Piscean New Moon 2023

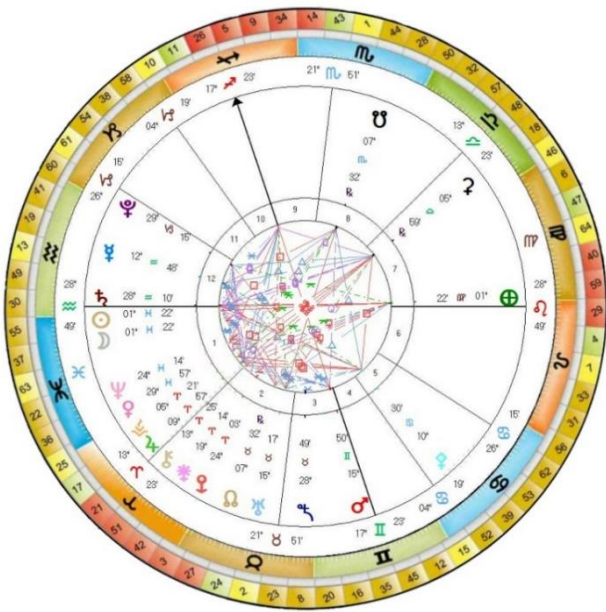

'If you desire with all your heart, friendship with every race on Earth, your thought, spiritual and positive, will spread; it will become the desire of others, growing stronger and stronger, until it reaches the minds of all men.'

Abdu'l Baha

'Creativity is the most important resource of all. Without creativity there would be no progress and we would be forever repeating the same patterns.'

Eduard de Bono

'I AM' the Light of the World

This New Moon is occurring in the last Zodiacal Sign of the Constellations at 1° Pisces 22 on the 19th or 20th of February, depending upon where you live.

The Piscean vibration emanates with the 2nd and 6th Rays of *Love and Wisdom* and *Devotion* and as such is carrying the potential for the refining of the Emotional Body and the Astral Realm so that Universal Unconditional Love, which is the pure Essence of Pisces may merge with the Waters that flow from Water Bearer of the Aquarian Constellation, uniting as One within the Higher Mental Plane.

The image for Pisces depicts two fish which are swimming in opposite directions, symbolizing the process of involution and evolution. Each of us, over so many lifetimes, has swum downstream, encased within a state of consciousness so dense that we forgot our innate Divinity.

But, over time, through our experiences in physical form, the Life Force and Soul begin to re-assert their Presence, guiding us back to the Truth, on a Path of Return, towards the Source and Origin of our Being and, like the prodigal sons and daughters returning home, we begin to swim upstream. As we enter, once again, the Aquarian Age, the image of Atlas in many ways, reflects this epic journey we have all been on, when Atlas was charged, according to ancient myth, to hold the Celestial Spheres apart from the Earth plane, until such time as fully individualised human beings might consciously merge with the Source and the Truth of their Being.

At this pivotal time when there is so much division causing discord, distraction and disharmony it is a salutary experience to recognise that the same patterns are repeating themselves, in this time and space, as were recorded in the ancient myths so long ago.

