HARWOODS COVER IT WITH J&J

J & J CONVERSIONS have just completed a number of specialist covered transporters for the Harwood Group. Harwoods is an independent, family run business established way back in 1931. The business is led by chairman, Guy Harwood and have a number of dealerships in the South East including Bentley, Aston Martin, Jaguar, Range Rover and Audi brands.

The covered transporter build programme has included a wide range of builds with features to suit the requirements of the specific brands in the Harwoods group. These have included fixed bodied covered transporters with hydraulic tailgates, curtain-sided transporters with loading ramps, accommodating both single and multi car loads.

The latest vehicle to hit the road was a curtain-sided transporter based on a 10 tonne MAN for their Southampton Audi dealership. The cab and curtains were finished in silver to complement the dealership site. The unit was designed and built to accommodate the entire Audi range from the compact A1 up to the Q7 4x4.

The driver of the vehicle, Dennis Chant, was involved in the build at every stage and is delighted with the vehicle. "There are often small things in vehicle design which cause the driver a lot of unnecessary grief, so it has been great to be involved from an early stage. The team at J&J understood the difference very small low-cost details can make to the usability of a truck."
