the collective consciousness. This is the key to working with Sedna – her transits offer the potential to realign at a higher level of Consciousness, on a new Time Cycle. However, there can be crises, or challenges, along the way, which requires the release of old beliefs and patterns, which ultimately results in a vastly expanded consciousness. *Sedna Gift Level: Radical acceptance. Heart centred focus. Crisis points. Nurturing a lightness of Spirit.*

At this point in time, few people interconnect with planets at a Spiritual level. What is understood from working with other planets, however, is that the refined and coherent Siddhi frequency is totally different from the two previous levels. Here the struggle of the Shadow level is gone, as are the transcendental crises of the Gift level.

At the Siddhi level the heightened frequencies, are embodied, uniting Earth with Galactic Consciousness to move humanity beyond duality and the 3D Laws of Time and Space as we birth into a new species. *Sedna Siddhi Level: Spiritual Destiny. Transcendental Peace. Outside of Time. Higher Octave of Ceres.*

Ceres which has only just been named as a Dwarf Planet rather than an asteroid seems to play an intrinsic role in our evolutionary journey of remembrance back into Galactic awareness through Sedna.

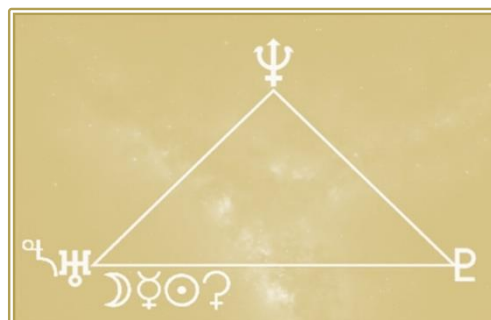

'The newly re-classified Dwarf Planet Ceres can be thought of as the higher octave of the Moon, meaning that the emotional security of the Moon is transmuted to a sustenance and nurturing of our Spiritual security and sense of place on planet Earth with Ceres.'

'This is very similar to Sedna, except that Sedna operates on a far vaster scale, so we may find that Sedna is the higher octave of Ceres – where the spiritual security and sense of place on Earth with Ceres is transmuted into a transpersonal nurturing of our Spirituality and sense of place in the evolutionary Cycle with Sedna.'

Alan Clay

So, this precise transiting line up of the Moon, Mercury, the Sun, and Ceres to Uranus and Sedna, at the time of the New Moon, is a Marker in Time, and has a particular relevance, purpose and destiny for us all as we navigate and integrate these extraordinary and significant times.

Last month, Venus came to join Uranus on Gene Key 8 at the time of the New Moon and now the Sun, Moon, Mercury, and Ceres are also moving through this same key, amplifying its message within human consciousness. Ceres as the final planet in this sequence to pass across Sedna and Uranus, reminds us that true Spiritual evolution is not only about awakening to higher frequencies, but equally about embodying the simple and essential human qualities of kindness, and compassion.

Ceres, known as the Goddess of the Earth, resonates with gentleness, purity, balance, and an innate care for life on Earth. These qualities become vital anchors, helping us to remain coherent, loving and grounded, as we merge with the Galactic energies of Sedna that are moving through the collective field.

So now as we look at the Gene Keys that are being activated at the time of this New Moon, Gene Key 8 is known as the **Diamond of the Self** which also reflects the highest vibrations of Light held within both Vulcan and Taurus when balanced and aligned, moving through the Shadow of **Mediocrity** to the Gift of **Style** to the Siddhi of **Exquisiteness**.

‘To break out of the heavyweight frequency of the 8th Shadow you have to take an exciting leap of faith in yourself. This 8th Gift catches people’s attention because it brings something fresh into the world. The Gift of Style has little to do with our popular interpretation of this word – it has more to do with following your own unique, rebellious spirit out into the world.’

‘True Style cannot be measured by materialistic trappings nor can it be faked. It is the natural flowering of your individuality. To find your own style is to be yourself without concern about what others may think. True Style takes great joy in shattering the grey world of mediocrity that is considered the norm. Where Style is more than skin deep, it is the cutting edge of creation itself.’

‘This Gift is wild, organic and unpredictable energy full of genius and quantum leaps. Such is the power of genius, for it carries within it more than just a new concept – it carries intent from a higher realm that is far beyond the individual through whom it manifests. Their only concern is to free more free thinkers – thus such people inherit a powerful mission in the world.’

