

Atamis SRM

Benefits

Drive out inefficiency caused by decentralised data

Understand and control risk across your entire supply chain

Save time generating management reports

Automatically generate a digital archive of activity

Improve inter-departmental communication over supplier issues

Automate periodic risk management activity

Improve visibility of contractor performance

Collaborate and share the same page with suppliers

Atamis Supplier Relationship Management

A supplier's performance can directly impact on the success of your own organisation. And a failing supplier - for example, a supplier that becomes publicly exposed to inadequate practices or policies - can have a catastrophic impact on your entire operations. Many businesses invest customer-focused services, yet neglect to protect the supply chain fundamental to their existence.

Atamis SRM helps you identify your high risk, high spend suppliers and provides you with easy-to-use tools to monitor their performance, track their policy compliance and implement a full risk management framework. And, not forgetting that SRM is, above all, about business relationships, Atamis SRM provides you with some modern and familiar tools for keeping in touch.

Atamis 3.0 is a modular application supporting the whole contract lifecycle:

-  Analyse spend in Atamis SA
-  Plan your pipeline in Atamis PM
-  Source goods and services in Atamis TM
-  Contract with suppliers in Atamis CM
-  Manage supplier performance in Atamis SRM

Features

Atamis SRM puts you firmly in control of your key supplier relationships, helping you to maximise your team's productivity and minimise supply-side risk. By maintaining all of your supplier information in one place, you'll save time and eliminate errors caused by pulling your correspondence, compliance, performance and on-going activity from multiple sources.

For a 30-day free trial with your own sample contract data, or for access to our Demo system with free video training tutorials, please email info@atamis.co.uk.

Atamis SRM

Rapid Setup

Atamis Support will have your initial system set up in a matter of hours. Our Client Briefing Pack provides you with all the guidance you need to send active procurement project data - in any format.

Depending on your requirements, we'll arrange a call or a workshop to confirm custom fields, layouts and permissions and have this configured within a few days.

We provide on-site and webinar training, or you can just use the short video training tutorials.

Training and Support

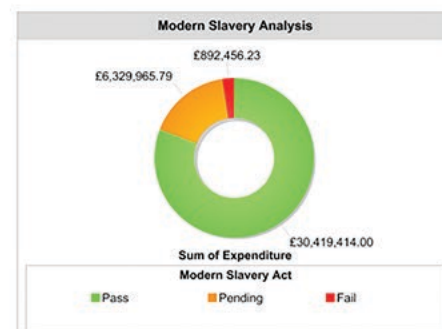

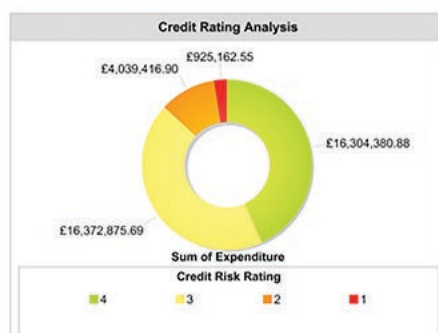

Three training options are available: On-site, webinar and self-service video tutorials. Our support desk is always on hand if you ever need help using Atamis SRM.

The Atamis SRM module enables you to customise your supplier page layouts with your own custom fields. Advanced security settings allow you to control who has access to view and update sensitive data. You can also generate your own custom reports and dashboards that graphically summarise indicators critical to the management of your supply chain.

Plus, there's unlimited ability for you to record supplier innovations, issues, notes, meetings, task reminders and all supporting documentation. Any diary events, tasks or emails you generate relating to your suppliers are automatically synchronised both ways with Outlook.

Risk Management

Atamis SRM enables you to profile and segment your suppliers using custom risk criteria, such as compliance with the Modern Slavery Act, employment policies or information security.

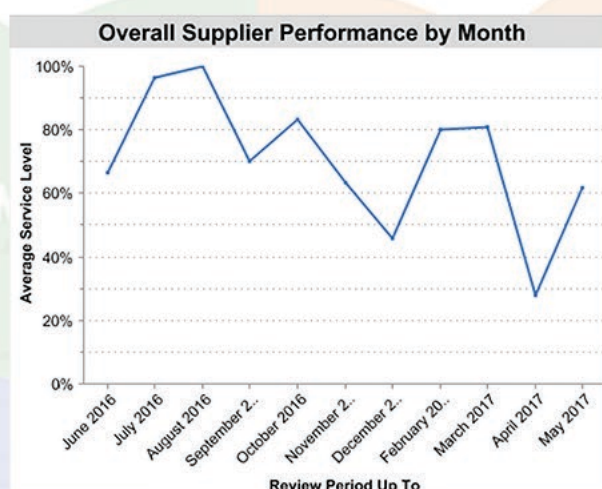

These profiles can be used to dictate approval processes and generate mandated periodic activity, enforcing procedural discipline while also saving time and effort.

Risks often lie within secondary or even tertiary suppliers, however, so Atamis SRM allows you to build up interdependencies and manage the risk across your entire supply chain.

Performance Management

Atamis SRM integrates seamlessly with Atamis CM to allow KPI schedules to be automatically scheduled for contracted suppliers according to your own standard scorecard.

KPI scoring can be delegated to team members (or to suppliers if you prefer) and exception reports and dashboards automatically highlight poor performance.

Service credits can also be applied to KPIs and linked to monthly payment transactions to calculate penalties and incentives.

Atamis SRM

Clients

Selected clients using Atamis SRM include:

Free Trial

For a 30-day free trial with your own sample contract data, or for access to our Demo system with free video training tutorials, please email info@atamis.co.uk.

Supplier Portal

The supplier portal enables you to (literally) share the same page with your suppliers.

You can provide your key suppliers with read or edit rights to selected fields, such as insurance renewal details, and enable them to upload documentation such as policies, insurance schedules or price lists.

If you're also using Atamis CM, then suppliers can view their own contract details too and even complete their own periodic service levels through the portal.

Welcome to the Supplier Portal. Please select from one of the following options:

Find Opportunities

My Proposals and Quotes

My Contracts

Complete KPIs/Service Levels

Company Details

And finally, recognising the importance of a healthy working relationship, you have access to a business networking tool to keep in regular contact with your suppliers through a familiar, social media-style interface.
