

Rainbow Bubble Snakes Activity

Try this fun activity both inside and outside. You can do this with items you have in your house.

What you need:

Plastic bottle
Scissors or Stanley knife (Adult use only)
Elastic band
Old sock
Washing up liquid
Food colouring (optional)
Shallow container
Water

What to do:

1. Cut the bottom of the bottle and slide the sock over it, overlapping it so the sock covers the bottom. Secure with a rubber band.
 2. Pour the washing up liquid into the shallow container with a little water and food colouring if you want.
 3. Dip the sock end into the solution and then blow through the drinking end with the bottle sideways.
 4. See how long or short, wide or narrow you can make you bubble snakes!