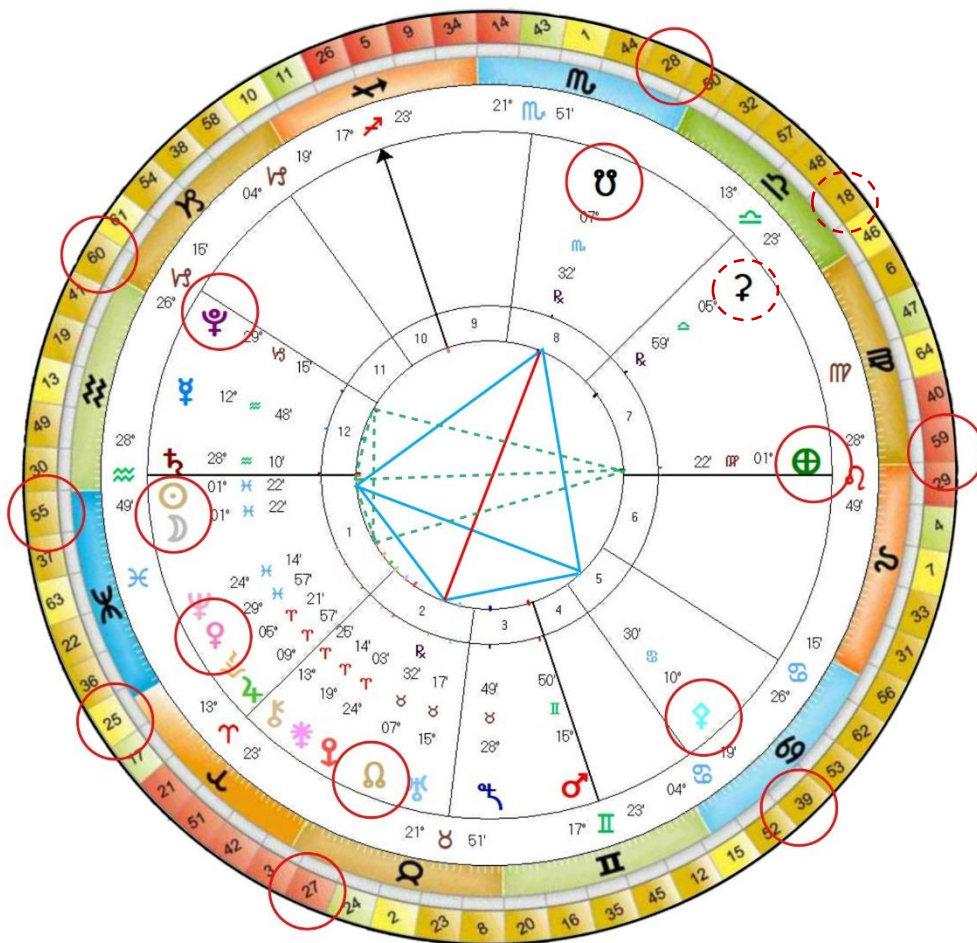

Atlas was given his task as a punishment after the Titan and Olympian wars had taken place. The Titans were fighting for Chronos/Saturn and the Olympians for Zeus/Jupiter – a battle between Control/Order and Freedom. Atlas was on the side of the Titans, of Control and Order, and it was the Olympian Freedom loving Zeus/Jupiter that meted out this retribution. As humans we learn that nothing is black or white – that 'Freedom' without responsibility, can become as abusive as Control without Freedom. We need to find inner liberation from the old patterns of 'them' and 'us' – that will speak to all hearts and minds – that comes from a high ideal, and a quality of Soul, not from ideologies and dictates of the mind.

Sadly, these two distinct ideologies are playing out in Europe right now even though the root cause is hidden – it is an age-old pattern that continually reasserts itself, through fear and manipulation. Neither the Titans nor the Olympians offer the prize that both appear to offer – for the solution lies beyond this level of consciousness – where old mental patterns can no longer distort the Truth of our Being.

This New Piscean Moon heralds many changes that will be occurring through the collective consciousness. Pisces is a highly creative visionary energy and we have the potential to imagine, create, and to see the world anew. A World that is created by Peace, for Peace, where our resources are turned to sustaining Life, working in harmony with Nature - where Unity, rather than division, is the guiding principle.

Wholeness is not about cutting off a portion of one's Being but by the integration of the contraries. Carl Jung

As mentioned in last month's Review both Saturn and Pluto, the Gatekeepers, into higher levels of awareness, will be changing signs this month, which signifies some major outer shifts are likely to occur, which is emphasised by Jupiter and Chiron coming together, on 12th March. (*More about Jupiter and Chiron later*). This sense of shift and change is also reflected, in that all of the planetary energies at the time of the New Moon are in forward motion, except for Ceres ♀^R, which is retrograde, so it is as if the Cosmos is moving quickly forward on the outer plane, with Ceres holding a more internal contemplative awareness.

The Sun and Moon play a pivotal role in both of the major planetary patterns and are on Gene Key 55, known as **The Dragon Fly's Dream**, moving through the Shadow of **Victimization** to the **Gift** and **Siddhi** of **Freedom**.

