'I AM' the Light that Moves to Rest

This month the New Moon takes place on the 2nd or 3rd of October at 10⁰ Libra 03, following on from the Full Moon partial Lunar Eclipse which took place on the 17th/18th of September and the Equinox on the 22nd or 23rd of September, depending on where you live.

The Full Moon was a Super Moon, and all eclipses have an inner effect upon the energetic system. The September Full Moon - known as the Harvest Moon - is a gathering in of all that has been sown in this cycle of time, coming to fruition. Adding to this, at the time of this New Moon, there will be an Annular Solar Eclipse that will be physically passing over Southern Chile and Argentina specifically, but ethereally across the whole Earth. This eclipse is part of Saros Cycle 144 known as 8 South, which began its journey from the South Pole in 1718 and will complete its journey at the North Pole in 2962.

So, the yearly cycle of New and Full Moons are all part of far larger cycles, which echo the patterns and archetypes that have been laid down within the Saros Cycles, that span some one thousand two hundred years, as the 'Shadow' falls across the Earth passing from Pole to Pole. Passed down from generation to generation we echo the teachings and beliefs of millennia – and all is under review. For right now, Mother Earth and all of us, as we circle around the Sun, are going through a radical cleansing and transformation. All that is out of alignment is being brought to the surface to be transmuted and rectified as the Light continues to intensify.

This New Moon and the Eclipse are highlighting the Libran qualities of Balance and Judgement. The Constellation of Libra flows with the **3rd Ray of Active Intelligence** – which has, at its core, the ideal and synthesis of Will/Power and Love/Wisdom in harmonic resonance – the Heart and Mind working in harmony.

At the personality level, Venus, as the Planetary Ruler of Libra, working through the **5th Ray of Concrete Knowledge** can bring a narrow perspective and a lack of Compassion, which manifests as too much pride in one's intellectual capabilities, as it is very possible to be extremely intelligent but not necessarily Soul centred.

The 3rd Ray links to both the Earth and Saturn – for it is here on Earth that we all take on the journey of creating with our thoughts and feelings and, through trial and error, discover and learn the power that words and feelings have upon the wellbeing of each of us, individually, and collectively.

Saturn, is exalted in Libra, acting as the *Ring Pass Not*, patiently guiding us to take on the responsibility for our actions, until we ultimately become co-creators with the Creator – At One with Source. From Soul Awareness, the Libran energy is expressed through Uranus, and the **7th Ray of Ceremonial Order and Magic**.

