## Taurus New Moon 2025

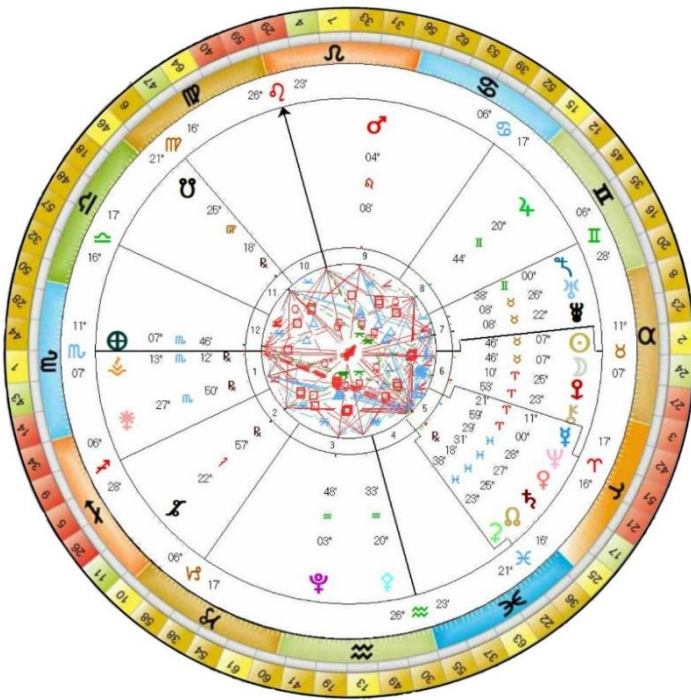

*When you lose touch with inner Stillness  
you lose touch with yourself.*

*Your innermost sense of Self, of who you are,  
is inseparable from Stillness.*

*This is the I AM that is deeper than name and form.*

Eckhart Tolle

# 'I AM' the Penetrating Light of the Path

The New Moon will take place at 7<sup>0</sup> Taurus 46, on the 27th or 28th of April, depending on where you live in the world.

Although a New Moon and, therefore, not visible, the Moon will be in its closest connection to the Earth, as a Supermoon, which means that its gravitational pull on the Earth's tides and tectonic plates is increased at this time.

The energies that were experienced, passing through the Eclipse corridor, during March, maintain a momentum, as the intensity of Light continues to build and unfold through the Solar Flares, that are irradiating this Plane.

As the dynamic Cosmic activity continues, we can see, in the outer world, how we are responding to this intensified Light in numerous ways. There is a sense of instability that is flowing through the collective consciousness, trying to find resolution, from opposing and conflicting positions.

The Taurean Constellation links deeply to the Earth – it is deeply connected with this plane of existence and to the evolution of Humanity within the Fourth Kingdom. It is through the **4<sup>th</sup> Ray of Harmony Through Conflict** and equally, through the Heart Centre, the 4th Chakra, that Humanity is evolving to move beyond the discord and conflicts that have been created over eons of time.

Taurus being Fixed, Feminine and Magnetic holds some of the deepest patterns and memories, which, at the personality level, can often manifest as entrenched beliefs and desires, as, like the Taurean Bull, the persona is both strong and unyielding.

