

Cosmic Overview

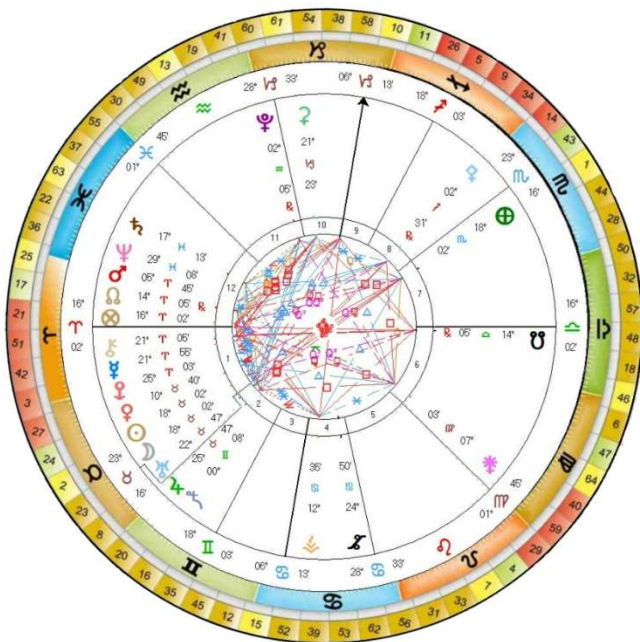

Taurus New Moon 2024

*So powerful is the Light of Unity that it can
illuminate the whole Earth.*

Baha'U'Llah

'I AM the Penetrating Light of the Path'

This month the New Moon in Taurus occurs on the 7th or 8th of May, depending on where you live, at 18° Taurus 02, following on from the earlier Full Moon in Taurus which took place in the latter part of April.

Looking back, just to recap, April has been an extraordinarily intense month astrologically, the 23rd or 24th of April, was the timing for the Wesak Full Moon Festival marking the Sun/Taurus, Moon/Scorpio polarity. The integration of the opposites.

Three days earlier Jupiter and Uranus came together to begin, another 14 year cycle around the Sun. These conjunction points are regular markers in time, like a heartbeat informing the cycle, and both Jupiter and Uranus seek to awaken and expand our consciousness.

On the 8th of April, there was, of course, the powerful Total Solar Eclipse which will still be informing and unfolding through the next months. At the time of the Solar Eclipse the Sun, Chiron, Moon and MC were all on Gene Key 51 moving through *Agitation*, to *Initiative* to *Awakening* and so this impulse to Awaken will continue to arise and activate within our consciousness.

The Constellation of Taurus is particularly connected to the Buddha. Buddha's teachings evolved around a fundamental need to be in the world but not of it. This is a paradox as the Taurean vibration and essence, as experienced through humanity at the personality level, is intimately linked to the desire and need for material security. However, the Path of Detachment so central to the Buddhist teachings, opens the way for the entrance of Light, the Creative Will, and the energies of the 1st Ray.

Initially, we receive the light flowing through the Taurean Constellation via the 4th Ray of *Harmony through Conflict* which moves through the planet of Venus, at the personality level, on the 5th Ray of *Concrete Knowledge* and ultimately, after initiation, through Vulcan on the 1st Ray of *Will and Power* at Soul Level.

Vulcan is yet to 'materialise' which it will do when human consciousness has evolved sufficiently to be able to respond to its planetary energies – when we are no longer trapped in limited material thinking and desire and when we use our will, purely as the Will-to-Good. It may well be that Vulcan aligns with us through the 5th Dimension which we will witness when resonating from that level of consciousness - as such Vulcan's prime purpose is to release us from the trap of materialism.

