

## COCKLE MEASUREMENT

### FISHING FOR COCKLES BYELAW

A PERSON MUST NOT TAKE FROM A FISHERY A COCKLE WHICH WILL PASS THROUGH A GAUGE HAVING A SQUARE OPENING MEASURING 23.8MM ALONG EACH SIDE.

This means that if a cockle, in any direction or orientation, goes through a square hole with 23.8mm length sides, then that cockle is too small to be taken.

On the left the cockle does not pass through the hole, however, on the right the **same** cockle will pass through the hole in a different orientation; **this cockle is too small to take.**
