

# BLOOD TEST INTERPRETATIONS FOR PHARMACY TEAMS IN PRIMARY CARE & ADVANCED LIPID MANAGEMENT (INCLUDING INJECTABLES)

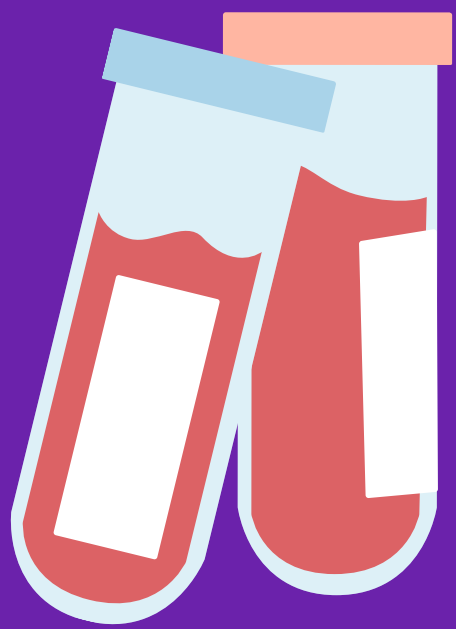

STUDY DAY

25TH JUNE

09:00 - 16:30

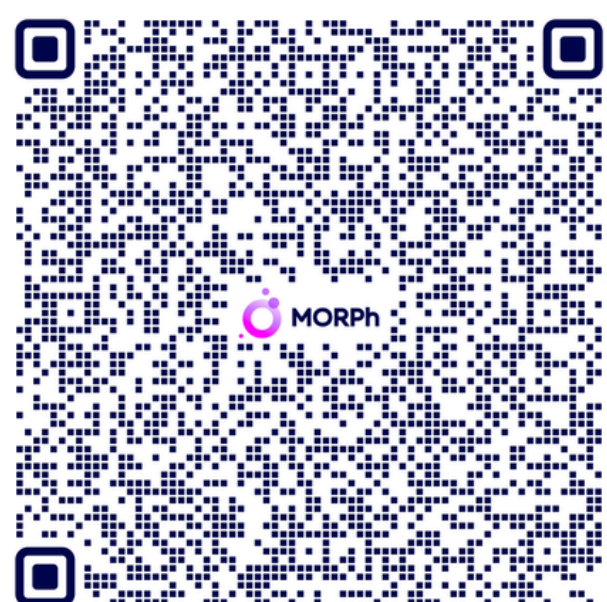

GUILDFORD

VENUE TBC

## What's on the Agenda?

- Interpret common blood tests in primary care and recognise clinically significant abnormalities.
- Apply blood test results to prescribing, medicines optimisation, and patient-centred clinical decision-making.
- Manage lipid treatment conversations confidently, including cardiovascular risk, statin intolerance, and inclisiran use.
- Implement safe follow-up, documentation, and practical clinic processes for lipid management and inclisiran.