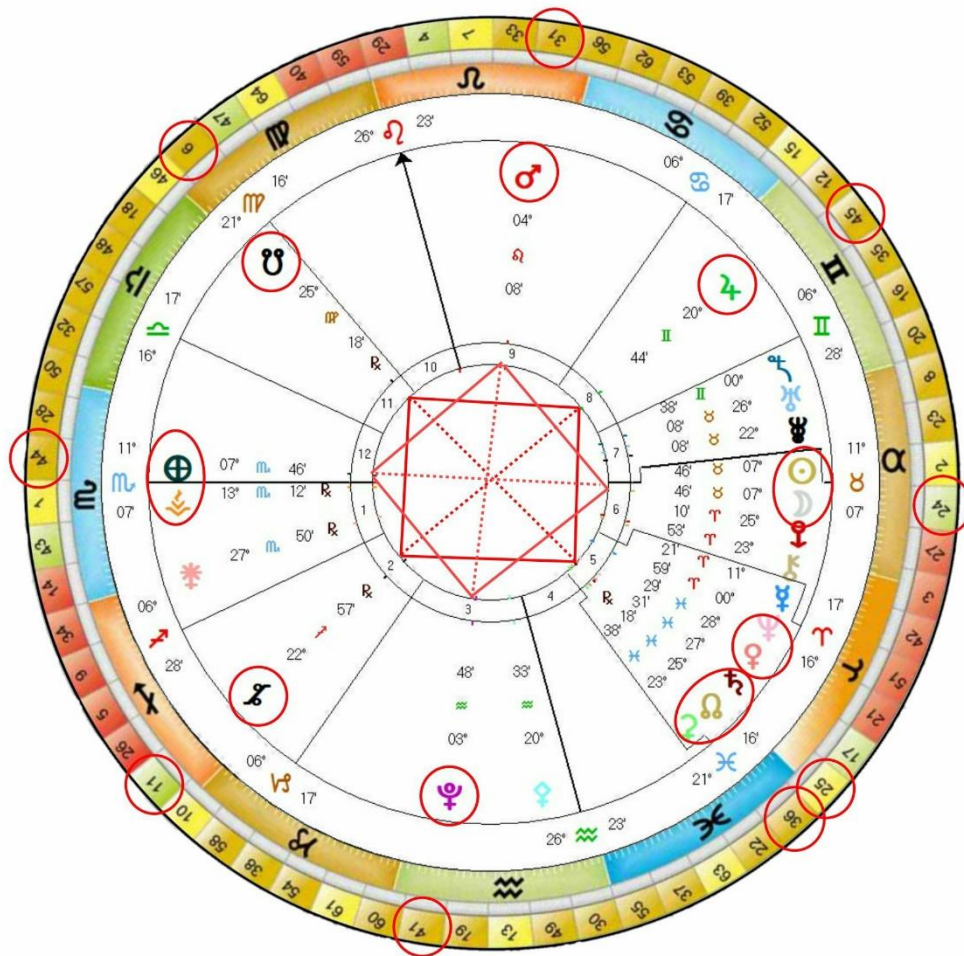

At the personality level, Taurus is ruled by Venus which adds to the focus on fixed desires, creating the 'tests' and 'trials' that humanity experiences on the way to becoming Soul embodied, and to ultimately creating a secure and stable environment for all, when Venus can utilise diplomacy and Right Human Relations to bring about harmony between opposing forces – for, innately, Taureans have a deep love of the Earth. At the Soul level, Taurus is ruled by the 1st Ray of Will and the planet Vulcan. This is the Path that leads from personal desire to becoming the embodiment, indeed the manifestation, of Spiritual Will, in which there is a determination to succeed, based on Higher Will.

The Taurean journey develops through understanding what it is that is of value. What are our core values? This is the inner conflict, struggle, and dichotomy held within the 4<sup>th</sup> Ray, that each one will encounter as they move from personal, subjective beliefs, to Impersonal Universal understanding.

It is through the 1<sup>st</sup> Ray, and Vulcan, that this inner transformation occurs, as the Soul, once freed from attachment, opens to the Presence of Light, concealed within the physical form, that permeates all Life. This is the true White Magician, the true Healer - for at this level of awareness, Spiritual Presence and Divine Will become the reality manifesting through Life.

# Chart for the Taurean New Moon 2025

**New Moon 27<sup>th</sup> April 2025 19:31 GMT London UK**  
<https://www.timeanddate.com/moon/phases/>

As you look at the above chart you will see there are two very distinct Grand Crosses, at the time of the New Moon. The first one is formed by the Sun ☉ and Moon ☾ being 90° away from Mars ♂ which is 90° away from the Earth ☊ and Vesta ♁ with Pluto ♇ completing the Fixed Grand Cross.

The other Grand Cross is Mutable having Jupiter ♃ 90° away from the South Node ♑ which is 90° away from Astrea ♂ which is 90° away from Ceres ♀ the North Node ♒ and Saturn ♄.

The Fixed Grand Cross, as its name suggests, links to strong and implacable force, whilst the Mutable Grand Cross is seeking to integrate far more expansive flowing outcomes – this is the dichotomy that is playing out across the Earth.

The Sun and Moon are on Gene 24 known as **The Ultimate Addiction** moving through the Shadow of **Addiction** to the Gift of **Invention** to the Siddhi of **Silence**

*‘The mass consciousness of humanity is still dominated by the archaic fear and survival-based aspects of our brain. The root of human suffering is wired into your DNA in the physical body, and this in turn triggers the emotional body through desire.’*

*‘All desires are really rooted in a single desire – the desire to escape suffering, but nothing external can bring an end to suffering, since it is rooted deep within the DNA. **Only by turning inwards can you face the addictive quality of your mind.** Your willingness to confront your mind creates the necessary pause or gap in thinking to disentangle the mind from the astral/emotional body.’*

So what happens in the gap when you do fully embrace it? The answer is absolutely anything. The 24th Gift is truly magical and contains the secret to genius. **One of the best ways of exploring the gaps is through contemplation.** To contemplate is to surrender yourself into the great mystery until it suddenly reveals itself to you through a process of deep insight.'

'It is all about those gaps between the cycles – the intervals between lives, the spaces between atoms, the silence between notes. **Magic and mutation occur within those gaps.**'

'The 24th Gift is the heart of the human creative process. The secret of the 24th Gift is really one of the secrets of creativity itself. It is in fact an acoustic field involving the raising of vibrational frequency through your genetics.'

'Each time you hit one of the magical gaps, you have the opportunity to either shift up an octave in frequency or remain in the same loop. In human beings this codon allows you to make quantum leaps in terms of the evolution of your awareness. All the great insights that have driven human evolution, from the arts to the sciences, have come across the bridge of the 24th Gift.'

'Over the centuries human beings have tried all manner of techniques to stop the mind from thinking. Thinking can in fact be masked by certain techniques, but that temporary quietness is not the same as the pure Silence of the 24th Siddhi. **The Silence of the 24th Siddhi is a Silence that descends on you even though it already lives within you.**'

'True Silence reigns when the mechanism controlling your awareness moves from your head down into your solar plexus. For awareness to shift in this way there is a physical mutation that occurs – certain chemicals are created by the endocrine system – so that you no longer think – but are thought by Life. **When the mind ceases to think then all addictive behaviour also ceases – the ultimate addiction of believing yourself to be separate from Life is eradicated.**'

'This Silence does not necessarily denote physical Silence, rather it is an internal Silence in which you are permanently enfolded. **Only true inner Silence can bring an end to the Maya or illusion of separateness which is ultimately the healing of mankind's greatest fear.** The key is always to relax because only as you relax can you feel the magic gaps and experience the Truth directly – not through your mind but through your innermost being.'

The Earth and Vesta are opposite to the Sun and Moon, activating Gene Key 44, known as **Karmic Relationships**, moving through the Shadow of **Interference** to the Gift of **Teamwork** to the Siddhi of **Synarchy**.