‘As an aspect of the genetic family known as the Ring of Water, the 8th Siddhi of Exquisiteness is chemically bonded to the 2nd Siddhi of Unity. These are the two great Feminine Gene Keys in the human genome drawing all human beings along their inevitable journey to self-realisation. The Ring of Water forms a kind of eternal genetic knot with its polarity, the Ring of Fire.’

‘These two chemical families move us along the trajectory of our destinies ensuring that our genetic material finds its opposite match. Deep within the body these chemical families set the primal blueprint for the balance of all the opposing forces inside us. It is the crossfire of these two Codon Rings that the mystical figure of eight is forged within us.

‘This eternal love knot deep within our planetary gene pool sets each man and each woman squarely on the human journey. The true symbolism of the number eight represents the timeless quest for the buried treasure that lies inside each of us – that elusive Diamond of our true Nature.

‘Exquisiteness is experienced when the Divine Essence begins to shine through the individual. In this state of Bliss you fall in love with your own pristine manifestation because it is through this uniqueness that the Divine currents can be accessed. This is the stage at which you achieve transcendence of your genetics.’

‘The only thing these Souls give to the world is their own exquisite lovingness – their absolute delight in being abandoned to the mystery itself, with no need for method or meaning. Theirs is the rush of existence, the aching pulse of the passing moment and the boundless joy that can only come from touching the core of their own existence.’

Uranus and Sedna are activating Gene Key 20 known as **The Sacred Om**, moving through the Shadow of **Superficiality** to the Gift of **Self-Assurance** to the Siddhi of **Presence**.

Sedna began this focus and activation in May 2024 and will remain on this Key until April 2033, whilst Uranus just recently came to join Sedna and will leave Gene Key 20 in May 2027.

Om, from Sanskrit, means the *Universal Primal Sound*. Nothing is by chance, and this particular Gene Key seems to reflect and to mirror the Inuit Sedna story of ancient lineage and species development, as it links to ancient primal times, and to the earliest insects which evolved slightly later than the crustaceans, appearing on Earth around about four hundred and eighty million years ago.

'This aspect of the DNA is very ancient. The 20th Gene Key and its Shadow were developed in species that preceded human beings – primarily in the world of insects. Looking at insects, we can see how incredibly busy they always seem to be – their only focus is to stay alive and to reproduce within a short time frame. **There is a blind activity occurring and like the insects, at a Shadow level, human busyness lacks real presence.'**

'With the development of the neo cortex we began to think and a strange thing happens when we think – we leave the present moment. The illusion occurs because the mind can only think in a linear fashion. This is the trade-off of the incredible abilities of the mind – **for all its genius it is limited to thinking within the domain of a false reality called Time.'**

'Your Self-Assurance is directly equivalent to your ability to escape being a victim of your mind. As you begin to learn the knack, you experience an ability to witness your mind without being caught up in it. An internal spaciousness grows and you no longer have to try to control life. **What actually occurs with this Gift is that the awareness within your solar plexus begins to take over from your mind, opening the way for you to connect into a very powerful Universal power.'**

'The true Siddhic state is one of complete relaxation. Thoughts are irrelevant – there is nothing to say that is not superficial – for nothing is felt but the Presence itself. **When this occurs, the whole world created by the human mind is suddenly seen as utterly superficial.** When this Siddhi has flowered in a person it actually creates a subtle atmosphere around itself – a kind of silent ease that pervades the aura of the person and radiates out to all Creation.'

'The 20th Siddhi is the notion of the Breath of God, or the Word of God. Presence is the underlying nature of Being. It would actually be truer to name this Siddhi, **The Presence**, since the use of the definite article gives us the clear impression that this is a state of consciousness that has nothing to do with any individual. **It is the manifestation of The Presence through a human vehicle.'**

The Earth is on Gene Key 14, known as **Radiating Prosperity** moving through **Compromise** to **Competence** to the Siddhi of **Bounteousness**.

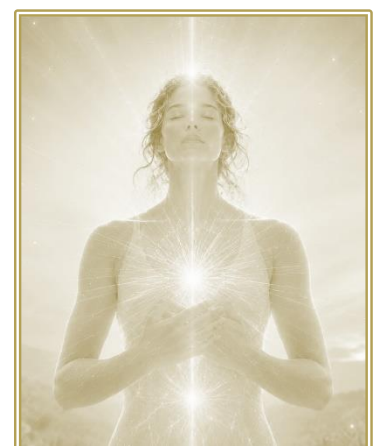

'Compromise has become so embedded in our group psyches that we don't even realise that we are doing it anymore. Compromise is the by-product of living without a sense of personal freedom. **It implies a lack of imagination and an inability to believe in the power of your own uniqueness and individuality.** Compromise begins when we are young as we inherit the world Shadows from our parents and schooling.'

