

Plumbing Services

In the fast paced world we live in, it is very easy to focus solely on the plumbing services offered and lose sight of the important things like quality of service, and friendliness/helpfulness of engineers. However, at Jackman plumbing we understand the importance of customer satisfaction. We also provide tailor made plumbing services to meet our customer's requirements. No job is too big or too small for our engineers.

When carrying out plumbing services in your home we always endeavor to treat it with respect and tidy up after ourselves.

We carry out plumbing services for domestic and commercial properties within the M25, London and the surrounding areas.

Some of the plumbing services we offer are:

- Plumbing services include the repair and installation of fresh water/waste water/ and even sewage pipes, as well as following blue prints and laying pipes for an entire building
- The installation and repair of pipes in washing machines, water heaters, gas stoves, ovens, showers, sinks, and toilets are some other plumbing services we offer.
- Popular plumbing services are installing/ refurbishing a bathroom and removing and installing fixtures such as shower, baths, toilets, sinks, dishwashers and washing machines
- Our plumbing services also include supply, installation, and repair of drainage systems and water systems, including tanks, immersion heaters, pumps and cylinders
- Repairs to previously installed systems, including draining them and removing clogging also comes under plumbing services
- Repairing leaks (from a dripping tap to a pipe) and remedying burst pipes are other plumbing services we provide as well as tending to overflows
- Additional plumbing services are installing a garden tap or a sprinkler system or even a complete new water mains into your property and removing old lead water pipes (which are poisonous and deemed as unsafe)
- Other plumbing services we offer are remedying any hot water problems you may be experiencing and ensuring hot water is back on and working efficiently

- Water softeners and lime scale reducers can also be installed
- Other plumbing services we offer are the unblocking, repairing and installation of waste disposals
- Fitting saniflows will give you the opportunity to add facilities in a basement or loft area where it's not feasible to install a soil pipe connection
- As well as plumbing services, basic carpentry may be required, to access pipes inside the wall or brace pipes to keep them in place
