Allianz create new product

BUILDING ON its strong partnership with Mitsubishi Motors in the UK, Allianz Global Assistance UK has developed an exclusive MOT Protection product designed to complement the existing Mitsubishi Approved Used Cars programme. This new added-value benefit provides customers with MOT Protection cover for up to £750 on a wide range of repairs, should their car fail its MOT.

The latest addition to a range of benefits for Mitsubishi Approved Used Car owners provided in partnership with Allianz Global Assistance, MOT Protection Cover is designed to offer customers peace of mind on the condition that they have their MOT carried out at an authorised Mitsubishi dealership and maintain their vehicle in line with the manufacturer's servicing schedule.

Lance Bradley, Managing Director of Mitsubishi Motors in the UK, said: "We are delighted to be working with Allianz Global Assistance to bring Mitsubishi owners a new level of cover for their vehicles. Our MOT Protection service is an innovative product that aims to help our customers manage their running costs by providing a financial cushion for MOT repairs, boosting the customer experience for the whole life of their vehicle."

J&J WELCOME BACK FRIENDS

THE TEAM at J&J Conversions were again delighted to welcome Blair Atholl Garage back to Andover to collect the newest addition to their fleet, a 12T MAN Crew Cab fitted with J&J's F1 Low approach body.

Blair Atholl Garage is an established family business, in fact Roddy has celebrated 45 years in business from its launch in 1949. Keeping current with the latest technologies Blair Atholl Garage maintains its family values and traditions.

Cole Crighton may have learnt much of the family business by osmosis but recently having qualified as a technician, Cole is now third generation, joining dad Derek and granddad Roddy to work full time there.

On the edge of Cairngorms National Park, the terrain around Blair Atholl is beautiful but can be challenging for local motorists and tourists. Working 24/7 for all major clubs and managing an authorised Bosch Service centre it took some juggling to find the time to make the trip from Scotland to

Hampshire not once but twice in a fortnight. To al-

leviate the pain of waiting the last few weeks for the new MAN F1 Low approach slide bed to be finished, J&J could offer Derek the use of a new Mitsubishi Canter Slidebed, one of a fleet of new free courtesy vehicles J&J offer their customers. Derek commented: "Very grateful for the use of the loan truck. This helped us a lot".

It was a pleasure for J&J's Glynn to hand over an impressive vehicle designed engineered and built to exacting standards. Derek's particular with his specifications, the F1 has superb loading angles and payload, is fully loaded with a three piece stainless steel wrap around gantry and a two tonne second car lift and comes with a J&J three year warranty to match MANS' chassis warranty.

On their return (the following morning) Derek emailed Helen at J&J commenting: "We had a fantastic run up, this truck drives like a high end prestige car in comfort and ride, delighted with the vehicle, now to put it to work!"

To learn more about Blair Atholl Garage visit www.blairathollgarage.co.uk. And to learn about the F1 Low Approach visit www.j-jconversions.co.uk.