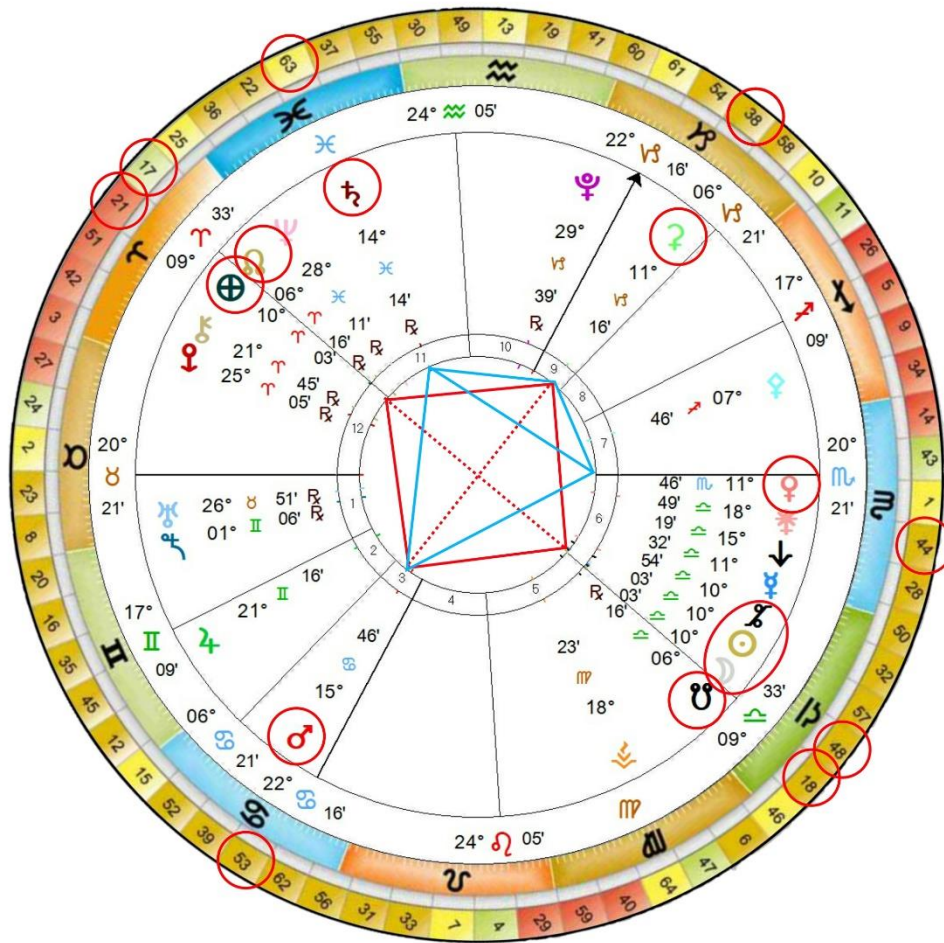

The 7th Ray has an impeccability and precision that is most intimately concerned with the alchemical transformation of Matter. The Aquarian Age is over lighted by the 7th Ray, and it is this *collective* Transformation that is the focus for this Age, the raising of resonance, so that we might reveal the Spiritual Essence, held within Matter, the Light within Form that interpenetrates all Life.

Keep me away from the Wisdom which does not cry, the Philosophy which does not laugh, and the 'Greatness' which does not bow before children.

There is a Grand Cardinal Cross (red lines) and a Kite formation (blue lines) at the time of the New Moon. The Cardinal Cross is formed by the Sun ☉ Moon ☾ and Astraea ♁ being opposite to the Earth ⊕ and 90° from both Mars ♂ and Ceres ♀. The Kite is created by Saturn ♄ being 120° away from both Venus ♀ and Mars, opposite to Ceres. Astraea conjunct the Sun and Moon is central to this New Moon Eclipse.

The Sun and Moon and Astraea are on Gene Key 48 known as the **Wonder of Uncertainty** moving through the Shadow of **Inadequacy** to the Gift of **Resourcefulness** to the Siddhi of **Wisdom**.

'The frequency that the 48th Shadow releases into the cells of your body emerges as a profound uncertainty about the future and your ability to handle it. Coupled with its programming partner the 21st Shadow of Control – these two Shadows programme human beings to try to stay in control of everything.'

'The 48th Shadow is like a bottomless black hole. It is the primal fear of the feminine. Only during times of great collective crisis is it possible to see the potential of the 48th Gene Key. Because humanity is now facing its greatest ever crisis – namely the destruction of our own environment – the potential of this 48th Gene Key is urging us to dig deep into our Souls for collective and practical resolutions.'

'In the years ahead we are going to have to understand this Gene Key and the hold that its Shadow frequency has over us. Every human must eventually turn inward and look into this deepest fear – the fear of the void. What we will discover is that the void is not empty and cold but warm, loving and bursting with light and wonder.'

'Of all of the Gene Keys this is the one of depth, the deepest. It is the most Yin, along with the 2nd Gene Key...here we find the unknown, the unknowable, the eternally abundant, infinitely unpredictable – the mystery of mysteries.'

'The secret of moving beyond the 48th Shadow lies in one word – Trust. As you learn to trust life on a broader scale the well begins to reveal some of its secrets.'

'First, you must enter the well – by entering into this field of fear you slowly learn to stop being afraid of fear itself.'

'Instead of hiding from the darkness inside you, it is as though you finally lower a bucket down the well and then pull it up to see what it contains. What you discover is a wonderful surprise – the well has all manner of solutions to all manner of challenges – you will be amazed that so much Light can emerge from such a dark place.'