'The 55th Gene Key holds the key to our liberation and Freedom. Our DNA holds our greater Self – the Cosmic part of each of us that transcends our mortal body which has lain secretly hidden inside humanity for eons. The 55th Gene Key allows us to contemplate and to quicken the actual process of awakening. Up until now, the inner journey has been for the select few – those bold adventurers and courageous pioneers of the inner planes. But that is all about to change.

As we begin the process of transcending our Shadows, miracles can occur in our lives. Much of the 55th Gene Key concerns the future of our species as it moves through the Great Change. We are now entering an era in which more and more people will have direct access to an experience of true higher consciousness. There will be a genetic mutation that will slowly colonise our species. The old human will literally be bred out of humanity.'

'As your awareness stretches, the spirit of Freedom breaks down the barriers in your life. The fractal lines open all around you and energy that was blocked in a certain dimension suddenly precipitates unforeseen beneficial circumstances in your life.'

*'We carry a lot of hidden agendas, all aimed at validating our separate existence. **The Transformational Way through the 55th Gene Key, and therefore all the Gene Keys, is one of letting go.** We gradually begin to drop stuff and become more and more open. Slowly, slowly we become lighter.'*

'We stand on the cusp of a Siddhic supernova – the incarnation of the Divine Feminine spirit. The end result of this in flowing of the Divine Feminine will result in the purification of all the fractal lines throughout humanity, resulting in a burning up of the collective karma in our DNA and the eventual eradication of all disease on the physical plane.'

The Earth is on Gene Key 59, known as the **Dragon in your Genome** moving through the Shadow of **Dishonesty** to the Gift of **Intimacy** to the Siddhi of **Transparency**.

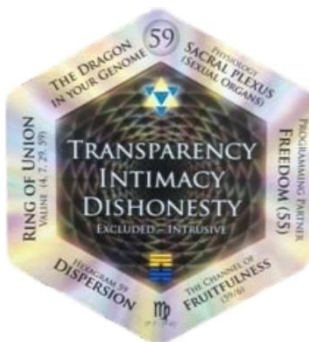

'Whenever a man tells a lie, he kills a part of the world' – thus spoke the mythical Merlin. At the Shadow level Dishonesty manifests as a deep distrust of others and a core fear of relationships. Keeping things hidden from one another that generates fear, distrust and Dishonesty and which creates boundaries and division. At this level there is an inability to be transparent with others and so there are hidden agendas and behaviour patterns rooted in selfishness and isolation.'

'In looking at the 59th Shadow we see the essence of all the problems underpinning the social structures within our world. The 59th Gene Key, the 55th Gene Key and to an extent the 49th Gene Key are the places within our DNA where a complete transmutation is currently underway.'

'At the level of the human aura, it destroys any interference patterns that appear to separate people. The power of human Intimacy is the power of two human auras interacting to create a third transformational aura, which sublimates the two original auras.'

'The more differentiated the original auras are the more potential there is for transcendence. An alchemical process within the solar plexus allows the two individuals to experience themselves as one awareness, through an opening of their heart centres.'

'Intimacy is really the by-product of inner transformation. It isn't something we do. Intimacy is something that is revealed from within. We become intimate with our own heart and then we can be honest with another heart. We have to transform inwardly every piece of trauma that is triggered inside us. That is the tantra.'

'Beyond the transmutation of the Shadow into the Gift lies a further transformation in which genetic mutations will take place within the brain chemistry of the pineal and pituitary glands. This process will lead to the dawning of the 59th Siddhi - the Siddhi of Transparency'

'The purpose of the 59th Gene Key is to break down all barriers that stand in the way of union. The ultimate role of the four Gene Keys, the 4th, 7th, 29th, and 59th is to bring the human family into realisation of its state of higher union with all of Creation. The ultimate agenda is evolution – although the form of our world will continue to evolve, the Consciousness out of which it emerges can never and has never evolved. Only awareness can evolve and it is evolving very quickly through the transformations and mutations coming through the 59th Gift and Siddhi.'

