

# ISLAND RUN FOR J&J

**W**ITH EACH nautical mile that passes, catching the ferry to the Isle of Wight is like stepping back in time. The Island may generate a feeling that you can enjoy a slower pace of life. Off season this may be true when the population is circa 140,000 but with over three million tourists visiting annually, it's the Islands' largest industry, so the volume of road traffic swells.

The Isle of Wight is fondly thought by some of being caught in a bit of a time warp,

but that's not so for Danny Price. He's embraced modern technology and uses a state of the art facility with skilled technicians providing all garage services for cars, light commercials and HGV. D H Price Motors is a stone's throw from where his grandfather housed his own

garage and Shell forecourt in the '60s. Although business has boomed and expanded, the family values remain the same. Priding themselves on outstanding customer service you only have to scan DH Price's new web site to see the testimonials.

Although equipped with a heavy underlift for HGV recovery, the majority of DH Price's business comes from the tourists' and working for several major clubs means 24/7 recovery is exactly what it says. It's never a good time to break down, let alone on your holi-

day, on an Island, too, so their 18-strong staff always strive to deliver quality service. To facilitate this, Danny's just bought a new Vauxhall Vivaro CDTI fitted with J&J Conversions Evolution II VRS. This Vivaro version of VRS has passed full EC Whole

I'm chuffed to bits with it. VRS is a superior piece of kit. I aim to buy another one in the Spring ready for next year's season.

Vehicle Type Approval.

Opting out of extra passenger seats, Danny customised his spec to increase the work shop area. Bott's racking system creates a stylish, functional mobile solution letting his staff undertake most roadside repairs. If it's not fixable roadside, J&J's VRS can rapidly be deployed. Benefiting from full remote control the VRS is fast, efficient and user friendly. Capable of recovering a panel van, J&J's VRS is an economic solution. Danny's already noticed and benefited from fuel savings. "I'm chuffed to bits with it. VRS is a superior piece of kit. I aim to buy another

one in the Spring ready for next year's season."

J&J hold stock of Vauxhall Vivaros, ensuring customers a prompt build time. They're working towards achieving WVTA on Ford's new Custom Transit. Investing in the future, J&J have completed an Individual Vehicle Approval Inspection bay on site in Andover.