**'The 24<sup>th</sup> Gene Key is paired with the 44<sup>th</sup> Gene Key, which is a magical one.**

'It is about a great Divine Plan where all human lives are part of a great beautiful tapestry, like the Bayeux Tapestry, and collectively all our lives unfold this wonderfully rich story of evolution.'

**'The ancient Chinese called the 44th Hexagram Coming to Meet**, which is, of course, highly appropriate since this 44th Gene Key concerns how, why and when people meet each other, as well as the results that emerge from group or family dynamics.'

'As you learn from each relationship in your life and over time come to master the lessons each affords you, then the frequency of your entire hologenetic profile heightens in pitch, and you begin to attract higher frequency fractals.'

*'The term human fractal is an extension of this notion to human relationships, referring to the web of invisible patterns that bind certain groups of people together. **In the classical Indian teachings, such ties are known as Karmic ties.'***

*'Until two individuals are ready to take on the Ancestral Interference patterns of their entire fractal, that fractal remains dysfunctional, but as it clears a deep devotion develops. **Couples who are actively involved in clearing out this collective genetic dysfunction are the pioneers of a coming new age.***

*'To really understand this Gift of Teamwork you also need to understand something of the mechanics of incarnation. Your Causal body, or Soul, which vibrates at a very rarefied frequency also travels with the Causal bodies of others across space and time in a cosmic relationship dance.'*

*'The Gift of Teamwork is, therefore, about recognising who belongs in your life. If you were able to assemble your own true fractal around you, the dynamics of this team would be nothing short of awesome. There would be total trust within the group. The world has not yet seen much of the 44th Gift, however, all that is on the cusp of changing.*

*'As a concept, Synarchy is the opposite of anarchy. The prefix 'syn' means to act in concert, and 'archy' means to govern. Therefore, the literal meaning concerns the concept of collective rulership. Synarchy is the opposite of anarchy - it concerns the concept of collective rulership.'*

*'The 44th Siddhi is truly remarkable. **The 44th Siddhi sees the entire tapestry of human interaction through time and space. It not only sees it, but this being dissolves into it.** The consciousness within such a person is able to travel down every single fractal line within the Cosmos. 'Because there is no resistance within their vehicle their consciousness ripples down the fractal arms of both the past and the future of the Universe. **The being expressing the 44th Siddhi therefore occupies a specific genetic vehicle whose mutation causes, in time, a chain reaction through humanity.'***

*'At the Siddhic level we know all life to be self-organising, even the Shadow. It eventually organises its own breakthrough. This is the great story of incarnation here in this Gene Key. **Eventually all humanity will realise its true nature as one Cosmic Harmony.'***

Holding these two Gene Keys, in pivotal balance, are Mars in opposition to Pluto. This particular alignment of planetary energy brings an intensity and a powerful focus - a sense of pressure and tension. Mars relates to our personal will, our assertiveness, action, drive, and our competitive nature, which can so often manifest as aggression, and Pluto brings an additional immense intensity, requiring that we utilise this power through a transformative, enlightened awareness as the '*shock absorbers*' on the Planet.

Mars moved into Leo, a Fire sign, on the 18<sup>th</sup> of April, which also gives it added impetus - it is on Gene Key 31, known as **Sounding your Truth** moving through the Shadow of **Arrogance** to the Gift of **Leadership** to the Siddhi of **Humility**.

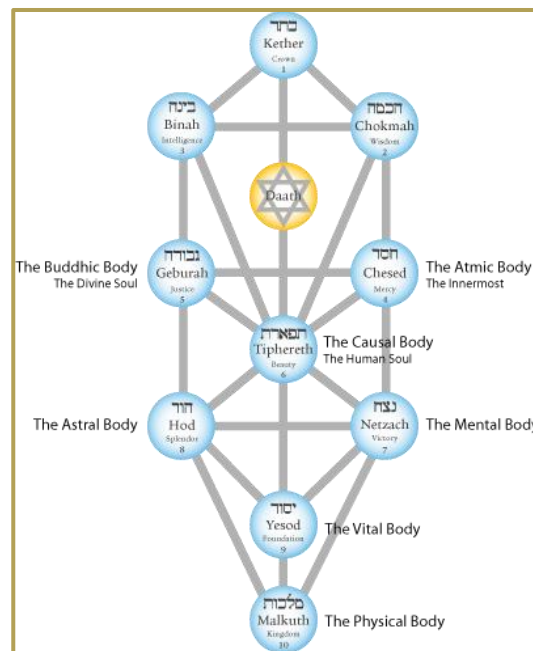

*'At the Shadow level of frequency, we are limited by our thoughts and language. **We are 'programmed' by the language and thoughts that we have inherited.** These thoughts and language keep us confined within a narrow spectrum of intellect and understanding of what our true potentials are. Real Arrogance comes from being cut off from our Divine Source, for to be arrogant is to act without realising that there are consequences. **There are laws built into life. These are the laws of karma.'***

*'The Gift of Leadership is really a gift of influence rather than an inherent predisposition to be a leader per se. The 31st Gift is known as Leadership only because that is the projection of the collective upon this Gene Key. **The 31st Gift, like all the Gifts, represents a huge step beyond the intellect and into the heart.** It is the heart that separates the Shadow frequencies from the Gift frequencies, and in our current stage of evolution the heart is the hottest frequency there is.'*

