

April Newsletter

We are pleased to announce that JETS[™] have introduced a highly sound insulating building drainage pipe system with an innovative three-layer technology. We will be stocking this push fit product for fast and easy installation.

- Simple and fast processing
- Safety during assembly and permanently leak-proof connection
- Good noise insulation properties
- Multi-layer technology
- Compatibility across all systems
- Environmentally friendly, as free of PVC and halogens
- Fast and easy to install
- Push fit connection
- Light weight

Training

We had the pleasure of welcoming members of the Qdos team to our premises at 10 Parkers Close, Downton, for training in JETS[™] equipment specifically tailored to their requirements. The day was split into two, theoretical understanding of the JETS[™] equipment before later moving onto the practical segment of the day.

To get the best out of JETS[™] equipment, it is vital that operatives and maintenance engineers are fully conversant. We offer training at our facilities free of charge for anyone using JETS[™] products. All you need to do is either give us a call or send us an email to discuss suitable dates, the amount of people who will be attending and we will organise the rest!!
