Specialist Locked Rehabilitation Service for Men with Complex Mental Health Needs

Maple House provides high quality, holistic, person-centred rehabilitative care and specialised treatment for men with complex mental health needs and/or challenging behaviour. Our goal is for each of the men in our care to achieve meaningful and sustainable positive change in their lives and to gain greater independence, long-term mental wellbeing and successful reintegration into their community at their earliest opportunity.

Maple House is a psychologically informed and planned service. The service focuses on nurturing an enabling environment through an operational framework and clinical model developed specifically to meet the needs of our patient group. Our overarching therapeutic approach is focused on interpersonal relationships, consistency, structure, clear boundaries, safety, resilience and clinical direction.

We offer an effective alternative to higher levels of secure care and aim to make a positive difference in the lives of all those we support. Maple House was rated 'Good' across all domains by the CQC at its most recent January 2018 inspection.

Service Inclusion Criteria
