

Spectrum Offshore Ltd has two operational companies comprising Spectrum Geosurvey Ltd which provides geophysical survey solutions and Spectrum Vessel Services Ltd, a multidisciplinary vessel operator that sources, manages and operates coastal work boats.

Our clients are international companies in the renewable energy sector and other offshore construction projects

Our services are planned and delivered with a constant focus on our clients' requirements.

Our aim is to enhance their operational effectiveness and efficiency in ways which make us their preferred service provider.

Therefore, we will always strive to:

- meet the contractual needs of our clients and, where practicable, exceed their expectations;
- listen to our clients, welcome their feedback and, where opportunities arise, to take actions which will enhance client satisfaction;
- comply fully with applicable legal requirements and other requirements to which we subscribe;
- conduct all operations in a safe, efficient and environmentally responsible manner;
- provide services of consistently high quality in the most cost effective manner;
- employ only highly competent people who share our dedication to quality;
- provide education, training and other appropriate means of support to enable our employees to perform to the high standards that we expect;
- identify other stakeholders who are relevant to our business, understand their needs, views and opinions and, as far as practicable, satisfy their relevant requirements.

We implement and maintain a Business Management System which provides us with a robust framework for meeting the aim and objectives expressed in this policy. It also enables us, by means of 3rd party certification, to demonstrate that we satisfy ISO 9001:2015 and other relevant management system standards, as required by many of our clients.

We will regularly review our capabilities and respond to the changing needs of the offshore industries in order to remain at the forefront of our profession. Our energy and ingenuity are dedicated towards continually improving our resources, our services and the processes by which those services are delivered. Ultimately, this means continually improving our Business Management System and our performance as a business.

Adam Cross
Director
