

Mobile Fishing Byelaw - A review of permit conditions

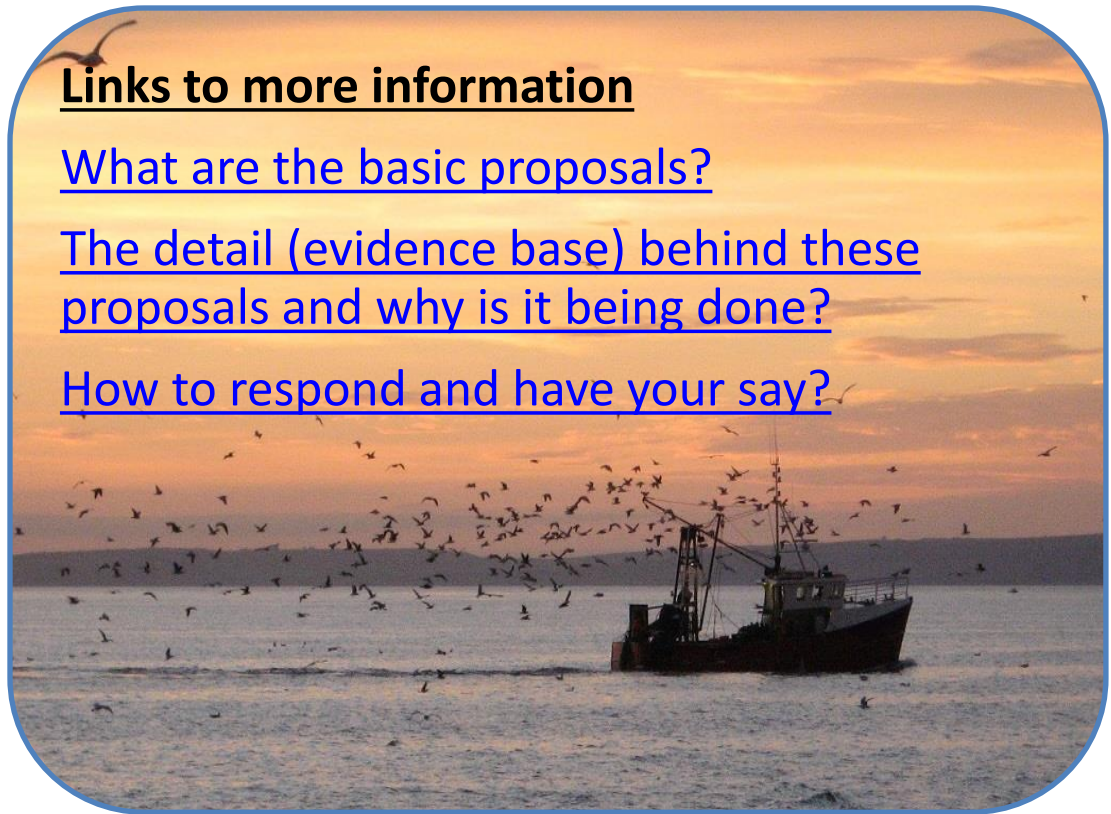

The D&SIFCA has to review the permit conditions. This is a requirement of the Byelaw. Work on the review began in December 2016 with all permit holders asked to submit their views. These responses have been summarised. Other factors such as the need to protect features and different habitats also influence decision making, especially in relation to where vessels can fish. Potential changes to the permits could impact you? It is important that fishers with a Mobile Fishing Permit have their say.
