

# Lizard Point SAC

## (Special Area of Conservation)

Main site areas:  
 Sea inlets (100%)

Point	Lat	Long
1	50° 03.350' N	5° 16.833' W
2	50° 02.400' N	5° 19.617' W
3	50° 00.933' N	5° 21.000' W
4	49° 59.533' N	5° 21.550' W
5	49° 57.483' N	5° 18.250' W
6	49° 53.750' N	5° 18.250' W
7	49° 53.750' N	5° 14.500' W
8	49° 05.000' N	5° 08.250' W
9	49° 59.500' N	5° 07.717' W
10	49° 59.467' N	5° 07.783' W
11	49° 59.983' N	5° 10.117' W

The Lizard Point SAC is located on the south-westerly tip of Cornwall.

Lizard Point is unique in terms of its underlying geology, with no other existing SAC in the surrounding area offering such a variety of bedrock origins. The Lizard Point site consists of rugged inshore and offshore areas of submerged bedrock and boulders of complex geological origin, separated by extensive areas of thin, coarse mobile sediment covering flat sedimentary bedrock to the south and east, and the flat metamorphic bedrock

to the west. There are two areas of upstanding offshore reef extending from approximately 3.5 to 9 km offshore and extending down to depths of 80 m in some areas. Reference: For full site information please visit the link below.