***‘The 31st Gift still carries an agenda, but this agenda is to help people out of the narrow mental confines of their own conditioning. Because the 31st Gift has its finger on the pulse of the collective patterns of humanity, it can have enormous influence over large numbers of people. Certain human beings operating out of the 31st Gift can literally become the voice of the collective.’***

***‘Humility is not for the faint-hearted. It is therefore ironic that Humility is a word that has come to be associated with people of a saintly or virtuous manner. But Humility has nothing to do with behaviour. Because the 31st Siddhi is truly humble, it has no agenda. It does not matter what such a person does in life. They are content to leave the world exactly as it is. Nonetheless such a person still carries the same genetic coding that requires they speak from the cutting edge of consciousness. The 31st Siddhi is rooted in the ancient tradition of the Oracle. The Oracle is simply a voice box for the Divine.’***

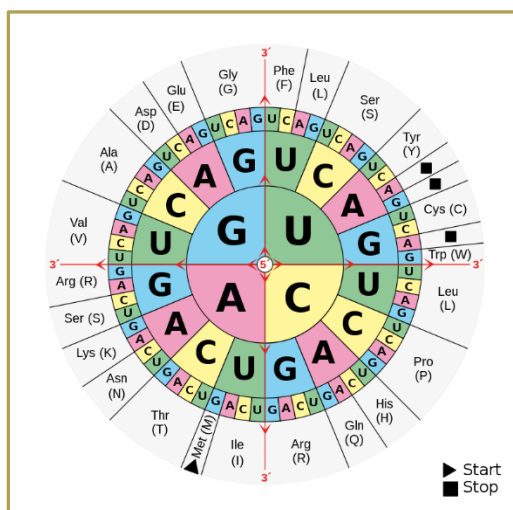

***‘The 31<sup>st</sup> Gene Key is part of the Codon Ring of No Return which refers to the great initiation from the 4th Causal Body into the 5th Buddhic Body. Once this leap of consciousness has been made, there is no possibility of return because your identity or ego will be erased.’***

***‘Once you have allowed the Siddhic frequency to command your voice, you have entered the first stage of Divine embodiment. From this moment forwards, whenever you use the word I, it is the voice of Divinity itself speaking. Such speech is pure transmission. It uses words to indicate the path beyond words.’***

And Pluto in Aquarius, which reflects Universal Consciousness, is on Gene Key 41, known as **The Prime Emanation**, moving through the Shadow of **Fantasy** to the Gift of **Anticipation** to the Siddhi of **Emanation**.

***‘The 41st Gene Key houses a truly remarkable archetype. It has a very important function – it relates to what is known in genetics as the start codon. At the Shadow level the 41st Gene Key centres around the issue of fantasy and dreams – it is like holding the key to your dreams in your hands, but never turning the lock. The evolutionary pressure that surges up in human beings carries our entire genetic history within it, all the way from the amoeba to Homo Sapien.’***

***‘The 41st Shadow represents the pressure to evolve to seek out new fields and new experiences. This evolutionary impulse is the secret to the 41st Gift – the Gift of Anticipation. The more the frequency of your DNA rises you become more and more sensitive to the hidden properties in the world around you, in particular, linking into the morphogenetic field that communicates specific information across time and space.’***

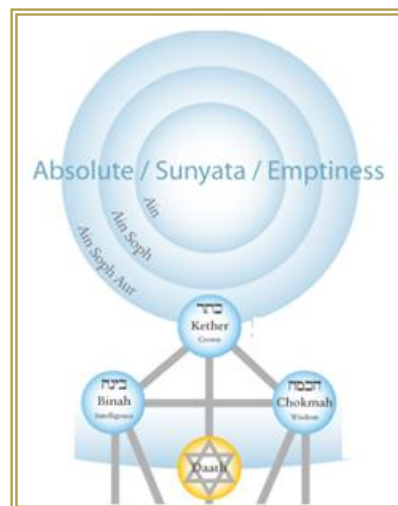

***‘The 41st Gift gives the gift of premonition or Anticipation which links to its partner the 31st Gift of Leadership. The greatest leaders are those who build upon the past whilst anticipating what is to come. The 41st Gift has a single genetic agenda – it is always attuned to the next evolutionary energetic grid that is waiting to descend into form. When you are able to maintain a high frequency through this 41st Gift you will be able to literally download all manner of beautiful things from the morphogenetic field.’***

***‘Every start codon inside every single cell is electromagnetically linked to each other. This is the foundation of the holographic body which in turn is linked to the holographic Universe. The 41st Gene Key is the key to seeing that the physical body can equally be seen as a holographic mirror of the Universe.’***

*'As the Source of Being the 41st Siddhi is the Siddhi of Emanation. **Emanation is a word that has been used by many ancient metaphysical and mystical systems as a means for understanding something that is really unapproachable.** One of the best known of these systems is perhaps the Kabbalah, whose central tenet is a map known as the Doctrine of Emanation. **In a nutshell the Doctrine of Emanation points towards a fractal model of the Universe in which everything is a mirror image of itself.'***

*'The Cabbalists used the symbol of ten spheres or sephira, one emanating from another, to represent the various levels of Spirit descending into matter. **The ultimate source, known as the Ain Soph,** represents the **unnameable, inconceivable, limitless Light from which all emanates.** The Source has been given so many names by so many traditions as man has tried to understand it.'*

*'What is fascinating about the 41st Siddhi is that it is the Source underlying all true Siddhic states. No matter what manifestation comes through our genetics, they are all ultimately grounded through this Siddhi that is not a Siddhi. In many ways, this is the nameless Siddhi, but we call it Emanation because we have no other way of approaching it.'*

