TMIC CONVEYOR RANGE

'Designed by our team for customers around the world to have an easy adjustable conveyor that limits time on maintenance and cleaning making it cost effective for your business'

John Steward

ABOUT

We at TMIC are very proud of our new modular conveyor as it is officially in production and currently being install into a leading potato company.

We have customised our conveyor to an interlock system to allow customers for easy maintenance and cleaning.

The push adjuster makes it quick and simple to tension and change the tracking on the belts along with them made out of stainless steel to last longer.

SERVICE

We can design, supply and install any bespoke conveyors to suit your requirements.

We work closely to our customers to plan the conveyor they need until they're happy and we can put into production. after production we can then deliver and install the product. We guarantee that all our machines come with a full 12 months warranty.

We also supply a parts / operation manual with every machine to assist you with the day to day running and ordering of replacement parts.

PRODUCT

Standard drive and tail sections throughout the range.

Easy removable sides allowing roller change above as well as below.

Identical carry and return rollers minimising the range of spares needed.

Complete range of options to cover any bespoke requirements.

7 DAYS

We have devised a conveyor that can be made in 7 days as it has been designed so the components can be laser cut making production fast and ready for delivery. We then offer a delivery service and installation team to install the conveyors.
