SE1

CAD manager and operator. Jackson Price specialised in bringing Energy Efficiency to Industry and Education.

Interests

I am interested in a great many things including culture, images, language and history. I enjoy living in the countryside and in the last two years have taken up golf.

Taking advantage of the slump in the fortunes of film based photography I have managed to acquire a large format camera and have set up to develop film which I then scan for processing electronically. (The camera is capable of rendering a distortion free image which through insertion into AutoCAD can be used for photogrammetry). I should add that I do also have a digital camera!

I like to understand the things I use.

STOP PRESS! Received the 2012 Prebendal School Golf Society "Most Enthusiastic Golfer Award". I thank you!
