

## Otter Vacuum News Letter September 2016

Here at Otter Vacuum, we have had another terrific year of continued success. Since moving into our new premises 10 Parkers Close, Downton Business park, Downton, Wilts SP5 3RB earlier this year, we have gone from strength to strength.

Our new premises has provided us with the opportunity to open our doors for training within our very own training facilities. These facilities are specifically designed for the training of design engineers and architects as well as service and maintenance engineers. We have incorporated a fully functioning Jets™ vacuum system to assist in hands on interaction and learning.

In addition, our new premises now give us the flexibility to stock even more Jets™ products in our secure storage space, Thus enabling us to provide increased efficiency with our service to our customers as we now have the ability to store a large range of products all under one roof.

The valued relationship with our customers has always been the focus of Otter Vacuum, this year has enabled us to become more hands on with our products, from the way in which they are packed and sent, through to the after sales.

UK & Eire Sole distributor for Jets™ Land and Transport
