

NEW TASAR DINGHY ORDERS

September 2026

Background:-

Tasar dinghies are all built to order from a common mould at Xtreme Sailing in Batam. To spread the cost of transport to the UK we need to order boats in batches of four so that we only ship full containers. It is important therefore that customers order boats on a common timetable. If there is sufficient demand this year's timetable would be as follows...

- September 30th 2026 Provisional orders with Signal Locker
- October 12th 2026 Factory Order placed by Signal Locker
- January 15th 2027 Boats dispatched Batam
- March 1st - 12th 2027 Boats arrive UK
- March 15th - April 9th Delivery to UK Tasar sailors

Two Tasar Specifications:-

Signal Locker offers two standard levels of specification for new Tasar Dinghies...

- 'Measurement Boat' - the hull and deck with all the fittings that are permanently attached to the boat (jib and main tracks, forestay fitting, toestraps etc). All these standard fittings will be fitted in the factory.
- 'Race-Ready Boat' - fully fitted out with mast, spars, sails and ready to sail.

Price and Stage Payments:-

The price and stage payments are as follows:-

Stage Payments	Measurement Boat	Race-Ready Boat
Stage 1 - With order	£1,849	£2,955
Stage 2 - On factory dispatch	£3,698	£5,910
Stage 3 - On delivery	£3,698	£5,910
Total Price (Inc.VAT)	£9,245	£14,775

Order Process:-

The order process is as follows...

Step 1 - Either call or e-mail to advise us that you would like to order a new Tasar, and to indicate whether this would be a complete 'Ready-to-Race' boat or a 'Measurement Boat'. We will not require a deposit payment until we have 3 potential new boat owners.

Step 2 - When we know we can fill a container we will send you an order confirmation and an invoice for the first stage payment.

Step 3 - If you are ordering a 'Measurement Boat', you can skip stage 3..... However, if you are ordering a 'Race-Ready' boat we'd like to review the fit-out specification with you. We'll send you the specification in the form of a check-list, giving you the opportunity to make alterations and additions.

For example you may have a preference for different cleats, lines and blocks to the standard specification. The process of finalising the fit-out specification of your boat will take some time, so we propose to work together with you to customise the equipment list while your hull is being built; aiming to have an agreed customised specification by the time the boat is dispatched from the XSP factory..

If changes are made that increase or decrease the fit-out cost of your boat, the final stage payment will be updated accordingly.

Step 4 - When the boats arrive in the UK we will inspect your boat and contact you to arrange collection or delivery. 'Measurement Boats' will be available immediately following inspection. 'Race-Ready Boats' are partially fitted-out in the UK and will therefore be available approximately 2 weeks after their arrival in the UK

If you are thinking about buying a new Tasar and would like to discuss any aspect of the ordering arrangements, please give me a call on:- (+44) 07970 132110.

Kind regards
