**Bronek Wedzicha, M0DAF, VMARS Publications Editor and Treasurer, demonstrating his very fine WWII Collins TCS 12 transmitter receiver at the 2014 National Hamfest**

***National Hamfest, Newark  
26th-27th September 2014***

VMARS were delighted to have been able to exhibit at the two-day National Hamfest held at the Newark Showground in Nottinghamshire and what a 'bumper' show it turned out to be. If the success of the event can be measured by the capacity crowd of visitors, the trade stands and interest in what VMARS had to offer and two lines of 'car-booters' on the outside area, all with various ham treasures and plenty of vintage equipment, this was indeed a 'bumper' event. We spotted an Eddystone 730/4, a plethora of Clansman HF and VHF manpacks plus boat-loads of ancillaries, a Racal Syncal 2000 complete with frame/bag, in working order, a Command transmitter and some crystal sets, to say nothing of myriads of components to suit every type of constructor. One of our members obtained a very nice BC-375 and associated BC-348, three tuning coils a Dynamotor and a T17 mike, in fact a complete station which, by early afternoon on Friday, was on its way to a new home in Wales. I hesitated briefly over a very nice VHF/UHF modern Park Air transceiver, only to find it gone twenty minutes later when I had decided to make the purchase. One of our newest members who enrolled on the day had bought an HRO-1 receiver in fair condition and was showing it to us on the stand.