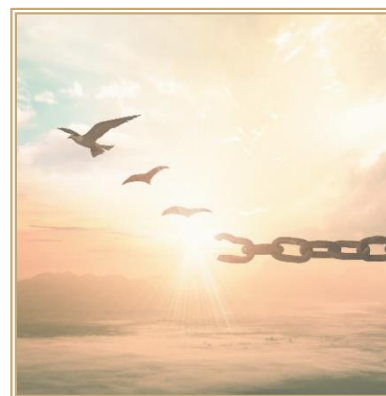

The Sun and Moon link to Pallas Athena and the North and South Nodes in the Kite Formation. Pallas Athena ♀ is on Gene Key 39 known as **The Tension of Transcendence** moving through the Shadow of **Provocation** to the Gift of **Dynamism** to the Siddhi of **Liberation**.

*'The 39th Gene Key and its programming partner the 38th Gene Key hold a unique place in our collective cosmology. **Above all other archetypes, these two represent the myth of the warrior.** Rooted in your adrenaline system, the 39th Gene key is a highly dynamic code that is all about action. The majority of humanity is trapped by the lowest frequencies of the 64 Gene Keys. Those with the 39th Shadow in their nature are the ones whose life energy is often most frozen. Locked in habitual emotional patterns their awesome potential lies completely inert.'*

'Children seem to have endless energy that just crackles in the air around them – this is the raw energy of the 39th Gift - the Gift of Dynamism. The other aspect of the 39th Gift is that it knows no fear. As you make the transition from child to adult and your personal and cultural conditioning gradually take you over, you also experience a decline in your natural Dynamism. Having said that – no matter how good or bad your upbringing may have been, all conditioning can be reversed'

*'People with the 39th Gift never seem to run out of energy it is as if they are being driven by a force beyond themselves. The pressure of Dynamism cannot help but create more Dynamism. The real essence of the 39th Gift is to touch other people's spirits in a way that helps them break out of their traps and into higher levels of freedom and energy. **A person living out the 39th Gift unleashes a tidal way of creative activity wherever they go.'***

'The 39th Gene Key is highly individualistic - it has to be so as not to be taken in by the status quo. Unique creativity has to break out of all conditioned patterns in order to rise to genius. There is always a point where the Gift suddenly makes the quantum leap to the Siddhi and the blossom becomes the fruit. In the case of the 39th Gene Key Dynamism becomes Liberation when it finally forgets itself entirely. At the Siddhic level an interesting thing occurs when all this genetic pressure breaks through to a higher dimension. Consciousness merges back into the totality which means that it has to give up its greatest gift – individual freedom. Only in giving up the illusion of your individual freedom can you receive an even greater gift – the Liberation of Being.'

'Life itself is struggling to transcend its struggle through human beings and the 39th Shadow builds the tension for change until it is released through the Siddhi of Liberation. Liberation requires that we honour our karma, that we clean up our own mess. This is why its Programming Partner is Honour, the 38th Siddhi. We have to honour Life, our heart, our past, and the path of our destiny. That is the way of Liberation.'

The North and South Nodal points create the focal point of the Kite formation. In this Kite Formation the energetic focus is upon the past, the South Nodal point which is on Gene Key 28 which is known as **Embracing the Dark Side** moving through the Shadow of **Purposelessness** to the Gift of **Totality** to the Siddhi of **Immortality**

*'The theme of purpose is a notion that lies central to the entire work of the 64 Gene Keys. The 28th Shadow of Purposelessness represents the potential nemesis in this regard, because it can ensure that you either do not discover your purpose or you never follow it through. This Shadow cuts to the core of the deepest of all human fears – for the 28th Gene Key holds within its Shadow the primal fear of death. **All fears ultimately can be reduced to this one fear – the fear of being extinguished.** Humans will do all manner of things to escape it. If you are to release your true creativity into the world, you must meet your own dark side. Only as you reclaim each of these dark aspects of your inner being can you begin to assemble and manifest the true purpose of your life. This is the magic and true purpose of the 28th Shadow.'*