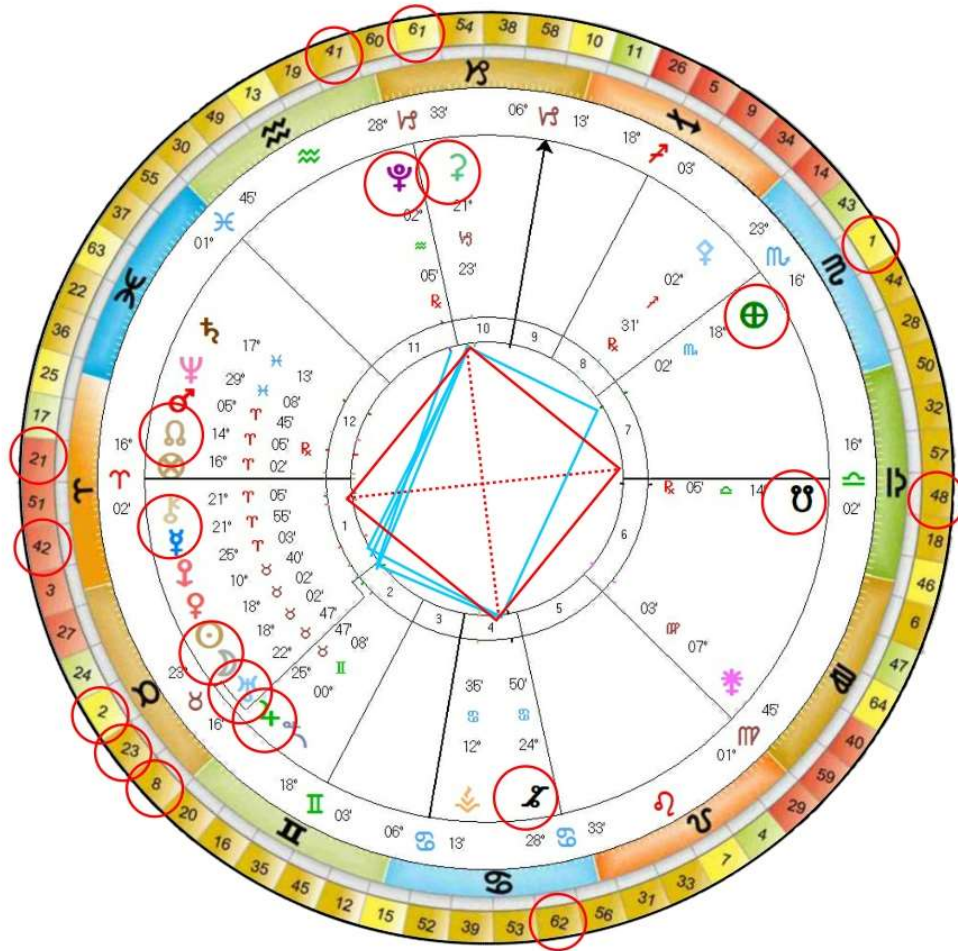

The Law of Detachment

 In detachment lies the wisdom of uncertainty	 In uncertainty lies the freedom from the known
 Detach from the outcome - be in the process	 Surrender to the dance of the Universe

Human beings and all living things are a coalescence of energy in a field of energy connected to every other thing in the world.

Lynne McTaggart

Chart for the Taurean New Moon May 2024

Taurean New Moon 8th May 2024 04:22 BST London UK

<https://www.timeanddate.com/moon/phases/>

The backdrop to this New Moon is played out through the South Node ♁ on Gene Key 48, known as the **Wonder of Uncertainty**, and the North Node ♀ on Gene Key 21, known as **A Noble Life**. In a nutshell, this is about trusting Life through all the twists and turns that are occurring and could be summarised as the courage love and balance that must be found within the lower self to die into the unknown world of the Higher Self. ♀

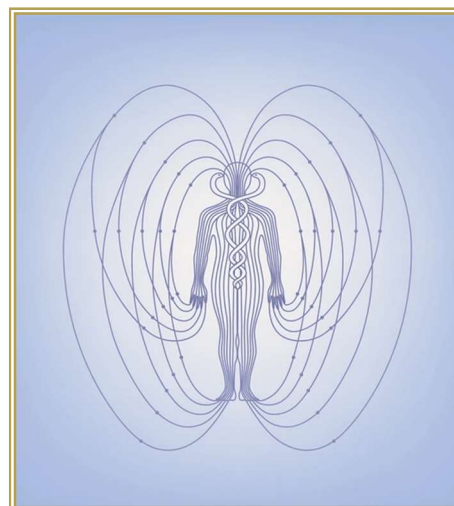

At the time of this New Moon, the polarity of the electro-magnetic field, the Yin and Yang, the Masculine and Feminine is highlighted. The Sun ☉ and Moon ☾ are on Gene Key 2 known as **Returning to the One** moving through the Shadow of **Dislocation** to the Gift of **Orientation** to the Siddhi of **Unity** and the Earth ⊕ is on Gene Key 1.

