

# Potting Permit Byelaw – A review of permit conditions

D&SIFCA has begun a three year review of the commercial and recreational potting permit conditions. This is a requirement of the Byelaw and D&S IFCA must complete this work. 2 periods of consultation will take place. **Read the guide**. You can influence decision making and it is important that you have the opportunity to engage in the process. Your response will be collated and discussed by the Byelaw and Permitting Sub-Committee. This review process may result in changes to the potting permits that are issued.