*'The Gift of Totality is a wonderful Gift to have and it belongs to anyone who really knows how to trust in life. Totality means to live alongside fear – and to live with the unexpected and to stay open to continual change, whilst remaining committed. The Gift of Totality means to embrace the whole of your nature and the whole of life – the pleasure and the pain. **To be total in the sense of this Gift means to live without allowing your mind to dictate your life.** This is Life lived for the moment in the full knowledge that your life purpose can only be*

found in the present moment rather than in the distant future. **It is a mythic path – a path that Jung called individuation. Shamans would call it the retrieval or incarnation of your full Soul.'**

*'Life shows you that it has an underlying purpose in everything that it brings you. **The more deeply you accept each feeling of fear that comes the lighter you grow and the more love you feel towards life.** As long as your commitment is total you will find an inner detachment – this detachment is the reward for your courageous Totality.'*

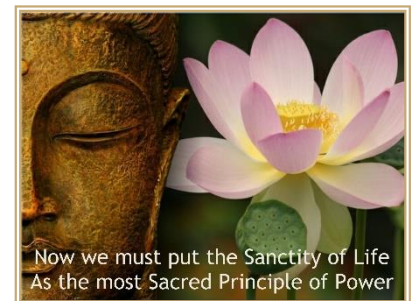

*'**The Siddhi of Immortality requires that the individual surrender him or herself into his own deepest fears and is reborn as pure consciousness.** When a being attains this state through the 28th Siddhi, they take on a particular mythology – their specific gift is to highlight the fears of others wherever they go. This is simply an aspect of their awakening operating through their genetics - thus, they are said to have the gift of casting out demons, because this is precisely what their aura does. **Through its Grace, it highlights the darker, unaccepted aspects of one's nature and absorbs them into non-existence.'***

'As already stated, this Siddhi contains the seed of the manifestation of Immortality in form – when the elements of our future vehicle will coalesce and form another kind of vehicle to house the higher consciousness of humanity. This is a secret that will only be unlocked through the very highest frequencies of Grace.'

To assist and align with this potential our spiritual guidance, is found in the North Nodal Point on Gene Key 27 known as **Food of the Gods** moving through the Shadow of **Selfishness** to the Gift of **Altruism** to the Siddhi of **Selflessness**.

*'The 27th Gene Key is truly vast in its implications at a planetary level. The ancient Chinese called this 27th Gene Key Nourishment with good reason. **It represents a built-in planetary law that rules all sentient life – To Give is to Receive.'***

*'The so-called selfish gene has been a requirement for us to survive particularly for blood ties and close genetic groupings. However, Selfishness must be transcended in order for the next form to mutate out of this existing form of Homo Sapiens. **Selfishness, then is a stage in our evolution that is in the process of being transcended at a collective level.** Thus, our species must prepare itself to make a genetic quantum leap, because that is the only way that it can truly transcend its built-in selfishness.'*

Now we must put the Sanctity of Life
As the most Sacred Principle of Power

*'In humans, Altruism ensures our survival as a species. It ensures a healthier happier life even though it may not always be the life you were expecting. **Giving from the heart can stir up unexpected Cosmic forces that work to your favour.** To give to others from the heart activates healthy currents deep within your body. Purpose flows from Altruism like water from a spring – connecting you into your Higher Purpose – it bubbles up inside you, creating warmth and goodwill, which spreads to others.'*

*This Gift links to children and to the care of children – it is also quite natural for those with the 27th Gift to find themselves involved in the service professions, where they can nurture others. **The true nature of the 27th Gift is generosity, which is primarily about caring for others and nature generally.'***

*'**Known as the Doctrine of Harmlessness, the 27th Siddhi of Selflessness has manifested in the lives of many saints throughout history.** This is not about being a do-gooder. Selflessness is an absolute pure yearning to provide succour to others. There is no sense of self-consciousness in it. Such people have made a quantum leap and the Siddhic energy available to them is enormous. Despite endlessly giving of themselves to others, they are not depleted, but are continuously nourished by the refined currents of the aura of love surrounding them.'*

'The Mathematics of Love are built into the structures of all life but only when we discover these laws will human beings realise their highest potential. Inherent in the 27th Siddhi is the realisation of the Divine law of Philanthropy – the Love of Humanity. At the Siddhic level, this Gene Key becomes capable of miraculous healing. Ultimately the 27th Siddhi represents the possibilities of spontaneous healing not just within the human life form, but in all life forms.'