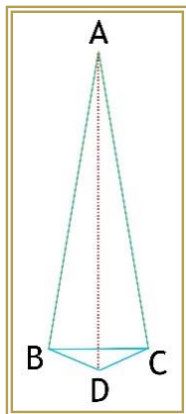

'The 14th Gift is Competence. It is an emerging Gift in the genetic matrix, because it has a lot to do with the collective awakening rather than being an individual Gift. If this Gift is applied for selfish ends it will lead to misfortune. Great wealth without an ideal of service ends in disaster. **Competence is about a part of something transcendent, something huge.'**

'This is Possession in Great Measure and that is the definition of Love. He or she who loves unconditionally generates, like the Sun, huge inner wealth, and radiance. This in turn generates blessings and above all more Love....**It is a Divine formula.**

The Sun gives of itself tirelessly. Its gratitude is infinite. **It is continually refuelled through the power of its own giving.** When the 14th Siddhi flowers within a human being they become a driving force for humanity itself. Their every thought word and deed reaches deep into the morphogenetic field and guides the whole of humanity towards abundance.'

'The mass dawning of the 14th Siddhi would be the uniting of Heaven and Earth. Not just a Golden Age, but a permanent state in which all humans take the helm together – a state in which individual power and collective power become one and the same – creating more and more abundance. **At this level, we need to view humanity as one large expanding genetic spiritual vehicle.** That is the true definition of Bounteousness.'

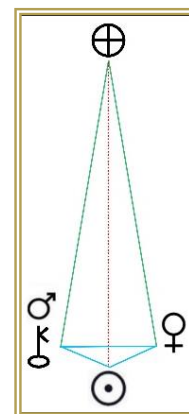

As mentioned earlier there is a very focussed planetary alignment occurring at the time of the New Moon – so looking now at the Grand Cross between the Sun, Earth, and the North and South Nodes, you will see that two Fingers of God are formed.

Yods bring a very intensified energy - the planet at the Apex point (A), is under great pressure, as old natural and habitual karmic patterns are being challenged by the planets at points (B) and (C), to find a new form of expression, which can occur through point (D)

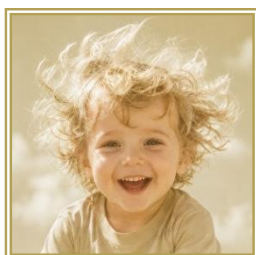

In the case of this Yod, the Earth on Gene Keys 14, is challenging us to move beyond a limited sense of Mediocrity to realise our true multi-faceted potential held within Gene Key 8 as the *Diamond of the Self*.

Chiron conjunct Mars on Gene Key 3, and Venus on Gene Key 12, are working together to assist this shift of consciousness. Chiron, activating the Soul, carries the essence of Christ Consciousness, and when conjunct Mars, has the potential to bring healing to man-made egoic belief patterns, that are held within the group collective.

Chiron and Mars on Gene Key 3, known as **Looking Through the Eyes of a Child**, are moving through the Shadow of **Chaos** to the Gift of **Innovation** to the Siddhi of **Innocence**.

*‘Individuals working from the Shadow of the 3rd Gene Key are trapped in a ‘separation’ consciousness by their own thoughts – thoughts that are coming from a primitive and defensive level. **This ‘separation’ consciousness creates Chaos by resisting the very changes that are required in order to survive and thrive.** They do not trust that the Chaos created by change will lead to order on a new level. ‘*

*‘The Gift of Innovation is far more exciting than simply being creative. It implies that you have permanently escaped the fear-based perspective of the Shadow frequency. **Innovation also requires a deep sense of inner trust.***

*‘All preconceived notions, and dogmas, must be discarded when they no longer serve the developing synthesis. **The Gift of Innovation requires you to become as open hearted and open minded as a child.**’*

‘There are two kinds of Innocence – ignorant innocence that is like a new born baby, the infant that just expresses its beauty without awareness of itself. Then there is the wise Innocence, when the mind and heart have opened up again after a long search with much pain and travail.’