'As you begin to trust life and your place within the greater whole, your natural gifts spontaneously emerge. All of your inner talents and resources are ultimately designed with a built-in programming agenda – to offer service to the whole. You begin to realise that you are capable of far more than you ever dreamed possible.'

'The 48th Siddhi of Wisdom is one of the truly great Siddhis. Wisdom has been revered and sought by all cultures since the beginning of time. Most see Wisdom as some inner knowledge that allows the individual to see beyond the confines of normal awareness. However, Wisdom is rooted in not knowing. As the 48th Siddhi opens up the void inside you you enter into a primal state of not knowing. **Everything about Wisdom is about being unsafe and insecure.'**

'There is a great difference between being insecure and unsecured – in insecurity we are looking for safety, for answers - to be unsecured means to be released from fear altogether. It means to have stepped through the Group Consciousness of fear and to be more secure than can possibly be imagined. No fear of death, no fear of life.'

'Wisdom is feminine in essence deep and unfathomable. Water is a symbol for Wisdom because its nature is paradoxical – it is empty yet full, weak yet strong, resistant yet yielding. One who is truly wise is like water in all these ways – you are wise because you do not know you are wise, you are powerful because you do not care about power, you are fearless because you do not really exist!'

The Earth is on Gene Key 21 known as **A Noble Life** moving out of the Shadow of **Control** into the Gift of **Authority** to the Siddhi of **Valour**.

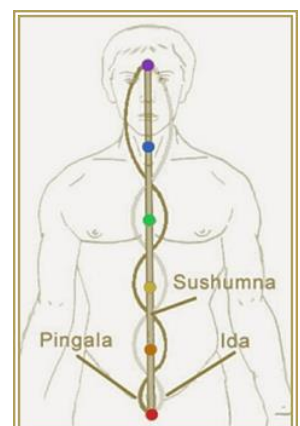

'One of the major issues to plague human beings and the cause of enormous conflict and violation of basic human rights is Control. Wherever you find the 21st Shadow you will find someone either too weak to control anything at all, or someone with a deep seated need to control everything in their environment.'

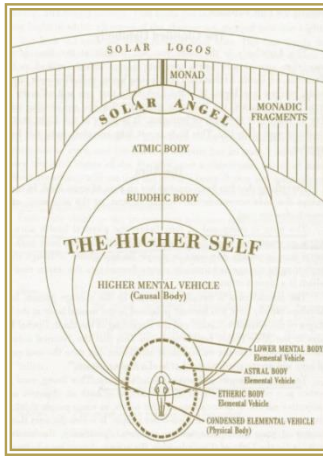

'Authority is a frequency that is determined by intent. If you assert Authority through the hierarchical base of the 21st Shadow then you rule through control and fear, which never inspires true Loyalty. **True loyalty can only be maintained when the frequency of love outweighs the frequency of fear.'**

'True Authority unites rather than controls. The relationship between Authority and submission is the relationship between yin and yang, between the male and female energies throughout our Universe. The Male Female polarity balanced so that the Yin/Yang flow is finely and exquisitely tuned into service.

'In the 21st Gift we see that true Authority, based on service, inspires loyalty. Valour is the highest frequency of the 21st Gene Key – it is an energetic field released into the world through a chemical signature within your genetics that underpins nobility.'

'Valour is nobility in action. It contains virtue, wisdom, love, courage and, above all, sacrifice. As an archetype, Valour signifies the ending of all karma, even though the states preceding it often carry a great deal of karma.'

'This Gene Key is about shining bright in the wilderness. The Siddhi of Valour may sound extremely impressive. However, we need to remember what the Siddhis really are – they are a mystery revealed from the inner planes when we are ready, when we have earned it. Valour is forged on the anvil of life. No matter how muddy the waters are, you have to realise your pure nature can never be soiled. To be a master, that is a Being who has attained realisation through this Siddhi, you must lead by example.'

'Valour is an act of absolute self-surrender in which you lay your entire being on the line for a higher ideal. Valour represents the surrender of the male principle of control, to trust, represented by the feminine principle of trust. The power of Valour could be summarised as the courage and love that must be found within the lower self to die into the unknown world of the Higher Self.'

