

Welcome to The Childrens House

The **Childrens House's** aim is to provide a safe enabling environment where your child can thrive, becoming independent, confident learners following the Montessori Philosophy with the support of our fantastic practitioners.

Why choose us?

Our ethos is to:

- Provide a happy, safe learning environment for children to reach their full potential
- promote core values where children learn our British Values through daily routines and interactions
- Create an enabling environment full of Montessori materials where the children can learn independently and at their own pace
- Ensure all children feel they have a voice and that voice is valued
- Support your child and you at the beginning of this long journey into education and inspire their creative minds to love education.

Established in 2005 Our Montessori nursery offers quality care and education 52 weeks a year

The Montessori Method of teaching is to teach the child to be independent. It promotes self-discipline and learning at the child's own pace. The children work independently, with guidance and encouragement from their teachers.

The Montessori classroom is designed to appeal to a child's senses, touch, sight & sound. The Montessori curriculum Incorporates mathematics, literacy, cultural, sensorial & practical life, as well as developing personal skills and confidence.

When the young child is encouraged to use all of his or her senses to investigate the world, learning becomes a natural and joyful activity.

The teachers are eager to become an integral part of each child's education; they work in partnership with the parents in order to care for their child, and to provide a safe, happy & loving nursery where the child can flourish safely.

'You can feel confident that at The Children's House your child will experience a fun packed day full of learning opportunities to inspire those absorbent minds.'
