

LIFEFIT Salesforce integration

The latest release of LIFEFIT is offered with Salesforce integration functionality. This integration allows the direct connection, via web services, from Salesforce to LIFEFIT and vice versa.

The client selected Salesforce as their RM tool of preference; FIT undertook the challenge to make LIFEFIT and Salesforce communicate with each other. Working with Salesforce consultants, our technical team delivered the project on time and on budget. LIFEFIT Salesforce integration has been running in production since May 2016.

As a result of this project LIFEFIT's latest release has Salesforce integration inbuilt.
