Safe, efficient and accurate refacing of flat pipe flange surfaces

Complete in Wheeled Carrying Case

The FF-120 comes as portable set, only 15 kg. Can be transported, easy set-up and operated by a

single technician. Set includes:

FFL-kit with locators, O-Rings and extensions;
FSS-kit with feed screw and nut 1/2"-20 UN for surface roughness Ra 1,6 - 2,4 μ .

FSF-kit with feed screw and nut 1/2"-11 UNF for surface roughness Ra 3,2 - 6,3 μ .

Joint Separation Tools

FS and FSH-Series parallel wedge spreaders provide quick and easy joint separation using hydraulic or mechanical force.

Joint Assembly Tools

Rectify twist and rotational alignment without additional stress in pipe lines using the **ATM-Series** flange alignment tools.

Controlled Tightening

Use Enerpac Bolting Tools to seal the joint to the precise torque or tension required:

E-Series manual torque multipliers,
S and W-Series hydraulic torque wrenches or
GT-Series hydraulic bolt tensioners.

QuickFace – Mechanical Pipe Flange Face Tool

Enerpac QuickFace, Mechanical Flange Face Tool

Portable, hand powered tool makes even the hardest to reach pipe flanges resurface-able in a safe and convenient way.

Makes refacing easy

A simple and cost effective solution – the FF-120 turns a two man operation with heavy equipment, compressors and portable generators into a one man job.

The FF-120 has interchangeable lead screws that make it suitable for resurfacing damaged flat-faced, raised-face or lens-ring joint flanges to the high safety standards required.

After selecting the correct lead screw for the operation, the tool body is inserted in the pipe end and centres itself with adjustable locators to provide real concentric operation.

The tool arm is then rotated by hand using a worm-gear mechanism to provide a perfect spiral “gramophone” finish. The tool can be adjusted with a calibrated slide to define cut depth and the correct finish.

Surface finish & accuracy

A serrated finish with 30-55 grooves per inch and a resultant roughness of between Ra 3,2-12,5 µ (125-500 micro inches).

The FF-120 has same precision and quality of finish as a lathe.

Cost effective solution

Small and portable enough to be a permanent addition to your equipment range, Enerpac's FF-120 is the perfect solution to all of your small diameter facing problems.
