The Machine Install Company

PUMPKIN WASHER

WHAT WE'RE ABOUT

The Machine Install Company Ltd (TMIC) is a new company with a difference.

It may be a new name, but our engineers faces are very familiar within the fresh produce industry in the UK, Mainland Europe and even as far reaching as the US and Canada.

For the past 25 years, machinery Installations and on-site projects have been our speciality. Ranging from single machines to multi-million pound new production facilities, we are the number one choice for many customers to undertake their new line projects and installations, often in difficult environments and within challenging timelines.

Although primarily set up as an on-site services company, due to ever increasing requests for building new machines for the fresh produce industry, coupled with the wealth of experience gathered through the years of being in so many factories, we realised at TMIC that we could manufacture a range of well-designed and robust machinery that is not only popular with the engineers tasked to look after them, but also cost efficient to own and run.

We now offer a complete range of efficiently designed modular conveyors and elevators and since 2018 TMIC is proud to announce that we are the official partner and supplier of Herbert Solutions machinery for the UK and Ireland.

MACHINERY SUPPLY

Moving to our new unit in Wisbech has allowed us to increase the range of machinery we can offer our clients.

MACHINERY INSTALLATION

From one machine to entire factories TMIC can take care of new installations or relocations.

WELDING SERVICES

All types of welding and fabrication undertaken

SHUT DOWN WORK

Our highly skilled engineers are able to carry out servicing on a wide range of machinery within food factories planned around your production requirements.
