BMC FootPrints Asset Core & MyApps

BMC FootPrints Asset Core with MyApps puts pre-approved software and access requests in the hands of the end user without going to any websites and without submitting any forms. It's the app store for the desktop – IT can advertise available software applications, advanced actions and quick links for the end-users to access on their schedule, not IT's.

Ten Reasons MyApps Just Works…

» *MyApps just works* with you and knows who you are. No need to know yet another set of credentials.

» *MyApps just works* with your machine. No need to have another screen and set of clicks when accessing the data you need.

» *MyApps just works* no matter what device you are on. If you are on your MacBook Air, your Windows desktop, or a server you manage, you will only see the items that apply to that device.

» *MyApps just works* no matter how your organization is structured. You only see the items that apply to your business unit, your department, your role.

» *MyApps just works* with or without a VPN. BMC FootPrints Asset Core leverages Service Anywhere to find and install your apps, even if you are a road warrior.

» *MyApps just works* even if you don't have administrative rights on your device. If your organization makes software available to your device, your group or you, the software just installs.

» *MyApps just works* letting you know when new items are available to you with non-intrusive notifications. No need to constantly check MyApps to see what's new. Just watch for the advertisement to appear in your systems tray.

» *MyApps just works* respecting your bandwidth needs. Do you need to ensure only a small amount of bandwidth is used at certain times of the day? No problem.

» *MyApps just works* quickly and efficiently. We use the same single BMC FootPrints Asset Core agent already installed on your device. Nothing new to download or install just to get MyApps.

» *MyApps just works* with filters for quick searches and tooltips for detailed descriptions. With a modern app store look and feel, MyApps is easy for anyone to use!

BUSINESS RUNS ON I.T.
I.T. RUNS ON BMC SOFTWARE.

Business runs better when IT runs at its best. Tens of thousands of IT organizations around the world — from small and mid-market businesses to the Global 100 — rely on BMC Software (NASDAQ: BMC) to manage their business services and applications across distributed, mainframe, virtual and cloud environments. BMC helps customers cut costs, reduce risk and achieve business objectives with the broadest choice of IT management solutions, including industry-leading Business Service Management and Cloud Management offerings. For the four fiscal quarters ended March 31, 2013, BMC revenue was approximately $2.2 billion. Visit www.bmc.com for more information.