'That is what the true meaning of this Gene Key is about – the lightening breaks through only when Grace dictates, and the thunder always precedes it. Be aware therefore that whenever the thunder of intense change comes into our life, the lightening is never far behind.'

At the time of the New Moon, Mars and Ceres are in opposition to each other. Mars represents our personal, individual will, the masculine principle of outer drive, and achievement and Dwarf Planet Ceres, as the Mother, the Goddess of the Harvest and Earth, represents the feminine, inner qualities of reflection, nurturance, and protection, aligning to the principles of ***'Know Thyself'*** and ***'Do No Harm.'***

Mars is on Gene Key 53 known as ***Evolving Beyond Evolution*** through the Shadow of ***Immaturity*** to the Gift of ***Expansion*** to ***Superabundance***.

'The 53rd Shadow of Immaturity points us in a single direction – immaturity is that stage in human evolution where we have not yet learned to look inwards for resolution of our problems. This whole Gene Key spans the spectrum from externally fixated to internally grounded.'

'The Shadow of Immaturity is rooted in the human tendency to see ourselves as separate from each other and Nature. The human mind has enormous difficulty seeing itself as a collective organism that is deeply embedded in Nature and the Earth. This sense of separateness, of being alone, underlies the primal fear of death. At the Shadow level, this fear is an inner yoke bound to human intention, and intention is like the arrow you load into the bow of your actions. Immaturity is nothing more than loading bent arrows into your bow and because of this, no matter how well-meaning, your actions, at this frequency, they can only lead to further disharmony.'

'It is through the two Shadows of Greed and Immaturity that humanity must finally awaken to its nature as a single organism. As you come to understand this vast and sweeping insight, your heart begins once again to open and trust in Life just as it is – with no opinion, no judgement, no attachment and above all, no fear. From the point of view of the 53rd Gift all that exists in life is the perpetual impulse to expand. The Gift of Expansion demands that individuals transcend their personal opinions, views and attempts to understand what is going on. Expansion is a process of transcending and including.'

'In a human being, the expansion of frequency can only occur in one way – through the heart. As you allow awareness to expand it opens your heart. You see the evolutionary impulse in all of life – all interconnected – all one. The 53rd Gift gives way to the bhakti – the ever-expanding-transcending-and-including energy of Life itself. Once you make this shift into your heart you are continually replenished and expanded.'

'We are indeed entering a new evolutionary phase right now in which human awareness seems ready to make a great quantum leap in terms of its expansion, but even though awareness may expand, Consciousness does not expand since it is already everywhere and everything and even everywhen. This is the crucial truth to understand. Beneath the form, Consciousness never changes or evolves or expands or contracts. It simply is.'

*'Superabundance is a space beyond frequency, but we can only describe it as a very high frequency at which there is nothing left to do in the world. **The 53rd Siddhi represents the state beyond and behind awareness known as Pure Consciousness.** This Gene Key links to the Ring of Seeking, however at a certain point you have to let go of your seeking as the awareness inside expands outside the form. **At this stage known as Enlightenment the great and final leap occurs – it is the leap into Pure Consciousness and the end of evolution itself.'***

Looking now at Ceres, you will see it is at 11⁰ Capricorn on Gene Key 38 known as **The Warrior of Light** moving through **Struggle** to **Perseverance** to **Honour**.

'This Gene Key still influences all human beings today, regardless of how closely associated you are to this Shadow. It is there in the collective energy field of humanity and it is particularly strong when certain groups of human beings are threatened by other groups, manifesting through its aggressive reactive side. The 38th Shadow likes and needs a fight and the nature of this fight is dependent upon its frequency. At the Shadow level there is a stubborn persistent need to fight no matter what the outcome.'

