

# May Newsletter

With summer fast approaching, it is key to be prepared for the busy season ahead. The JETS<sup>™</sup> descale and cleaning products are designed to keep the JETS<sup>™</sup> products functioning at their best.

Firstly, the JETS<sup>™</sup> Toilet Clean plus is perfect for routine cleaning. Its environmentally friendly and efficient treatment is designed for the removal of hard water scale and anti-bacterial cleaning of wastewater systems. It also aids in the cleaning and prevention of scaling of the bowl, vacuum valve and secondary pipe.

The Toilet Clean Plus comes in a handy 0.75L size for easy portable use, along with a 5L or 10L option.

Alternatively, the JETS<sup>™</sup> Descale Gel will prevent scale build up in vacuum lines, holding tanks and components and keeps sewage flowing freely. It can also be used directly on scale build up in wastewater source bowls for local cleaning and is safe for use on stainless steel, acrylic and plastic.

The Descale Gel comes in 5L and 10L options.

## Training

We know how important it is to be able to solve any issues you may encounter with your JETS<sup>™</sup> equipment when out and about, so we have continued to provide our free training to JETS<sup>™</sup> users.

This month we welcomed members of When Nature Calls and Gifford Circus to our premises located at 10 Parkers Close, Downton, SP5 3RB, where they were able to gain first hand, training tailored to their equipment.

We aim to ensure that those that attend training leave the day feeling prepared to tackle the season ahead, for this reason we mix the day into theoretical understanding followed by hands on practical where they can put what they learn into practice.
