Package price for cataract surgery (second eye)	£2441.00		
First follow up consultation (reduced) Second follow up consultation		£75.00 <u>£160.00</u> £235.00	
Approximate price for STANDARD LENS (both eyes)			£5782.00

Horgan's fees for consultations will be issued by his office after consultations.
Any **additional follow ups** needed will be charged at £160.00.

If you require a more unusual (special order) lens such as a **"Toric"** there will be an additional fee to pay. This is charged to you by the hospital after your surgery has taken place. The hospital can provide information about the costs of these.

If you opt to have multifocal lenses, these will incur fees and these vary depending on lens type. The package price for standard lens surgery is chargeable by the New Victoria Hospital before the day of surgery (this covers theatre costs, the surgeon's fee, standard lens and all expenses incurred on the day). After surgery, any additional fees for toric or multifocal lenses will be raised by the New Victoria Hospital by way of an invoice.

You may also be charged by the New Victoria Hospital for any additional drugs collected.

If you wish to have multifocal lenses, Mr Horgan will request that you have a Pentacam scan carried out at an additional cost payable by you. This is required to check your cornea. Prices vary depending on which optometrist/hospital you choose to visit.

If you wear contact lenses and you are keen to proceed quickly to having your biometry carried out at your first consultation (the measurement taken to enable Mr Horgan to calculate the correct lens for you), you will need to have removed your contact lenses for:

Soft/Gas Permeable lenses	A minimum of one week
Hard lenses	A minimum of two weeks

Mr Horgan will ask you to sign a consent form confirming that you have done this.

Sometimes it is not possible to obtain biometric measurements using the hospital's equipment (for example, the cataract is very thick or the patient has previously undergone laser eye surgery) and for this reason you may need to visit an Optometrist with an ultrasound machine to achieve the biometry. This will also incur a fee payable to the Optometrist and this is not covered within the package price or covered by Mr Horgan.

The same contact lens rule (above) regarding contact lens wear applies for pentacam scans.

SCANS are available at:

<p>HAIG-BROWN Fair Oak Porsmouth Road Esher Surrey KT10 9PJ TEL: 01372 466762</p>	Simply book in directly