‘As the most archetypically feminine of all the 64 Gene Keys, the 2nd Gene Key and the journey it represents contain a beautifully simple distillation of Cosmic wisdom. If you wanted to describe the nature of humanity and the reason for our existence to an alien being you would have to look no further than this 2nd Gene Key. As the 1st Gene Key tells the story of the great masculine principle of energy and light, the 2nd Gene Key grounds this story into the world of form.’

‘Even at the Shadow level of consciousness, this Gene Key teaches us that there is a purpose to everything in existence. At no point in evolution has anything ever occurred that was not a part of a huge, interconnected plan.... One of the translations of this hexagram, known as Kun, is the word Field. This is a beautifully apt word to describe this 2nd Gene Key, because it represents the Universal field in which we live. To move in harmony with this field is to be orientated, and to move out of harmony with the field is to be disorientated and dislocated.’

*'The Gift of Orientation has two faces. The Gift of Orientation either comes as a shift in your awareness that affects your actions, or it comes as a shift in your actions which then catalyzes a shift in your awareness. Whichever path is taken there is an increased realisation of synchronicity occurring in your life. **Evolution itself is drawing you inexorably along the path towards awareness of your Unity and Oneness.**'*

*'The 2nd Gift has a special role within the DNA in that it creates an 'attractor field' around you. **As the frequency through the 2nd Gift rises you live more harmoniously and the electro-magnetic power of your aura increases.** As you let go into the feminine yielding quality of this Gift, the more Universal power flows through you.'*

*'As your awareness begins to operate at its highest biological level – through the solar plexus system – so you fall into an easier rhythm of life. **As you become orientated into a wider context, your real face begins to show itself in the world - you begin to experience life in a more and more magical dimension.**'*

*'One of the other indicators of your rising awareness is to be found in the 8th Gift of Style. Through the chemical family known as the Ring of Water this 2nd Gift shares a strong genetic link with the 8th Gift, which presents as a new and original way of living. **As you become oriented into a wider context your real face begins to show itself in the world.**'*

*'The 2nd Siddhi describes the state of enlightenment or awakening. **It is the cornerstone of all the Siddhic states, being as it is the essence of the Divine Feminine.** As do all the Siddhis, the 2nd Siddhi carries a specific mythology when it manifests through an individual into the world of form. As one of the primary pillars of our DNA, the life of one who lives within this Siddhi is of great relevance to our evolutionary history.'*

*'These beings exert an enormous magnetic influence on our entire planet. **Although it may sound like science fiction the expression of the 2nd Siddhi in a human being actually changes the direction of the Earth as it moves through space.** The 2nd Siddhi can therefore only be born in the world of humanity if our whole species makes a leap in consciousness.'*

'In order for such a leap to be made, we have to wait for a certain set of geometric co-ordinates to line up in the Cosmos. These are the alignments that astrologers are always seeking to find and understand in the heavens.'

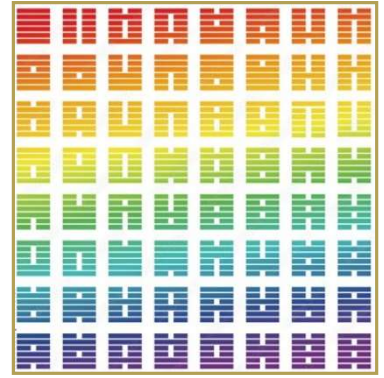

*'To transcend into Oneness is not easy to explain. If you see Oneness as an experience to be attained or that may one day happen to you, then you are caught within that straight line between two points. **Oneness cannot be comprehended, only lived - it is the unification of all opposites, this cannot be described, only experienced.**'*

*'It is the original nature of consciousness itself. A highly beautiful plan unfolding in time and space, swept along by currents of evolution. **This is our final destiny as a species - to realize our state of Oneness and Unity with all that is.**'*

And the Earth on Gene Key 1 is moving through the Shadow of **Entropy** to the Gift of **Freshness** to the Siddhi of **Beauty**.

