

# SNOWS GROUP BUY J&J PREDATOR SLIDE BED

**J** & J CONVERSIONS were delighted to be approached by the Snows Group to provide a bespoke car transporter for the Groups Accident Repair Centre.

The history of Snows Group is fascinating in itself, with founder Geoff Snow an obvious entrepreneur starting his initial business selling office supplies. Some 50 years later Snows Group has transformed into a colossal business with over 25 franchised car dealerships across the South Coast.

Snows Accident Repair Centre houses a state of the art body and paint shop capable of restoring all makes of vehicles with certified manufacturers spare parts. Because Snows franchises also include some prestigious and rather low slung cars it was imperative that they have a transporter capable of carrying even the lowest belted bodies. J & J's Predator slidebed was just perfect for the job achieving an astonishing 3200kg payload. The Mitsubishi Canter TF 7C15 150 day cab, fitted with a second car lift, duonic gear box and a stainless steel wrap around gantry is a reflection of Snows company image of quality and service.

Daniel Bush of Snows Accident Repair was delighted with Richard's expert advice on choosing the right vehicle for the job and they spent a lot of time discussing specifications to get the right build at the best possible price.

Daniel e-mailed Helen a few weeks after taking delivery commenting, "The truck hasn't stopped working since we col-

lected it which is good ... so please thank yourself and the team for doing a super job"

Predator Slidebeds or any other J & J product, standard or bespoke, please contact Glyn lawrence@j-jconversions.co.uk

## RTR lend a helping hand

RTR has reached an agreement to allow the Yorkshire Ambulance Service to get to accidents quicker and to improve their 999 service response.

RTR has allowed the Yorkshire Ambulance Service to position a special deployment unit on the company's land.

As Paul Hoyle said: "It's an honour for use to help our local ambulance service to save lives."
