

## Annex 4 – Data Collection on board Fishing Vessels

A summary of the results are shown in the table below:

	<b>Boat 1</b>	<b>Boat 2</b>	<b>Boat 3</b>	<b>Boat 4</b>	<b>Boat 5</b>
<b>Port</b>	Salcombe	Plymouth	Salcombe	Ilfracombe	Axmouth
<b>Total No. Hen crab catch</b>	215	155	314	111	69
<b>No. Hen crabs over 149mm</b>	124	70	119	72	29
<b>No. Hen crabs under 140mm</b>	41	48	120	15	28
<b>No. Hen crabs between 140-149mm</b>	50	37	75	24	12
<b>%ages of catch returned due to increase in MCRS</b>	<b>28.74</b>	<b>34.58</b>	<b>38.66</b>	<b>25</b>	<b>29.27</b>

The five pie-charts below were created from these results and show the number of female crabs sampled and measured on each of the on –board fishing vessel surveys undertaken.

The percentages of the female crab catch between 140-149mm which were returned to sea during the surveys undertaken are shown below.