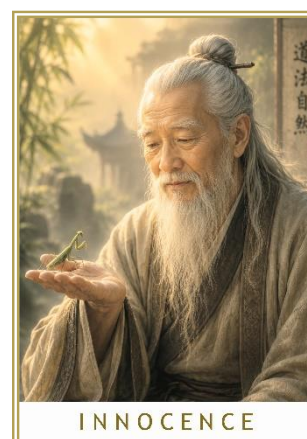

*‘The wise Ignorance and the ignorant Innocence, they are the same – the same field. **The only difference is awareness. Wise Innocence has come full circle.** We don’t have to wait until we are old to be wise. **Wisdom isn’t dependent upon age.** Wisdom is dependent upon Love. **How deeply can we Love.**’*

‘One day humanity will evolve towards its awesome final destiny of Global and Celestial harmony. As the 3rd Siddhi comes into the world, which it will do very shortly, a great remembering of our Innocence will emerge in humanity, because the first vessels of the new human destiny will all be children.’

‘The strange thing about these children is that the consciousness within them will never grow up and become serious. Their awareness will function in an entirely new and different way from our current brain-centred awareness.

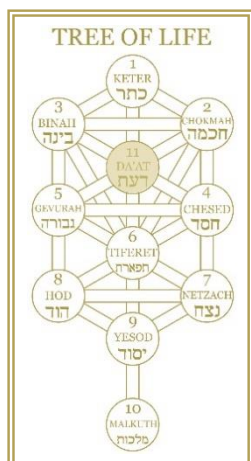

‘Their brain will be the environment itself – it will be inside every other human being, creature, plant, stone and star and it will soon come pouring into the world like a great breaking wave.’

*‘The certainty of order within the Universe is a feeling that can only be captured by a more advanced system of awareness in humans that our mystics have called by many names. **Above all it is equated with the human heart and the feeling of Love and Unity that lies between all creatures.**’*

INNOCENCE

Venus, which passed across the heightened frequencies of Uranus and Sedna, almost a month ago now, is on Gene Key 12 assisting Chiron and Mars to awaken this Innocence and Joy. Gene Key 12 is known as **A Pure Heart** moving through the Shadow of **Vanity** to the Gift of **Discrimination** to the Siddhi of **Purity**.

‘Within the mystery of the 21 Codon Rings, this 12th Gene Key forms a ring of its own within the Ring of Trials, known as the Ring of Secrets. However, its secrets remain firmly locked away until you activate its highest frequency in the 12th Siddhi.’

‘In the ancient alchemical systems, the throat centre was seen as the greatest of all initiations. All the lower chakras including the heart are synthesised and purified in the throat.’

‘In this respect, it represents the boundary of the known and unknown. It is the Abyss or Da’at of the Kabbalah. The Being who has passed through the Abyss and entered the sphere of the 12th Siddhi becomes once again like a child. It is the ultimate purification in which you meet your own death and are reborn in a higher sphere – into the Sphere of Divine Love

‘If you are strongly influenced by this Gift you will recognize the beauty of true expression, which means that you will also recognise when something or someone is not expressing true Soul. Wherever you see true passion moving into the world, there you are seeing the influence of this 12th Gift. It is both sweeping and consuming yet at the same time highly refined.’

‘The 12th Gift contains the teachings of transformation and death – the movement from one level of consciousness to another. Of all the Gene Keys this 12th Gift represents the mythic passage from one state to a higher state in which the stop codon kills your identification with your past, allowing you to be transformed; through tears and laughter, the transcendent enters your body and alters your chemistry leaving you radically and permanently altered.’

‘Everything in the Universe has at its core the same original Purity – we are all shards of a Divine crystal and as our forms go through their processes of polishing, so consciousness begins to remember itself through us.’

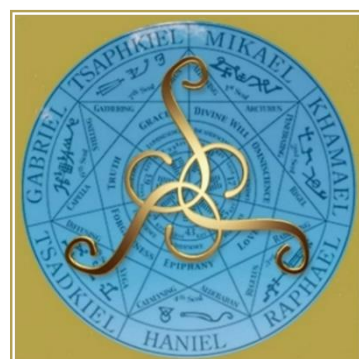

And finally, this second Finger of God shows how the South Node, our collective past karma, is under pressure to realign to the needs of the North Node, our present and future spiritual pathway. Pluto, Divine Will and Neptune the Higher Heart are working together to create this metamorphosis deep within our DNA.