At the time of this New Moon, the Sun and Moon are also the focal point for a Finger of God or Yod that is created by the planetary energies of Pluto, the Earth and Venus – this Yod underpins the potential that the Kite carries and carries a profound message for us all.

The Earth as we have seen is activating Gene Key 59 – leading to the Siddhi of Transparency and Venus on Gene Key 25 known as the ***Myth of the Sacred Wound*** moving through ***Constriction to Acceptance to Universal Love***. Venus links to our personal relationships, our personal likes and dislikes to the way we express love and affection.

'Within the 25th Gene Key lies the secret that men and women have always sought – the secret of love. Here too lies the antithesis of love, the Shadow of Constriction. Constriction exists wherever love is absent and it is the underlying source of all human suffering. Constriction is the physical manifestation of fear at an individual and Universal level. As we learn to face our wounds our journey becomes clearer and easier- we begin to walk the path from fear to love and through Acceptance, the wound begins to unwind and another higher destiny opens before us.'

'Here in the 25th Gift we arrive at one of the greatest and most powerful of all human Gifts, the Gift of Acceptance. Because this 25th Gift represents the portal to the true nature of the Universe as Love, it has incredible relevance for all human beings.'

'The flowering of Love follows the burgeoning of Acceptance. Acceptance is based on taking the soft approach to life. The Path of Love is the path of Acceptance, which is not a technique but more of a seeing. In order to accept something about yourself, and especially something uncomfortable, it first must be recognised.'

'The state of Acceptance is akin to "Spiritual Springtime" where everything seems new again, flowing more easily and freely. The 25th Gift makes it difficult to hold any resentment, judgement or indeed worry about life – for now you are carrying the Seed of Love. You will walk through life with an air of another world about you, whilst at the same time being deeply grounded and open to others. When you can finally accept everything in your life just as it is right now you will have embraced the human wound.'

'The 25th Siddhi is a special Siddhi, whether it happens to be within your hologenetic profile or not. Every Gene Key exists inside each of us and the 25th Gene Key is the primary archetype of Love. This Siddhi describes the shift from the personal to the Universal. Most of us think love as a personal connection between people or between us and something outside us. Universal Love lies in another dimensional field. It is the connective tissue that holds together everything.'

'The 25th Siddhi is also one of the Seven Sacred Seals a mystical group of Gene Keys whose collective role is to heal the Sacred Wound within humanity. The 25th Gene Key is the 3rd Seal and it heals the human wound of shame.'

'All spiritual paths begin with the urge to bring an end to personal suffering – it is the unacceptance of suffering that makes you seek. Eventually this revelation gives rise to the quantum leap to the Siddhic level of consciousness. Those Beings who have attained realisation through this 25th Siddhi become, in some form, legends. Whether Buddha or the Christ – the aura of such a person shines like a light down the centuries and is felt within

the bloodlines of all future generations. Every time someone attains the 25th Siddhi a great genetic constriction is removed throughout Humanity. **The bodies of these people have undergone a radical transformation in order to be the receiver or chalice for pure consciousness.'**

As for last month, Pluto remains on the 60th Gene, known as the **Cracking of the Vessel** moving through the Shadow of **Limitation** to the Gift of **Realism** and to the Siddhi of **Justice**. This month, Pluto the planet of Transformation and the 1st Ray of Divine Will is joining with Venus to open our minds and hearts to the vast field of potential, that resides within each of us.

'This Shadow appears wherever imagination and openness are stifled, or wherever men or women have forgotten who they are. Most people do not think magically; they do not leave the door ajar within their brains so that inspiration may creep in at any moment. The main reason for the death of magic is closed circuit thinking, where the mind follows familiar patterns or systems of thought around and around without the ability to think beyond them.'

'There is great capacity for magic in this Gene Key which may sound odd as it is called the Gift of Realism. Actually, Realism in its truest sense always involves magic and the only thing needed for magic to occur is some form of a structure and an open mind. We know from modern quantum physics that all matter is made up of vibrating energy fields. Therefore, all structures in the world of form are really an illusion. They are frameworks through which something unexpected may occur.'