*'There is another interesting point that emerges from deep contemplation of this Gene Key. **Somewhere deep within your DNA lies a code whose sole purpose is to trigger the state we call Enlightenment.** In certain vehicles, the body picks up a specific set of secret genetic instructions and triggers the neurological process of enlightenment. It may come as a shock to many mystical seekers that this process cannot be triggered by what we do up on the surface. **Within the hologram of the Universe, Enlightenment is a spontaneous acausal non-event.** You could say that Grace triggers this process but the point is that no one knows why or when or to whom it will happen. **It is an Emanation that simply arises from an unknown Source.'***

So, you could say that this Fixed Grand Cross is building the pressure, the container and the crucible for transformation to take place, as we develop the capacity to hold higher frequencies of energy within the our physical Being, whilst the Mutable Grand Cross unfolds a very different potential as it contains a much more fluid energy, one that is seeking to move beyond the limitations of our inherited thought forms.

Turning now to the Mutable Grand Cross, if we look first at the conjunction of the North Node, and Saturn, we find that, as for last month, they remain on Gene Key 36, known as **Becoming Human** moving through the Shadow of **Turbulence** to the Gift of **Humanity** to the Siddhi of **Compassion**.

However, Dwarf Planet Ceres, has now come to join with them and Ceres is intimately connected to the well-being of the planet, bringing us into a deeper inter-connection with the Earth, and the Elemental Kingdoms. Ceres guides us to nurture ourselves - to stay centred, mindful, and peaceful, and not to become entangled in outer events in which old patterns are being released. Equally, as the North Node depicts our Spiritual evolution, and Saturn is the Gatekeeper into transpersonal consciousness, we need to be very aware of how our thoughts and feelings, intertwine within the quantum field, informing the Elemental Nature Kingdoms, for good or ill, which create future karmic conditions and experiences.

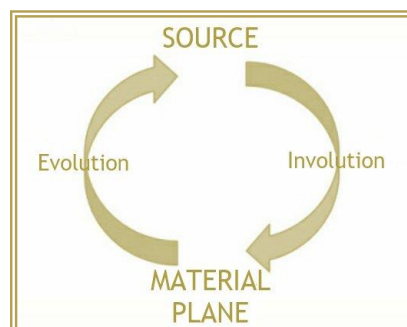

*'The potential suffering that exists on account of Gene Key 36, is part of a genetic family known as the **Ring of Divinity**. This is a beautiful revelation, as each of the four Shadows of the Ring of Divinity, Dishonour GK22, Turbulence GK36, Weakness GK37 and Doubt GK63, has the potential to awaken the highest consciousness inside you. **This codon group in many respects is deeply connected to the true meaning of Christ Consciousness.'***

*'The Gift of Humanity truly understands emotions and consequently understands all people. This is a Gift that can only be earned. **These are people who have looked deeply into their own Shadows.** From this level, these people are no longer overwhelmed by emotions as they tend to be at the Shadow level but have opened and expanded themselves to life through harsh experience.'*

*‘As a living transmission, the 36th Gift carries a great teaching into the world – the celebration of Humanity. **This Gift contains a natural spirituality – it is one of the most grounded of all the Gene Keys.** It is a bridge for the higher bodies of humanity to move down into the lower planes and transform them. The deepest role of the 36th Gene Key is to help humans to become humane - it is their courage and deep acceptance of the life process that eventually gives rise to the highest of human expressions – the expression of Compassion.’*

*‘**Compassion is Divinity embodied in humanity. Compassion is the seed that exists within Turbulence.** The whole transformational journey through this Gene Key culminates with the release of this fragrance from our essence. **This is where humanity and Divinity become One. This is where the current of evolution meets the current of involution.** Even the darkest of natures can be instantaneously brought to tears through the presence of this 36th Siddhi. At the Siddhic level your own suffering becomes so Universalised that it encompasses all humanity. **All boundaries of the self dissolve.’***

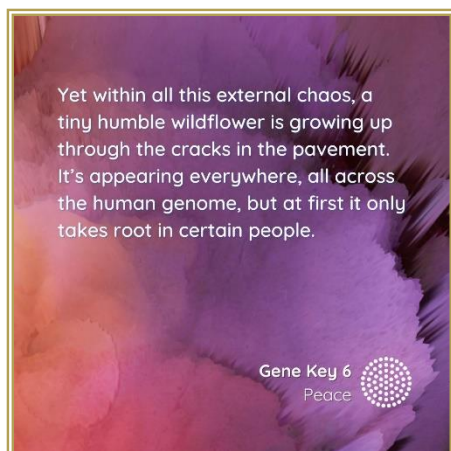

So now, looking at the position of the South Node, which holds all the collective karma, both positive and negative, which is seeking transformation and integration, to bring about expanded consciousness, you will see that at the time of this New Moon, asteroid Vesta is conjunct the South Node. Vesta’s archetypal essence holds the imprint of the Light, the Flame within, which is carried through time and space, within each one of us. She is associated with preserving what is of value and meaningful – she symbolizes the beginning and the end, and the preservation of Sacredness.

The South Node and Vesta are on Gene Key 6, known as **The Path to Peace**, moving through the Shadow of **Conflict** to the Gift of **Diplomacy** to the Siddhi of **Peace**.

The scars and memory patterns that have resulted from past conflicts, underpins all that the Path to Peace is seeking to heal and resolve held within the South Nodal point. The Path to Peace is created and sustained through the overall resonance and awareness of humanity, who know that the imprint of old personal battles, combats, and collective wars, simply recycle through time, until we break the pattern of engrained blame and projection and come to hold all in a deeper understanding and Compassion.

