To consider – BEAG terms of reference

ESCC A259 workshop October 4<sup>th</sup> 2-4 Teams We would like to invite you to the first of a series of stakeholder workshops to discuss the A259 Major Road Network South Coast Corridor Study. The Study, which complements the Transport for the South East (TFSE) Outer Orbital Area Study, aims to develop a balanced package of multi-modal transport measures by improving the efficiency and effectiveness on the corridor between Pevensy in Eastbourne and Rottingdean in Brighton, alongside integrating greater sustainable mobility options. This will be fundamental for both existing and future users of the A259 corridor which serves a region with ambitious growth plans.

We are very keen to understand stakeholder views, and to engage with our Local Members and District and Borough partners as well as key stakeholder organisations and interest groups along the A259 and integrate these early into the developing study. For this initial workshop, we would like to introduce the A259 South Coast Corridor Study and its scope in more detail; understand your aspirations for the corridor; as well as discuss potential opportunities and challenges. A more detailed agenda for this workshop will be issued prior to session
