

## Parish Notes – 6 November 2017

**Parking** continues to feature in parish correspondence with recent contact from residents indicating that double yellow lines to stop on-street parking may not address safety issues.

Persistent offenders may be reported to

<https://www.brighton-hove.gov.uk/content/parking-and-travel/parking/parking-problems>

**Bus stop shelters:** BHCC Public Transport team receive requests for new bus shelters at stops where no shelter currently exists. A priority/ scoring system is being developed so that shelters are installed where they are most needed & where site conditions make it practical to do so.

Some shelters are provided because there is a new building development nearby and, as a condition of the planning process the developer has provided funds to install a shelter. New assessment criteria would not apply to these developer-funded shelters.

For other bus shelters an assessment process is proposed *taking onto account*

- Relative exposure to the elements of the bus stop site
- Distance from nearest bus stop that already has a shelter
- Most popular location in terms of numbers of requests received
- Numbers of users observed boarding at the bus stop and
- Location characteristics. Consideration will be given to sites near essential services (e.g. community building, medical centre or hospital), or near sheltered housing or other building with a potentially high concentration of mobility-impaired users

Site visits would be conducted by council staff and a representative from Brighton & Hove Buses as they manage bus stop infrastructure & have knowledge of locations. Feasibility assessments would be conducted, and an installation programme produced on an annual basis.

Views are sought by 30 November. Contact [TransportProjects@brighton-hove.gov.uk](mailto:TransportProjects@brighton-hove.gov.uk) or phone 01273 292480.