*'The 38th Gift is the Gift of Perseverance. This is a Gift which thrives when you are up against the odds. These people are extremely active and physical – they make the impossible look effortless. **They are people of action. As with the 39th Gift the 38th Gift has a strong link with the archetype of the warrior.** Wherever there is a fight for a higher purpose especially against insurmountable odds, there you will find the 38th Gift stretching itself to its limits.'*

'The 38th Gene Key sets the pattern of a human struggle – the Struggle of all form to reach Spirit. In humans it is represented by the quest of the inner Warrior of Light against the dark forces of the lower nature. Perseverance is the most essential attribute of the inner warrior because the darker forces of human instinct are so deeply embedded in our nature. At a certain level this Spirit enters into the realm of a pure frequency - into the realm of Honour.'

'Honour is action that is rooted in a Love so pure that it sacrifices itself, without a thought, to serve a higher aspiration. Every act of Honour carries an equalising force into the world rather than a divisive force. If the act brings people together into a high frequency field, it is an act of Honour. Honour always carries the frequency of mercy and surrender within it.'

*'The 38th Siddhi retains a deep mythic connection to Struggle, aggression and all the darkest sides of human nature, however, people in whom this Siddhi manifests are the highest form of warrior. **They become our Holy Warriors those who cannot be tarnished by the world.'***

*'As the Warrior of Light, the 38th Siddhi does not fight the lower nature, rather it absorbs the forces of darkness deep inside itself through its action, and in doing so shines out with immense purity in the world. Whenever a Siddhi dawns in a human being, its programming partner is also activated. **Thus the 39th Siddhi of Liberation is also released alongside the 38th Siddhi – unleashing a chain reaction resulting in a stream of dynamic liberating energy lasting for generations and generations.'***

Looking now at the second planetary pattern, you will see that the planets Saturn and Venus join with Mars and Ceres, to form a Kite. As shared, both Saturn and Venus resonate with Libra – Venus is the planetary energy that rules Libra from a personality level and Saturn, at a higher resonance, is exalted in Libra.

As we enter into this New Moon Eclipse, Saturn, as the Gatekeeper into higher consciousness, is monitoring the clarity, balance, and harmony of our inner being to see how we are clearing, refining, integrating and maintaining our emotional body. For Venus relates to our 'likes' and 'dislikes' and is the primary planet that highlights our personal feelings, desires and entanglements - patterns of thought that have been developing and building since birth, stored within the subconscious and group consciousness.

Venus is on Gene Key 44, known as **Karmic Relationships** moving through the Shadow of **Interference** to the Gift of **Teamwork** to the Siddhi of **Synarchy**.

'The ancient Chinese called the 44th Hexagram Coming to Meet, which is of course highly appropriate since this 44th Gene Key concerns how, why and when people meet each other, as well as the results that emerge from group or family dynamics. This Gene Key is all about how we respond to the Shadow Consciousness of the world. It is inside us, downloaded at conception, and life places us deep in Interference frequencies, dysfunctional families, challenging hierarchical dynamics and groups that split apart, all in order for us to learn this great lesson.'

'It isn't about the others. It never has been. It is about us. The Interference begins inside us, as a perception of the outer world that is rooted in fear. When we see through the illusion, everything in our life begins to change.'

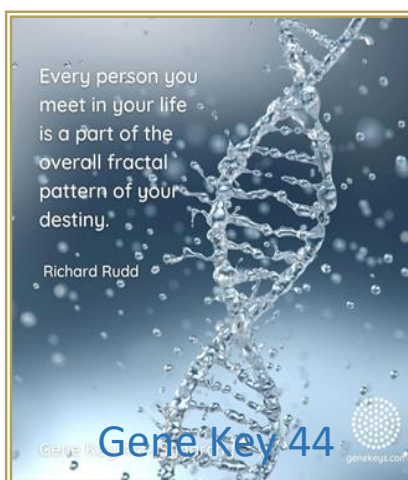

'As you learn from each relationship in your life and over time come to master the lessons each affords you, then the frequency of your entire hologenetic profile heightens in pitch and you begin to attract higher frequency fractals.'

'The moment we begin to see relationships appearing in the world without Interference patterns, we will know that the core human fractal/consciousness is rebuilding itself from the bottom up. Couples who are actively involved in clearing out this collective genetic dysfunction are the pioneers of a coming new age.'