*‘**Human beings are unconsciously addicted to Conflict.** We long for Peace individually and globally, but our collective low frequency ensures that we keep reinforcing the patterns of Conflict.’*

*‘At a heightened frequency, the 6th Gift pulls rapidly away from Conflict adjusting behaviour to create harmonious relationships with others. This is the Gift of Diplomacy – the ability to adjust your own behaviour to create a harmonious exchange. **When one is able to see and own their unconscious projections, they actually rupture the collective Shadow patterns wherever they go.’***

*‘People displaying the 6th Gift are always attuned to the right timing of how to act and what to say through the strong resonance of their auric field. **Emotional maturity means that your awareness operates even during the most profound emotional states.** This 6th Gift is breaking down the barriers in human relationships and dismantling the borders and barriers that keep people apart from each other – eventually and ultimately bringing peace to Earth. **You might say that whilst the 6th Gift is the activity which maintains peacefulness, the 6th Siddhi is Peace itself.’***

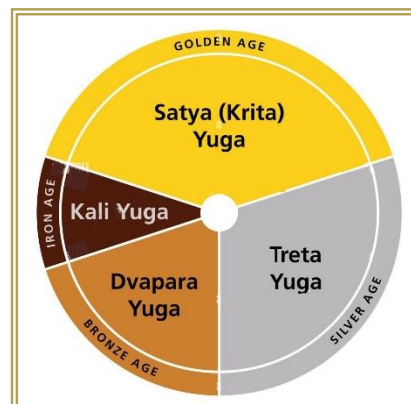

*‘Profound changes occur in your physical body before, during, and after this realisation. Since your outer walls have dissolved, the process is mirrored within your body, and all inner conflict comes to an end.’*

*‘**It is as though all the cells within your body make peace with each other and experience their own inner Garden of Eden.** In this sense, the true Garden of Eden is the body itself. The waves of Peace that accompany this event travel deep into the collective consciousness of all humanity.’*

This focus on the transformation of past negativity through, the embodiment of inner and outer Peace ushers in the potential for the seeding and unfolding of the Gifts that are held by Jupiter and Astrea, which complete the Mutable Grand Cross. Jupiter at 20° Gemini, opposite to Astrea, at 22° Sagittarius, speaks clearly about an expansion of consciousness, and the freedom of expression (*Jupiter in Gemini*) that can usher in a Golden Age (*Astrea in Sagittarius*) when past karmic patterns are no longer creating, present experience, and ‘reality.’

Jupiter’s archetypal essence is aligned with the pursuit of Truth, Justice, and Spiritual growth, and Astraea too, according to legend, is associated with Justice, as well as Idealism, and Innocence. It is said that when the last Golden Age finally crumbled and fell, through the deeds of mankind, Astraea left this realm.

*‘In the last of the Ages of Men came the Race of Iron... \* Honour fled and truth and loyalty, replaced by fraud, deceit and treachery and violence and wicked greed for gain... Honour and Love lay vanquished, Astraea, Virgin Divine, the last of the Immortals, fled away, destined one day to come back to Earth, bringing with her the return of a Utopian Golden Age.’*  
Ovid 1<sup>st</sup> Century BC.

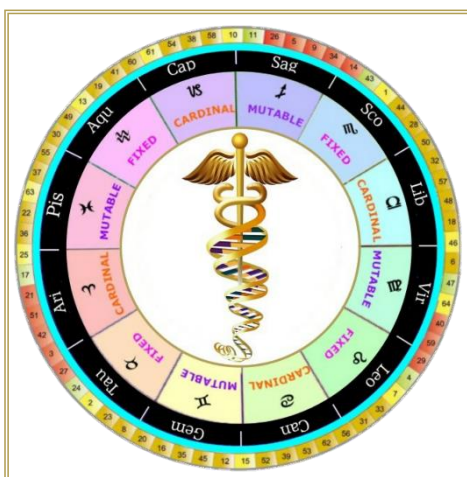

So, which keys do Jupiter and Astraea hold that might throw some further Light on what it is that is seeking to be expressed. Jupiter is on Gene Key 45, known as **Cosmic Communion**, moving through the Shadow of **Dominance** to the Gift of **Synergy** to the Siddhi of **Communion**.

*‘When you look at the core reason for the major problems on this Planet, you find that they all centre around a single issue – food. Because humans have to eat to survive, food is symbolic of real power. Everything else springs from this single fact. In today’s modern world, food is symbolised by money. As long as you have enough money you can survive.’*

*‘The 45th Shadow of Dominance lies at the heart of this whole evolutionary tendency to operate out of hierarchies. The human need to find a place of security in the hierarchical chain is based upon Dominance. That is to say, you always have to push someone else down in order that you can rise up. We remain victims of the Shadow of Dominance whilst we live for ourselves rather than each other.’*

*‘Beyond hierarchy lies a far more expansive concept. It is known as heterarchy. Heterarchy is based upon Synergy the 45<sup>th</sup> Gift. Synergy is like a healing wave that rushes through the human genome. It balances and equalises different chemistries, making a higher group awareness possible. Any group that comes together for a higher purpose can experience this transformation. The wave of Synergy is an aspect of the evolutionary impulse at work; it is the creative field of transformation as the old human themes of dominance are set aside in favour of a new awareness. This self-organising principle exists at all levels within the Cosmos – the ultimate Synergy takes place within our DNA as different chemical components are fused and combined to create a higher functioning with capacities that transcend the parts themselves.’*