Neptune remains on Gene Key 25 known as the **Myth of the Sacred Wound**, moving through the Shadow of **Constriction** to the Gift of **Acceptance** on to the Siddhi of **Universal Love** and Pluto continues to activate Gene Key 41 known as the **Prime Emanation**, moving through the Shadow of **Fantasy** to the Gift of **Anticipation** to the Siddhi of **Universal Love**.

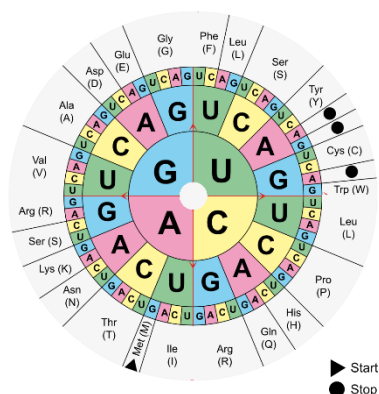

‘At the Shadow frequency, the wound maintains human suffering, at the Gift frequency the wound provokes humanity to evolve and at the Siddhic frequency the wound reveals humanity’s true nature as an Expression of Universal Love.’

‘The 25th Siddhi is one of the Seven Sacred Seals - a mystical group of Gene Keys whose collective role is to heal the Sacred Wound within humanity. The 25th Gene Siddhi is the 3rd Seal, and it heals the human wound of shame.’

‘The 25th Gift makes it difficult to hold any resentment, judgement or indeed worry about life – for now you are carrying the Seed of Love. When you can finally accept everything in your life just as it is right now you will have embraced the human wound. All that Love locked away in our DNA. The DNA is just filtering it through the memory – the ancient memory. This is the embracing of the Collective Wound. Every time someone attains the 25th Siddhi a great genetic constriction is removed throughout Humanity. The bodies of these people have undergone a radical transformation in order to be the receiver or chalice for pure Consciousness’

‘This is the embracing of the collective wound. It is the passage to Christhood, or Buddhahood. We cannot ‘get’ there. We just have to keep on opening, accepting, and the path leads us there of its own accord. It is our natural state.’

‘And Pluto on the 41st Gene Key houses a truly remarkable archetype. It has a very important function – it relates to what is known in genetics as the Start Codon. The evolutionary pressure that surges up in human beings carries our entire genetic history within it, all the way from the amoeba to Homo Sapien.’

‘All this history carries an enormous weight inside you – it can drag you down, but it also urges you to want to break free. The 41st Shadow represents the pressure to evolve to seek out new fields and new experiences. This evolutionary impulse is the secret to the 41st Gift – the Gift of Anticipation. Every start codon inside every single cell is electromagnetically linked to each other. This is the foundation of the holographic body which in turn is linked to the holographic Universe.’

‘What is fascinating about the 41st Siddhi is that it is the Source underlying all true Siddhic states. No matter what manifestation comes through our genetics, they are all ultimately grounded through this Siddhi that is not a Siddhi. In many ways, this is the nameless Siddhi, but we call it Emanation because we have no other way of approaching it.’

‘Emanation is a word that has been used by many ancient metaphysical and mystical systems as a means for understanding something that is really unapproachable. One of the best known of these systems is perhaps the Kabbalah, whose central tenet is a map known as the Doctrine of Emanation. In a nutshell the Doctrine of Emanation points towards a fractal model of the Universe in which everything is a mirror image of itself.’

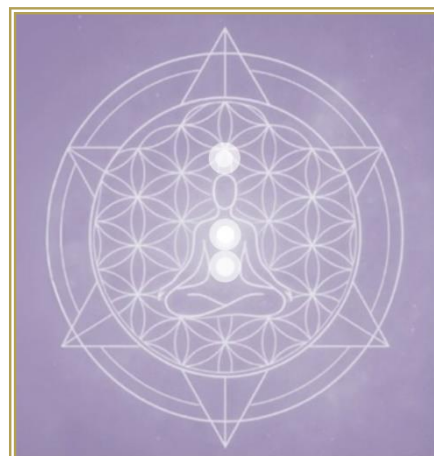

‘There is another interesting point that emerges from deep contemplation of this Gene Key. Somewhere deep within your DNA lies a code whose sole purpose is to trigger the state we call Enlightenment. In certain vehicles, the body picks up a specific set of secret genetic instructions and triggers the neurological process of enlightenment.’

‘It may come as a shock to many mystical seekers that this process cannot be triggered by what we do up on the surface. Within the hologram of the Universe, Enlightenment is a spontaneous acausal non-event. You could say that Grace triggers this process but the point is that no one knows why or when or to whom it will happen.’