'As the frequency of this 44th Gene Key rises the Gift of Teamwork is born. To really understand this Gift of Teamwork you also need to understand something of the mechanics of incarnation. Your Causal body, or Soul, which vibrates at a very rarefied frequency also travels with the Causal bodies of others across space and time in a cosmic relationship dance. Such fractal lines of evolution have been understood through the ancient Laws of karma.'

'As we awaken to a higher potential within ourselves, we begin to activate our inner genius, our higher life purpose and simultaneously we come into alignment with others doing the same. We move into a higher hierarchical gear, but instead of this hierarchy being based on control, manipulation and fear, it is based on creativity and service.'

'The time we are in now, this transitional era, this Great Change, is a breakthrough at every level within the Universe. The Sun is involved, the Galaxy is involved, and the entire Cosmos is involved. Awareness is opening up within the living chain of being throughout the Universe. This is what is meant by this wonderful word Synarchy. Synarchy means that we all lead together. Synarchy is not an individual phenomenon. This Siddhi is one of the great collective Siddhis. It can only blossom in a collective, as a collective.'

'The 44th Siddhi is truly remarkable. It concerns the complete understanding of the mechanics of human destiny and the entire story of humanity. The being expressing the 44th Siddhi therefore occupies a specific genetic vehicle whose mutation causes, in time, a chain reaction through humanity. The awakening of a core fractal essentially involves the death of the illusion of its individuality.'

'There are a finite number of core fractals – 144,000 to be precise. Synarchy has existed since the dawn of time. It is simply distorted by an interference pattern – this distortion or sacred wound is literally wound around the arms of every single fractal line.'

'It is the reason for human suffering, but as the Universe awakens, the Interference is gradually cleared and the Synarchy that lies beneath emerges.'

'Humanity has always sensed the existence of Synarchy – it is in all our myths of a past Golden Age and our present desire to create Heaven on Earth.'

This archetypal memory pattern of **Heaven on Earth** is held deeply within the Group Collective and expresses through the asteroid Astraea, which at the time of the New Moon Eclipse is on the same degree as the Sun and Moon. Astraea was said to be on the Earth alongside humans during the Golden Age of Man, and when the Iron Age dawned, bringing along misery and wickedness, Astraea was the last of the Immortals to withdraw from the Earth.

The essence of Astraea is Idealism, Innocence and Purity. There is something sublime about Astraea's idealism, which seems to relate to Divine Order. Unsurprisingly, it does not always sit comfortably in the 'real' world - just as Saturn's true balance is hard to achieve and maintain.

However, according to the myth, when the consciousness of Astraea returns to Earth she will once again bring Heaven to Earth, the Utopia that was here during the Golden Age, bringing an end to human suffering reflecting back to us the Pathway of the 44th Gene Key which is pivotal at this time.

As part of the Kite Formation, Saturn is on Gene Key 63. Gene Key 63 is known as **Reaching the Source** and moves through the Shadow frequency of **Doubt**, to the Gift of **Inquiry**, and on to the Siddhi of **Truth**.

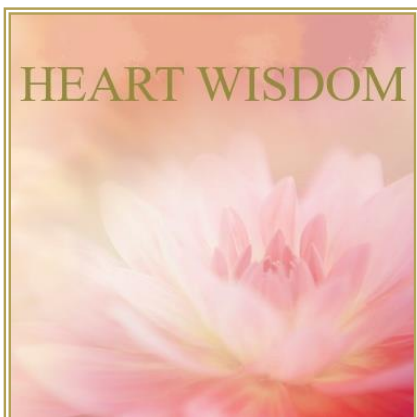

*'When the logical mind is prevented from doubting, it also stops evolving. **Without Doubt, the logical mind is inherently unhealthy because it short circuits its own nature, which is to keep asking questions.** The other important aspect about Doubt is that although it is truly impersonal, we humans make it personal.'*

'If Doubt serves genuine Inquiry then it becomes creative, but if it becomes personal or internalised, it becomes destructive. Your fear of uncertainty needs to be recognised and embraced because the deeper you can embrace uncertainty the closer you come to transcendence.'