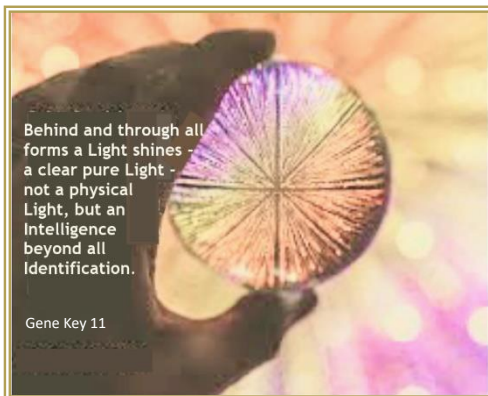

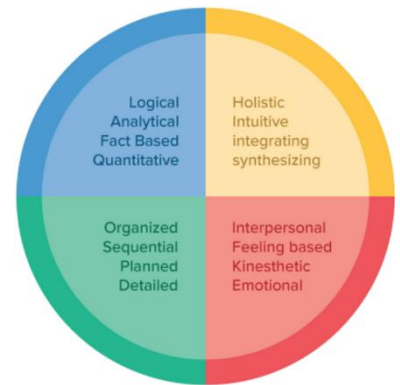

*‘At the level of the 45<sup>th</sup> Siddhi we move beyond the need for money. In the 45<sup>th</sup> Siddhi all the various strands of human DNA finally come together. It is the Cosmic gathering point for higher consciousness – Humanity operating as one Consciousness.... In entering into this field of frequency, you are transcending all sense of being separate from others.’*

*‘In the far distant future, at least from the viewpoint of our current awareness, the 45<sup>th</sup> Siddhi will flower throughout humanity. Not only will this bring an end to money, but it will slowly bring an end to food. As our collective frequency mutates our biological bodies, so the body of humanity will evolve to live on the frequencies of Light. This is programmed into the future of humanity through the Codon Ring known as the Ring of Alchemy.’*

Astraea, at this point in time, speaks to this Truth of an earlier epoch, and cycle of time, that is waiting to unfold through Humanity, as she is activating Gene Key 11, known as **The Light of Eden**, moving through the Shadow of **Obscurity**, to the Gift of **Idealism** and to the Siddhi of **Light**.

*'The 11th Shadow places an interference frequency between Light and the way in which the brain processes, translates and communicates that Light. In other words, your whole experience of the world is pushed off-kilter through the medium of the 11th Shadow. The 11th Shadow greatly limits a very specific functioning of the right hemisphere of the human brain – that aspect of the mind that does not see facts through language and number but grasps reality through intuition from the deep recesses of the brain.'*

*'The 11th Gift is one of the great keys of our present age. The more people can be encouraged to play with the imagery and creative power coming from the right hemisphere of the brain, the healthier the world will become. Idealism is given a bad rap in our modern world. It is seen as the opposite of realism. The 60th Gift of Realism, however, is actually founded upon a magical truth – that the only thing needed for magic to occur is some form of structure and an open mind.'*

*'This Gene Key allows us to use the creative imagery of the right brain to create true magic in the world. Although the 11th Gift is embedded in a world of magic and fairy tale, it is also a Gene Key of great power. In the world of the 11th Gift, everything is a symbol of the endless pattern of great archetypes moving from the formless into form. As we humans begin to think once again with our right brains, so we will bring much needed balance to the world of form. In accessing and honouring the gifts of the Divine Feminine and in balancing the left and right hemispheres of our brain we will once again re-awaken true harmony on Earth.'*

At the time of the New Moon Venus and Neptune are conjunct the North Node and opposite to the South Node, on Gene Key 25, which has **Universal Love** as the Siddhi. Neptune, as the higher vibration of Venus, embodies this essence of Universal Love, Selflessness, and Mysticism. Neptune has an ethereal quality that seeks to dissolve all sense of separation. However, Neptune has the potential to create an illusory world, where self-responsibility becomes lost, where alcohol and drugs become an escape from the harsher realities of life.

Since 2011, Neptune has been passing through Pisces, emphasising and magnifying these archetypal patterns. In the inner world, the expansion of spiritual consciousness has been growing within many Souls, as old memories, patterns, and beliefs have been dissolved and transformed, opening up higher realms of awareness and understanding through creativity and intuition. In the outer world, of the group collective consciousness, the dissolving of boundaries has been clearly seen around the world as mass migration has swept across the land. The escalating amphetamine addiction is a reflection of the Neptunian Shadow in Pisces.

Neptune, now in Aries, has a different energetic vibration – more active and goal-oriented, seeking to find solutions - a balance between deep Compassion for others, and a realistic practicality that will serve and enhance all. This shift in consciousness will become more evident as Saturn, the planet of realism, moves into Aries in May and finally comes to conjunct Neptune, beginning a new Saturn Neptune Cycle, at 0° Aries, in February 2026, revealing and healing **The Myth of the Sacred Wound**, during this 36-year cycle to awaken us to the Truth of Who We Are.

*'The 25th Siddhi is Love itself as the Source of all, and in this sense, it can be called Universal Love. The sacred wound that hides within each human being can be understood at three levels of consciousness – at the Shadow frequency, the wound maintains human suffering, at the Gift frequency the wound provokes humanity to evolve, and at the Siddhic frequency the wound reveals humanity's true nature as an Expression of Universal Love.'*

To assist this waking up 'out of a dream', you will see that feeding into these two Grand Crosses, Uranus is playing a pivotal role as it is sextile  $60^{\circ}$  from Ceres, the North Node, and Saturn, and trine  $120^{\circ}$  to the South Node (*blue lines*) and Uranus is also conjunct to Hygiea ♀ and to Sedna ♀.