The South and North Nodes moved onto Gene Keys 59 and 55 on the day of the last Full Moon, and will remain on these keys until mid-August. The South Node on Gene Key 59 is known as ***The Dragon in your Genome***, moving through the Shadow of ***Dishonesty*** to the Gift of ***Intimacy*** to the Siddhi of ***Transparency*** and the North Node on Gene Key 55 known as the ***Dragonfly’s Dream*** moves through the Shadow of ***Victimhood*** to ***Freedom***.

‘This is the Shadow that makes the world a lonely place, despite the numbers of people there are around, as we rarely communicate with each other in real depth. The 59th Shadow demands that we do some deep inner spring cleaning and it is not a comfortable process. But take heart, because now is the time of the great cleansing of the human wound.’

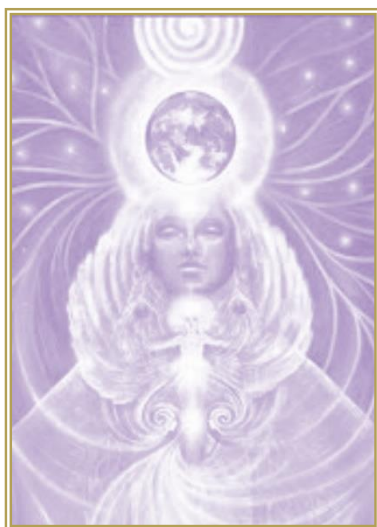

‘Right now the 59th Gene Key is mutating. It is paired with the 55th Gene Key – the 55th Gene Key explains the nature of the Great Change, this transitional period we are living through, in which humanity is moving through a huge deep genetic change. The 59th Gene Key is instrumental in this process. It is dismantling us, opening us up so that we can become an empty vessel for the new, for a new functioning, a new human.’

*'The 55th Gene Key holds the key to our liberation and Freedom. **Our DNA holds our greater Self – the Cosmic part of each of us that transcends our mortal body has lain secretly hidden inside humanity for aeons.** The 55th Gene Key allows us to contemplate and to quicken the actual process of awakening. Up until now, the inner journey has been for the select few – those bold adventurers and courageous pioneers of the inner planes. **But that is all about to change.'***

*'There is a place inside our DNA whose sole purpose is to trigger this awakening. There is no more poignant nor contemporary note sounded than the underworld journey from victim mentality out into the pure air of Freedom. **Of all the Gene Keys, this 55th Key is the one we humans most long for and this is the Gift we will soon be given at a collective level.** As we begin the process of transcending our Shadows, miracles can occur in our lives'*

*'The Time of the Great Change is now upon us. As the Fifth Root Race prepares to give way to the Sixth Root Race. **The 6th Root Race will be triggered through the 55th Gene Key and its mutation within the Solar Plexus centre, the seat of human emotion.** The Sixth Root Race heralds the reawakening of this centre and will allow human beings to experience once again the Universal Quantum field connecting all beings. This reawakening is not a retrograde movement into a past Golden Age but a new integration of the three lower planes, the physical, astral and mental into their higher counterparts – the Causal, Buddhic and Atmic.'*

*'Down the centuries much has been written, spoken and taught concerning the nature of higher consciousness. **We are now entering an era in which more and more people will have direct access to an experience of true higher consciousness.** There will be a genetic mutation that will slowly colonise our species.'*

*'**The old human will literally be bred out of humanity.** This vast and dynamic change is being triggered by this 55th Gene Key and its related amino acid histidine. Soon there will be children born among us who carry the full mutation and who will spread it through the gene pool.'*

*'**We stand on the cusp of a Siddhic supernova – the incarnation of the Divine Feminine spirit.** The end result of this in flowing of the Divine Feminine will result in the purification of all the fractal lines throughout humanity, resulting in a burning up of the collective karma in our DNA and the eventual eradication of all disease on the physical plane.'*

We are in momentous times, and as these light encodements stream through the Universe and into our auric field, we are being gently called to remember that we are not separate witnesses to creation, but are participants within a vast, interconnected Cosmos — each of us innately connected into the unfolding evolution of Life itself.

So, at the time of this New Moon take some time for relaxation and regeneration, to honour and recognise that our biology is beating to an ancient drum that was created long before the advent of this digital fast paced world, and **'embrace the boundless joy that can only come from touching the core of your own existence.'**

May the Peace, and Silence of the Divine Feminine be with Us All.

All Love and Blessings