*'When the energy of Doubt is harnessed cleanly it becomes the Gift of Inquiry. Inquiry is about remaining open without finding a definitive answer to life. **All pure Inquiry is of great service to humanity.** It inevitably unlocks many of nature's secrets by examining life in minute detail.'*

*'At higher levels of frequency, you begin to enter the holistic domain of synthesis in which all phenomena are increasingly seen to affect each other. **This quantum world thus forces your Inquiry into a far more subjective territory – that of your inner self.***

When you begin earnestly and honestly to question your own nature and purpose – you begin refining your physical and spiritual essence to such a height that you arrive at liberation or spiritual realisation.'

*'We stand at a time in evolutionary history in which the process of Truth is being triggered. **One day all of humanity will realise itself as Truth.** Truth must always come about through communion, through creative resonance and only when the mind has been transcended.'*

*'As humanity begins to open its heart in the epoch that lies before us, more and more layers of Truth will be revealed. We have been through the Age of Outer Inquiry and we are now passing into the Age of Inner Inquiry, in which more and more people will begin to turn naturally inwards and seek the Source of their Being. **Truth is your natural state - It is a drifting space, a total sinking into your Being and so beautifully simple - Truth is the Eternal Moment of the Universe.***

*'It is beyond our perception and yet it's closer than a heartbeat. It is our nature and goal to be an embodiment of Truth so that we too one day can say **'I am the Way, the Truth, and the Light.'***

Finally, over the last several weeks, since the time of New Moon in Leo and the Lion's Gate on 8th August, the South Node and North Node have been passing through the Collective Consciousness of Gene Keys 18 and 17. The North Node on the 17th Gene Key is all about our innate wisdom, the opening of the Third Eye, and the transcendence of dualistic thinking.

The South Node on Gene 18 holds the culmination of past collective karmic patterns that are seeking to be transmuted and integrated into the highest frequencies to assist this transcendence.

The South Node on Gene Key 18 is known as **The Healing Power of the Mind** moving through the Shadow of **Judgement** to the Gift of **Integrity** to the Siddhi of **Perfection**.

'The 18th Shadow holds a key secret, that all judgement is a self-Judgement. The key to raising this level of frequency is to realise that everything external in your life is a mirror of an internal process seeking resolution. As you move beyond the victim mind – your frequency rises, and your external and internal life reflect these changes.'

'A cleaned-out mind is a rare thing. A mind with Integrity has terrific power to serve the world. Integrity uses Judgement in an objective and impersonal way. Judging from the heart is never cruel because Integrity has only one purpose - to serve the whole in the spirit of truth and compassion assisting other to step out of the victim mind.'

'In the East they call this mind the Yi, the Wisdom Mind and it is a mind like water. It flows in harmony with the Universe. It sees the Perfection and the flaws and it knows its role in bringing those flaws back into alignment with the greater Perfection.'

'The 18th Siddhi is not often seen in the world today Someone demonstrating the 18th Siddhi is above the victim mind – when they look at someone, even someone who appears genuinely evil, they will only see the Higher Self hidden in that person.'

'By holding this high thought frequency they influence hidden currents of energy that raise the frequency of others. This is called Siddhic thinking and it involves thinking with the heart.'

'The 18th Siddhi serves a very mystical purpose – it heals the split in the mental plane itself bringing humanity closer and closer to its realisation of Oneness. The 18th Siddhi is the source of the tradition of the Bodhisattva Vow.'

'The Bodhisattva Gene Keys keep returning to the planet as individual human beings whose sole purpose is to build this collective vision of Perfection on the material plane. As we will all one day see, the end of this story also happens to be the beginning of our Universal Life.'

This Eclipse New Moon is seeking to activate and to impart into our inner being the concept and the realisation of *Siddhic Thinking*, in which all the written words, all the scriptures, and all the dogmas have but one purpose, and that is to Awaken us to the Innocence, Purity, Love and Expansiveness, that is at the core of our Being. In this openness and mentally *'emptied out state'* Wisdom resides, waiting to reflect back to us the Perfection of the Light of a Golden Age – Heaven on Earth.

Love and Blessings to All