'Another synonym for the 60th Gift, might be the Gift of common sense, for it is common sense to remain open-minded to everything in the Universe because everything has at its core the same wondrous inner Light. It is the responsibility and great privilege of humanity to be the outermost peak of the awareness of Gaia. We are her eyes and ears. We are her very mind. Everything of true value is hidden inside form – inside our body, inside the ferrous core of the planet, inside the vibrating fabric of your inner being. It is all rooted inwardly. **This is why humankind must discover inner space, why we must turn inward for inspiration.'**

'Life moves in cycles. Every now and then a transmutation occurs. At a certain point our hearts open to our true innocence and we begin to unlock other codes in our DNA that are ancestral rather than personal. We begin to transmute more global karma and the more our being opens, the more we are given.'

'The 60th Siddhi is an extremely rare Siddhi. When a Being attains Self-realisation through the 60th Siddhi, something quite extraordinary happens, the fundamental laws that govern physical existence are loosened and in some cases broken altogether. At a collective genetic level this kind of event is called a frameshift mutation. The 60th Siddhi breaks all laws of our reality – beginning with the Laws of Time and Gravity.'

'The 60th Siddhi of Justice is true magic because it is acausal. It cannot be learned, mastered, or imitated. The Siddhi of Justice is not retribution; it's a reward. It is given as Grace, not taken as punishment and when it is given, freedom flows from it. Every time a being attains enlightenment through the 60th Siddhi, magic comes pouring through this being and they become a phenomenon, a symbol of the breaking of form – Masters who have attained the Body of Light.'

As shared at the beginning of this review, only Ceres is holding an inner contemplative resonance at this time, and so if **'humankind must discover inner space... must turn inward for inspiration'** then Gene Key 18 **The Healing Power of the Mind** which is where Ceres is at this time, may give more insight to the potential that is held at the time of this New Moon. Gene Key 18 moves through the Shadow of **Judgment** to the Gift of **Integrity**, to the Siddhi of **Perfection**.

'The 18th Shadow begins in your childhood and it gives rise to a collective phenomenon in the world known as the 'victim mind'. This victim mind is a conglomeration of all the judgemental, undermining thought patterns, throughout the world. The key to raising this level of frequency is to realise that everything external in your

life is a mirror of an internal process seeking resolution. As you move beyond the victim mind – your frequency rises and your external and internal life reflect these changes.'

'When you are free from the trap of the victim mind then Judgement becomes Integrity. **A cleaned-out mind is a rare thing.** A mind with Integrity has terrific power to serve the world. In the East they call this mind the Yi, the Wisdom Mind – it flows in harmony with the Universe. It sees the Perfection and the flaws and it knows its role in bringing those flaws back into alignment with the greater Perfection.'

'To uphold Integrity, you have to be courageous – you have to challenge anything or anyone who does not meet your high standards. Integrity uses Judgement in an objective and impersonal way. This is the Gift of the 18th Gene Key - not to use or take Judgement personally, but to learn to judge from the heart. Judging from the heart is never cruel because Integrity has only one purpose - to serve the whole in the spirit of truth and compassion assisting others to step out of the victim mind.'

'The 18th Siddhi is not often seen in the world today - it involves an archetype of Perfection. If the 18th Gene Key is activated within your hologenic profile then you will continue to lead humanity towards Perfection in any and every way you can conceive of. The 18th Siddhi concerns the way in which we think and especially the way we think about others. **This Gene Key has enormous power over the Mental Plane and can completely reformat a person's mental reality.'**

'Someone demonstrating the 18th Siddhi is above the victim mind – when they look at someone, even someone who appears genuinely evil, they will only see the Higher Self hidden in that person. By holding this high thought frequency they influence hidden currents of energy that raise the frequency of others. **This is called Siddhi thinking and it involves thinking with the heart.'**

'The 18th Siddhi serves a very mystical purpose – it heals the split in the mental plane itself bringing humanity closer and closer to its realisation of Oneness. It cannot and will not sit still until this great rift in the world mind has been healed. The 18th Siddhi is the source of the tradition of the Bodhisattva Vow. **The Bodhisattva Gene Keys keep returning to the planet as individual human beings whose sole purpose is to build this collective vision of Perfection on the material plane.** As we will all one day see, the end of this story also happens to be the beginning of our Universal Life, when this great rift in the world mind has been healed. All we need is inspiration and this will happen.'