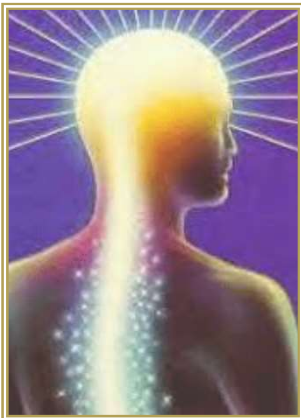

'The Chinese I Ching is one of the greatest spiritual books of all time. The I Ching is a mathematical mirror of the genetic code and one can actually reduce all 64 archetypes down to four essential principles.'

'These are captured at the beginning and the end of the I Ching sequence itself – the 1st and 2nd Gene Keys and the 63rd and 64th Gene Keys. These two pairs are like the prologue and epilogue to the great book itself. Upon these four principles, or pillars, life is built.'

'The lower frequency of the 1st Gene Key is Entropy – 'A measure of the disorder or unavailability of energy within a closed system. More entropy means less energy available for doing work' The 1st Shadow appears in your life whenever you feel flat or sad or low. The state of Entropy is rather like a vacuum state. Your system is recharging so the energy within you withdraws into a kind of stasis. The resulting feelings, or lack of feeling and/or enthusiasm provide a delicate environment for something quite special to occur, if you are patient enough to allow.'

'Every time an individual moves cleanly through their low frequency chemical process, they enact the creation myth – out of darkness suddenly light emerges and as if by magic the low energy field switches and is experienced as joy. This joy comes as unexpectedly as the sadness does.'

'This 1st Gift is called the Gift of Freshness because whatever emerges out of its numbing chemistry field is absolutely new. Freshness conveys aliveness, as though it refers to something burning with an inner fire.'

'This is exactly how people empowered by the 1st Gift express themselves creatively, as though surrounded by a halo of something brought with them from another world.'

'It is through individual creativity that all diseases and negative patterns will eventually leave this planet. The 1st Gift can perform wonders within small organizational groupings.'

'As you raise your frequency through this Gift you become a person likely to be singled out by others as a natural born leader. This Gift brings the potential to be a clear vessel for the creative process so that evolution can flow through you and find its way to a permanent state of Love Beauty and Unity.'

'In Human Beings the 1st Siddhi is Beauty and as with all Siddhis it is also reliant upon its programming partner the 2nd Siddhi of Unity. Beauty lies in the Unity of all. True Beauty is emptiness. True Beauty when manifested and realised in a human being, presupposes a state of union with the totality.'

'When the 1st Siddhi dawns inside you, everything in the Cosmos is experienced as beautiful and fresh. Even the Shadow state is beautiful. In truth, Beauty is our nature. It is right here, right now, inside each and every one of us. In Beauty nothing lies outside the Unity of everything. Everything is experienced as a unique creative expression of this Unity.'

'Everything shines with the essence of its uniqueness and yet at the same time it all shares a single Source. To be awakened in this way is to become a great inspiration to humanity.'

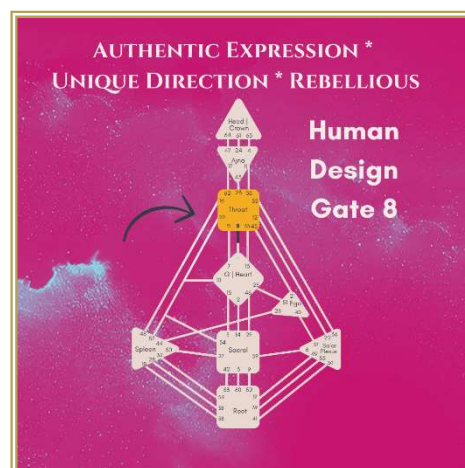

‘When this inner Divine Fire is released through your DNA you become capable of miraculous power. The Codon Ring of Fire unites the two Siddhis of Beauty and Bounteousness (1st and 14th Gene Keys). It represents the energetic germ at the heart of creation and the purpose of existence – to create that which is endlessly beautiful and to imbue it with the awareness that it is endlessly beautiful.’

