

TEACHING, LEARNING & ASSESSMENT ESSENTIALS

Maths Moderation Meetings for Year 3, 4, 5 and 6 teachers

Following up on our work around developing subject knowledge and mathematics pedagogies in the new curriculum, ODST has arranged for Hub moderation meetings in mathematics for all staff involved in KS2.

With the increased Ofsted focus on the accuracy and impact of assessment to establish pupils' starting points and to help modify teaching so that pupils achieve their potential, it is essential that teacher judgements are accurate so that they can build on learning.

There will be opportunities for teachers/teaching assistants to agree what the 'expected standard' and greater depth within the expected standard look like for their year group and then apply this knowledge within the moderation process. The process can be applied to further aspects of learning back in the classroom.

The aims of the workshop are to provide teachers/teaching assistants with:

- a general introduction about assessment/interim frameworks in 2017
- agreement about what the 'expected standard' and greater depth within the expected standard look like for their year group
- support colleagues in reaching judgements that are assessed against national standards
- highlight good examples which ODST can load onto Target Tracker as exemplars for its schools

The focus/strand will be number – addition and subtraction. Teachers/teaching assistants will need to bring a range of pupils' books and other relevant assessment information (see 'assessment jigsaw' document for ideas), which show the addition and subtraction strand in number.

Key Stage 2 – (15% sample size)

- 1 FE or less 5 pupils
- 2 FE 9 pupils

Hub & Venue	Date & time	Contact details
Oxford Hub Wheatley CE Academy	Wednesday, 8 th March 1600 - 1730	Wheatley CE Primary Academy OX33 1NN office.3165@wheatley.oxon.sch.uk 01865 872366
