Flexible Software for Life and Pensions

LIFeFit - Policy Administration Solution

Financial Information Technology Ltd set out in 1990 to lead the field in cost effective policy administration software. We continue to offer our clients unparalleled opportunities to leverage technology to streamline the administration process, and to ultimately improve the policy holder experience.

We are specialists in the Life Insurance and Pensions industry. Our team of highly skilled professionals has many years of experience in Life and Pensions companies, implementing systems and developing solutions that work out of the box.

There have been over 30 installations of LIFeFit around the world. We are always working with our clients to develop the next step in their technology journey. We leverage technology to optimize operating efficiency to ensure our clients get a real return on their investment.

flexible solutions for your business needs

Cradle to grave solution for the full product range. Includes products such as Term, Endowment, Unit Linked, Universal Life, Funeral, Annuities, Deposit Administration, School fees, plus rider benefits.

Implementations

LIFeFit has been implemented in a huge variety of companies, from startups to established firms, from emerging markets to mature environments. Working with the client we establish the optimum model for their business situation. With our vast experience we provide guidance on what has worked, and what hasn't, saving the client both time and money.

Why Financial Information Technology and LIFeFit?

- Functionality works out of the box
- Fully parameterised for rapid implementations
- Leverage from our industry experience
- Working in partnership
- Leading edge technology

- WEB SERVICE INTEGRATION
- REPORTING and ANALYTICS

BACK OFFICE ADMINISTRATION

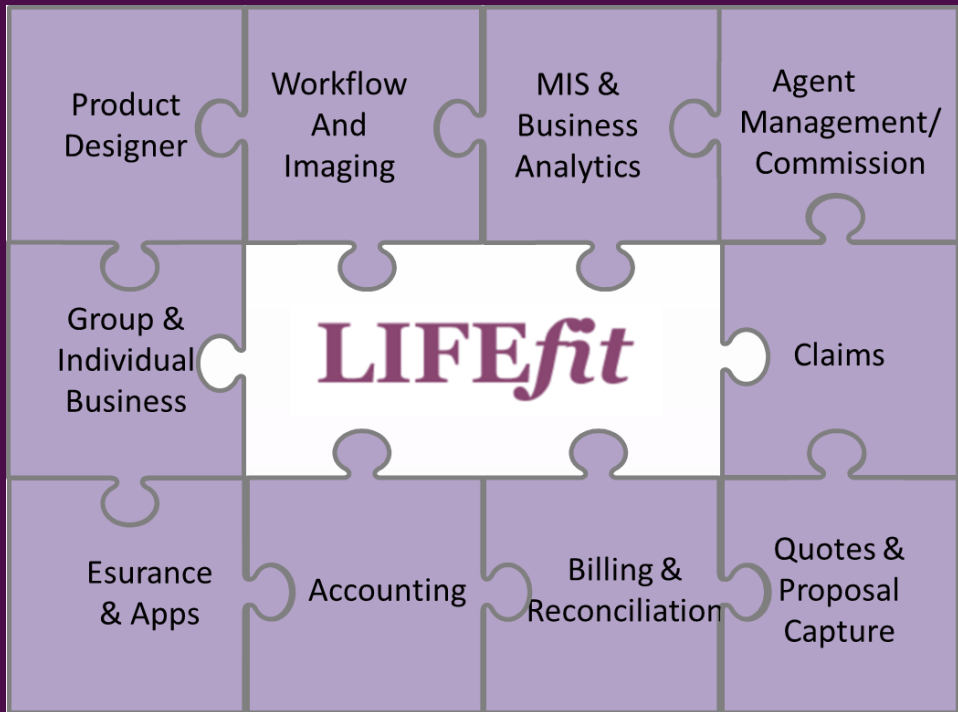

Traditional back office administration supports all business functions in a centralized way. Everything just 1 click away. Complete audit trail of changes, including full transactional history.

PRODUCT DESIGNER (Sandbox)

Parameterised product setup allows the product design team to create, modify, test and launch new products quickly. Both Group and Individual products including rider benefits. Link products to underwriting, reinsurance, commission, claims and accounting.

ESURANCE SOLUTIONS

Online real-time pre-sales quotations and application forms (proposals). Push the work to the broker/agent to streamline the back office process with straight through real-time processing. Policy holder access for enquiries and updates. Esurance via an internet browser and/or mobile app.

LIFEfit Solution

Multi-currency, multi-language and multi-company operation are standard features of LIFEfit. Being flexible and parameterised allows insurance companies to create and launch new products rapidly as market conditions change and new opportunities arise. LIFEfit will help you solve your administration puzzle.

Business analytics and management reporting are critical to every organisation. They can be used to spot trends, mitigate risk and drive growth through real time analysis of information. Use the results to refine and improve workflow, resulting in faster processing and happier agents and customers.

There are many pieces to the administration puzzle and LIFEfit provides solid foundations for your enterprise. Use as many components of LIFEfit as you want, then review and improve. We are continually improving LIFEfit to meet the ever-changing market conditions and all clients benefit from these enhancements.

- Real time integration
- Full product range is support and parameterised for setup
- Pre-Sales Quotes and Online Proposals
- eSurance - Agents, Policy holders, and Group Life Administration
- Automated communication - SMS, email and letter
- Comprehensive workflow and document management
- Anti Money Laundering controls

FLEXIBILITY, FUNCTIONALITY, AFFORDIBILITY, STABILITY

LIFEfit is the tool to exceed your business needs

FIT have successfully implemented LIFEfit at many happy clients around the globe and we are committed to delivering technological excellence through the continued evolution of LIFEfit. LIFEfit will help you streamline business processing resulting in the ability to service your customers and salesforce on a more timely basis.

LIFEfit is quick to implement and does not require a vast team of people to maintain. The application runs entirely in a web browser, and users find it intuitive and straight forward.

LIFEfit is best described as a business tool, a tool the business people use.