Uranus ♃ the planet of the Higher Mind, and Jupiter ♃, the planet of expanded consciousness, remain together in Taurus – Uranus still on Gene Key 23 known as **The Alchemy of Simplicity** evolving out of the Shadow of **Complexity** to the Gift of **Simplicity** to the Siddhi of **Quintessence** but Jupiter has now moved to Gene Key 8, which as shared earlier, means that the position of the Sun on Gene Key 2 and Jupiter creates a strong bond and genetic connection.

Jupiter on Gene Key 8 is known as the **Diamond of the Self** moving through the Shadow of **Mediocrity** to the Gift of **Style** to the Siddhi of **Exquisiteness**.

‘Mediocrity is defined by others rather than by yourself and Mediocrity has two main functions. Firstly, it stops you from thinking outside of the box. Under the influence of this low frequency you think like everyone else, look like everyone else and more or less behave like everyone else. The second function of Mediocrity is to serve the machinery of society rather than evolution. In other words you become a cog in the wheel of the systems established by man.’

‘True Style cannot be measured by materialistic trappings nor can it be faked. It is the natural flowering of your individuality. True Style takes great joy in shattering the grey world of mediocrity that is considered the norm. Where Style is more than skin deep, it is the cutting edge of creation itself. The individual surrenders the self to a creative process that controls the individual rather than the individual controlling the process. This Gift is wild, organic and unpredictable energy full of genius and quantum leaps. Such is the power of genius, for it carries within it more than just a new concept – it carries intent from a higher realm that is far beyond the individual through whom it manifests.’

‘Their only concern is to free more free thinkers – thus such people inherit a powerful mission in the world. People of the 8th Siddhi are not leaders. They are examples. The 8th Siddhi of Exquisiteness is the natural revelation and manifestation of all the Siddhic states. Each Siddhi is holographic in the sense of being reflected within all other Siddhis. Exquisiteness is experienced when the Divine Essence begins to shine through the individual. In this state of bliss you fall in love with your own pristine manifestation because it is through this uniqueness that the Divine currents can be accessed.’

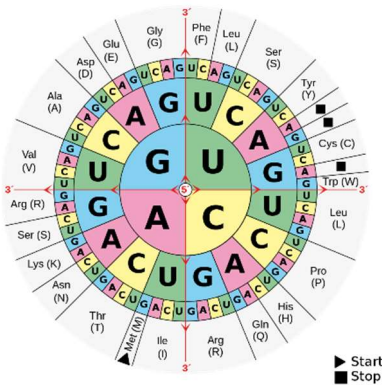

‘This is the stage at which you achieve transcendence of your genetics. You remain differentiated at the level of form, but at the collective Universal level your awareness permeates all forms, making you both a drop in the ocean and the ocean itself.’

‘There is an inner Light and Wisdom that has a powerful and liberating effect on others, freeing them from the structured systems. Their legacy to the world is to dismantle all concepts of how one should live or what one needs to do in order to attain any particular state. They sparkle like exquisite rare jewels. They shine like a diamond in the heart of creation and wherever they look, they see other diamonds in various states of clarity – each one unique, each one exquisite and incomparable.’

Jupiter, makes a 120° aspect to Pluto ♃ and Ceres ♃ and a 60° aspect to Astraea ♃ creating a Mystic Rectangle (blue lines) with the Sun Moon and Earth at this time.

Pluto, the planet of Transformation, as shared last month, is for the next few weeks on Gene Key 41 before returning to Gene Key 60 until January 2025. Gene Key 41 is known as **The Prime Emanation** moving through the Shadow of **Fantasy** to the Gift of **Anticipation** to the Siddhi of **Emanation** and it reflects the message of Gene Key 8 in the ‘transcendence of your genetics’.

