

Financial Information Technology and LIFefit turn 25

Since its launch in 1990, LIFefit has been designed specifically for Life Insurance and Pension markets. LIFefit has undergone major technological innovation along the way, but its core parameterised flexibility and functionality remains. There are implementations of LIFefit across Africa, Asia, Europe, the Middle East and the United States of America.

As we celebrate our silver jubilee we have seen many competitors come and go, but FIT goes from strength to strength, all to the benefit of our loyal customers. The business knowledge of our people is what makes us different; we understand Life and Pensions, inside out, across markets worldwide. This understanding is crucial in delivering the solutions our clients need now, and that will future proof them. We work in partnership with our customers ; they learn from us as much as we learn from them.

The LIFefit application is designed to empower the client, and we encourage and guide them to take ownership. With this model of cooperation we look forward to the next quarter century, as LIFefit continues to grow and deliver.

Financial Information Technology is a software development company with 25 years' experience evolving LIFefit, a fully parameterised Life Insurance and Pension policy administration platform. LIFefit covers full lifecycle processing, from pre-sales to claim, and every step along the way. The FIT team are software and business experts in Life Insurance and Pensions.

LIFefit – flexible software for Life and Pensions
