

Lodestar Recruitment

Guiding the way to a brighter future

**Software Tester; C#/.Net, QA, App testing (POS, Web, Back Office),
Automated Testing, Warwickshire, Good Salary + Benefits!**

We are looking for Software Testers who have passion and technical know how for execute programs/applications with the sole intent of finding bugs!

My client offers one of the most comprehensive and award winning technology suites on the market. Ensuring the quality of their products and services are of the highest standards is paramount. This is where you are able to bring true value and play an integral role, significantly contributing to the company's ongoing successful reputation.

As the successful Software Tester some of your responsibilities will include:

- Carrying out tests on multiple award financial services applications (Back Office, Web, POS), ensuring high quality/suitable robustness for client release.
- Producing test docs, executing functional tests and contributing to the overall quality of the System under test.
- Forming part of project teams to review/agree system/business requirements
- Scripting/reviewing test conditions and manual test scripts.
- Carrying out manual test executions and recording the test results.
- Reporting defects and following through to resolution.
- Keeping all relevant parties updated of any delays/risks to key dates and milestones.
- Developing test technician skills, progressing test automation, plus performance and security testing.

Lodestar Recruitment

Guiding the way to a brighter future

Key deliverables for the successful Software Tester include:

Test plans, Test conditions and test scripts, Test execution results, Defect reports, Release notes, Test exit reports, Updates to the daily QA log, Recording issues affecting test progress and Test estimates.

As the successful Software Tester, your profile will look similar to:

- Proven experience in Quality Assurance Testing environment.
- Excellent technical knowledge with strong attention to detail.
- Ideally have some experience writing SQL statements and analysing XML messages.
- Experience with Microsoft Office (Word/Excel) is a must.
- Good rapport building skills, able to work with employees and clients at all levels.
- Have the ability to use their own initiative and be driven by results.
- Possess the ability to work under pressure and tight timescales.
- Relevant testing accreditation/qualifications are highly desirable (ISEB/ISTQB foundation course in Software Testing or above).
- General experience in financial services is highly desirable, but not essential.

This is a great opportunity to join a global, award winning and market leading FinTech company who are able to offer competitive salaries, excellent benefits and career progression routes.