‘The 41st Gene Key houses a truly remarkable archetype. It has a very important function – it relates to what is known in genetics as the start codon.’

‘The more the frequency of your DNA rises you become more and more sensitive to the hidden properties in the world around you, in particular, linking into the morphogenetic field that communicates specific information across time and space. The 41st Gift has a single genetic agenda – it is always attuned to the next evolutionary energetic grid that is waiting to descend into form. When you are able to maintain a high frequency through this 41st Gift you will be able to literally download all manner of beautiful things from the morphogenetic field.’

*‘Every start codon inside every single cell is electromagnetically linked to each other. **This is the foundation of the holographic body which in turn is linked to the holographic Universe.** The 41st Gene Key is the key to seeing that the physical body can equally be seen as a holographic mirror of the Universe. As the Source of Being the 41st Siddhi is the Siddhi of Emanation. **In a nutshell the Doctrine of Emanation points towards a fractal model of the Universe in which everything is a mirror image of itself.**’*

Ceres on Gene Key 61 known as the **Holy of Holies** moves through the Shadow of **Psychosis** to the Gift of **Inspiration** to the Siddhi of **Sanctity**. This is the Gene Key that Pluto was activating throughout the time of the Global Pandemic and now, as Ceres comes to this position, there is an opportunity to move away from all fear-based reactions.

*‘A dictionary definition of the word Psychosis might read ‘any kind of mental defection or derangement’. The loss of contact with reality is the background consciousness of almost all human beings. **Its key hallmark is that the individual so affected is usually unaware of the affliction.**’*

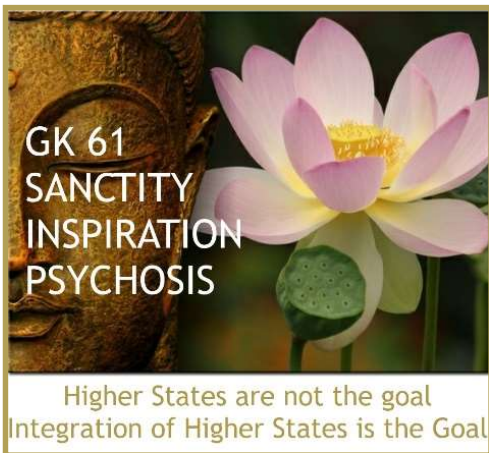

*‘At the Gift level Inspiration involves a powerful dismantling of the inner realities that have been built by your mind. Inspiration comes when you place yourself directly in the firing line of the inner question that lies deep within each human being. **Who Am I?**’*

‘At first you may seek answers outside yourself, but eventually you will have to turn deep inside to unfold the Hidden Truth that is awaiting your discovery. By its very nature the Gift of Inspiration is spiritual because it serves to loosen the hold of your mental constructs, opening and expanding your capacity for love.’

*‘This Gene Key represents a mystery hiding inside every single unit of matter within the Universe. **The mystery is the mystery of Christ Consciousness, that quintessence of inner Light that holds all things together.**’*

‘In arriving at the 61st Siddhi, we approach a great mystery – the mystery of life itself. The Inspiration pouring through the higher reaches of the 61st Gift is a stream of sparks from a great

transformation occurring within every human being who approaches the inner door. As you enter the field of the 61st Siddhi a huge pregnant silence descends and all your mental activity abruptly ceases. **Here inner Truth resides.'**

*'In western mythic traditions, this is a place called by many names – the Covenant, the Grail, the Holy of Holies. In the East it is generally described as a state – enlightenment, nirvana or samadhi. The 61st Siddhi is neither a place nor a state - it is the inner experience of Sanctity – of being one with the Divine. **A human being who is embodying the 61st Siddhi is nothing but a human vehicle manifesting pure Universal Consciousness.'***

*'This state of Sanctity is the underlying nature of reality and until you come to rest within it you are asleep. In the future, the 61st Siddhi will become far more common place, because humanity is in the process of making a quantum leap. **The children who will begin to arrive on this planet will carry this Siddhi of Sanctity in their bones. They will be the living embodiment of Life's potential in form.'***

