

## Colours

I can recognise colours

I can mix 2 colours to make a new colour.

Red + Yellow=

Blue + yellow=

Red+ Blue=

Let's paint some bread....

### Painted bread

#### What you need:

- Milk
- Food colouring
- White bread
- CLEAN paint brushes

#### What you do...

- Put a couple of drops of food colouring into a small amount of milk. A little of the 'milk paint' goes a long way so don't make gallons!
- Get the children to paint onto their bread. The idea is that you don't soak the bread with paint or it won't toast! You can paint both sides if you want.
- Pop into the toaster.