The energy of Uranus brings an unpredictability to the chart – potential seismic activity, shocks and sudden revelations, which, because both Hygiea and Sedna are conjunct to Uranus, could reflect both more inventions or disclosures regarding the medical community at large (Hygiea) and equally announcements regarding our ancient past, (Sedna) which have already begun to surface with regard to the tunnels, or portals, that have been discovered under the Khafra Pyramid in Giza Egypt.

However this may manifest, Uranus seeks to break the limitations of the past. This can occur in a variety of ways, but it is always a 'Wake Up Call' to remove the blinkers from our eyes.

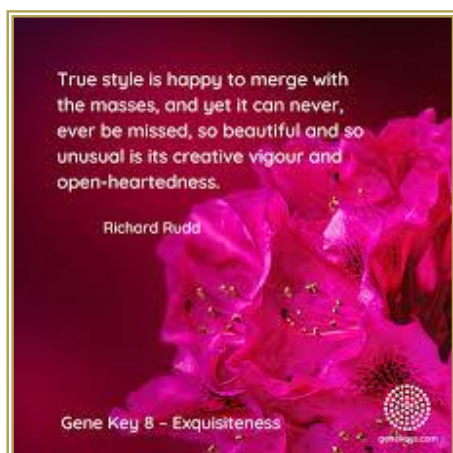

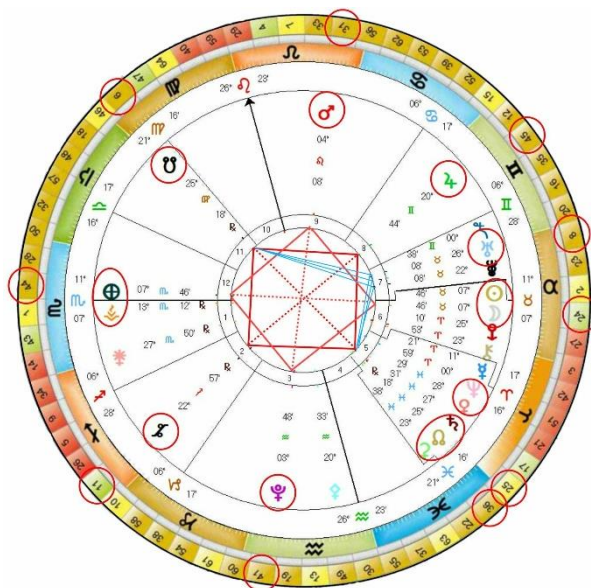

Uranus is on Gene Key 8, which is known as **The Diamond of the Self** moving through the Shadow of **Mediocrity** to the Gift of **Style** to the Siddhi of **Exquisiteness**.

**'The 8th Shadow like all of the Shadows is founded upon a specific fear and in this case it is the fear of being different. The 8th Shadow prevents individuals from rising out of the mass consciousness and exploring the real adventure of Life. The second function of Mediocrity is to serve the machinery of society rather than evolution. In other words you become a cog in the wheel of the systems established by man.'**

**'To break out of the heavyweight frequency of the 8th Shadow you have to take an exciting leap of faith in yourself. This 8th Gift catches people's attention because it brings something fresh into the world. True Style takes great joy in shattering the grey world of mediocrity that is considered the norm.'**

**'Where Style is more than skin deep, it is the cutting edge of creation itself. The individual surrenders the self to a creative process that controls the individual rather than the individual controlling the process.'**

**'This Gift is wild, organic, and unpredictable energy full of genius and quantum leaps. Such is the power of genius, for it carries within it more than just a new concept – it carries intent from a higher realm that is far beyond the individual through whom it manifests. Their only concern is to free more free thinkers – thus such people inherit a powerful mission in the world.'**

**'People of the 8th Siddhi are not leaders. They are examples. The 8th Siddhi of Exquisiteness is the natural revelation and manifestation of all the Siddhic states. Each Siddhi is holographic in the sense of being reflected within all other Siddhis. Exquisiteness is experienced when the Divine Essence begins to shine through the individual. In this state of bliss you fall in love with your own pristine manifestation because it is through this uniqueness that the Divine currents can be accessed. This is the stage at which you achieve transcendence of your genetics. You remain differentiated at the level of form, but at the collective Universal level your awareness permeates all forms, making you both a drop in the ocean and the ocean itself.'**

**'There is an inner Light and Wisdom that has a powerful and liberating effect on others, freeing them from the structured systems. Such people create their path as they walk it. Their legacy to the world is to dismantle all concepts of how one should live or what one needs to do in order to attain any particular state. They sparkle like exquisite rare jewels. They shine like a diamond in the heart of creation and wherever they look, they see other diamonds in various states of clarity – each one unique, each one exquisite and incomparable.'**

So as the Light continues to expand and the frequencies rise, you will have realised, this Supermoon holds two very particular ends of a spectrum, tension and reaction, coming from past lives, repeating into the present, or the potential, through the inner Silence and Stillness of Being, to anchor and to sow the seeds for a Golden Age.

At the time of the Wesak Moon on the 12<sup>th</sup> or 13<sup>th</sup> of May, which I will share nearer the time, there is a powerful healing focus that will be assisting us all in this endeavour.

We chose to be on Earth at this time, as the Kali Yuga Cycle closes, so let us collectively remember and realise the purpose of our Presence, so that Peace, Compassion, and Light are the Emanations that touch and enfold All Beings.