Astraea is holding both the Mystical Rectangle and the Cardinal Grand Cross (red lines) together - she is the fifth-largest asteroid in our Solar system, named after the Greek Goddess of Justice and Harmony, and she is the sister of Athena, the Goddess of Creative Intelligence and Justice. She was said to be on the Earth alongside humans during the Golden Age of Man, and when the Iron Age dawned, bringing along misery and wickedness, Astraea was the last of the Immortals to withdraw from the Earth when she went to the skies transforming into the Constellation of Virgo.

The essence of Astraea is Idealism, Innocence and Purity and the asteroid seems to be a symbol of integration and wholeness, whether in an ideal state or the fragmentation that requires a restoration to the ideal. There is something sublime about Astraea's idealism, which seems to relate to Divine Order. Unsurprisingly, it does not always sit comfortably in the 'real' world - just as true balance is hard to achieve and maintain. However, according to the myth, when the consciousness of Astraea returns to Earth she will once again bring Heaven to Earth, the Utopia that was here during the Golden Age, bringing an end to human suffering.

Right now, Astraea is on Gene Key 61 known as **The Language of Light** evolving humanity through the Shadow of **Intellect** to the Gift of **Precision** to the Siddhi of **Impeccability**.

*'Like any of the human Shadows, the 62nd Shadow of Intellect is not inherently bad. **Intellect is a wonderful quality if it is used correctly in the service of innate intelligence.** Your intelligence is stunning, vibrant and natural Your natural intelligence is to be found in the way you move your limbs, in the brightness of your eyes and in the freedom of your self-expression.'*

'Intelligence is of the Heart, whereas intellect is of the mind. Problems arise when we identify our lives with our thoughts, which we have been pre-programmed with throughout our upbringing. Until we are able to step outside of this mental framework we are controlled by our language, thoughts and belief patterns.'

*'Precision happens when natural intelligence strikes a balance between the heart and the mind, but with one caveat, that the heart, the feminine principle, is given control over life. **The masculine principle, the intellect, then moves into service of the feminine principle, which is***

about intuition, listening and receiving rather than thinking, expressing and transmitting. As the Gift of Precision grows stronger it may seem as though the world gradually begins to come alive again. Intelligence recognises intelligence and with the mind out of the way the invisible essence that connects all beings is once again felt.'

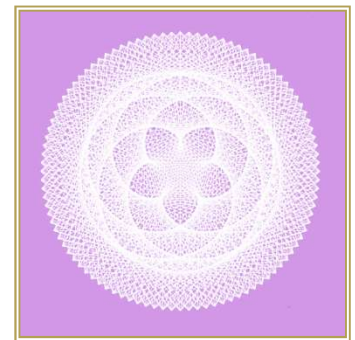

'The 62nd Gene Key is genetically coupled with the 31st Gene Key forming the codon known as the Ring of No Return. This mystical name describes the evolutionary process that takes place when higher consciousness reaches the throat centre. The throat centre is where the greatest human initiation occurs.'

'Once the higher involutory currents begin to use our voice to transmit their truths, you begin a process of detaching from your own identity. This is why there is no return once you begin to speak your truth – you have broken away from the lower realms forevermore.'

'The 62nd Siddhi concerns the use of language at a level beyond our ken. Every word has its frequency and vibration and the order and tone of your diction creates a certain aura. At the Siddhic level words do not come via the mind anymore – they are not thoughts that become words. They emerge directly from the void, naked and pure.'

'There is a Cosmometry behind life that choreographs all actions. The closer you come to full awakening the more harmoniously your life flows within this Cosmometry. When you finally merge into the ocean of consciousness you achieve complete oneness with the Divine.'