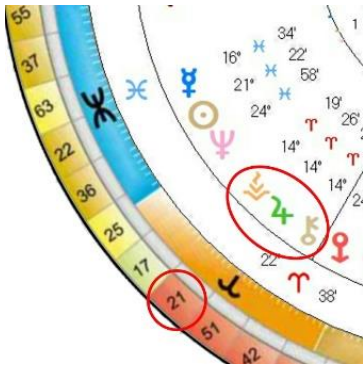

'Almost every global culture and mythology has references to Heaven, to a perfect world beyond ours. In St. John's Revelation he talks of the coming of Heaven to Earth, the coming down of a New Jerusalem. Other cultures also speak of this idea of the future Eden that we will one day inherit. Is this just mad idealism? From our current scientific materialistic perspective it might seem so. But Heaven on Earth isn't as far away as we think. The inner and outer are intimately linked. They aren't separate at all and the outer follows the inner.'

At the beginning of this Review the image of Atlas holding up the Sky from the Earth symbolises the separation consciousness that has evolved through the Mental Plane split, which has created so much, fear, division, chaos, and discord on Earth, and it is here in the 18th Gene Key that we are handed the opportunity to heal this rift as each one consciously turns within to let go of old divisive thoughts and projections in this ongoing Global Initiation. Rather than allowing this rift to continue, let us take positive steps to utilise our mental thoughts for positive outcomes.

Later this month, on March 12th (as mentioned earlier), when Jupiter and Chiron come together in the constellation of Aries, known as **The Light of Life** there will be an expansive intensification of Light flowing onto and into the Earth plane.

Chiron brings greater Light into the subtle etheric system, and Jupiter magnifies and expands this Light into our awareness, to assist in the shedding and cleansing of old emotional patterns and thought forms that no longer serve, so that they are no longer projected onto others.

With these heightened frequencies flowing, in, through, and around us, we have the potential for growth and transformation, as any divisive mental patterns, within our consciousness, are brought to the surface to be transmuted, healed and released.

To amplify this infusion of Light, ♃ Vesta, the Keeper of the Sacred Flame, is also at 14° Aries exactly conjunct Jupiter and Chiron, bringing the added qualities of devotion and commitment - Heart and Mind fused in irradiating Light - central to the **Power of the Healing Mind**.

It is through the Constellation of Aries that Divine Will, descends to us individually and collectively, initially through the planetary focus of Mars which underpins much of the division and discord. But from a Soul level, Aries flows through Mercury, the Messenger of the Gods, and when the mind becomes a clear vessel it has the potential for co-creating with Universal Purpose, bringing fundamental change in the outer world.

A line from the quotations at the start of the Review shares that **'Creativity is the most important resource of all'**. So, whilst being discerning and aware of all that is taking place on the Earth right now, let us bring our focus to the power of our Creative Mind and Heart and embody and hold this vision, until it flows into the minds of all mankind.

Imagine and see a world where everyday thoughts and feelings come from Universal Unconditional Love - where fear and separation are a thing of the past - where Hearts are in Harmony with the Angelic and Elemental Kingdoms – creating Peace on Earth and seeing the Nature Kingdoms vibrant and abundant providing for every need - no hunger or drought - but a perfect flow of mutual reception of Elemental energy - an inner receiving and outer giving - no excess and no waste – every need met for the balanced sustainability and health of all Life, naturally organically occurring as we co-create and magnetise this into outer expression through Divine Will and the Grace of our Soul's Vision.

We are in a crucible of change, a pivotal time - so may this New Moon encourage us all to seed and to anchor, true Freedom and Liberation wherever we go and with whomever we meet, for these are the everlasting fruits of Universal Love.

Love and Blessings
