

**Dedicated Supported Living Services for  
adults with mental health needs and associated complex behaviours and  
adults with learning disabilities and associated complex behaviours**

**Vision**

KR Health and Social Care Group commit to providing a consistently high standard of individualised care and support across an integrated service network. Our vision is to help each person accessing our services to achieve their full potential and to keep on achieving it.

**Aim**

The aim of our Supported Living services is to continue to equip the people we support with the necessary skills and competencies to move on to greater independence and engagement in the community at their earliest opportunity.

**Objective**

We will work with every person we support to continue to help them develop new ways of thinking, feeling and behaving to the extent that they are able to more appropriately engage with and be part of their wider community. We will also work with each person accessing our services to ensure their physical health improves. Our offer will be shaped to meet the needs of each person we support.

**The Team**

The service is managed by a caring, innovative, energetic and progressive leader and we have a full staff compliment working with her. The team is engaged, experienced and enabling.

**Partnership**

In addition to working with each person we support, their commissioners, families and carers we are linked to local employment, leisure and education providers. We can also, where appropriate, offer full MDT support from our affiliate locked rehabilitation service for men in Warrington. By Autumn 2018 we will be in a position to offer this additional back up from our locked rehabilitation service for women in St Helens.

**Admission Criteria**

- **Supported living services for adults with mental health needs and associated complex behaviours** - Adult, mental health diagnosis, requires on-going support, desire and ability to engage, could be subject to CTO, will be subject to detailed pre-admission assessment to ensure we can appropriately meet identified needs.
- **Supported living services for adults with learning disabilities and associated complex behaviours** - Adult, diagnosis of learning disability, autism, cognitive impairment, requires on-going support, desire and ability to engage, could be subject to CTO, will be subject to detailed pre-admission assessment to ensure we can appropriately meet identified needs.