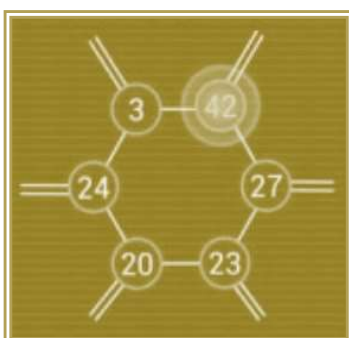

'Divine Cosmometry is the language of perfection. It is the manifestation of Impeccability in which your every movement and breath becomes an emanation of the Pure Light. You have entered into the Language of Light – the Impeccable Beauty of Being.'

To add to this 'mental' focus, Mercury ♀ the planet of Communication, is conjunct Chiron ♄ at the time of this New Moon on Gene Key 42. This aspect suggests and encourages a healing of our ingrained mental beliefs and the way that we utilise our minds.

So, with this focus on the throat chakra, and communication, it is apt that Uranus remains on GK 23, known as **The Alchemy of Simplicity**, moving through **Complexity** to **Simplicity** to **Quintessence**.

Gene Key 23 speaks of the complexity of the human mind trying to control the environment and that Buddha **'Hit upon the great and simple truth – that language flows directly out of your state of consciousness.'**

With Chiron and Mercury working alongside Gene Key 23, we have the opportunity to move away from our 'go to' mind for solutions, for *'The more humans try to use their minds to create a feeling of security in the world the more complicated and unsafe the world becomes'*.

It appears that the more fear we have the more the mind swings into overdrive. Chiron and Mercury on Gene Key 42 are part of the **Codon Ring of Life and Death**, along with Gene Keys 3, 20, 23, 24 and 27. Gene Key 42, known as **Letting Go of Living and Dying**, has the Shadow of **Expectation**, the Gift of **Detachment** and the Siddhi of **Celebration**.

'The 42nd Shadow is actually one of the Shadows at the source of all human mental fear because the 42nd Shadow concerns death and the 42nd Siddhi is about the transcendence of death. These are the sages who teach humanity about the illusion of death.'

'Can you imagine for a moment your body without any fears? To live permanently without fear. We can close our eyes for a moment and conjure up what that might feel like, what that blissfulness feels like. We can touch the ecstatic realms where the mind lets go and thinking comes to an end. And when thoughts do come, they are the thoughts of God so they only engender more bliss. We become like a child again and life becomes Heaven on Earth.'

'These six Siddhis of the Ring of Living and Dying really describe what the building of Bliss feels like. The 3rd Siddhi of Innocence brings this eternal child, the 'puer eternis', Adam and Eve naked in the Garden. The 24th Siddhi brings Silence, not a deathly silence, but the silence of Light and Illumination. It is the Silence of Quintessence, of reaching the heart of hearts, the 23rd Siddhi. It also brings vast caring for everything, the kind of Love that's selfless and unconditional, the 27th Siddhi.'

'Finally, this Codon Ring brings the 20th Siddhi, pure Presence, a resting in the Eternal Now. When we discover this, we realise that we are eternal and cannot die. The body may die, but the indwelling Quintessence can never die. Equally, the cells of the body can be transfigured back into their Quintessence and literally cause us to ascend.'

'When someone has entered the doorway of death deeply enough within themselves they discover the pure Maya of life – the illusion that we are born and we die – and as this great truth begins to permeate them, from the inside out, it literally kills off every aspect of their own identification with what they are.'

'The one in whom the realisation of this Siddhi has dawned is filled with laughter and all they want to do is to share this laughter with others. 'With the 42nd Siddhi, there is only one manifestation occurring and this is the state of Celebration. Celebration is the direct manifestation of true Awakening. The real power of the 23rd Siddhi is in its direct transmission in the flesh. Once this Siddhi has fully dawned inside a person they become an alchemical agent that over time refines all and extracts the Quintessence from the dross.'

May this upcoming New Moon assist us to embrace the **Sanctity** and **Beauty** of Life as we transition into uncharted water, for there is an exquisite symmetry working through the Cosmos. There is also a perfect interaction between each individual Soul and Pure Consciousness, from out of which we emerge to experience Life on Planet Earth. This Pure Consciousness, which is always with us, awaits our return, when, free of reactions, judgments and fears, we come to rest within the Peace and Stillness of Source - United as One, within the Universal Field.

All Love and Blessings
