

Accessories improve cleat performance

● These accessories expand the capability of a conventional Clamcleat® rope cleat while retaining the advantage of not having any moving parts to jam or seize up.

● The most innovative accessory is the Keeper (patented). This has been designed to overcome the problem of lines being cleated accidentally as well as improving the performance of cleats by holding lightly-loaded lines in the jaws of a cleat.

Two full ranges

Will Loy's Testimonial

"I am well chuffed with their performance so far though I should not be surprised. Took the boat out two sundays ago in very strong winds and the cleats held true. Racing was cancelled but last weekend I recorded a couple of bullets in the competitive solo fleet at Littleton S.C. Getting a fair amount of interest. People seem surprised when I mention they are Clamcleat®, rope cleats they like the positive feel that the Keeper gives"
