LIFEfit - any time, any place, anywhere

LIFEfit on iPad

LIFEfit is a flexible software package for life and pensions administration that allows users to process information anywhere. 100% browser operation enables our clients to benefit from advances in mobile computing on tablets and smartphones - any location will serve as a workplace.

Combining this flexibility with state of the art workflow means users no longer have to "go to work", the work comes to them. And LIFEfit's support for document imaging means all the information they need to complete a task is instantly to hand.

If you'd like to know more, please get in touch.
