LYNCHPIN

Improved Workshop Performance!

Fast simple, integrated job card-to-invoicing, guaranteed to substantially boost your fitter productivity, job margins and customer service levels.

LYNCHPIN

Frees up time, and puts your finger firmly on your workshop's pulse.

Workshop owners choose LYNCHPIN to simplify their workshop administration for three sound reasons.

Firstly, it does a lot more than just maintain vehicle records and turn job cards into invoices. It has the most comprehensive set of time and cost saving features yet devised in a simple-to-operate system.

Secondly, it's built around delivering accurate on demand reporting that enables you to make quality decisions on financial and operational performance – instantly and with peace of mind!

Thirdly, it is tailored to match the working processes of the only workshop that matters—YOURS.

Not all commercial vehicle workshops are the same.

Having helped nearly 60 owners located throughout the UK to simplify job paperwork, we have uncovered many ways to improve efficiency and productivity. By shaping **LYNCHPIN** to suit their way of working, they and their workshops have a tool fit for purpose -their purpose.

Easy to use screens and automatic built in updating guarantees tasks get done right, first time, and with the least amount of keystrokes and mouse clicks.

If you need something unique, we provide it at no extra cost.

If you don't need something, we'll hide it just in case you change your mind at a later date, or your circumstances change.

You see, we believe that software should be designed around, and for the user. As an absolute given it should be capable of being moulded to suit the needs of the workshop owner. And it is this core belief that enables us to give you the ultimate guarantee - it will work for you.

LYNCHPIN

Frees up time, and puts your finger firmly on your workshop's pulse.

Fitters. They are your most precious resource and the quality of their work distinguishes you from your competitors. Making sure they spend their time on work you can invoice is a priority. The **LYNCHPIN** Time & Recording system uses the latest bar code technology and includes :

- daily attendance - automate and simplify time started, break time and time finished
- eliminate the need for paper timesheets
- instant analysis on attendance and absence
- Capture & analyse non productive i.e. cleaning, opening up etc)
- integrate with time clocking machines (TimePro)

Inspection Sheets. Comes with the following built in:

◆LGV◆truck◆trailer◆skip loader◆tail lift◆brake test◆ ◆mechanical brush◆hook lift.   Others can be added upon request to match your customer needs. Fitters can update job and inspection sheet with copies stored as PDF within job file. Inspection sheets can also be attached to the customer invoice and emailed with a simple mouse click.

Automatic Yearly Planners by customer, vehicle and year.
